*Teaching English as an Additional Language in Secondary Schools* - Seán Bracken 2016-11-10

With increasing numbers of learners in secondary schools having English as an additional language, it is crucial for all teachers to understand the learning requirements of these students and plan distinctive teaching approaches to engage and support them. This book provides school leaders, trainee teachers and qualified teachers with the skills and practical knowledge they need to strengthen the learning outcomes of students for whom English is an additional language. Teaching English as an Additional Language in Secondary Schools sets out realistic ways in which EAL learners can be engaged and stretched in their learning, building on their prior literacy, cultural experiences and language learning. It clearly explains the theory and key research into how additional languages are acquired and offers

practical classroom teaching and learning strategies to show teachers how they can help EAL learners to access the curriculum and reflect on their learning through assessments. Features include: tasks to help put the ideas into practice case studies illustrating the key challenges faced by EAL learners summaries of key research findings reflections to encourage deeper thinking. Drawing on the daily experiences of teachers and teaching assistants, this book will be essential reading for all trainee and practising teachers that want to ensure students with EAL fulfil their true learning potential.

**International Student Engagement in Higher Education** - Margaret Kettle 2017-06-15

Hand-in-hand with the continuing drive to recruit international students to Western universities goes an interest in student engagement. However, it is often unclear exactly what is meant by engagement. This book goes beyond the policy rhetoric to provide a practice-based explication of international student engagement and its enabling institutional conditions. By utilising a social practice conceptual model, the book explains the multiple dimensions of engagement that are often conflated in policy: the antecedents to engagement, the actions of engaging, and the achievements and outcomes of engagement. As a result, the book is able to address issues such as how English comes to matter in international student academic practice; the teaching and assessment approaches that promote international student engagement; and the metacognitive, cognitive and affective strategies that international students use to achieve academic and personal transformation.

Transformative Pedagogical Perspectives on Home Language Use in Classrooms - Jules, Janice E. 2020-09-25

Linguists, researchers, and other practitioners in language education acknowledge that the resolution of language problems associated with breaking down language and cultural barriers that hinder the growth of learners' self-identities and national identities is ongoing. In fact, even with decades of research in home language use in the classroom, there are still classrooms worldwide where learners are deprived of the

opportunity of building their self-esteem, confidence, and autonomy by communicating with their native language. The global nature of communication requires speakers to use all the languages in their repertoire effectively, thus reinforcing the need to encourage home language use in classrooms. Transformative Pedagogical Perspectives on Home Language Use in Classrooms is a cutting-edge research publication on the effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner. Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills. In addition, the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self-identity and national identity. Highlighting topics such as engineering education, cultural responsiveness, and transformative pedagogy, this book is essential for linguists, academicians, education professionals, curriculum designers, policymakers, administrators, instructional designers, researchers, and students.

### **What we learn and when we learn it:**

**sensitive periods in development** - Etienne De Villers-Sidani 2014-11-21

The impact of training or experience is not the same at all points in development. Children who receive music lessons, or learn a second language before age 7-8 are more proficient as adults. Early exposure to drugs or trauma makes people more likely to become addicted or depressed later life. Rat pups exposed to specific frequencies from 9-13 days post-partum show expanded cortical representations of these frequencies. Young birds must hear and copy their native song within 1-2 months of birth or they may never learn it at all. These are examples of sensitive periods: developmental windows where maturation and specific experience interact to produce differential long-term effects on the brain and behavior. While still controversial, evidence for the existence of

sensitive periods has grown, as has our understanding of the underlying mechanisms of brain plasticity. Behavioral evidence from studies of language, psychopathology or vision in humans has been complemented by evidence elucidating molecular, gene and hormonal mechanisms in animals. It has been proposed that sensitive periods can be both opened and closed by specific experience, and that there are multiple, overlapping sensitive periods that occur through-out development as functions come on line. It is also likely that experience-dependent behavioral or brain plasticity accrued during one sensitive period can serve as a scaffold on which later experience and plasticity can build. Based on current knowledge, there are a number of broad questions and challenges to be addressed in this domain, these include: generating new information about the neurobiological mediators of structural and functional changes; proposing models of brain development that will better predict when sensitive periods should occur and what functions are implicated; investigation of the interaction between experience during a sensitive period and pre-existing individual differences; and the relationship between experience during a sensitive period and on-going experience. The goal of this Research Topic is to bring together scientists in different fields whose work addresses these issues, including animal and human developmental neuroscience, language and cognitive development, education, developmental psychopathology and sensory neuroscience.

**China-Africa Relations** - Kathryn Batchelor 2017-06-26

The recent rapid growth in China's involvement in Africa is being promoted by both Chinese and African leaders as being conducted in a spirit of cooperation, friendship and equality. In the media and informally, however, a different, less harmonious picture emerges. This book explores

how China and Africa really regard each other, how official images are manufactured, and how informal images are nevertheless shaped and put forward. The book covers a wide range of areas where China-Africa exchange exists, including diplomacy, technological cooperation, sport, culture and arts exchange. The book also discusses the historical development of the relationship and how it is likely to develop going forward.

**Hold Your Friends Close** - Sarah Logan 2022-11-11

When we think of counterterrorism we often think of coercive measures, including expanded policing powers, extraordinary rendition, increased jail sentences, and no-fly lists. Yet, several countries also use surprisingly "soft" methods to deal with the rising problem of homegrown extremism--from debate training and sports competitions to citizenship education and information campaigns. Given the violent aims of homegrown extremists, why do states opt for this softer approach? In *Hold Your Friends Close*, Sarah Logan provides the first exploration of counter-radicalization policy and homegrown extremism through a theoretical and historical lens. Logan contends that unlike traditional counterterrorism, counter-radicalization is generally informed by ideals of citizenship and allegiance to the state as a panacea for the violence of homegrown extremism. Because the radicals these policies target are not loyal to their own state, but rather to the idea of a non-state based political or religious community, winning them back to their "home" state is the primary aim of counter-radicalization efforts. While there are some basic similarities in approach across countries, there are important divergences too. Logan argues that this stems from different ideas about the nature of citizenship and national belonging. To that end, Logan compares the different approaches of the UK and US, showing how they differ in important ways despite a basic focus on solidifying the target subject's allegiance to their home state. Providing the first detailed policy history of counter-radicalization in the US and the UK, as well as a comprehensive overview of counter-radicalization policies globally, *Hold Your Friends Close* is an essential read for scholars and policymakers who work on

terrorism and its sources.

The Education Invasion - Joy Pullmann

2017-03-14

Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of "informational text" instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping "reform" of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as "an absolute game-changer in public education," yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation's schools? Who benefits? And how can citizens regain local self-governance in education, so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? *The Education Invasion* offers answers and remedies.

**Language Choice in Postcolonial Law** -

Richard Powell 2020-02-24

This book discusses multilingual postcolonial common law, focusing on Malaysia's efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through analysis of legislation and policy documents, interviews

with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes?

*The Multilingual City* - Lid King 2016-01-26

This book is an exploration of the vitality of multilingualism and of its critical importance in and for contemporary cities. It examines how the city has emerged as a key driver of the multilingual future, a concentration of different, changing cultures which somehow manage to create a new identity. The book uses the recent LUCIDE multilingual city reports as a basis for discussion and analysis, and deals with both societal and individual multilingualism in a way that draws on the full range of their historical, contemporary, visual/audible, psychological, educational and policy-oriented aspects. The book will be of interest to students and researchers of multilingualism, migration studies, European Studies, anthropology, sociology and urbanism.

**Edwidge Danticat** - Mary Ellen Snodgrass

2022-05-18

A comet in the mounting firmament of third-world, non-white, female writers, Edwidge Danticat stands apart. An accomplished trilingual children's and YA author, she is also an activist, op-ed and cinema writer, and keynote speaker. Much of her work introduces the world to the cultural uniqueness of Haiti, the first black republic, and the elements of African heritage, language, and Vodou that continue to color all aspects of the island's art and self-expression. This companion provides an in-depth look into the world and writings of Danticat through A-Z entries. These entries cover both her works and the prevalent themes of her writing, including colonialism, slavery, superstition, adaptation, dreams and coming of age. It also provides a biography of Danticat, a list of 32 aphorisms from her fiction, a guide to the names and histories of the real places in her fiction, lesson planning aids, and a robust glossary offering translations and definitions for the many Creole, French, Japanese, Latin,

Spanish, and Taino terms in Danticat's writing.  
**Secondary School English Education in Asia**  
- Bernard Spolsky 2015-03-27

Continuing on from the previously published Primary School English-Language Education in Asia: From Policy to Practice (Moon & Spolsky, 2012), this book compiles the proceedings which took place at the 2011 annual conference of AsiaTEFL which took place in Seoul, Korea. It surveys the current status, practices, challenges, and future directions of Secondary English education in 11 diverse countries - in Israel, Japan, Korea, Singapore, Bangladesh, India, Indonesia, Malaysia, Pakistan, Vietnam and China. Given the importance of secondary English education as the central feature for continuing development of target language and culture in English language teaching in Asia, each contributed chapter includes key policies, theories, and practices related to the development and implementation of country-specific curricular and instructional programs in secondary English educational contexts in these countries. Secondary School English Education in Asia: From Policy to Practice critically analyses both sides of the English language debate - from advantages to complications - in its chapters including: Educating for the 21st Century: The Singapore Experience Miles to Go ...: Secondary Level English Language Education in India English Language Education Innovation for the Vietnamese Secondary School: The Project 2020 Exploring the Value of ELT as a Secondary School Subject in China: A Multi-goal Model for English Curriculum Secondary School English Education in Asia will appeal to English Language Teaching (ELT) researchers, teacher educators, trainee teachers and teachers, primarily those teaching in Asia.

**Contemporary Task-Based Language Teaching in Asia** - Michael Thomas 2015-02-26

Over the last decade task-based approaches to language learning and teaching (TBLT) have become a global focus of increased levels of research. Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result. This book focuses on Asia, where this shift has been particularly in evidence. TBLT has often been implemented in top-down approaches to curriculum development, which presents a huge range of challenges at the cultural as well as the pedagogic level. Contemporary Task Based Language Teaching in Asia looks at the drivers, stakeholders and obstacles across the region. Some countries have adapted TBLT to deal with the local constraints, others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts. This collection is important to all involved in language development, from curriculum reform to materials development. It assists from programme evaluation to the setting of assessment standards. The chapters cover all aspects of language education across Asia, from primary to tertiary, private and public education, as well as innovations at local, regional and national levels.

Roles, Rights, and Responsibilities in UK Education - H. McQueen 2014-12-04

Top scholars systematically explore roles, rights, and responsibilities of major participants in UK education: the government, the educators, the learners, and the parents. They investigate the inequalities produced by their current arrangement and look into how changing these arrangements might lead to different outcomes for all involved.

**Exploring Digital Communication** - Caroline Tagg 2015-04-10

Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies or taking an introductory MA course, as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative 'practice to theory' approach, with a 'back-to-front' structure. This leads the reader

from real-world problems and issues, through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Exploring Digital Communication aims to discuss real-world issues pertaining to digital communication, and to explore how linguistic research addresses these challenges. The text is divided into three sections (Problems and practices; Interventions; and Theory), each of which is further divided into two subsections which reflect linguistic issues relating to digital communication. The author seeks to demystify any perceived divide between online and offline communication, arguing that issues raised in relation to digital communication throw light on language use and practices in general, and thus linguistic interventions in this area have implications not only for users of digital communication but for linguists' general understanding of language and society. Including relevant research examples, tasks and a glossary, this textbook is an invaluable resource for postgraduate and upper undergraduate students taking New Media or Communication Studies modules within Applied Linguistics and English Language courses.

*Bilingualism and Bilingual Education: Politics, Policies and Practices in a Globalized Society* - B. Gloria Guzmán Johannessen 2019-01-14

This volume presents a multinational perspective on the juxtaposition of language and politics. Bringing together an international group of authors, it offers theoretical and historical constructs on bilingualism and bilingual education. It highlights the sociocultural complexities of bilingualism in societies where indigenous and other languages coexist with colonial dominant and other prestigious immigrant languages. It underlines the linguistic diaspora and expansion of English as the world's lingua franca and their impact on indigenous and other minority languages. Finally, it features models of language teaching and teacher education. This book challenges the existent global conditions of non-dominant languages and furthers the discourse on language politics and policies. It does so by pointing out the need to change the bilingual/multilingual educational paradigm across nations and all levels of educational systems.

*Languages other than English in Australian Higher Education* - Jennifer Joan Baldwin 2019-01-29

This book researches the study of languages other than English, and their place in the Australian tertiary sector. Languages are discussed in the context of the histories of Australian universities, and the series of reports and surveys about languages across the second half of the twentieth century. It demonstrates how changes in the ethnic mix of society are reflected in language offerings, and how policies on languages have changed as a result of societal influences. Also discussed is the extent to which influencing factors changed over time depending on social, cultural, political and economic contexts, and the extent to which governments prioritised the promotion and funding of languages because of their perceived contribution to the national interest. The book will give readers an understanding as to whether languages have mattered to Australia in a national and international sense and how Australia's attention to languages has been reflected in its identity and its sense of place in the world.

**Consumption, Cities and States** - Ann Brooks 2015-03-01

'Consumption, Cities and States' examines the fascinating intersection of consumption, citizenship and the state in a cross-section of global cities in Asia and the West. It focuses on a number of theoretical and empirical analyses: developing and amplifying the intersection of consumption, citizenship and the state in late

modernity in relation to a range of cities; examining the concept of the global city as an 'aspirational' category for cities in Asia and the West; and considering case studies which highlight the intersection of consumption and the state. As Ann Brooks and Lionel Wee demonstrate, the interface between citizen status and consumer activity proves a crucial point of analysis in the light of the neoliberal assertion that individuals and institutions perform at their best within a free market economy.

*The Working Class* - Ian Gilbert 2018-03-27  
In *The Working Class: Poverty, education and alternative voices*, Ian Gilbert unites educators from across the UK and further afield to call on all those working in schools to adopt a more enlightened and empathetic approach to supporting children in challenging circumstances. One of the most intractable problems in modern education is how to close the widening gap in attainment between the haves and the have-nots. Unfortunately, successive governments both in the UK and abroad have gone about solving it the wrong

way. Independent Thinking founder Ian Gilbert's increasing frustration with educational policies that favour 'no excuses' and 'compliance', and that ignore the broader issues of poverty and inequality, is shared by many others across the sphere of education - and this widespread disaffection has led to the assembly of a diverse cast of teachers, school leaders, academics and poets who unite in this book to challenge the status quo. Their thought-provoking commentary, ideas and impassioned anecdotal insights are presented in the form of essays, think pieces and poems that draw together a wealth of research on the issue and probe and discredit the current view on what is best for children from poorer socio-economic backgrounds. Exploring themes such as inclusion, aspiration, pedagogy and opportunity, the contributions collectively lift the veil of feigned 'equality of opportunity for all' to reveal the bigger picture of poverty and to articulate the hidden truth that there is always another way. This book is not about giving you all the answers, however. The contributors are not telling teachers or schools leaders how to run their schools, their classroom or their relationships - the field is too massive, too complex, too open to debate and to discussion to propose 'off-the-shelf' solutions. Furthermore, the research referred to in this book is not presented in order to tell educators what to think, but rather to inform their own thinking and to challenge some of the dominant narratives about educating the 'feckless poor'. This book is about helping educators to ask the right questions, and its starting question is quite simple: how can we approach the education of young people from disadvantaged backgrounds in a way that actually makes a difference for all concerned? Written for policy makers and activists as well as school leaders and educators, *The Working Class* is both a timely survey of the impact of current policies and an invaluable source of practical advice on what can be done to better support disadvantaged children in the school system. Edited by Ian Gilbert with contributions from Nina Jackson, Tim Taylor, Dr Steven Watson, Rhythmical Mike, Dr Ceri Brown, Dr Brian Male, Julia Hancock, Paul Dix, Chris Kilkenny, Daryn Egan-Simon, Paul Bateson, Sarah Pavey, Dr Matthew McFall,

**Spinglish** - Henry Beard 2015-06-02

Spinglish—the devious dialect of English used by professional spin doctors—is all around us. And the fact is, until you’ve mastered it, politicians and corporations (not to mention your colleagues and friends) will continue putting things over on you, and generally getting the better of you, every minute of every day—without your even knowing it. However, once you perfect the art of terminological inexactitude, you’ll be the one manipulating and one-upping everyone else! And here’s the beauty part: Henry Beard and Christopher Cerf, authors of the New York Times semi-bestseller *The Official Politically Correct Dictionary and Handbook*, have compiled this handy yet astonishingly comprehensive lexicon and translation guide—a fictionary, if you will—to help you do just that. If you want to succeed in business (or politics, sports, the arts, or life in general) without really lying, this is the book for you! (Your results may vary.) Spinglish includes these nifty bits of spurious verbiage and over a thousand more: aesthetic procedure - face-lift dairy nutrients - cow manure enhanced interrogation techniques - torture “For your convenience.” - “For our convenience.” hands-on mentoring - sexual relations with a junior employee incomplete success - failure rightsizing - firing people zero-tasking - doing nothing With each and every entry sourced from some of the greatest real-life language benders in the world today, you’re virtually guaranteed to have the perfectly chosen tried-and-untrue term right at the tip of your forked tongue. Wish you could nimbly sidestep a question without batting an eye? Not sure how to apologize while also . . . not apologizing? Spinglish has you covered. Simply consult this convenient, shoot-

from-the-lip glossary, and before you know it, you'll be telling it like it isn't, it wasn't, and it couldn't ever have been.

### *Enhancing Student Education Transitions and Employability* - Thanh Pham 2021-04-09

This book explores student education transition and employability negotiation experiences in various contexts. It explores determinants of student transitions at three levels including macro, meso and micro but focuses on exploring

affordances, constraints and strategies at the micro level. The framework underpinning the explorations at the micro level covers a range of different forms of capital including human, culture, social, identity, psychological and agentic. The book is unique in three ways. First, it consists of chapters about critical discussion, empirical research and practical guidance about student transition experiences. The critical discussion and empirical research chapters explore and obtain insights about the complexity of student transitions and develop conceptual frameworks that guide the development of applicable practices. The book is, therefore, a useful resource for policy makers, institutions, academics, professionals and students. Second, it provides insights about how student transitions are determined by a range of factors at different levels. These insights extend discussions about student transitions in the current literature which have mainly explored impacts of policies, institutional programmes and human capital. Finally, it is international in focus because it draws on research with different cohorts of students and graduates in different contexts. Insights provided in the book are, therefore, rich, diverse and comparative.

### U.S. Media and Migration - Sarah C. Bishop 2015-12-22

Winner of the 2017 Outstanding Book Award from the National Communication Association's International and Intercultural Communication Division and the 2017 Sue DeWine Book Award from the NCA Applied Communication Division Using oral history, ethnography, and close readings of media, Sarah C. Bishop probes the myriad and sometimes conflicting ways refugees interpret and use mediated representations of life in the United States. Guided by 74 refugee narrators from Bhutan, Burma, Iraq, and Somalia, U.S. Media and Migration explores answers to questions such as: What does one learn from media about an unfamiliar place? How does media help or hinder refugees' sense of belonging after relocation? And how does the U.S. government use media to shape refugees' understanding of American norms, standards, and ideals? With insights from refugees and resettlement administrators throughout, Bishop provides a compelling and layered analysis of the interaction between refugees and U.S. media

before, during, and long after resettlement.
