Pathwise Estimation and Inference for Diffusion Market Models - Nikolai Dokuchaev 2019-03-26

Pathwise estimation and inference for diffusion market models discusses contemporary techniques for inferring, from options and bond prices, the market participants' aggregate view on important financial parameters such as implied volatility, discount rate, future interest rate, and their uncertainty thereof. The focus is on the pathwise inference methods that are applicable to a sole path of the observed prices and do not require the observation of an ensemble of such paths. This book is pitched at the level of senior undergraduate students undertaking research at honors year, and postgraduate candidates undertaking Master's or PhD degree by research. From a research perspective, this book reaches out to academic researchers from backgrounds as diverse as mathematics and probability, econometrics and statistics, and computational mathematics and optimization whose interest lie in analysis and modelling of financial market data from a multi-disciplinary approach. Additionally, this book is also aimed at financial market practitioners participating in capital market facing businesses who seek to keep abreast with and draw inspiration from novel approaches in market data analysis. The first two chapters of the book contains introductory material on stochastic analysis and the classical diffusion stock market models. The remaining chapters discuss more special stock and bond market models and special methods of pathwise inference for market parameter for different models. The final chapter describes applications of numerical methods of inference of bond market parameters to forecasting of short rate. Nikolai Dokuchaev is an associate professor in Mathematics and Statistics at Curtin University. His research interests include mathematical and statistical finance, stochastic analysis, PDEs, control, and signal processing. Lin Yee Hin is a practitioner in the capital market facing industry. His research interests include econometrics, non-parametric regression, and scientific computing.

Awakening of the Soul - Grace J. Scott 2009-11

In 2002, Grace J. Scott began to receive messages from those beyond the grave. Grace felt it her duty to record their voices, their thoughts, and even their warnings. Awakening of the Soul is the amazing result. This intriguing collection of channeled thoughts from souls in heaven, other planetary systems, and other universes will benefit those seeking spiritual growth as well as those wanting information about preparing for upcoming Earth changes. Much of the material is packed with information and requires time to read and digest while other material is simple and easily understood. Presented in chronological order as received in reflexology sessions, the conversations are completely original, unedited, and unorganized, straight from the spirit itself. Some spirits channeled big lessons for the general public or gave messages to

individuals while some explained disasters, politics, wars, dreams, and events in our daily lives. But all of the souls have one thing in common: they bring news that Earth is cleansing itself at a rapid pace, and they are here to assist us through the cleansing and beyond. Epic in scope, *Awakening of the Soul* is a vital tool for those looking to the future and to the fate of Earth itself.

C++ Reactive Programming - Praseed Pai 2018-06-29

Learn how to implement the reactive programming paradigm with C++ and build asynchronous and concurrent applications. Key Features: Efficiently exploit concurrency and parallelism in your programs. Use the Functional Reactive programming model to structure programs. Understand reactive GUI programming to make your own applications using Qt. Book Description: Reactive programming is an effective way to build highly responsive applications with an easy-to-maintain code base. This book covers the essential functional reactive concepts that will help you build highly concurrent, event-driven, and asynchronous applications in a simpler and less error-prone way. C++ Reactive Programming begins with a discussion on how event processing was undertaken by different programming systems earlier. After a brisk introduction to modern C++ (C++17), you'll be taken through language-level concurrency and the lock-free programming model to set the stage for our foray into the Functional Programming model. Following this, you'll be introduced to RxCpp and its programming model. You'll be able to gain deep insights into the RxCpp library, which facilitates reactive programming. You'll learn how to deal with reactive programming using Qt/C++ (for the desktop) and C++ microservices for the Web. By the end of the book, you will be well versed with advanced reactive programming concepts in modern C++ (C++17). What you will learn: Understand language-level concurrency in C++ Explore advanced C++ programming for the FRP Uncover the RxCpp library and its programming model Mix the FP and OOP constructs in C++ 17 to write well-structured programs Master reactive microservices in C++ Create custom operators for RxCpp Learn advanced stream processing and error handling Who this book is for: If you're a C++ developer interested in using reactive programming to build asynchronous and concurrent applications, you'll find this book extremely useful. This book doesn't assume any previous knowledge of reactive programming.

Plant Mitochondria - Frank Kempken 2010-11-22

Mitochondria are the product of a long evolutionary history. It is now a well established fact that mitochondria did evolve from free living bacteria being the common ancestor of both, eukaryotic mitochondria and α -proteobacteria. Advances in genome sequencing, the establishment of in organello and in vitro assays to name only a few, contributed significantly to advances in plant mitochondrial research. Second generation sequencing and the ability to directly sequence and analyse the whole plant transcriptome certainly will help to develop the research on plant mitochondria to another level in the

future. In this book the current knowledge about plant mitochondria is presented in a series of detailed chapters, which have been organized in five main sections: (i) dynamics, genes and genomes; (ii) transcription and RNA processing; (iii) translation and import; (iv) biochemistry, regulation and function; and (v) mitochondrial dysfunction and repair. These sections consist of two to five chapters, each written by well-known specialists in the field. This book thus provides a comprehensive inside in the field of plant mitochondria for the specialist. The addition of a glossary and text boxes to each chapter provides easy access for readers from other subjects and hopefully will attract young scientist to the fascinating and exiting field of plant mitochondria.

Komodo Dragons - James B. Murphy 2015-03-31

More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."

Electrical Contacts - Milenko Braunovic 2017-12-19

Various factors affect the performance of electrical contacts, including tribological, mechanical, electrical, and materials aspects. Although these behaviors have been studied for many years, they are not widely used or understood in practice. Combining approaches used across the globe, *Electrical Contacts: Fundamentals, Applications, and Technology* integrates advances in research and development in the tribological, material, and analytical aspects of electrical contacts with new data on electrical current transfer at the micro- and nanoscales. Taking an application-oriented approach, the authors illustrate how material characteristics, tribological behavior, and loading impact the degradation of contacts, formation of intermetallics, and overall reliability and performance. Coverage is divided broadly into three sections, with the first focused on mechanics, tribology, materials, current and heat transfer, and basic reliability issues of electrical contacts. The next section explores applications, such as power connections, electronic connections, and sliding contacts, while the final section presents the diagnostic and monitoring techniques used to investigate and measure phenomena occurring at electrical contact interfaces. Numerous references to current literature reflect the fact that this book is the most comprehensive survey in the field. Explore an impressive collection of data, theory, and practical applications in *Electrical Contacts: Fundamentals, Applications, and Technology*, a critical tool for anyone investigating or designing electrical equipment with improved performance and reliability in mind.

The Animal Is in the World Like Water in Water - Leslie Scalapino 2013-07-02

Poetry. Art. Originally printed as an artist book by Granary Books in an edition of 40 in 2010. "THE ANIMAL IS IN THE WORLD LIKE WATER IN WATER is a collaboration of drawings by Kiki Smith and poetry by Leslie Scalapino (myself)... Kiki Smith sent me color xeroxes of a completed sequence, forty-three drawings, which she'd titled, 'Women Being Eaten by Animals.' I wrote the poem using the sense of an unalterable past occurrence: One female, apparently the same girl, is repeatedly, in very similar images as variations, bitten and clawed by a leopard-like, lion-like animal. Both person and animal have abstracted features, giving the impression of innocence or opaqueness. As in a dream of similar actions or a dream of a single, timeless action, the girl flecked with blood while being unaltered by the animal's touch, there is no representation of motion except stillness of the figures floating in space of page. Neither the girl nor the

animal articulate expression, as if phenomena of feeling(s) do not exist. "The words make in an outside/space a sense of the undoing of social tyranny as undoing of any hierarchy in individuals' feelings and perception as well as in people's values (public indistinguishable from private). Without hierarchy, past-reality-future is apparently free paradise of childhood and of birds. This outside space of the word/or that is my words abuts the other visible space of 'Women being eaten by animals' (Kiki's original title). While reading as well as seeing the images (but also if only seeing the visual images?), the viewer has the experience of body and mind being separated as if that is caused by the outside world. This experience of the viewer arises from their sense, in seeing, that one is separated from the scene of the girl and the animal alone together as if making love; and a sense of separation arises from the girl and animal not mimicking expressions of experiencing sensations. The disconnect that's itself the dreamlike dialogue between 'not being experienced (by the senses)'—and separation or union (both together?) of mind/eye and body/sight—has to be first enacted by Smith's visual images, in order for the language to broach this (subject) matter at all. Is dialogue possible without language?"—Leslie Scalapino

Disciple IV - Abingdon Press 2005-05

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.
