The Eloquent Blood - Manon Hedenborg White 2019-10-14

In the conventional dichotomy of chaste, pure Madonna and libidinous whore, the former has usually been viewed as the ideal form of femininity. However, there is a modern religious movement in which the negative stereotype of the harlot is inverted and exalted. The Eloquent

Blood focuses on the changing construction of femininity and feminine sexuality in interpretations of the goddess Babalon. A central deity in Thelema, the religion founded by the notorious British occultist Aleister Crowley (1875-1947), Babalon is based on Crowley's favorable reinterpretation of the biblical Whore of Babylon, and is associated with liberated female sexuality and the spiritual ideal of passionate union with existence. Analyzing historical and contemporary written sources, qualitative interviews, and ethnographic fieldwork in the Anglo-American esoteric milieu, the study traces interpretations of Babalon from the works of Crowley and some of his key disciples--including the rocket scientist John "Jack" Whiteside Parsons, and the enigmatic British occultist Kenneth Grant--until the present. From the 1990s onwards, this study shows, female and LGBTQ esotericists have challenged historical interpretations of Babalon, drawing on feminist and queer thought and conceptualizing femininity in new ways. Tracing the trajectory of a particular gendered symbol from the fin-de-siècle until today, Manon Hedenborg White explores the changing role of women in Western esotericism, and shows how evolving constructions of gender have shaped the development of esotericism. Combining research on historical and contemporary Western esotericism with feminist and queer theory, the book sheds new light on the ways in which esoteric movements and systems of thought have developed over time in relation to political movements.

Musical Motives - Brent Auerbach 2021-04-21

All music fans harbor in their memories vivid fragments of their favorite works. The starting guitar solo of "Satisfaction" by the Rolling Stones, the da-da-da-DUM gesture that opens Beethoven's Fifth Symphony, the lush swelling chords of a beloved movie soundtrack: hearing the briefest snippet of any of these is enough to transport listeners into the piece's sonic and emotional world. But what makes musical motives so powerful?

In *Musical Motives*, author Brent Auerbach looks at the ways that motives the small-scale pitch and rhythm shapes that are ever-present in music unify musical compositions and shape our experiences of them. Motives serve both to communicate basic musical meaning and to tie together sound space like the motifs in visual art. They present in all genres from classical and popular to jazz and world music, making them ideally suited for analysis. *Musical Motives* opens with a general introduction to these fundamental building blocks, then lays out a comprehensive theory and method to account for music's structure and drama in motivic terms. Aimed at both amateur and expert audiences, the book offers a tiered approach that progresses from Basic to Complex Motivic Analysis. The methods are illustrated by small- and large-scale analyses of pieces by Mozart, Beethoven, Handel, Chaminade, Verdi, Radiohead, and many more.

For the Love of Humanity - Ayca Cubukcu 2018-08-14

On February 15, 2003, millions of people around the world demonstrated against the war that the United States, the United Kingdom, and their allies were planning to wage in Iraq. Despite this being the largest protest in the history of humankind, the war on Iraq began the next month. That year, the World Tribunal on Iraq (WTI) emerged from the global antiwar movement that had mobilized against the invasion and subsequent occupation. Like the earlier tribunal on Vietnam convened by Bertrand Russell and Jean-Paul Sartre, the WTI sought to document—and provide grounds for adjudicating—war crimes committed by the United States, the United Kingdom, and their allied forces during the Iraq war. *For the Love of Humanity* builds on two years of transnational fieldwork within the decentralized network of antiwar activists who constituted the WTI in some twenty cities around the world. Ayca Çubukçu illuminates the tribunal up close, both as an ethnographer and a sympathetic participant. In the process, she situates debates among WTI activists—a group encompassing scholars, lawyers, students, translators, writers, teachers, and more—alongside key jurists, theorists, and critics of global democracy. WTI activists confronted many dilemmas as they conducted

their political arguments and actions, often facing interpretations of human rights and international law that, unlike their own, were not grounded in anti-imperialism. Çubukçu approaches this conflict by broadening her lens, incorporating insights into how Amnesty International, Human Rights Watch, and the Iraqi High Tribunal grappled with the realities of Iraq's occupation. Through critical analysis of the global debate surrounding one of the early twenty-first century's most significant world events, *For the Love of Humanity* addresses the challenges of forging global solidarity against imperialism and makes a case for reevaluating the relationships between law and violence, empire and human rights, and cosmopolitan authority and political autonomy.

Women's Writing in Italy, 1400-1650 - Virginia Cox 2008-06-16
Winner, 2009 Best Book Award, Society for the Study of Early Modern Women
Winner, 2008 PROSE Award for Best Book in Language, Literature, and Linguistics. Professional and Scholarly Publishing Division of the Association of American Publishers
This is the first comprehensive study of the remarkably rich tradition of women's writing that flourished in Italy between the fifteenth and early seventeenth centuries. Virginia Cox documents this tradition and both explains its character and scope and offers a new hypothesis on the reasons for its emergence and decline. Cox combines fresh scholarship with a revisionist argument that overturns existing historical paradigms for the chronology of early modern Italian women's writing and questions the historiographical commonplace that the tradition was brought to an end by the Counter Reformation. Using a comparative analysis of women's activities as artists, musicians, composers, and actresses, Cox locates women's writing in its broader contexts and considers how gender reflects and reinvents conventional narratives of literary change.

Children of Lucifer - Ruben van Luijk 2016-05-02

If we are to believe sensationalist media coverage, Satanism is, at its most benign, the purview of people who dress in black, adorn themselves with skull and pentagram paraphernalia, and listen to heavy metal. At its most sinister, its adherents are worshippers of evil incarnate and engage in violent and perverse secret rituals, the details of which mainstream society imagines with a fascination verging on the obscene. *Children of Lucifer* debunks these facile characterizations by exploring the historical origins of modern Satanism. Ruben van Luijk traces the movement's development from a concept invented by a Christian church eager to demonize its internal and external competitors to a positive (anti-)religious identity embraced by various groups in the modern West. Van Luijk offers a comprehensive intellectual history of this long and unpredictable trajectory. This story involves Romantic poets, radical anarchists, eccentric esotericists, Decadent writers, and schismatic exorcists, among others, and culminates in the establishment of the Church of Satan by carnival entertainer Anton Szandor LaVey. Yet it is more than a collection of colorful characters and unlikely historical episodes. The emergence of new attitudes toward Satan proves to be intimately linked to the ideological struggle for emancipation that transformed the West and is epitomized by the American and French Revolutions. It is also closely connected to secularization, that other exceptional historical process which saw Western culture spontaneously renounce its traditional gods and enter into a self-imposed state of religious indecision. *Children of Lucifer* makes the case that the emergence of Satanism presents a shadow history of the evolution of modern civilization as we know it. Offering the most comprehensive account of this history yet written, van Luijk proves that, in the case of Satanism, the facts are much more interesting than the fiction.

Fashionable Nonsense - Alan Sokal 2014-01-14

In 1996 physicist Alan Sokal published an essay in *Social Text*--an influential academic journal of cultural studies--touting the deep similarities between quantum gravitational theory and postmodern philosophy. Soon thereafter, the essay was revealed as a brilliant parody, a catalog of nonsense written in the cutting-edge but impenetrable lingo of postmodern theorists. The event sparked a furious debate in academic circles and made the headlines of newspapers in the U.S. and abroad.

Now in *Fashionable Nonsense: Postmodern Intellectuals' Abuse of Science*, Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off. In a delightfully witty and clear voice, the two thoughtfully and thoroughly dismantle the pseudo-scientific writings of some of the most fashionable French and American intellectuals. More generally, they challenge the widespread notion that scientific theories are mere "narrations" or social constructions.

Crossing - Ben Rampton 2014-05-01

Volume 5 This is a new and enlarged edition of Ben Rampton's groundbreaking study of sociolinguistic processes in urban youth culture. It focuses on language crossing - the use of Panjabi by adolescents of African-Caribbean and Anglo descent, the use of Creole by adolescents with Panjabi and Anglo backgrounds, and the use of stylized Indian English. Its central question is: how far and in what ways do these intricate processes of language sharing and exchange help to overcome race stratification and contribute to a new sense of mixed youth, class and neighbourhood community? Ben Rampton produces detailed ethnographic and interactional analyses of spontaneous speech data, and integrates the discussion of particular incidents with theories of discourse, code-switching, social movements, resistance and ritual drawn from sociolinguistics, sociology, anthropology and cultural studies. Vivid descriptions of adolescent life in youth clubs and school playgrounds provide an important insight into the ways in which young people manage to 'live with difference', and full consideration is given to crossing's critical implications for education policy.
