Research on Teaching and Learning English in

Under-Resourced Contexts - Kathleen M. Bailey
2021-03-28

This book is the eighth volume in the Global Research on Teaching and Learning English series, co-published with The International Research Foundation for English Language Education (TIRF). It brings together the latest developments in research on teaching English in under-resourced contexts across the world, offering a window into the complex challenges that these communities face. Recommendations from research and experience in well-resourced contexts are frequently not relevant or feasible in different circumstances. Contributors explore local and regional assets and challenges to provide a deeper understanding of the difficult issues that language learners and teachers must confront, and they provide insights to meet those challenges. With chapters written by TIRF Doctoral Dissertation Grant awardees, the volume addresses the crucial and growing need for research-based conversations on the

contexts, environments, and challenges of teaching English in areas of the world with limited resources, literacy levels, or other constraints. The volume includes sections on policy connections, teacher preparation, and practice insights. It is a useful resource for graduate students and teacher educators in language education, ESL/EFL education, and international education, and an enlightening reference for all readers with an interest in language education around the world.

Corporate Governance in Asia A

Comparative Perspective - OECD 2001-08-01
Poor corporate governance was identified as one of the root causes of the recent Asian financial crisis. The absence of effective disciplines on corporate managers, coupled with complicated and opaque relationships between corporations, their owners ...

Tax and Development - Satoru Araki
2018-12-18

Taxation is increasingly in the limelight as a

development agenda item, particularly with the emergence of the G20 as the premier international forum. This volume highlights the challenges faced by the Asia and Pacific region regarding tax policy and administration. Partly reflecting the diversity of the region, the region's voice still appears to be low in comparison with that of other regions such as Europe and Latin America. This book introduces ADB's and ADBI's active roles in assisting developing countries with respect to taxation. In addition, this book is an attempt to narrow the gap in understanding between development specialists and tax specialists. This publication, an anthology by contributors who have been involved in ADB's and ADBI's activities on fiscal policy and taxation in various capacities is classified into three groups: (i) bird's-eye overviews that discuss tax and development issues in Asia and the Pacific; (ii) country case studies that present theoretical policy analysis of a particular economy; and (iii) another set of

country case studies that share practical experiences regarding the tax system of a particular economy.

OECD Economic Surveys: United Kingdom 2020 - OECD 2020-10-14

Like many countries, the United Kingdom has

been hit severely by the COVID-19 outbreak. A strict lockdown was essential to contain the pandemic but halted activity in many key sectors. While restrictions have eased, the country now faces a prolonged period of disruption to activity and jobs, which risks exacerbating pre-existing weak productivity growth, inequalities, child poverty and regional disparities. On-going measures to prevent a second wave of infections will need to be carefully calibrated to manage the economic impact.

Brunei Darussalam, 2005-2009 - Musa Mohidin 2014

On report of government of Brunei for 2005-2009.

Positioning Theory and Strategic Communication - Melanie James 2014-06-13

In public relations, people talk about positioning an idea, a persona, a political ideal, an ideology – but what are they talking about? Why do some positions taken by organizations crystallize in

the minds of audiences, while others fail? Whilst positioning is not something new in public relations, this book is the first to explicate what it involves, how it works and how to do it. This is the first in-depth exploration of the possibilities of Positioning Theory for the public relations field and it adds a new perspective to the growing body of multidisciplinary work in this rich theoretical area, moving the discussion away from the traditional communication plans of previous decades, which fail to accommodate the changing media and opinion landscapes. The author pulls together various strands of socio-cultural theory into an analytical framework, providing readers with a tool to analyse the organizational implications of public relations decisions, guiding strategic decision making through realistic scenario planning. This thought-provoking book provides an alternative path to studying communication in increasingly complex environments and as such, will be vital reading for researchers and educators, advanced

communication and public relations students, and for senior public relations practitioners.

Assessment and Teaching of 21st Century Skills - Esther Care 2017-11-07

This book provides a detailed description of research and application outcomes from the Assessment and Teaching of 21st Century Skills project, which explored a framework for understanding the nature of these skills. The major element of this new volume is the presentation of research information from the global assessment of two 21st century skills that are amenable to teaching and learning: collaborative problem solving, and learning in digital networks. The outcomes presented include evidence to support the validity of assessment of 21st century skills and descriptions of consequent pedagogical approaches which can be used both to teach the skills and to use them to enhance key learning goals in secondary education systems. The sections of the volume are connected through a

focus on the degree to which innovative assessment tasks measure the constructs of interest. This focus is informed by conceptual and methodological issues associated with affordances of 21st century computer-based assessment. How understanding of the nature of the skills, as derived from these assessments, can guide approaches to the integration of 21st century skills in the classroom, is informed by initiatives adopted by participating countries. The guiding questions in this volume are: "Do the assessment tasks measure the constructs?" and "What are the implications for assessment and teaching in the classroom?" It is the third volume of papers from this project published by Springer.

Ageing Management for Nuclear Power Plants: International Generic Ageing Lessons Learned (Igal) - International Atomic Energy Agency 2020-10-31

This Safety Report provides detailed information on ageing management programmes and time

limited ageing analyses to manage existing and potential ageing effects and degradation mechanisms of structures, systems and components (SSCs) that are important to the safety of nuclear power plants. It has been written to assist operating organizations and regulatory bodies by specifying a technical basis and providing practical guidance on managing ageing of mechanical, electrical and instrumentation and control components, and civil structures. It also provides a common, internationally recognized basis on what constitutes an effective ageing management programme, a knowledge base on ageing management for design of new plants and design reviews, and a roadmap to available information on ageing management.

Economic Assessment of the Long Term Operation of Nuclear Power Plants -

International Atomic Energy Agency 2019-02-04
This publication describes the various approaches to the techno-economic assessment

of a project for the long term operation of a nuclear power plant in its specific market environment. It examines the process of defining the technical scope required to prolong the operating licences of nuclear power plants and highlights the need for further studies on technical cost drivers and economic assessments in order to better define the cost boundaries of long term operation. Information is also provided on the new IAEA software LTOFIN, which was developed to assist in performing long term operation economic assessments within the process described in the publication.

ASEAN Law in the New Regional Economic Order - Pasha L. Hsieh 2020-11-05

The fast-growing last decade of strong economic growth of the Association of Southeast Asian Nations (ASEAN) has played a critical role in Asia-Pacific regionalism and global trade. This book explores the concept of ASEAN law under the normative framework of the new regional economic order. It examines the roadmap of the

new ASEAN Economic Community Blueprint 2025 by evaluating the impact of ASEAN trade agreements on domestic legislation on professional services, financial integration, investment disputes and digital trade. More importantly, it sheds light on the legal implications of ASEAN's agreements with China and India and the potential developments of mega-regional trade agreements such as the CPTPP and the RCEP. Hence, the legal analysis and case studies in the book offer a fresh view of Asia-Pacific integration and bridge the gap between academia and practice.

WISC-V Assessment and Interpretation -

Lawrence G. Weiss 2019-01-22

WISC-V: Clinical Use and Interpretation, Second Edition provides practical information for clinicians on the selection of subtest measures, along with their proper administration and interpretation. Full Scale IQ is identified as important for predicting relevant behaviors and primary index scores for characterizing the

child's strengths and weaknesses. Classroom indicators of low scores on each of these abilities are identified, with suggested interventions, accommodations and instructional strategies for low scorers. Coverage includes ethnic differences for the Full Scale IQ and each primary index score, along with evidence of the profound influence of parental attitudes and expectations. Several other societal and contextual factors relevant to understanding racial/ethnic differences are presented. Two chapters review use of the WISC-V for identifying learning disabilities, testing of individuals with dyslexia, and best-practice recommendations to ensure accurate diagnosis and intervention. Concluding chapters describe advances in the Q-interactive system platform allowing administration of the WISC-V on iPads and other tablets, and how clinicians can tailor assessment using select WISC-V subtests and features. Authored by the creators of the WISC-V Describes the new subtests, revised test

structure and test extensions Advises clinicians on test selection Provides test result interpretation Discusses clinical applications of test use

Science of the Heart - Exploring the Role of the Heart in Human Performance - Rollin McCraty 2015

International Financial Transactions and Exchange Rates - I. Kallianiotis 2013-12-18
International transactions among nations and multinational corporations are important and growing due to the openness of economies all

over the world. In this follow-up title to *Exchange Rates and International Financial Economics*, Kallianiotis examines the role of the exchange rate and trade policy in improving the trade account. He discusses the international parity conditions extensively, together with the most popular theory in international finance, the interest rate parity (IRP) theory. *International Financial Transactions and Exchange Rates* describes these theories and gives practical solutions for multinational businesses, individuals, and nations. The increasing internationalization of businesses, openness of economies, integration of nations, change in the exchange rate system, and lastly, the deregulation of the financial market and institutions around the world have made the study of international finance necessary for all business students and professionals.

A World Trade Organization for the 21st Century - Richard Baldwin 2014-11-28
ø Policy makers will benefit from the expert

knowledge and policy lessons presented in this book, and development economists and researchers will profit from its critical examination of the world trading system. Undergraduate and postgraduate students will benefit from its critical examination of the world trading system. *The Second Report on the State of the World's Plant Genetic Resources for Food and Agriculture* - Food and Agriculture Organization of the United Nations 2010-01-01 Plant genetic resources provide a basis for food security, livelihood support and economic development as a major component of biodiversity. The Second Report on the State of the World's Plant Genetic Resources for Food and Agriculture demonstrates the central role plant genetic diversity continues to play in shaping agriculture growth in the face of climate change and other environmental challenges. It is based on information gathered from Country Reports, regional syntheses, thematic studies and scientific literature, documenting the major achievements made in this sector during the

past decade and identifying the critical gaps and needs that should urgently be addressed. The Report provides the decision-makers with a technical basis for updating the Global Plan of Action on Conservation and Sustainable Use of Plant Genetic Resources for Food and Agriculture. It also aims to attract the attention of the global community to set priorities for the effective management of plant genetic resources for the future. Purchase a print copy. **An Overview of Islamic Finance** - Mr. Mumtaz Hussain 2015-06-02

Islamic finance has started to grow in international finance across the globe, with some concentration in few countries. Nearly 20 percent annual growth of Islamic finance in recent years seems to point to its resilience and broad appeal, partly owing to principles that govern Islamic financial activities, including equity, participation, and ownership. In theory, Islamic finance is resilient to shocks because of its emphasis on risk sharing, limits on excessive

risk taking, and strong link to real activities. Empirical evidence on the stability of Islamic banks, however, is so far mixed. While these banks face similar risks as conventional banks do, they are also exposed to idiosyncratic risks, necessitating a tailoring of current risk management practices. The macroeconomic policy implications of the rapid expansion of Islamic finance are far reaching and need careful considerations.

Brunei English - David Deterding 2013-05-13

This detailed survey of Brunei English reflects the burgeoning academic interest in the many new varieties of English which are fast evolving around the world. Wholly up to date, the study is based on careful analysis of a substantial dataset that provides real-life examples of usage to illustrate the narrative throughout. As well as a thorough account of the pronunciation, grammar, vocabulary usage, and discourse patterns of Brunei English, the volume explores its historical and educational background and

current developmental trends, providing an in-depth review of the patterns of English usage within this multilingual, oil-rich society on the north-western coast of Borneo. Written in a non-technical style throughout that will assist non-specialists wishing to grasp the fundamentals of this unique brand of the English language, the work is a worthy addition to Springer's series on multilingual education that plugs a gap in the coverage of the numerous varieties of English being used across South East Asia. "The authors bring renewed and badly needed attention to the long-overlooked development of Brunei English. Their examination of the variety not only documents the features and functions of English within Brunei society, it also suggests the development of regional or global varieties of English that extend beyond Brunei, and even beyond South East Asia." Andrew Moody, University of Macau
Liberia - International Monetary Fund. African Dept. 2021-01-08

The Pro-Poor Agenda for Prosperity and Development 2018 to 2023 (PAPD) is the second in the series of 5-year National Development Plans (NDP) anticipated under the Liberia Vision 2030 framework. It follows the Agenda for Transformation 2012-2017 (AfT). It is informed as well by lessons learned from the implementation of the Interim Poverty Reduction Strategy 2007 (iPRS) and the Poverty Reduction Strategy (2008-2011). The fundamentals underpinning the PAPD are: i) Liberia is rich in human and natural resources; but ii) is deprived of development largely because its human capital lacks the knowledge to transform the natural resources into wealth—whether through farming, mining, fishing, or other productive ventures that require technology or financial investments. Consequently, Liberia is relatively rich in natural capital but relatively poor in relations to its peers in both human and produced capital. Moreover, because of a legacy of entrenched inequality in access to

development opportunities, widespread infrastructure deficits and pervasive poverty have become the binding constraints to future growth and prosperity.

Education in Brunei Darussalam - 2000

The Cambridge Handbook of Clinical Assessment and Diagnosis - Martin Sellbom
2019-12-19

This Handbook provides a contemporary and research-informed review of the topics essential to clinical psychological assessment and diagnosis. It outlines assessment issues that cross all methods, settings, and disorders, including (but not limited to) psychometric issues, diversity factors, ethical dilemmas, validity of patient presentation, psychological assessment in treatment, and report writing. These themes run throughout the volume as leading researchers summarize the empirical findings and technological advances in their area. With each chapter written by major

experts in their respective fields, the text gives interpretive and practical guidance for using psychological measures for assessment and diagnosis.

Handbook of Deep Trade Agreements -

Aaditya Mattoo 2020-09-23

Deep trade agreements (DTAs) cover not just trade but additional policy areas, such as international flows of investment and labor and the protection of intellectual property rights and the environment. Their goal is integration beyond trade or deep integration. These agreements matter for economic development. Their rules influence how countries (and hence, the people and firms that live and operate within them) transact, invest, work, and ultimately, develop. Trade and investment regimes determine the extent of economic integration, competition rules affect economic efficiency, intellectual property rights matter for innovation, and environmental and labor rules contribute to environmental and social

outcomes. This Handbook provides the tools and data needed to analyze these new dimensions of integration and to assess the content and consequences of DTAs. The Handbook and the accompanying database are the result of collaboration between experts in different policy areas from academia and other international organizations, including the International Trade Centre (ITC), Organisation for Economic Co-operation and Development (OECD), United Nations Conference on Trade and Development (UNCTAD), and World Trade Organization (WTO).

The Use and Status of Language in Brunei

Darussalam - Noor Azam Haji-Othman

2016-09-17

describes the acquisition of Malay grammar, Malay politeness strategies, the use of language online, language in the courts, a comparison of Malay and English newspapers, the language of shop signs, the status of Dusun, and lastly, English literature in Brunei.

The Cambridge History of Philosophy of the Scientific Revolution - David Marshall Miller
2021-12-31

The early modern era produced the Scientific Revolution, which originated our present understanding of the natural world. Concurrently, philosophers established the conceptual foundations of modernity. This rich and comprehensive volume surveys and illuminates the numerous and complicated interconnections between philosophical and scientific thought as both were radically transformed from the late sixteenth to the mid-eighteenth century. The chapters explore reciprocal influences between philosophy and physics, astronomy, mathematics, medicine, and

other disciplines, and show how thinkers responded to an immense range of intellectual, material, and institutional influences. The volume offers a unique perspicuity, viewing the entire landscape of early modern philosophy and science, and also marks an epoch in contemporary scholarship, surveying recent contributions and suggesting future investigations for the next generation of scholars and students.

An Introduction to the Languages of the World - Anatole Lyovin 2017

Unique in scope, An Introduction to the Languages of the World introduces linguistics students to the variety of world's languages. Students will gain familiarity with concepts such as sound change, lexical borrowing, diglossia, and language diffusion, and the rich variety of linguistic structure in word order, morphological types, grammatical relations, gender, inflection, and derivation. It offers the opportunity to explore structures of varying and fascinating

languages even with no prior acquaintance. A chapter is devoted to each of the world's continents, with in-depth analyses of representative languages of Europe, Asia, Africa, Oceania, and America, and separate chapters cover writing systems and pidgins and creoles. Each chapter contains exercises and recommendations for further reading. New to this edition are eleven original maps as well as sections on sign languages and language death and revitalization. For greater readability, basic language facts are now organized in tables, and language samples follow international standards for phonetic transcription and word-by-word glossing. There is an instructor's manual available for registered instructors on the book's companion website.

New Dimensions of Connectivity in the Asia-Pacific - Christopher Findlay 2021-11-10

There is no bigger policy agenda in the East Asian region than connectivity. Costs of international connectivity are indeed falling, in

the movement of goods, services, people and data, leading to greater flows, and to the reorganisation of business and the emergence of new forms of international transactions. There are second-round effects on productivity and growth, and on equity and inclusiveness. Participating in trade across borders involves significant set-up costs and, if these costs are lowered due to falling full costs of connectivity, more firms will participate, which is a driver of productivity growth and innovation at the firm level. Connectivity investments are linked to poverty reduction, since they reduce the costs of participating in markets. This volume includes chapters on the consequences of changes in both physical and digital connectivity for trade, for the location of economic activity, for forms of doing business, the growth of e-commerce in particular, and for the delivery of new services, especially in the financial sector. A study of China's Belt and Road Initiative (BRI) is also included. These studies are preceded by an

assessment of the connectivity performance in the Asia-Pacific region and followed by a discussion of impediments to investment in projects that contribute to productivity. The collection as a whole provides the basis for a series of recommendations for regional cooperation. The Pacific Trade and Development (PAFTAD) conference series has been at the forefront of analysing challenges facing the economies of East Asia and the Pacific since its first meeting in Tokyo in January 1968.

Innovation, Agricultural Productivity and Sustainability in Japan - 2019

Effective Teaching Methods - Gary D. Borich
2013-05-22

In a conversational style, this market-leading text shows how to apply effective, realistic, research-based teaching practices in today's heterogeneous classrooms. *Effective Teaching Methods: Research-Based Practice*, 8/E, prepares teachers to meet the many challenges

presented by the changing face of the American school and classroom teaching today—and discover the opportunities for professional growth and advancement those changes provide. The content presented is the direct result of years of research and observation of effective teaching practices in actual classrooms. These are the experiences of real teachers in real classroom, showing teachers both what to do to meet today's teaching challenges, and how to do it. The 8th edition provides readers with new coverage of important topics including Multiple Intelligences, professional learning communities, working with parents, and standardized testing. A new chapter on Technology Integration includes information on 21st century learning technologies, why teaching with technology is important, and assessing technology integration as well as its effectiveness.

A Comprehensive Book on Autism Spectrum Disorders - Mohammad-Reza Mohammadi
2011-09-15

The aim of the book is to serve for clinical, practical, basic and scholarly practices. In twentyfive chapters it covers the most important topics related to Autism Spectrum Disorders in the efficient way and aims to be useful for health professionals in training or clinicians seeking an update. Different people with autism can have very different symptoms. Autism is considered to be a "spectrum" disorder, a group of disorders with similar features. Some people may experience merely mild disturbances, while the others have very serious symptoms. This book is aimed to be used as a textbook for child and adolescent psychiatry fellowship training and will serve as a reference for practicing psychologists, child and adolescent psychiatrists, general psychiatrists, pediatricians, child neurologists, nurses, social workers and family physicians. A free access to the full-text electronic version of the book via Intech reading platform at <http://www.intechweb.org> is a great bonus.

Customs Modernization Handbook - Luc De Wulf 2005-01-03

Trade integration contributes substantially to economic development and poverty alleviation. In recent years much progress was made to liberalize the trade regime, but customs procedures are often still complex, costly and non-transparent. This situation leads to misallocation of resources. 'Customs Modernization Handbook' provides an overview of the key elements of a successful customs modernization strategy and draws lessons from a number of successful customs reforms as well as from customs reform projects that have been undertaken by the World Bank. It describes a number of key import procedures, that have proved particularly troublesome for customs administrations and traders, and provides practical guidelines to enhance their efficiency. The Handbook also reviews the appropriate legal framework for customs operations as well as strategies to combat corruption.

The Behavioral and Cognitive Neurology of Stroke - Olivier Godefroy 2007-01-18

The care of stroke patients has changed dramatically. As well as improvements in the emergency care of the condition, there have been marked advances in our understanding, management and rehabilitation of residual deficits. This book is about the care of stroke patients, focusing on behavioural and cognitive problems. It provides a comprehensive review of the field covering the diagnostic value of these conditions, in the acute and later phases, their requirements in terms of treatment and management and the likelihood and significance of long-term disability. This book will appeal to all clinicians involved in the care of stroke patients, as well as to neuropsychologists, other rehabilitation therapists and research scientists investigating the underlying neuroscience.
