Israel - Noa Tishby 2021-04-06

A “fascinating and very moving” (Aaron Sorkin, award-winning screenwriter of *The West Wing* and *The Social Network*) chronological timeline spanning from Biblical times to today that explores one of the most interesting countries in the world—Israel. Israel. The small strip of arid

land is 5,700 miles away but remains a hot-button issue and a thorny topic of debate. But while everyone seems to have a strong opinion about Israel, how many people actually know the facts? Here to fill in the information gap is Israeli American Noa Tishby. But “this is not your Bubbie’s history book” (Bill Maher, host of *Real Time with Bill Maher*). Instead, offering a fresh, 360-degree view, Tishby brings her “passion, humor, and deep intimacy” (Yossi Klein Halevi, *New York Times* bestselling author of *Letters to My Palestinian Neighbor*) to the subject, creating an accessible and dynamic portrait of a tiny country of outsized relevance. Through bite-sized chunks of history and deeply personal stories, Tishby chronicles her homeland’s evolution, beginning in Biblical times and moving forward to cover everything from WWI to Israel’s creation to the disputes dividing the country today. Tackling popular misconceptions with an abundance of facts, Tishby provides critical context around headline-

generating controversies and offers a clear, intimate account of the richly cultured country of Israel.

Apocalyptic Planet - Craig Childs 2012-10-02

The earth has died many times, and it always comes back looking different. In an exhilarating, surprising exploration of our planet, Craig Childs takes readers on a firsthand journey through apocalypse, touching the truth behind the speculation. Apocalyptic Planet is a combination of science and adventure that reveals the ways in which our world is constantly moving toward its end and how we can change our place within the cycles and episodes that rule it. In this riveting narrative, Childs makes clear that ours is not a stable planet, that it is prone to sudden, violent natural disasters and extremes of climate. Alternate futures, many not

so pretty, are constantly waiting in the wings. Childs refutes the idea of an apocalyptic end to the earth and finds clues to its more inevitable end in some of the most physically challenging places on the globe. He travels from the deserts of Chile, the driest in the world, to the genetic wasteland of central Iowa to the site of the drowned land bridge of the Bering Sea, uncovering the micro-cataclysms that predict the macro: forthcoming ice ages, super-volcanoes, and the conclusion of planetary life cycles. Childs delivers a sensual feast in his descriptions of the natural world and a bounty of unequivocal science that provides us with an unprecedented understanding of our future.

Later that day, Phileas goes to the Reform Club as usual, where he gets into an argument with his whist partners who debate whether one can travel all around the world in eighty days. Destination Earth - Nicos Hadjicostis
2016-06-08

Travel is the departure from one's little pond. It

is the bold renouncement of the petty comforts that hold us prisoner. It is a movement away from the known towards the unknown and unimaginable. Travel is expansion, widening, opening-up. After years as a media executive, Nicos Hadjicostis abandoned the business world and set his sights on a larger and more fulfilling goal: to explore our planet as if it were one huge country, a single destination. Starting from New York and traveling west for six-and-a-half-years, the author visited six continents and seventy countries delving deep into their peoples, cultures and natural wonders. Destination Earth is the result of this life-transforming journey. While many travelers today concern themselves with destinations solely for amusement, relaxation, and entertainment, the author proposes a more meaningful, rewarding, and fulfilling way of viewing Travel and its relation to Life. Enriched with travel incidents and some of the authors best travel photos, Destination Earth sheds light on both Travel and Life. Ideas and

experiences are interwoven into a newly created Philosophy of Travel that is practical and easy to read. *January 2019 Now in a new edition!*

The series' books include The 12th Planet, The Stairway to Heaven, The Wars of Gods and Men, The Lost Realms, When Time Began, The Cosmic Code, and The End of Days, all products of the author's unmatched study of the ancient records of Sumer, Babylonia, Assyria, Israel, and Egypt and the civilizations of pre-Columbian America. Unearthing the hidden history of Earth and mankind, the series uses the past to unveil the meaning of the prophesied future. Zecharia Sitchin has created an encyclopedic compendium of the key figures, sites, concepts, and beliefs to provide a unique navigational tool through this entire opus. Entries are coded to indicate at a glance their cultural origin and contain summations, commentaries, and guidance for locating the topics within all of his books, including Genesis

Revisited, Divine Encounters, The Lost Book of Enki, The Earth Chronicles Expeditions, and Journeys to the Mythical Past.

Sun Moon Earth - Tyler Nordgren 2016-09-13
With beautiful illustrations and a detailed map, Sun Moon Earth has everything you need to get ready for the next solar eclipse. On April 8, 2024, millions of Americans will experience an awe-inspiring phenomenon: a total eclipse of the sun. In Sun Moon Earth, astronomer Tyler Nordgren illustrates how this most seemingly unnatural of natural phenomena was transformed from a fearsome omen to a tourist attraction. From the astrologers of ancient China

and Babylon to the high priests of the Maya, Sun Moon Earth takes us around the world to show how different cultures interpreted these dramatic events. Greek philosophers discovered eclipses' cause and used them to measure their world and the cosmos beyond. Victorian-era scientists mounted eclipse expeditions during the age of globe-spanning empires. And modern-day physicists continue to use eclipses to confirm Einstein's theory of relativity.

Beautifully illustrated and lyrically written, Sun Moon Earth is the ideal guide for all eclipse watchers and star gazers alike.

The Daily Show (The Book) - Chris Smith
2016-11-22

NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning The Daily Show with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, The Daily Show with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers - including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of The Daily

Show's most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics—a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, The Daily Show has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's

most groundbreaking shows.

CEO of Earth - Simon Hammond 2012-01-25

How, given the chance, would you market planet

Earth as the ultimate tourist destination? Fysh Reynolds, 25-year-old MBA grad and internet superstar, must answer this question when his part-time job playing Ronald McDonald at kids' birthday parties thrusts him into an unexpected position of power. When aliens land on Earth, they mistake the golden arches to be our most prolific centre of authority and assume Fysh — dressed as Ronald — to be leader of the free world. The aliens' mission: to establish Earth as a premium travel destination for intergalactic tourists. Fysh, a gen Y marketing prodigy, is charged with creating the most powerful brand in the universe: Brand Earth. This fun, quirky and irreverent business fable unravels the mystery of why some brands have the power to inspire deep and primal emotions in consumers that make products legendary and their developers filthy rich. CEO of Earth is a blueprint for marketers who want to engage the philosophies that have propelled the world's most celebrated brands to greatness.
