When Matt Cruse, the cabin boy on the luxury airship Aurora, fearlessly performs a dramatic rescue to save an old man from his damaged hot air balloon, he doesn't know what events he's setting in motion. Will he and the balloonist's fiery granddaughter, Kate de Vries, be able to solve the mystery of impossible flying creatures seen among the clouds? And will they figure it out before pirates and shipwreck end their voyage forever? Pushed high into the sky by a storm over the Indian Ocean, the decrepit training ship Flotsam makes an astonishing discovery before being forced to descend. Adrift at 20,000 feet is a tattered, ice-crusting airship bearing the name Hyperion. Could it really be the legendary lost craft, now a vast treasure and a frozen mausoleum to a ghostly crew? Matt Cruse is the only member of Flotsam's oxygen-starved crew able to remember the ghost ship's coordinates—and it seems as if everyone in the fabulous city of Paris wants them. In Skybreaker, Matt and Kate de Vries are challenged with another thrilling adventure, this time among

Though it's only a summer job piloting a humble aerocrane, he's thrilled to be helping to build the Celestial Tower, Paris's extraordinary gateway to outer space. But Matt's idyllic summer is short-lived. He narrowly survives a deadly attack by the fanatical Babelites, who are opposed to humans reaching the heavens. Worse still, his nights spent stargazing with Kate de Vries must end when she's summoned back to Lionsgate City by her parents. But then the chance of a lifetime boosts Matt's hopes of being airborne once more. Canada wants to reach space first, and the Canadian Minister of Air has asked Kate to join the first expedition as an expert on aerial zoology. Darkwing - Kenneth Oppel 2011-11-15

Before there were bats like Shade, Marina or even Goth, there was a young chiropter—a small arboreal glider—named Dusk. . . . It is 65 million years ago, during a cataclysmic moment in the earth's evolution, and Dusk, just months old, has no way of knowing he will play a pivotal role in creating a new world. What he does know is that he is different from the other newborn chiropters. Not content to use his large sails to glide down from the giant sequoia tree, Dusk discovers that if he flaps quickly enough, he can fly. But this strange gift that makes him feel like an outcast from the colony will also make him its saviour. After most of the colony is savagely massacred by the felids—the earth's first mammalian carnivores—Dusk must lead his fellow chiropters to a new home, and a new life. Against a tableau of disappearing dinosaurs and the ascent of the mammal kingdom, Oppel has created an adventure fantasy that sets the stage for the birth of the bats, the story of the forebears of Shade, the beloved hero of the *Silverwing* series. As with all *Silverwing* books, it is impossible to simply read Oppel's *Darkwing*; each of us enters a world of convincing characters, warring theologies, incredible natural history and a story that roars through head, heart and imagination. A tale that can be read as a stand-alone or as a prequel, *Darkwing* will be a welcome new classic for the millions of Kenneth Oppel fans.

Off the Main Sequence - Tom Easton 2006-10-01

Tom Easton has served as the monthly book review columnist for Analog Science Fiction for almost three decades, having contributed during that span many hundreds of columns and over a million words of penetrating criticism on the best literature that science fiction has to offer. His reviews have been celebrated for their wit, humor, readability, knowledge, and incisiveness. His love of literature, particularly fantastic

literature, is everywhere evident in his essays. Easton has ever been willing to cover small presses, obscure authors, and unusual publications, being the only major critic in the field to do so on a regular basis. He seems to delight in finding the rare gem among the backwaters of the publishing field. "A reviewer's job," he says, "is not to judge books for the ages, but to tell readers enough about a book to give them some idea of whether they would enjoy it." And this he does admirably, whether he's discussing the works of the great writers in the field, or touching upon the least amongst them. This companion volume to "Periodic Stars" (Borgo/Wildside) collects another 250 of Easton's best reviews from the last fifteen years of "The Reference Library." No one does it better, and no other guide provides such lengthy or discerning commentary on the best SF works of recent times. Complete with Introduction and detailed Index.

[Airborn](#) - Kenneth Oppel 2009-09-22

Sailing toward dawn, and I was perched atop the crow's nest, being the ship's eyes. We were two nights out of Sydney, and there'd been no weather to speak of so far. I was keeping watch on a dark stack of nimbus clouds off to the northwest, but we were leaving it far behind, and it looked to be smooth going all the way back to Lionsgate City. Like riding a cloud. . . . Matt Cruse is a cabin boy on the Aurora, a huge airship that sails hundreds of feet above the ocean, ferrying wealthy passengers from city to city. It is the life Matt's always wanted; convinced he's lighter than air, he imagines himself as buoyant as the hydrium gas that powers his ship. One night he meets a dying balloonist who speaks of beautiful creatures drifting through the skies. It is only after Matt meets the balloonist's granddaughter that he realizes that the man's ravings may, in fact, have been true, and that the creatures are completely real and utterly mysterious. In a swashbuckling adventure reminiscent of Jules Verne and Robert Louis Stevenson, Kenneth Oppel, author of the best-selling Silverwing trilogy, creates an imagined world in which the air is populated by transcontinental voyagers, pirates, and beings never before dreamed of by the humans who sail the skies.

The Great Romance - Inhabitant 2008-01-01

The Great Romance, a two-volume novella published under the pseudonym "The Inhabitant," was one of the outstanding late nineteenth-century works of utopian science fiction. Volume 1 was a possible model for Edward Bellamy's phenomenally successful *Looking Backward*, while volume 2 was assumed lost for over a century until uncovered in the Hocken Library in Dunedin, New Zealand. Together these volumes represent a remarkable piece of science fiction writing as they proffer one of the first serious considerations of the colonization of other planets and the impact of human beings on an alien culture. Here, for the first time, readers encounter descriptions of spacesuits and airlocks, space shuttles and planetary rovers, interplanetary colonization and cross-species miscegenation. Behind these genre-defining elements is the story of John Hope, who, by means of a sleeping elixir, awakes to a utopian community in a distant future—a "kingdom of thought" where the struggle for existence has been eliminated and humanity operates under an unwritten law of civility and harmony, aided by telekinesis that inerrantly reveals all wrong-doers. Since only two of the probably three volumes are extant, the tale ends with a chilling cliffhanger. In his introduction Dominic Alessio discusses the cutting-edge aspects of this work and its significance in both the realm of science fiction and the

history and culture of its day.

skeleton of a massive dinosaur, larger than anything the late nineteenth century world has ever seen. Some legends call it the Black Beauty, with its bones as black as ebony, but to seventeen-year-old Samuel Bolt it's the "rex", the king dinosaur that could put him and his struggling, temperamental archaeologist father in the history books (and conveniently make his father forget he's been kicked out of school), if they can just quarry it out. But Samuel and his father aren't the only ones after the rex. For Rachel Cartland this find could be her ticket to a different life, one where her loves of science and adventure aren't just relegated to books and sitting rooms. Because if she can't prove herself on this expedition with her professor father, the only adventures she may have to look forward to are marriage or spinsterhood. As their paths cross and the rivalry between their fathers becomes more intense, Samuel and Rachel are pushed closer together. And with both eyeing the same prize, their budding romance seems destined to fail. But as danger looms on the other side of the hills, causing everyone's secrets to come to light, Samuel and Rachel are forced to make a decision. Can they join forces to find their quarry—and with it a new life together—or will old enmities and prejudices keep them from both the rex and each other?
