The Assassination of President James Garfield - Charles River

Charles River Editors

2015-11-11

*Includes pictures *Includes accounts of the assassination and trial *Includes online resources and a bibliography for further reading *Includes a table of contents "This is not murder. It is a political necessity. It will make my friend Arthur president, and save the republic. ... I leave my justification to God and the American people." - Charles Guiteau In 1880, Civil War veteran James Garfield was running as a Republican for president, and one of his supporters was a man named Charles Guiteau, who wrote and circulated a speech called "Garfield vs. Hancock" that aimed to rally support for the

Republican candidate. Though few knew it, Guiteau's family had already deemed him insane and attempted to keep him committed in an asylum, only to have him manage an escape from confinement. Garfield went on to narrowly edge Winfield Scott Hancock in the election, and Guiteau, harboring delusions of grandeur, believed he had helped tip the scales in Garfield's favor. As such, he believed that he was entitled to a post in Garfield's nascent administration, perhaps even an ambassadorship, and he continued to rack up debts while operating under the assumption that he would soon have the government salary to pay them back. However, despite lobbying around Republican headquarters in New York City and even approaching Cabinet members, no post was forthcoming for the troubled man. Eventually, in May 1881, Secretary of State James Blaine told him to never show up again. Enraged by the perceived slight, Guiteau bought a revolver and

plotted to kill the president. He got his chance on July 2, 1881 at a railroad station, shooting Garfield in the back twice and bragging to the authorities, "I am a Stalwart of the Stalwarts...Arthur is president now!" In reality, Garfield would live for nearly 3 more months, and the poor standards of medical care in the 1880s would end up being responsible for the fact he did not survive wounds that he would've survived at the end of the 19th century. Indeed, Guiteau would cite medical malpractice at trial, stating, "I deny the killing, if your honor please. We admit the shooting." Those kinds of statements and his generally odd behavior helped ensure Guiteau's lawyers would claim he was insane, one of the first high profile attempts to use that as a defense against a crime. However, that never had much chance of succeeding, and claims of insanity were heartily rejected by prosecutors. George Corkhill, a D.C. district attorney and member of the prosecuting team, insisted,

He's no more insane than I am. There's nothing of the mad about Guiteau: he's a cool, calculating blackguard, a polished ruffian, who has gradually prepared himself to pose in this way before the world. He was a deadbeat, pure and simple. Finally, he got tired of the monotony of deadbeating. He wanted excitement of some other kind and notoriety... and he got it." Throughout his trial, which was all but a foregone conclusion, Guiteau kept up the bizarre antics, including singing in the court, passing notes back and forth with members of the crowd watching the trial, and even openly planning his own 1884 presidential campaign. Of course, those plans were all for naught, because after he was convicted in January 1882, Guiteau was hanged on June 30 of that year. To the end, Guiteau acted oddly, including dancing his way up to the scaffold and reciting a poem he had written as his last words before he met his fate at the gallows. Garfield was the 2nd president to be assassinated

after Abraham Lincoln, and today he is often remembered as one of the presidents to die in office after being elected every 20 years starting with William Henry Harrison's 1840 election through John F. Kennedy's 1960 election. The Assassination of President James Garfield: The History and Legacy of the President's Death chronicles the shooting and its aftermath.

Every known illness, disease

and condition has a specific number that goes along with the word describing the person's medical problem. Every physician and their office staff must know medical codes for the sake of billing purposes. If the doctor and office staff does not code a specific illness, condition or disease correctly the insurance company may not pay for treatment, medication, in hospital stays, outpatient treatment, and a number of surgical and other procedures performed for the patient, making it impossible for the patient to receive the proper treatment. Common illnesses, diseases and conditions listed in a pamphlet would enable the medical student to become familiar and able to memorize with the more common medical codes. The bottom line for using proper ICD codes is money reimbursement for the medical community and patient. [Go to Coders Medical Coding](#) - Delissa Ortega 2019

Memoirs of a Security Contractor - Paul Yurkin
2015-09-09

Paul "Chuck Norris" Yurkin has never been one to give up. A product of the inner city projects, he pulled himself up by the bootstraps and enlisted in the Marine Corps-serving proudly in Desert Storm before beginning a fifteen-year career

with the Myrtle Beach police force. But when he saw the efforts of his policing failing to create any positive change, it wasn't long before Yurkin became jaded by the system as a whole. Seeking a new life for himself and his daughters, he met up with a private contracting firm and began training for a trip to sunny Afghanistan, where he would work on training the fledgling Afghan National Police. In the midst of two weeks of training in Virginia, he earned the nickname that would stick with him for years to come-and met three best friends that remained by his side through dangerous missions, misadventures, and the frustrations of being stationed abroad. In *Memoirs of a Security Contractor*, Yurkin tells the true story of his time as a security contractor in Afghanistan in candid detail-in an eye-opening tale of determination, friendship, and never giving up.

Manboob Nation - Nathan Goodyear 2014-02-27

Testosterone provides the hormonal foundation for masculinity, determining what it means to be male. So what does a global decline in testosterone levels say about the current generation of men? Why is the greatest testosterone decline seen in American men under the age of thirty? A broken, reactive medical system isn't concerning itself with answering these questions. The medical profession classifies

testosterone loss as "testicular dysgenesis syndrome." Calling a condition a syndrome, however, is just a fancy medical term for "we don't know why this is happening." When a condition is classified as a syndrome, the symptoms receive treatment, not the cause. Nathan Goodyear, MD rejects reactive approaches to testosterone loss, as well as the pharmacological marketing that sees low testosterone as the latest cash cow. Instead, he offers a solution. Dr. Goodyear argues that low testosterone results from eight specific causes, backing up his claim with hard scientific facts and outlining treatment options for each cause. With proper treatment, low testosterone levels can be reversed.

Newman's Billing and Coding Specialist Study Guide - Xaiver

Newman 2012-01-01

Medical coding professionals provide a key step in the medical billing process. Every time a patient receives professional health care in a physician's office, hospital outpatient facility or ambulatory surgical center (ASC), the provider must document the services provided. The medical coder will abstract the information from the documentation, assign the appropriate codes, and create a claim to be paid, whether by a commercial payer, the patient, or CMS. While the medical coder and medical biller may be the same person or may work closely together to make sure all invoices are paid properly, the medical coder is primarily responsible for abstracting and assigning the appropriate coding on the claims. In order to accomplish this, the coder checks a variety of sources within the patient's medical record, (i.e. the transcription of

the doctor's notes, ordered laboratory tests, requested imaging studies and other sources) to verify the work that was done. Then the coder must assign CPT codes, ICD-9 codes and HCPCS codes to both report the procedures that were performed and to provide the medical biller with the information necessary to process a claim for reimbursement by the appropriate insurance agency. This text is intended to dispel any ambiguity prior to taking your national certification. This text contains over 400 preparatory examination questions, covering ICD-9, ICD-10, Revenue cycle, Medical report extrapolation assignments, HCPCS, UB04, and CPT.
