Maison Ikkoku - Rumiko Takahashi 2005-10-11

From the creator of RANMA 1/2 and INUYASHA comes one of Rumiko Takahashi's most beloved series, the romantic (sort of) comedy MAISON IKKOKU, re-presented in a second edition in its original episodic order, with a "missing" episode! Take a trip down memory lane back into Japan's nuttiest apartment house and meet its volatile inhabitants: Kyoko, the beautiful and mysterious new apartment manager; Yusaku, the exam-addled college student; Mrs. Ichinose, the drunken gossip; Kentaro, her bratty son; Akemi, the boozy bar hostess who runs around the house in flimsy lingerie; and the mooching and peeping Mr. Yotsuya.

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his

Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Cylons in America - Tiffany Potter 2008-01-01

With its fourth season due to air in January 2008, the award-winning Battlestar Galactica continues to be exceptionally popular for non-network television, combining the familiar features of science fiction with direct commentary on life in mainstream America. Cylons in America is the first collection of critical studies of Battlestar Galactica (its 2003 miniseries, and the ongoing 2004 television series), examining its place within popular culture and its engagement with contemporary American society. Battlestar Galactica depicts the remnants of the human race fleeing across space from a robotic enemy called the Cylons. The fleet is protected by a single warship, the Battlestar, and is searching for a "lost colony" that settled on the legendary planet "Earth." Originally a television series in the 1970s, the current series maintains the mythic sense established with the earlier quest narrative, but adds elements of hard science and aggressive engagement with post-9/11 American politics. Cylons In America casts a critical eye on the revived series and is sure to appeal to fans of the show, as well as to scholars and researchers of contemporary television.

One hundred leading experts from twenty five countries synthesise understanding of this group of species; discussing current research, and gaps in the knowledge of researchers, conservation biologists, zoologists, wildlife managers and students. This beautifully illustrated reference includes the long history of interactions between wild pigs and humans, the benefits some species have brought us and their role and impact on natural ecosystems.

Cryptology and Network Security - Swee-Huay Heng 2010

The 9th International Conference on Cryptology and Network Security (CANS 2010) was held in Kuala Lumpur, Malaysia during December 12-14, 2010. The conference was co-organized by the Multimedia University (MMU), Malaysia, and Universiti Tunku Abdul Rahman (UTAR), Malaysia. The conference received 64 submissions from 22

countries, out of which 21 were accepted after a careful and thorough review process. These proceedings also contain abstracts for two invited talks. All submissions were reviewed by at least three members of the Program Committee; those authored or co-authored by Program Committee members were reviewed by at least five reviewers. Program Committee members were allowed to use external reviewers to assist with their reviews, but remained responsible for the contents of the review and representing papers during the discussion and decision making. The review phase was followed by a 10-day discussion phase in which each paper with at least one supporting review was discussed, additional experts were consulted where needed, and final decisions were made. We thank the Program Committee for their hard work in selecting the program. We also thank the external reviewers who assisted with reviewing and the CANS Steering Committee for their help. We thank Shai Halevi for use of his Web-Submission-and-Review software that was used for the electronic submission and review of the submitted papers, and we thank the International Association for Cryptologic Research (IACR) for Web hosting of the software.
