Extraordinary Insects - Anne Sverdrup-Thygeson
2020-04-02

A journey into the weird, wonderful and truly
astonishing lives of the small but mighty
creatures who keep the world turning. Out of
sight, underfoot, unseen beyond fleeting scuttles
or darting flights, insects occupy a hidden world,
yet are essential to sustaining life on earth.
Insects influence our ecosystem like a ripple
effect on water. They arrived when life first

moved to dry land, they preceded - and survived - the dinosaurs, they outnumber the grains of sand on all the world's beaches, and they will be here long after us. Working quietly but tirelessly, they give us food, uphold our ecosystems, can heal our wounds and even digest plastic. They could also provide us with new solutions to the antibiotics crisis, assist in disaster zones and inspire airforce engineers with their flying techniques. But their private lives are also full of fun, intrigue and wonder - musical mating rituals; house-hunting for armies of beetle babies; metamorphosing into new characters; throwing parties in fermenting sap; cultivating fungi for food; farming smaller species for honey dew and always ensuring that what is dead is decomposed, ready to become life once again. Here, we will discover life and death, drama and dreams, all on a millimetric scale. Like it or not, Earth is the planet of insects, and this is their extraordinary story.

**An annotated checklist of the scale insects
of Iran (Hemiptera, Sternorrhyncha,
Coccoidea) with new records and
distribution data** - Masumeh Moghaddam

2013-09-23

Iran is in the Near East, located between longitudes E 44°02' and 63°20' and latitudes N 25°00' and 39°47'; bordered to the north by the Caspian Sea, Armenia, Azerbaijan and Turkmenistan; to the east by Afghanistan and Pakistan; to the south by the Persian Gulf and the Gulf of Oman; and to the west by Iraq and Turkey. It occupies 1,648,195km², of which 14% is arable land, 8% forest, 47% natural (i.e. non-arable) pasture and 31% varied environment (Yale et al. 2001). The list contains all species of Coccoidea recorded up to March, 2013 and

includes 275 species in 113 genera and 13 families. This present checklist is intended to facilitate access to the most recent data on Iranian Coccoidea for taxonomists and to update the recorded species from Iran. Only records in which Iran is specifically mentioned are cited. New records from Iran are marked with asterisks and the following 32 species are currently only known from Iran.
