### Low-intensity Conflict in the Third World -

Stephen Blank 1988

A common thread ties together the five case studies of this book: the persistence with which the bilateral relationship between the United States and the Soviet Union continues to dominate American foreign and regional policies. These essays analyze the LIC environment in Central Asia, the Middle East, Southeast Asia, Latin America, and sub-Saharan Africa.

### The Politics of Europeanization - Kevin

Featherstone 2003-06-05

'The Politics of Europeanization' looks at the political aspects of European integration from the point of view of domestic politics. In doing so, it goes beyond the classic analysis of 'how policies are made in Brussels' and raises instead the question 'what is the power of Europe in national contexts?'. The questions at the heart of this volume are crucial both for our understanding of European integration and for

their policy implications. What does Europeanization really mean? How can it be measured? How is the European Union affecting domestic politics and policies in member states and candidate countries? Is Europeanization an irreversible process? Does it mean convergence across Europe? How and why do differences remain? The contributors explain and question the 'power of Europe' by providing theoretical and empirical perspectives on domestic politics and institutions, government and administration, public policies, political actors and business groups. The volume contains a new research agenda for the nascent literature on Europeanization.

**Engaging Minds** - Brent Davis 2015-05-01  
Engaging Minds: Cultures of Education and Practices of Teaching explores the diverse beliefs and practices that define the current landscape of formal education. The 3rd edition of this introduction to interdisciplinary studies of

teaching and learning to teach is restructured around four prominent historical moments in formal education: Standardized Education, Authentic Education, Democratic Citizenship Education, Systemic Sustainability Education. These moments serve as the foci of the four sections of the book, each with three chapters dealing respectively with history, epistemology, and pedagogy within the moment. This structure makes it possible to read the book in two ways - either "horizontally" through the four in-depth treatments of the moments or "vertically" through coherent threads of history, epistemology, and pedagogy. Pedagogical features include suggestions for delving deeper to get at subtleties that can't be simply stated or appreciated through reading alone, several strategies to highlight and distinguish important vocabulary in the text, and more than 150 key theorists and researchers included among the search terms and in the Influences section rather than a formal reference list.

**State, Society and Markets in North Korea** -  
Andrew Yeo 2021-11-04

Under Kim Jong-un, North Korea has experienced growing economic markets, an emerging 'nouveau riche,' and modest levels of urban development. To what extent is North Korean politics and society changing? How has the growth of markets transformed state-society relations? This Element evaluates the shifting

relationship between state, society, and markets in a deeply authoritarian context. If the regime implements controlled economic measures, extracts rent, and subsumes the market economy into its ideology, the state will likely retain strong authoritarian control. Conversely, if it fails to incorporate markets into its legitimating message, as private actors build informal trust networks, share information, and collude with state bureaucrats, more fundamental changes in state-society relations are in order. By opening the 'black box' of North Korea, this Element reveals how the country manages to teeter forward, and where its domestic future may lie.

**Freedom in the World 2007** - Freedom House (U.S.) 2007

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 193 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human

rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

## The Narrow Corridor - Daron Acemoglu

2020-09-22

"Why is it so difficult to develop and sustain liberal democracy? The best recent work on this subject comes from a remarkable pair of scholars, Daron Acemoglu and James A. Robinson. In their latest book, *The Narrow Corridor*, they have answered this question with great insight." -Fareed Zakaria, *The Washington Post*

From the authors of the international bestseller *Why Nations Fail*, a crucial new big-picture framework that answers the question of how liberty flourishes in some states but falls to authoritarianism or anarchy in others--and explains how it can continue to thrive despite new threats. In *Why Nations Fail*, Daron Acemoglu and James A. Robinson argued that countries rise and fall based not on culture, geography, or chance, but on the power of their institutions. In their new book, they build a new theory about liberty and how to achieve it, drawing a wealth of evidence from both current

affairs and disparate threads of world history. Liberty is hardly the "natural" order of things. In most places and at most times, the strong have dominated the weak and human freedom has been quashed by force or by customs and norms. Either states have been too weak to protect individuals from these threats, or states have been too strong for people to protect themselves from despotism. Liberty emerges only when a delicate and precarious balance is struck between state and society. There is a Western myth that political liberty is a durable construct, arrived at by a process of "enlightenment." This static view is a fantasy, the authors argue. In reality, the corridor to liberty is narrow and stays open only via a fundamental and incessant struggle between state and society: The authors look to the American Civil Rights Movement, Europe's early and recent history, the Zapotec civilization circa 500 BCE, and Lagos's efforts to uproot corruption and institute government accountability to illustrate what it takes to get

and stay in the corridor. But they also examine Chinese imperial history, colonialism in the Pacific, India's caste system, Saudi Arabia's suffocating cage of norms, and the "Paper Leviathan" of many Latin American and African nations to show how countries can drift away from it, and explain the feedback loops that make liberty harder to achieve. Today we are in the midst of a time of wrenching destabilization. We need liberty more than ever, and yet the corridor to liberty is becoming narrower and more treacherous. The danger on the horizon is not "just" the loss of our political freedom, however grim that is in itself; it is also the disintegration of the prosperity and safety that critically depend on liberty. The opposite of the corridor of liberty is the road to ruin.

*Red Pedagogy* - Sandy Grande 2015-09-28

This ground-breaking text explores the intersection between dominant modes of critical educational theory and the socio-political landscape of American Indian education. Grande

asserts that, with few exceptions, the matters of Indigenous people and Indian education have been either largely ignored or indiscriminately absorbed within critical theories of education. Furthermore, American Indian scholars and educators have largely resisted engagement with critical educational theory, tending to concentrate instead on the production of historical monographs, ethnographic studies, tribally-centered curricula, and site-based research. Such a focus stems from the fact that most American Indian scholars feel compelled to address the socio-economic urgencies of their own communities, against which engagement in abstract theory appears to be a luxury of the academic elite. While the author acknowledges the dire need for practical-community based research, she maintains that the global encroachment on Indigenous lands, resources, cultures and communities points to the equally urgent need to develop transcendent theories of decolonization and to build broad-based

coalitions.

**Political Warfare** - Kerry K. Gershaneck 2020

"Political Warfare provides a well-researched and wide-ranging overview of the nature of the People's Republic of China (PRC) threat and the political warfare strategies, doctrines, and operational practices used by the Chinese Communist Party (CCP). The author offers detailed and illuminating case studies of PRC political warfare operations designed to undermine Thailand, a U.S. treaty ally, and Taiwan, a close friend"--

*Our Extractive Age* - Judith Shapiro 2021-05-30  
Our Extractive Age: Expressions of Violence and Resistance emphasizes how the spectrum of violence associated with natural resource extraction permeates contemporary collective life. Chronicling the increasing rates of brutal suppression of local environmental and labor activists in rural and urban sites of extraction, this volume also foregrounds related violence in areas we might not expect, such as

infrastructural developments, protected areas for nature conservation, and even geoengineering in the name of carbon mitigation. Contributors argue that extractive violence is not an accident or side effect, but rather a core logic of the 21st Century planetary experience. Acknowledgement is made not only of the visible violence involved in the securitization of extractive enclaves, but also of the symbolic and structural violence that the governance, economics, and governmentality of extraction have produced. Extractive violence is shown not only to be a spectacular event, but an extended dynamic that can be silent, invisible, and gradual. The volume also recognizes that much of the new violence of extraction has become cloaked in the discourse of "green development," "green building," and efforts to mitigate the planetary environmental crisis through totalizing technologies. Ironically, green technologies and other contemporary efforts to tackle environmental ills often themselves

depend on the continuance of social exploitation and the contaminating practices of non-renewable extraction. But as this volume shows, resistance is also as multi-scalar and heterogeneous as the violence it inspires. The book is essential reading for activists and for students and scholars of environmental politics, natural resource management, political ecology, sustainable development, and globalization.

The Cambridge History of Native American Literature: Volume 1 - Melanie Benson Taylor  
2020-09-17

Native American literature has always been uniquely embattled. It is marked by divergent opinions about what constitutes authenticity, sovereignty, and even literature. It announces a culture beset by paradox: simultaneously primordial and postmodern; oral and inscribed; outmoded and novel. Its texts are a site of political struggle, shifting to meet external and internal expectations. This Cambridge History endeavors to capture and question the contested

character of Indigenous texts and the way they are evaluated. It delineates significant periods of literary and cultural development in four sections: "Traces & Removals" (pre-1870s); "Assimilation and Modernity" (1879-1967); "Native American Renaissance" (post-1960s); and "Visions & Revisions" (21st century). These rubrics highlight how Native literatures have evolved alongside major transitions in federal policy toward the Indian, and via contact with broader cultural phenomena such, as the American Civil Rights movement. There is a balance between a history of canonical authors and traditions, introducing less-studied works and themes, and foregrounding critical discussions, approaches, and controversies.

The Shock Doctrine - Naomi Klein 2010-04-01  
The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism."

Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war,

the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

**International Development Law** - Rumu Sarkar 2020-03-26

This book describes how international development works, its shortcomings, its theoretical and practical foundations, along with prescriptions for the future. International Development Law provides the reader with new perspectives on the origins of global poverty, identifies legal impediments to sustainable economic growth, and provides a better understanding of the challenges faced by the international community in resolving global poverty issues. The text is structured into two basic parts: the first part deals with the theoretical and philosophic foundations of the subject, and the second part sets forth issues relating to the international financial architecture, namely, international borrowing

practices, privatization, and emerging economies. In particular, the book provides new, innovative analysis on corruption as an impediment to sustainable development. The three interlocking facets of corruption are examined: transnational organized crime, Islamic-based international terrorism, and corruption within emerging economies and the international banking system. Thus fresh new analysis adds depth and clarity to a field that heretofore has been scattered and superficial. Finally, the “right to development” within the international human rights discourse is critically reviewed, particularly in light of new jurisprudence emerging from the African context. This book offers a fresh, new and balanced legal perspective on the development process. The text has been rigorously researched and has many practical facets based on the author’s professional experience within the international development field. It is an invaluable research and teaching tool since it

takes a multidisciplinary approach to putting complex issues, legal trends and political questions into a clear, new perspective that is highly analytical as well as accessible to the reader. The author's elegant legal prose is both powerful and persuasive.

Holt World History Human Legacy - Ramirez

**China Unbound** - Joanna Chiu 2021-09-28  
While the United States stumbles, an award-winning foreign correspondent chronicles China’s dramatic moves to become a dominant power. As the world’s second-largest economy, China is extending its influence across the globe with the complicity of democratic nations. Joanna Chiu has spent a decade tracking China’s propulsive rise, from the political aspects of the multi-billion-dollar “New Silk Road” global investment project to a growing sway on foreign countries and multilateral institutions through “United Front” efforts. Chiu offers readers

background on the protests in Hong Kong, underground churches in Beijing, and exile Uyghur communities in Turkey, and exposes Beijing's high-tech surveillance and aggressive measures that result in human rights violations against those who challenge its power. The new world disorder documented in *China Unbound* lays out the disturbing implications for global stability, prosperity, and civil rights everywhere.

**The Real North Korea** - Andrei Lankov 2015

After providing an accessible history of the nation, the author turns his focus to what North Korea is, what its leadership thinks and how its people cope with living in such an oppressive and poor place, arguing that North Korea is not irrational, but rather a nation that has survived against all odds.

*Many Roads to Justice* - Mary E. McClymont 2000

This book attempts to convey some of the challenges that those wielding the law for social change purposes have faced and the successes they have achieved. By intention, it is more a studied appreciation than a critical analysis of their efforts. We asked an international team of consultants to help us document and describe how various law-based strategies have worked in

very different settings, to draw out connections between those efforts, and to highlight some of the insights that emerge from grantees' experiences in law-related work. We also asked them to help us learn more about the ways the Foundation has played a role in these efforts. Known as the Global Law Programs Learning Initiative (GLPLI), this effort is not definitive, but rather suggestive. Our goal is to contribute to more serious future reflection and, ultimately, more effective programs in this field.

#### Britain's Gulag - Caroline Elkins 2014

Only a few years after Britain defeated fascism came the Mau Mau uprising in Kenya - a mass armed rebellion by the Kikuyu people, demanding the return of their land and freedom. The draconian response of Britain's colonial government was to detain nearly the entire Kikuyu population of 1.5 million and to portray them as sub-human savages. Detainees in their thousands - possibly a hundred thousand or more - died from exhaustion, disease, starvation

and systemic physical brutality. For decades these events remained untold. Caroline Elkins conducted years of research to piece together this story, unearthing reams of documents and interviewing several hundred Kikuyu survivors. Britain's Gulag reveals, for the first time, the full savagery of the Mau Mau war and the ruthless determination with which Britain sought to control its empire.

#### **Street Without Joy** - Bernard B. Fall

2018-02-16

First published in 1961 by Stackpole Books, Street without Joy is a classic of military history. Journalist and scholar Bernard Fall vividly captured the sights, sounds, and smells of the brutal— and politically complicated—conflict between the French and the Communist-led Vietnamese nationalists in Indochina. The French fought to the bitter end, but even with the lethal advantages of a modern military, they could not stave off the Viet Minh insurgency of hit-and-run tactics, ambushes, booby traps, and

nighttime raids. The final French defeat came at Dien Bien Phu in 1954, setting the stage for American involvement and a far bloodier chapter in Vietnam's history. Fall combined graphic reporting with deep scholarly knowledge of Vietnam and its colonial history in a book memorable in its descriptions of jungle fighting and insightful in its arguments. After more than a half a century in print, *Street without Joy* remains required reading.

[A Culture of Conspiracy](#) - Michael Barkun 2006

**Creating the Intellectual** - Eddy U 2019-04-30  
A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more. *Creating the*

*Intellectual* redefines how we understand relations between intellectuals and the Chinese socialist revolution of the last century. Under the Chinese Communist Party, "the intellectual" was first and foremost a widening classification of individuals based on Marxist thought. The party turned revolutionaries and otherwise ordinary people into subjects identified as usable but untrustworthy intellectuals, an identification that profoundly affected patterns of domination, interaction, and rupture within the revolutionary enterprise. Drawing on a wide range of data, Eddy U takes the reader on a journey that examines political discourses, revolutionary strategies, rural activities, urban registrations, workplace arrangements, organized protests, and theater productions. He lays out in colorful detail the formation of new identities, forms of organization, and associations in Chinese society. The outcome is a compelling picture of the mutual constitution of the intellectual and the Chinese socialist revolution, the legacy of

which still affects ways of seeing, thinking, acting, and feeling in what is now a globalized China.

**The Black Man's Burden** - Edmund Dene Morel 1920

*The Globalization of Childhood* - Robyn Linde  
2016-07-07

How does an idea that forms in the minds of a few activists in one part of the world become a global norm that nearly all states obey? How do human rights ideas spread? In this book, Robyn Linde tracks the diffusion of a single human rights norm: the abolition of the death penalty for child offenders under the age of 18. The norm against the penalty diffused internationally through law--specifically, criminal law addressing child offenders, usually those convicted of murder or rape. Through detailed case studies and a qualitative, comparative approach to national law and practice, Linde argues that children played an important--

though little known--role in the process of state consolidation and the building of international order. This occurred through the promotion of children as international rights holders and was the outcome of almost two centuries of activism. Through an innovative synthesis of prevailing theories of power and socialization, Linde shows that the growth of state control over children was part of a larger political process by which the liberal state (both paternal and democratic) became the only model of acceptable and legitimate statehood and through which newly minted international institutions would find purpose. The book offers insight into the origins, spread, and adoption of human rights norms and law by elucidating the roles and contributions of principled actors and norm entrepreneurs at different stages of diffusion, and by identifying a previously unexplored pattern of change whereby resistant states were brought into compliance with the now global norm against the child death penalty. From the institutions

and legacy of colonialism to the development and promotion of the global child--a collection of related, still changing norms of child welfare and protection--Linde demonstrates how a specifically Western conception of childhood and ideas about children shaped the current international system.

**The Licit Life of Capitalism** - Hannah Appel  
2019-12-13

The Licit Life of Capitalism is both an account of a specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate

inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.

The Pathet Lao: Leadership and Organization - Joseph Jeremiah Zasloff 1973

**From Christian Science to Jewish Science** - Ellen M. Umansky 2005

During the late nineteenth and early twentieth centuries, thousands of American Jews were drawn to the teachings of Christian Science. Viewing such attraction with alarm, American Reform Rabbis sought to counter Christian Science's appeal by formulating a Jewish vision of happiness and health. Unlike Christian Science, it acknowledged the benefits of modern medicine yet, sharing the belief in God as the true source of healing, similarly emphasized the power of visualization and affirmative prayer. Though the numbers of those formally affiliated with Jewish would remain small, its emphasis on the connection between mind and body

influenced scores of rabbis and thousands if not hundreds of thousands of American Jews, predating contemporary Jewish interest in spiritual healing by more than seventy years. Examining an important and previously unwritten chapter in the story of American Judaism, this book sheds light on religious and social concerns of twentieth-century American Jewry, including ways in which adherence to Jewish Science helped thousands bridge the perceived gap between Judaism and modernity. *Glencoe World History, New York Edition* - Jackson J. Reading for Understanding - Ruth Schoenbach 2012-06-15

"As elegantly practical as it is theoretically elegant. It is a guided tour, as one examines the tools of expert teachers as they engage students in a journey that is aptly dubbed Reading Apprenticeship?learning how to become a savvy, strategic reader under the tutelage of

thoughtful, caring, and demanding teachers.? P. David Pearson, University of California, Berkeley, and founding editor of the Handbook of Reading Research. Reading for Understanding is a monumental achievement. It was a monumental achievement when it came out as a first edition in 1999, bringing years of rigorous reading research together in a framework for teaching that made sense in actual secondary school classrooms. Now, just thirteen years later, Schoenbach and Greenleaf have several randomized clinical trials and multiple on-going studies at their fingertips to demonstrate the effects of this approach for developing the reading and thinking of young people in our nation?s middle and high school classrooms, as well as in community college classrooms. Their careful work on developing disciplinary literacy among all students represents a passion for and commitment to supporting students?and their teachers?in reading for understanding, which translates to reading for enjoyment, self-

awareness, learning, and for purposeful and informed action in our society. ?Elizabeth Moje, Arthur F. Thurnau Professor and Associate Dean for Research, School of Education, University of Michigan Reading Apprenticeship has proven to be an inspiration to Renton Technical College faculty and students alike. They have learned together to view themselves as readers in transformative ways, as they embrace powerful techniques to increase reading comprehension. The ideas and strategies in Reading for Understanding anchor this new and broad-based energy around reading and an enthusiasm among our faculty to model effective reading strategies for our students. ?Steve Hanson, President, Renton Technical College, Renton, Washington Reading for Understanding has the finest blend I have seen of research, strategies, and classroom vignettes to deepen teacher learning and help them connect the dots between theory and practice. ?Curtis Refior, Content Area Literacy Coach, Fowlerville

Community Schools, Fowlerville, Michigan A teacher-tested, research-based resource for dramatically improving reading skills Published in partnership with WestEd, this significantly updated second edition of the bestselling book contains strategies for helping students in middle school through community college gain the reading independence to master subject area textbooks and other material. Based on the Reading Apprenticeship program, which three rigorous "gold standard" research studies have shown to be effective in raising students' reading achievement Presents a clear framework for improving the reading and subject area learning of all students, including English learners, students with special needs, as well as those in honors and AP courses Provides

concrete tools for classroom use and examples from a range of classrooms Presents a clear how-to for teachers implementing the subject area literacies of the Common Core Standards Reading for Understanding proves it's never too late for teachers and students to work together to boost literacy, engagement, and achievement.

**The Mis-education of the Negro** - Carter Godwin Woodson 1933

Woodson's classic work of criticism explores how the education received by blacks has failed to give them an appreciation of themselves as a race and their contributions to history. Woodson puts forward a program that calls for the educated to learn about their past and serve the black community. (Education/Teaching)
