Functional Assessment for Adults with Disabilities - National Academies of Sciences, Engineering, and Medicine 2019-07-31

The U.S. Social Security Administration (SSA) provides disability benefits through the Social Security Disability Insurance (SSDI) and Supplemental Security Income (SSI) programs. To receive SSDI or SSI disability benefits, an individual must meet the statutory definition of disability, which is "the inability to engage in any substantial gainful activity [SGA] by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months." SSA uses a five-step sequential process to determine whether an adult applicant meets this definition. *Functional Assessment for Adults with Disabilities* examines ways to collect information about an individual's physical and mental (cognitive and noncognitive) functional abilities relevant to work requirements. This report discusses the types of information that support findings of limitations in functional abilities relevant to work requirements, and provides findings and conclusions regarding the collection of information and assessment of functional abilities relevant to work requirements.

Assessments in Occupational Therapy Mental Health - Barbara J. Hemphill-Pearson 2008

Assessments in Occupational Therapy Mental Health, Second Edition

proposes an exciting integrated approach to assessing multiple systems. the chapters in this text also present a thorough process for approaching client evaluation. In addition, the reasoning process is explored in a way that is helpful to occupational therapy students and practitioners at all levels.

Psychiatric Disorders Late in Life - Rajesh R. Tampi 2018-03-28

Though mental health recommendations for the elderly is rapidly evolving, the few current textbooks on this subject are either too voluminous or complex for regular review by clinicians, and most do not contain the latest information available in the field. Written by experts in geriatric psychiatry, this book provides a comprehensive yet concise review of the subject. The text covers topics that include the social aspect of aging, treatment and diagnosis options unique to the elderly in need of psychiatric care, policy and ethics, and particular geriatric health concerns that may influence psychiatric considerations. *Psychiatric Disorders Late in Life* is the ultimate resource for practicing psychiatrists, physicians, geriatricians, and medical students concerned with the mental healthcare of the elderly.

[Occupational Therapy Assessment Tools](#) - Ina Elfant Asher 2007-01

Nearly 400 instruments are reviewed in this third edition of *Occupational Therapy Assessment Tools*, including many developed by occupational therapists. An international team of academicians, clinicians,

researchers, and advanced-degree candidates working in various practice arenas collaborated on this update. The assessment profiles-- which include title, authors, format, purpose, population, time required to administer, setting or position, materials or tools, brief description, interpretation, reliability and validity, source, additional references, cost, and ample-- will be useful to clinicians and students, who must choose appropriate tools for clinical practice; to educators, who select assessment procedures for the classroom; and to researchers, who will find instruments that are designed for research purposes or will benefit from further investigation. Another major change in this new edition is the incorporation of the language, terminology, and organization of the Occupational Therapy Practice Framework. Other improvements include a matrix of all assessments, showing content areas and age ranges of each instrument. Most exciting is the accompanying searchable CD-ROM, which offers readers quick, easy access to the entire text. -- Publisher's website

Occupational Therapy Treatment Goals for the Physically and Cognitively Disabled - Claudia Kay Allen 1992

Helps therapists predict the rehabilitation potential for clients with physical and cognitive disabilities. Expands the 6 cognitive levels to 52 modes of performance, with specific and practical treatment goals for each. Case studies illustrate the application of knowledge in various age groups, diagnostic categories, socioeconomic conditions, and cultures.

The Merck Manual of Geriatrics - William B. Abrams 1995

Discusses physiologic changes of normal aging and the clinical aspects of caring for the elderly patient. Also covers cardiovascular, pulmonary, gastrointestinal, genitourinary and gynecologic, hematologic, musculoskeletal, metabolic and endocrine, neurologic, psychiatric, skin, eye, and ear, nose and throat disorders as well as infectious diseases, in the elderly.

BNVR: The Butt Non-Verbal Reasoning Test - Pamela Butt 2017-07-05

The BNVR Test is a unique non-linguistic approach for identifying whether a cognitive (problem-solving) deficit as well as a linguistic deficit exists in individuals with acquired aphasia. Recognising cognitive

deficits in terms of problem-solving may be a key factor in understanding why some individuals overcome their communication difficulties better than others. Failure to recognise problem-solving difficulties may lead to unrealistic expectations of therapeutic intervention and thus inappropriate management and goal setting. The BNVR requires the client to solve 10 everyday problems, presented in full-colour photographic format. It is short, requires minimal linguistic input, contains real-life situations and is likely to be suitable for non-English speaking individuals. It will be useful to speech language therapists, occupational therapists and psychologists who need to ascertain whether problem-solving skills are affected and to assist in multi-disciplinary team decision-making in acute and rehabilitation settings.

Handbook of Geriatric Assessment - Joseph J. Gallo 2003

Informing Social Security's Process for Financial Capability

Determination - National Academies of Sciences, Engineering, and Medicine 2016-05-20

The U.S. Social Security Administration (SSA) provides benefits to disabled adults and children, offering vital financial support to more than 19 million disabled Americans. Of that group, approximately 5.5 million have been deemed "incapable of managing or directing the management of their benefits. Hence, a representative payee has been appointed to receive and disburse SSA payments for these beneficiaries to ensure that their basic needs for shelter, food, and clothing are met. Periodically, however, concerns have been expressed about the accuracy of the process by which SSA determines whether beneficiaries are capable of

managing their benefits, with some evidence suggesting that underdetection of incapable recipients may be a particular problem. The importance of creating as accurate a process as possible for incapability determinations is underscored by the consequences of incorrectly identifying recipients either as incapable when they can manage their benefits or as capable when they cannot. Failure to identify beneficiaries who are incapable of managing their funds means abandoning a vulnerable population to potential homelessness, hunger, and disease.

Informing Social Security's Process for Financial Capability Determination considers capability determination processes used by other similar benefit programs, abilities required to manage, and direct the management of, benefits, and effective methods and measures for assessing capability. This report evaluates SSA's capability determination process for adult beneficiaries and provides recommendations for improving the accuracy and efficiency of the agency's policy and procedures for making these determinations.

Geriatric Psychiatry Study Guide - Ana Hategan 2018-05-26

Trainees in subspecialty of geriatric psychiatry and general psychiatry need to master core competencies in geriatric psychiatry in order to practice. This book is designed to provide short-answer question-based learning centering around the core curriculum topics in geriatric psychiatry and is primarily ideal not only for medical students, residents, and fellows, but also for psychiatrists preparing for re-certification. This book features approximately 300 short-answer questions on geriatric psychiatry topics, each comprising the stem of a brief clinical scenario or concise question with expected number of answers. The book also features detailed teaching notes, graphics, and the respective source references. The format is consistently structured from chapter to chapter, practical and concise, and designed to enhance the reader's diagnostic and management ability and clinical understanding. Each answer includes a concise discussion, pertinent illustrations, and source references. This text is a valuable reference and teaching tool that provides an opportunity for learning across a rapidly growing field. The material covered matches the existing postgraduate curricula in geriatric

psychiatry and helps prepare candidates for their specialty and subspecialty certification examinations. The cases map well to both the American Geriatric Psychiatry Association and Canadian Academy of Geriatric Psychiatry as well as other international postgraduate curricula. The book covers main topics within geriatric psychiatry, some such as substance use disorders and sexuality and sexual dysfunction in later life. As the Baby Boomers age, this reference will continue to be a valuable staple in geriatric workforce training. *Geriatric Psychiatry Study Guide* is the ultimate resource for students, residents, fellows, psychiatrists, psychologists, family practitioners, nurses, social workers, and all clinicians rising to the challenges of the mental health segment of the geriatric workforce.

ACS - Carolyn Manville Baum 2008-01-01

Activity Card Sort, 2nd Edition (ACS) is a flexible and useful measure of occupation that enables occupational therapy practitioners to help clients describe their instrumental, leisure, and social activities. The format's 89 photographs of individuals performing activities and 3 versions of the instrument (Institutional, Recovering, and Community Living) is easily understood and administered. Using the ACS will give clinicians the occupational history and information they need to help clients build routines of meaningful and healthy activities. Includes 20 instrumental activities, 35 low-physical-demand leisure activities, 17 high-physical-demand leisure activities, and 17 social activities and allows for the calculation of the percentage of activity retained.

A Model of Human Occupation - 2002

Presenting the new edition of the text that delivers the most widely-used and developed conceptual model in occupational therapy. Beautifully redesigned and fully revised, the Third Edition of *A Model of Human Occupation (MOHO)* delivers the latest in human occupation research and application to practice. New to this edition: a reader-friendly format with second color and additional illustrations and anecdotes; more case examples for integrating the model into practice; a discussion of the therapy process and how change occurs; language linked to UT and ICDH-2 terminology; a research chapter; and numerous research

references highlighting the growing body of evidence supporting MOHO.

Life Care Planning and Case Management Handbook - Spilios

Argyropolous 2004-05-10

The Complexity of Autism Spectrum Disorders - Michael Wolff

2018-09-03

Since its first identification, Autism Spectrum Disorder (ASD) has presented myriad challenges of diagnosis and classification. Our understanding has evolved from a cluster of diagnostic categories (Asperger's, Autism, and Pervasive Development Disorder) to the current continuum of Autism Spectrum Disorder. Meanwhile, we have progressed from debating the validity of the diagnosis, to considering it a modern epidemic. This evolution has drawn attention across a variety of fields, including the neurosciences, education, forensics, and behavioral health. While new research accumulates, there remains a lack of conceptual and practical clarity about what ASD is, how specific diagnoses might be delineated, and what we can do to understand and manage the complexity of individuals on the Spectrum. In understanding ASD, one size does not fit all—families, schools, and clinicians all need a multi-faceted engagement with the specifics they encounter. This text opens a critical dialogue through which students, researchers, and clinicians can challenge their ideas about what it means to work with the unique presentations of individuals on the Spectrum. It provides education, clinical expertise, and personalization to the lives influenced by the ever-changing dynamics of Autism Spectrum Disorder.

The Milwaukee Evaluation of Daily Living Skills - Carol A.

Leonardelli 1988

The Kohlman Evaluation of Living Skills - Linda Kohlman Thomson 1992

On-Call Geriatric Psychiatry - Ana Hategan 2016-04-13

This text covers basic principles and practice of on-call psychiatric care in the geriatric patient in various medical settings. It compiles the most likely complaints and provides assessment and management tools for each situation. Written and edited by expert geriatric psychiatrists, emergency psychiatrists, consultation/liaison psychiatrists, geriatricians, and other multidisciplinary specialists, this is the first handbook devoted to on-call geriatric psychiatry. Chapters contain an important summary of key points for managing clinical situations, case studies, and reflective

questions. This text brings together relevant principles of on-call geriatric psychiatry provided in clinical settings such as emergency, acute and subacute inpatient, outpatient, residential, correctional, and consultation/liaison. It includes clinical topics such as psychopharmacology, psychotherapy, substance abuse, and includes coverage of medical ethics and the law, utilization of contemporary technology, and administrative and public health policy. On-Call Geriatric Psychiatry is the first practical guide to knit together evidence-based medicine and geriatric psychiatric principles and practice guidelines and is a valuable resource for trainees, psychiatrists, geriatricians, emergency departments, nursing home physicians, and other health professionals working with older adult patients.

Contextual Memory Test - Joan P. Toglia 1993-01-01

Occupational Therapy in Acute Care - Helene Smith-Gabai 2011

Occupational therapy is an allied health profession with an underlying belief that engaging in occupations promotes both health and wellness. This comprehensive text lays the foundation for occupation-based practice and addresses the contextual issues of working within the acute care setting. The chapters help to demystify medical conditions and issues routinely encountered by occupational therapists working in this practice area. Detailed research covers the importance of occupational therapists' knowledge of how diseases affect the human body, including the cardiovascular, nervous, and endocrine systems. Chapters review the evaluation process, including chart review, measures, and interpretations and recommendations for intervention to ensure the ultimate level of independence for each patient. Occupational Therapy in Acute Care is designed specifically for therapists working in a hospital setting to acquire better knowledge of the various body systems, common conditions, diseases, and procedures. Students and educators will find this new publication to be the most useful text available on the topic. The book features color illustrations of the human body's systems and functions, as well as tables delineating the signs and symptoms for various diseases. HIGHLIGHTS include: * Evaluation of the Acute Care

Patient * The Intensive Care Unit (ICU) * The Cardiac System * The Vascular System * The Pulmonary System * The Nervous System * Orthopedics and Musculoskeletal Disorders * The Endocrine System * The Gastrointestinal System * The Genitourinary System * Oncology * Infectious Diseases and Autoimmune Disorders * Dysphagia * Transplantation * Burns * Appendices -- Common diagnostic tests, medications, deconditioning and immobility, energy conservation, patients with altered mental status, low vision, bariatrics, vertigo, safe patient handling, pain management, evidence-based practice, ethics, discharge planning, blood disorder

Mental Health Outcome Measures - Graham Thornicroft 2012-12-06

Mental Health Outcome Measures provides an authoritative review of measurement scales currently available to assess the outcomes of mental health service intervention. The excerpt of summaries by leading writers in the field assess the contributions of scale in areas including mental state examination, quality of life, patient satisfaction, needs assessments, measurement of service cost, global functioning scales, and social disability. These chapters provide a critical appraisal of how far such scales have been shown to be reliable and valid, and provide valuable insights in to their ease of use. This book will provide an invaluable reference manual for those who want to take research on mental health services, and for those who need to interpret this research for policy, planning, and clinical practice.

Elder Abuse - XinQi Dong 2017-02-22

This book provides a global comprehensive and systematic state-of-the review of this field that fills the gaps between research, practice, and policy. The book addresses the epidemiology of the issue and the global prevalence of elder abuse in both developed and developing countries, which synthesizes the most up-to-date data about risk factors and protective factors associated with elder abuse and consequences of elder abuse; clinical assessment and management of elder abuse, including screening, detection, management of elder abuse, and the role of decision making capacity and forensic approaches; practice and services that describe adult protective services, legal justice, elder court systems,

and guardianship system; elder abuse and culture, which provides more in-depth anthropological and ethnographic experiences; policy issues, which highlights the elder justice movement, GAO reports, elder justice act, older American act and elder justice coordinating council; and future directions, which explores translational research, practice, education/training and policy issues surrounding elder abuse. *Elder Abuse: Research, Practice and Policy* is a useful resource for aging researchers, social services, general internists, family medicine physicians, social workers, nurses, and legal professionals interested in the issues of elder abuse.

Encyclopedia of Clinical Neuropsychology - Jeffrey Kreutzer

Preparing for the Occupational Therapy National Board Exam - Joseph Michael Pellerito 2010-10-22

A comprehensive overview for occupational therapy students preparing to take the National Board for Certification in Occupational Therapy (NBCOT?) exam. Containing more than just study questions, this comprehensive review guide is organized by domain areas and each subject is addressed according to the degree it is covered on the NBCOT examination. Corresponding workbook pages include specific references to occupational therapy curricula, enabling additional exploration of content that is challenging or unfamiliar. The companion CD-ROM simulates online testing with multiple choice practice questions, each providing evidence-based rationale for why a particular answer is correct or incorrect. The CD-ROM includes over 100 test questions, case studies, and work sheets

Activity Analysis - Gayle Ilene Hersch 2005

To respond to the renewed focus by the occupational therapy profession upon occupation, the fifth edition of *Activity Analysis and Application* has been updated and renamed to reflect this latest emphasis. While *Activity*

Analysis: Application to Occupation, Fifth Edition maintains the sequential process of learning activity analysis, this step-by-step approach now helps students analyze activity for the purpose of optimizing the client's occupational performance. Gayle Hersch, Nancy Lamport, and Margaret Coffey successfully guide students through the development of clinical reasoning skills critical to planning a client's return to meaningful engagement in valued occupations. The authors utilize a straightforward teaching approach that allows students to progress developmentally in understanding both the analysis and application of activity to client intervention. The *Occupational Therapy Practice Framework: Domain and Process*, with a prominent focus on occupation as this profession's philosophical basis for practice, has been incorporated in the updated forms and explanations of the activity analysis approach. *Activity Analysis: Application to Occupation, Fifth Edition* is a worthy contribution to the professional education of occupational therapists in furthering their understanding and application of activity and occupation. Features: The newly titled Client-Activity Intervention Plan that synthesizes the activity analysis into client application. Objectives at the beginning of each unit. Discussion questions and examples of daily life occupations. A Web site including 5 forms where students and practitioners can download and print information for class assignments and clinical settings.

Ethical Considerations and Challenges in Geriatrics - Angela Georgia Catic 2017-01-31

This book is designed to present an overview of common geriatrics ethical issues that arise during patient care and research activities. Each chapter includes a case example and practical learning pearls that are useful in day-to-day patient care. Coverage includes a brief overview of geriatric epidemiology, highlighting the high rates of dementia, use of surrogate decisions makers at the end-of-life, relocation from home to long-term care facilities, and low health literacy in the geriatrics population. Sections are devoted to issues around capacity, surrogate decision making, end-of-life care, hemodialysis in the elderly, and futility as well as challenges presented by independence questions, such as dementia care, driving, feeding, and intimacy in nursing homes. The text also addresses questions around recognizing, reporting, and treating elder abuse and self-neglect, ethics related to research and technology in the geriatric population, and the use of e-mail, Facebook, and open notes. Written by experts in the field, Ethical Considerations and Challenges in Geriatrics is a valuable tool for trainees at a variety of levels including medical students, residents, and fellows. In addition, it provides practical guidance and a useful reference for practicing geriatricians, primary care physicians, geriatric nurses, social workers, nursing home workers, hospice care employees, and all medical health professionals working with the elderly.

Psychosocial Conceptual Practice Models in Occupational Therapy - Moses N. Ikiugu 2007-01-01

This book examines the occupational therapy paradigm (its focal viewpoint, core constructs, and values) as well as the role of

complexity/chaos theory as a scientific framework for occupational therapy research and practice. Unlike other current OT texts, this book uses clinical case examples to illustrate application of proposed changes to make procedures consistent with the latest Occupational Therapy Practice Framework. The reader walks away with a clear grasp of the theoretical principles guiding his or her treatment interventions, the explanations behind those principles, and the applicable intervention for said techniques and procedures. An emphasis on clinical-reasoning skills, including information on different types of reasoning skills as well as the MAPP model of teaching helps the student and clinician translate theoretical principles into practice. The section on specific interventions addresses each of the conceptual practice models according to a consistent chapter template, which enables the reader to apply conceptual practice models in real-world contexts. Preview questions at the beginning of each chapter alert the reader to important concepts in the upcoming text. Critical analysis of the theoretical core provides suggested modifications to increase consistency with the new occupational therapy paradigm.

Occupational Therapy for Physical Dysfunction - Mary Vining Radomski 2008

The definitive work on occupational therapy for physical dysfunction returns in its Sixth Edition, with reputable co-editors and clinical, academic, and consumer contributors. This text provides a current and well-rounded view of the field- from theoretical rationale to evaluation, treatment, and follow-up. Through the Occupational Functioning Model (OFM), the Sixth Edition continues to emphasize the conceptual foundation and scientific basis for practice, including evidence to support the selection of appropriate assessments and interventions. NEW TO THIS EDITION: Student DVD with video clips demonstrating range of motion, manual muscle testing, construction of hand splints, and transferring patients Evidence Tables summarize the evidence behind key topics and cover Intervention, Participants, Dosage, Type of Best Evidence, Level of Evidence, Benefit, Statistical Probability, and Reference Assessment Tables summarize key assessment tools and cover

Occupational Therapy Essentials for Clinical Competence - Karen Sladyk 2010

This text begins by linking the ACOTE Accreditation Standards with current practice in chapters for students and educators, and sets the stage with two foundational concepts vital to the study of occupation: flow and culture. It presents a summary of interconnected constructs that define and direct occupational therapy practice. Inside are included: Basic tenets of occupational therapy; Occupational therapy theoretical perspectives; Screening, evaluation, and referral; Formulation and implementation of an intervention plan; Context of service delivery;

Context of delivery service; Management of occupational therapy services; Professional ethics, values, and responsibilities; Culture and its role in occupational choice and performance. It also includes student activities at the end of each chapter, as well as on-line material that consists of multiple choice questions, chapter objectives, teacher activities, and PowerPoint slides. Some additional features Include: Examples as viewed and analyzed from multiple perspectives; Evidence-based practice reviews that provide a starting point to have each topic explored in depth; Evaluation of the mastery of application and self-assessment exercises; Integration throughout the text of Occupational Therapy Practice Framework: Domain and Process, Second Edition. The text overall incorporates adult learning theory as its basis to assist in establishing cognitive interest, using the organization format of grouping concepts together to reinforce and facilitate learning.

Occupational Therapy Practice Framework - American Occupational Therapy Association 2008-01-01

The Framework, an official AOTA document, presents a summary of interrelated constructs that define and guide occupational therapy practice. The Framework was developed to articulate occupational therapy's contribution to promoting the health and participation of people, organizations, and populations through engagement in occupation. The revisions included in this second edition are intended to refine the document and include language and concepts relevant to current and emerging occupational therapy practice. Implicit within this summary are the profession's core beliefs in the positive relationship between occupation and health and its view of people as occupational beings. Numerous resource materials include a glossary, references and a bibliography, as well as a table of changes between the editions.

The Test of Grocery Shopping Skills - Catana Brown 2009

Occupational therapy practitioners and other clinicians understand the importance of accurately evaluating a client's ability to accomplish necessary everyday tasks, especially those in the community setting. The Test of Grocery Shopping Skills is a new performance-based assessment that measures how accurately and efficiently clients can locate items in a

grocery store. Developed primarily to assess individuals with serious mental illness, this assessment also is ideal for use with other populations in which cognitive impairments could interfere with community living skills, such as persons with brain injury, stroke, dementia, or developmental disabilities. The manual clearly discusses how to administer the test and to score and interpret results. Two different but statistically comparable pre- and post-test forms allow practitioners to measure changes in clients' abilities. This user-friendly assessment also includes instructions for the test administrator and test

taker, score sheets, grocery lists, and a sample store map and answer sheet—all of which are available on the enclosed CD-ROM for easy use with clients and also in the classroom.

Neurorehabilitation in Parkinson's Disease - Marilyn Trail 2008
'Neurorehabilitation in Parkinson's Disease' serves as a reference for the treatment of patients with Parkinson's disease. In addition to providing treatment models for physical therapy, occupational therapy, & speech-language pathology, the text covers topics such as review of pathophysiology, & symptomatology.
