The Outdoor Life of Children - Charlotte Mason 2015-03-14

Book Number Two in the Charlotte Mason Topics series, The Outdoor Life of Children is a compilation of Charlotte Mason's writings on the topics of Nature Study, teaching natural philosophy, and the importance of children being out-of-doors. Now all of Charlotte Mason's writings on Nature Study and the outdoors (from the original six-volume set) are located in this one, easy-to-use volume. The teachings and philosophies of Charlotte Mason, a British educator from the last century, are currently experiencing a revival, especially among American private and home schools. Mason's educational ideas were originally used by governesses in England to educate the children in their charge.

Eventually, schools based on her philosophies sprung up throughout England, and her original training school became a college to supply teachers for the Parents' Union Schools throughout the world. Mason developed a lifetime love of learning in her students by actively engaging children firsthand with nature, literature, science, history, art, music, and avoiding dumbed-down materials - what she referred to as twaddle - as much as possible. The content of The Outdoor Life of Children was compiled and adapted by Deborah Taylor-Hough, long time homeschooling mother of three, author of A Twaddle-Free Education: An Introduction to Charlotte Mason's Timeless Educational Ideas, and editor of the Charlotte Mason eMagazine. CONTENTS INCLUDE: Knowledge Through Senses Out-of-Door Geography Flowers and Trees 'Living Creatures' Field-Lore and Naturalists' Books Walks in Bad Weather Teaching Natural Philosophy ... and more! From the Foreword: "Nature Study is the backbone of introductory natural sciences in Charlotte Mason style homes and school, but Mason also felt it was beneficial for children to spend a great deal of time out-of-doors for their physical, emotional, and spiritual health. "In spite of often rainy, inclement weather, Charlotte Mason insisted on going out once-a-week for an official Nature Walk, allowing the children to experience and observe the natural environment firsthand. These excursions were nature walks, not nature talks. "In addition to the weekly Nature Walks, Mason also recommended children spend large quantities of time outside each day, no matter what the weather. Take a daily walk for fun and fresh air. "I want to encourage those of you who don't have your own fields and forests, there are other readily available opportunities for outdoor play and learning activities. Basically, go outside with your kids as often as you can. You'll all be healthier and happier, and you may even learn a thing or two in the process." ~Deborah Taylor-Hough, Seattle 2015 The Outdoor Life of Children: The Importance of Nature Study and Outside Activities is available in both paperback and Kindle ebook formats.

Which Way? - Lidia Stanton 2017-07-07

For page samples, follow the link:

<https://books.lidiastanton.com/whichway> This colourful and highly engaging resource is written for children as young as 4-5 years old but also those in Key Stage 2 of primary school (up to 9 years old) who continue to feel confused by letter and digit shapes. The latter group might become so discouraged that they avoid writing, or write very little, despite having great imaginations. They start doubting their ability to simply 'know' the correct way when writing b/d, p/q, p/g, 9/g, 6/9, s/z, 5/S, S/3, etc. Most teachers and parents are very good at playing down the reversals and encouraging the child to have another go. They say, "It's fine, it's still good writing. I love what you've written here." Yet, after so many attempts and after so many teacher corrections on the page, the child begins to think, "This writing game might not be for me after all". Those with dyslexia will have additional phonological difficulties to manage alongside poor memory for graphic shapes. This workbook is for children who can trace well at speed, thus appear to have developed adequate motor memory in their fingers, yet struggle to remember 'which way' to write the letter or digit. It is very likely that they will be ready to integrate this type of linear visual-spatial information at a later time. For now, they have no real-life representation, or model, of a handful of graphic shapes in their brains, and this, in turn, can affect their confidence in writing independently. This resource offers practical and long-term 'tricks' that will trigger the child's memory at the right moment. It adopts a complementary

approach to traditional letter formation teaching to bridge the gap between children who are proficient graphic writers and those whose brains make different sense of graphic information. Many children with dyslexia and dysgraphia will particularly benefit from completing the workbook. How to use the resource The child doesn't need to work through the entire book. Choose sections that are relevant to their needs. Younger children (aged 4-6) will almost certainly need assistance when working with the resource, although older ones will no doubt choose to work independently, showing their practised strategies and completed activities to teachers and parents. It is recommended that section 7 (Use your whole body) is attempted with the help of an older helper or adult. There are more than one method to help distinguish between b/d/p and s/z in this workbook. Introduce the child to only one method at a time, evaluate the child's progress, and decide whether there is a need to move on to the next one. Some children are more practical than visual - the 'Use your hands' strategy might be sufficient for them. Other children might enjoy more visual strategies in sections 4, 5 and 6. In my experience, section 7 (Use your whole body) works well with children who need to 'experience' concepts in a multi-sensory manner. Pay attention to the child's initial response to a particular method. It will guide you along. You can mix and match strategies. Some children don't confuse b/d as much but struggle with p/9. Some activities can be completed independently of the section the child is currently working through. For example, Activity 7 can be attempted after completing the 'Use your hands' section. Flick through the book to decide which activities appear to be suitable to the child's current progress.

Children Learn Business - Children Learn Business 2015-10-24

The most successful professionals starting learning business concepts at a very early age. Having these childhood experiences proved most valuable as adults. They grew up and entered the workforce leagues ahead of their peers in social skills, communication, and business acumen. Children are quick to learn from others and adapt to their environment, more so than any other age. Knowing this, we must ask ourselves an important question. If the best time to learn is during childhood, why there is a significant lack of business education tailored for children? Millions of children's books are available for sale, however they are written on tales of a fantasy world where animals can speak, everyone is free from responsibility, and there is no conflict. As expected, these books add no value to a child's development and may even paint an unrealistic viewpoint of the world.
