Contemporary Issues in Accounting - Elaine

Conway 2018-06-01

The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic

corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.

Family Influence on Performance of Family Small and Medium Enterprises - Ana Paula

Matias Gama 2021-05-19

This book examines the relationship between family influence and financial performance and non-economic goals in small and medium family-owned enterprises (SME) in Portugal. Research on the performance of family-owned firms is growing but results are mixed, especially for non-listed companies. This book examines smaller family-owned firms that operate in a small, open economy, characterised by a context of relatively weak capital markets and predominantly bank-based financing. Delving into the impact of key variables such as the power dimension, experience and culture on performance establishes, the book goes on to analyse the determinants of performance in such family-owned SMEs. Given the importance of

family firms to open economies, this book would be a valuable read to scholars aiming to understand the reasons behind their success, managers seeking out strategic and operational guidance and to regulators and policymakers at the regional and national levels.

Intermediate Accounting - 2016

The End of Accounting and the Path Forward for Investors and Managers - Baruch Lev 2016-06-14

An innovative new valuation framework with truly useful economic indicators The End of Accounting and the Path Forward for Investors and Managers shows how the ubiquitous financial reports have become useless in capital market decisions and lays out an actionable

alternative. Based on a comprehensive, large-sample empirical analysis, this book reports financial documents' continuous deterioration in relevance to investors' decisions. An enlightening discussion details the reasons why accounting is losing relevance in today's market, backed by numerous examples with real-world impact. Beyond simply identifying the problem, this report offers a solution—the Value Creation Report—and demonstrates its utility in key industries. New indicators focus on strategy and execution to identify and evaluate a company's true value-creating resources for a more up-to-date approach to critical investment decision-making. While entire industries have come to rely on financial reports for vital information, these documents are flawed and insufficient when it comes to the way investors and lenders work in the current economic climate. This book demonstrates an alternative, giving you a new framework for more informed decision making. Discover a new, comprehensive system of

economic indicators Focus on strategic, value-creating resources in company valuation Learn how traditional financial documents are quickly losing their utility Find a path forward with actionable, up-to-date information Major corporate decisions, such as restructuring and M&A, are predicated on financial indicators of profitability and asset/liabilities values. These documents move mountains, so what happens if they're based on faulty indicators that fail to show the true value of the company? The End of Accounting and the Path Forward for Investors and Managers shows you the reality and offers a new blueprint for more accurate valuation.

Investment Decisions and the Logic of Valuation - Carlo Alberto Magni 2020-02-11

This book presents a new approach to the valuation of capital asset investments and investment decision-making. Starting from simple premises and working logically through three basic elements (capital, income, and cash flow), it guides readers on an interdisciplinary journey through the subtleties of accounting and finance, explaining how to correctly measure a project's economic profitability and efficiency, how to assess the impact of investment policy and financing policy on shareholder value creation, and how to design reliable, transparent, and logically consistent financial models. The book adopts an innovative

pedagogical approach, based on a newly developed accounting-and-finance-engineering system, to help readers gain a deeper understanding of the accounting and financial magnitudes, learn about new analytical tools, and develop the necessary skills to practically implement them. This diverse approach to capital budgeting allows a sophisticated economic analysis in both absolute terms (values) and relative terms (rates of return), and is applicable to a wide range of economic entities, including real assets and financial assets, engineering designs and manufacturing schemes, corporate-financed and project-financed transactions, privately-owned projects and public investments, individual projects and firms. As such, this book is a valuable resource for a broad audience, including scholars and researchers, industry practitioners, executives, and managers, as well as students of corporate finance, managerial finance, engineering economics, financial management, management

accounting, operations research, and financial mathematics. It features more than 180 guided examples, 50 charts and figures and over 160 explanatory tables that help readers grasp the new concepts and tools. Each chapter starts with an abstract and a list of the skills readers can expect to gain, and concludes with a list of key points summarizing the content.
