The Ants and the Grasshopper - Aesop 1995

Allegro Non Troppo - Marco Bellano 2021

"A film that will let you see the music and listen to drawings; in a word, a film full of Fantasia!" Bruno Bozzetto's *Allegro non Troppo* tips its hand right away: it is an unabashed, yet full of admiration, retake on Walt Disney's 1940 'concert feature'. The obvious nod to that model fuels many tongue-in-cheek jokes in the film; however, *Allegro non Troppo* soon departs from mere parody, and becomes a showcase for the multifaceted aesthetics of Italian animation in 1976, as well as a witty social satire and a powerful rethinking of the music-image relationship in cinema. Marco Bellano reconstructs the history of the production of *Allegro non Troppo*, on the basis of an original research developed with the contribution of Bozzetto himself; it also presents an audiovisual analysis of the work, as to reassess the international relevance of Bozzetto's achievements by giving insight into the director's"--

Cultures of Copyright - Dànuelle Nicole DeVoss 2014-10-30

The symbols, signs, and traces of copyright and related intellectual property laws that appear on everyday texts, objects, and artifacts have multiplied exponentially over the past 15 years. Digital spaces have revolutionized access to content and transformed the ways in which content is porous and malleable. In this volume, contributors focus on copyright as it relates to culture. The editors argue that what -counts- as property must be understood as shifting terrain deeply influenced by historical, economic, cultural, religious, and digital perspectives.
 Key themes addressed include issues of how:
 - Culture is framed, defined, and/or identified in conversations about intellectual property;
 - The humanities and other related disciplines are implicated in intellectual property issues;
 - The humanities will continue to rub up against copyright (e.g., issues of authorship, authorial agency, ownership of texts);
 - Different cultures and bodies of literature approach intellectual property, and how competing dynasties and marginalized voices exist beyond the dominant U.S. copyright paradigm.
 Offering a transnational and interdisciplinary perspective, <I>Cultures of Copyright offers readers - scholars, researchers, practitioners, theorists, and others - key considerations to contemplate in terms of how we understand copyright's past and how we chart its futures."

Slimed! - Mathew Klickstein 2013-09-24

The special 5th Anniversary Edition of SLIMED! An Entertainment Weekly "Best Tell-All" Book One of Parade Magazine's "Best Books About Movies/TV" Included in Publishers Weekly's "Top Ten Social Science Books" Before the recent reboots, reunions, and renaissance of classic Nickelodeon nostalgia swept through the popular imagination, there was SLIMED!, the book that started it all. With hundreds of exclusive interviews and have-to-read-'em-to-believe-'em stories you won't find anywhere else, SLIMED! is the first-ever full chronicle of classic Nick...told by those who made it all happen! Nickelodeon nostalgia has become a cottage industry unto itself: countless podcasts, blogs, documentaries, social media communities, conventions, and beyond. But a little less than a decade ago, the best a dyed-in-the-wool Nick Kid could hope for when it came to coverage of the so-called Golden Age (1983-1995) of the Nickelodeon network was the infrequent listicle, op-ed, or even rarer interview with an actual old-school Nick denizen. Pop culture historian Mathew Klickstein changed all of that when he forged ahead to track down and interview more than 250 classic Nick VIP's to at long last piece together the full wacky story of how Nickelodeon became "the Only Network for You!" Celebrate the fortieth anniversary of Nickelodeon with this special edition of SLIMED! that includes a new introduction by Nick Arcade's Phil Moore in addition to a foreword by Double Dare's Marc Summers and an afterword by none other than Artie, the Strongest Man in the World himself (aka Toby Huss). After you get SLIMED!, you'll never look at Nickelodeon the same way again. "Mathew Klickstein might be the geek guru of the 21st century."—Mark Mothersbaugh

Norman McLaren - Nichola Dobson 2018-01-25

Animator Norman McLaren is best known for his experimental films using pioneering techniques and his work as founder of the animation department of the National Film Board of Canada (NFB), but little mention is made of his Scottish heritage or his personal life. Nichola Dobson examines some of the key events and people in his life through a close examination of his key works and his personal papers, and discusses how influential they were. By using archive material to discover his personal identity and close readings of his films, Norman McLaren rediscovers one of the most important figures in animation history. Divided into thematic chapters of significant areas of influence, Dobson analyzes his formative years growing up in Scotland and his relationship with fellow Scot, John Grierson; the international travel which influenced him politically and creatively; the creative arts which played a vital part of his life; his collaborations with other artists and his complex, and rarely discussed, personal life. Each of these chapters considers his key films during those periods with a close detailed analysis and a further

examination of his life through his correspondence with family and close friends. By featuring this previously un-published material, the book allows much of the consideration of the work to be in McLaren's own words and offers a deep insight into his vast output of films over nearly 50 years.

Afrikaans My Taal - P. F. de Klerk 1986

The starting-point for this series is the belief that a proper study of a language involves listening, reading, speaking and writing. Since the effective use of language is so important, instruction must therefore be made in the living language.

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Hayao Miyazaki - Raz Greenberg 2018-07-12

Hayao Miyazaki's career in animation has made him famous as not only the greatest director of animated

features in Japan, the man behind classics as *My Neighbour Totoro* (1988) and *Spirited Away* (2001), but also as one of the most influential animators in the world, providing inspiration for animators in Disney, Pixar, Aardman, and many other leading studios. However, the animated features directed by Miyazaki represent only a portion of his 50-year career. Hayao Miyazaki examines his earliest projects in detail, alongside the works of both Japanese and non-Japanese animators and comics artists that Miyazaki encountered throughout his early career, demonstrating how they all contributed to the familiar elements that made Miyazaki's own films respected and admired among both the Japanese and the global audience.

Burned - Edward Humes 2019-01-08

Was a monstrous killer brought to justice or an innocent mother condemned? On an April night in 1989, Jo Ann Parks survived a house fire that claimed the lives of her three small children. Though the fire at first seemed a tragic accident, investigators soon reported finding evidence proving that Parks had sabotaged wiring, set several fires herself, and even barricade her four-year-old son inside a closet to prevent his escape. Though she insisted she did nothing wrong, Jo Ann Parks received a life sentence without parole based on the power of forensic fire science that convincingly proved her guilt. But more than a quarter century later, a revolution in the science of fire has exposed many of the incontrovertible truths of 1989 as guesswork in disguise. The California Innocence Project is challenging Parks's conviction and the so-called

science behind it, claiming that false assumptions and outright bias convicted an innocent mother of a crime that never actually happened. If Parks is exonerated, she could well be the "Patient Zero" in an

epidemic of overturned guilty verdicts—but only if she wins. Can prosecutors dredge up enough evidence and roadblocks to make sure Jo Ann Parks dies in prison? No matter how her last-ditch effort for freedom turns out, the scenes of betrayal, ruin, and hope will leave readers longing for justice we can trust.
