The Future of Knowledge - Verna Allee
2009-11-03

Verna Allee, whose groundbreaking book 'The Knowledge Evolution' helped usher in the exploding field of knowledge management, has brought her experience-tested insights into an exciting new synthesis, penetrating to the very heart of value creation. 'The Future of Knowledge' strips away traditional business thinking to reveal the new patterns of management thought and practice essential for success in a more complex world. With a gift for making the complex simple and practical, Allee weaves together diverse threads such as business webs, communities of practice, knowledge technologies, intangibles, network

analysis, and biology to show why organizations must be supported as living systems before their natural networked pattern of organization can emerge. Embodying Allee's visionary approach, 'The Future of Knowledge' brings forward a practical view of new theories, frameworks, tools, and methods offering businesses a guide to managing the increasing levels of complexity within their organizations and in society at large. 'The Future of Knowledge' works on many levels: * At the strategic level, the new tools are intangible scorecards and understanding value networks * At the tactical level, the knowledge management tools for exchanging and applying knowledge are knowledge networks and communities of practice * At the operational level, a wealth of new technologies is supporting the codification, storage and delivery of the knowledge people need to complete their routine tasks.

His Reluctant Omega - L. C. Davis 2017-01-28 Mitchell is an alpha among alphas in the brutal Mountain Ridge Pack. He rules with equal parts fear and respect, but his pack is growing restless after decades without an heir to his proverbial throne. Only an alpha and an omega pair can sire another alpha to lead the pack, but Mitchell's not-so-secret shame is the fact that he hasn't been able to impregnate any of his female omegas. Unlike the other weaker packs, the Mountain Ridge wolves have always kept their omegas in line and at a safe distance through the infamous yet efficient Breeding Program. On the recommendation of an old rival turned tentative friend, Mitchell decides to try his hand—among other things—in a last-ditch effort at siring an heir with a rare male omega. When a transfer request for one of the only male omegas in the pack uncovers unspeakable abuse and corruption within the Breeding Program, the very future of the pack is thrown into question. - Angel's heart has turned to stone after a lifetime of abuse at the hands of the alpha shifters who oversee the Breeding Program in his pack unit. The only love he has left belongs to the three other omegas he shares his little corner of hell with. Angel will do whatever it takes to protect

them, even if it means becoming the mate of the top alpha himself. Angel knows better than to believe the gruff Mitchell when he claims that he's not like the others. Despite his best attempts to steel himself against the strange bond that forms between them, Angel discovers that Mitchell is the most dangerous alpha of all because he wants the one thing Angel has sworn never to give—his heart. With war looming on the horizon, a pack in chaos and two hardened hearts melted by an unlikely spark of love, only one outcome is certain. The Mountain Ridge Pack will never be the same. Disclaimer: See inside cover for content warnings. This is the second book in The Mountain Shifters series. Reading His Unclaimed Omega may provide context, but this book can be read as a standalone.

The Object of My Affection Is in My Reflection - Rokelle Lerner 2010-01-01

In her latest book, relationship expert Rokelle Lerner, tackles the innerworkings of narcissism and offers compassionate and realistic advice for surviving a relationship with those afflicted with this personality disorder. A Narcissist can make life exhilaratingly exciting one minute, and sheer hell the next. A narcissist has no qualms about taking another's money, love, admiration, body or soul to satisfy their unquenchable hunger. They are not inherently evil, but unfortunately their wounds compel them to act in ways that are sometimes unconscionable, damaging, and ultimately tragic. Whether a mother-in-law, friend, coworker or boss, sometimes it's impossible to avoid narcissists, so instead of being miserable or taken advantage of, Rokelle Lerner shares her insights on the dynamics behind this personality disorder to give readers the tools to cope with narcissists, including: Learning to see narcissists as they see themselves Creating defense factors to ward them off Maintaining a balanced relationship based on mutual love, not one-sided narcissism

Odes - Sharon Olds 2016-09-20

Following the Pulitzer prize-winning collection *Stag's Leap*, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender "Ode to the Hymen," Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its

structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as "Ode to My Sister," "Ode of Broken Loyalty," "Ode to My Whiteness," "Blow Job Ode," and "Ode to the Last Thirty-Eight Trees in New York City Visible from This Window," Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

The Art of Managing Longleaf - Leon Neel
2012-03-01

Greenwood Plantation in the Red Hills region of southwest Georgia includes a rare one-thousand-acre stand of old-growth longleaf pine woodlands, a remnant of an ecosystem that once covered close to ninety million acres across the Southeast. The Art of Managing Longleaf documents the sometimes controversial

management system that not only has protected Greenwood's "Big Woods" but also has been practiced on a substantial acreage of the remnant longleaf pine woodlands in the Red Hills and other parts of the Coastal Plain. Often described as an art informed by science, the Stoddard-Neel Approach combines frequent prescribed burning, highly selective logging, a commitment to a particular woodland aesthetic, intimate knowledge of the ecosystem and its processes, and other strategies to manage the longleaf pine ecosystem in a sustainable way. The namesakes of this method are Herbert Stoddard (who developed it) and his colleague and successor, Leon Neel (who has refined it). In addition to presenting a detailed, illustrated outline of the Stoddard-Neel Approach, the book—based on an extensive oral history project undertaken by Paul S. Sutter and Albert G. Way, with Neel as its major subject—discusses Neel's deep familial and cultural roots in the Red Hills; his years of work with Stoddard; and the formation and early years of the Tall Timbers Research Station, which Stoddard and Neel helped found in the pinelands near Tallahassee, Florida, in 1958. In their introduction, environmental historians Sutter and Way provide an overview of the longleaf ecosystem's natural and human history, and in his afterword, forest ecologist Jerry F. Franklin affirms the value of the Stoddard-Neel Approach.

The Book of L - G. Rozenberg 2012-12-06

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context

between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

People of the Owl - Kathleen O'Neal Gear

2004-06-14

New York Times and USA Today bestselling authors W. Michael Gear and Kathleen O'Neal Gear are famous for writing novels about prehistoric America that are fast-paced, steeped in cultural detail, and smart. In *People of the Owl* they combine their distinctive trademark of high action with a rich psychological drama. Four thousand years ago, in what centuries later will be the southern part of the United States, a boy is thrust into manhood long before he's ready. Young Salamander would much rather catch crickets and watch blue herons fish than dabble in the politics of his clan. But when his heroic brother is killed, Salamander becomes the leader of America's first city. He inherits his brother's two wives, who despise him, and is forced to marry his mortal enemy's daughter to forge an alliance for the trade goods his people desperately need. Cast adrift in a stark wilderness of political intrigue where assassins are everywhere, young Salamander has no choice but to become a man-and quickly. The GMO Deception - Sheldon Krinsky

2014-06-03

Seventy-five percent of processed foods on

supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

Plain Roots - Becki Willis 2018-11

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--and the roots--she so desperately craves.

For generations, her kin have tended the Old Places, keeping the land safe and fertile. But with the Summer Moon, the mood of her neighbors has soured. And Ari is no longer safe. The Fae have long ignored what occurs in the mortal world, passing through on their shadowy roads only long enough to amuse themselves. But the roads are slowly disappearing, leaving the Fae Clans isolated and alone. Where harmony between the spiritual and the natural has always reigned, a dissonant chord now rings in the ears of both Fae and mortal. And when murmurs of a witch-hunt hum through the town, some begin to wonder if the different omens are notes in the same tune. And all they have to guide them is a passing reference to something called the Pillars of the World...

The Power of the 2 x 2 Matrix - Alex Lowy
2011-03-23

By studying the work of hundreds of the most original and effective business minds, the authors present a common architecture that illuminates exceptional analysis and creative performance. 2 x 2 Thinking is characterized by a fundamental appreciation for the dynamic and complex nature of business. The best strategists go out of their way to tackle dilemmas rather than merely solve problems. They use opposition, creative tension, iteration and transcendence to get to the heart of issues and involve critical others in finding the best solutions. The authors demonstrate how to apply the 2 x 2 approach to a wide range of important

business challenges.

Evaluating Teaching and Learning - David Kember 2012-03-12

Every semester, colleges and universities ask students to complete innumerable course and teaching evaluation questionnaires to evaluate the learning and teaching in courses they have taken. For many universities it is a requirement that all courses be evaluated every semester. The laudable rationale is that the feedback provided will enable instructors to improve their teaching and the curriculum, thus enhancing the quality of student learning. In spite of this there is little evidence that it does improve the quality of teaching and learning. Ratings only improve if the instruments and the presentation of results are sufficiently diagnostic to identify potential improvements and there is effective counselling. *Evaluating Teaching and Learning* explains how evaluation can be more effective in enhancing the quality of teaching and learning and introduces broader and more diverse forms of evaluation. This guide explains how to develop questionnaires and protocols which are valid, reliable and diagnostic. It also contains proven instruments that have undergone appropriate testing procedures, together with a substantial item bank. The book looks at the specific national frameworks for the evaluation of teaching in use in the USA, UK and Australia. It caters for diverse methodologies, both quantitative and qualitative and offers solutions that allow evaluation at a wide range of levels: from classrooms to programmes to departments and entire institutions. With detail on all aspects of the main evaluation techniques and instruments, the authors show how effective evaluation can make use of a variety of approaches and combine them into an effective project. With a companion website which has listings of the questionnaires and item bank, this book will be of interest to those concerned with organising and conducting evaluation in a college, university, faculty or department. It will also appeal to those engaged in the scholarship of teaching and learning.

herself to her fate, she sees a movie that will change her life—Sixteen Candles. But in her case, life doesn't imitate art. Tormented in school and hopelessly in unrequited love with a handsome football player, Davie finds it bittersweet to dream of Molly Ringwald endings. When a cruel school prank goes too far, Davie leaves the life she knows and reinvents herself in the glittery world of Hollywood—as a beautiful and successful lounge singer. Just as she's about to ride off into the L.A. sunset, the past comes back with a vengeance, threatening to crush Davie's dreams—and break her heart again. With wholly original characters and a cinematic storyline, *32 Candles* introduces Ernessa T. Carter, a new voice in fiction with smarts, attitude, and sassiness to spare.

Materials for Advanced Batteries - D. Murphy
2013-03-09

The idea of a NATO Science Committee Institute on "Materials for Advanced Batteries" was suggested to JB and DWM by Dr. A. G. Chynoweth. His idea was to bring together experts in the field over the entire spectrum of pure research to applied research in order to familiarize everyone with potentially interesting new systems and the problems involved in their development. Dr. M. C. B. Hotz and Professor M. N. Ozdas were instrumental in helping organize this meeting as a NATO Advanced Science Institute. An organizing committee consisting of the three of us along with W. A. Adams, U. v

Alpen, J. Casey and J. Rouxel organized the program. The program consisted of plenary talks and poster papers which are included in this volume. Nearly half the time of the conference was spent in study groups. The aim of these groups was to assess the status of several key aspects of batteries and prospects for research opportunities in each. The study groups and their chairmen were: Current status and new systems J. Broadhead High temperature systems W. A. Adams Interface problems B. C. H. Steele Electrolytes U. v Alpen Electrode materials J. Rouxel These discussions are summarized in this volume. We and all the conference participants are most grateful to Professor J. Rouxel for suggesting the Aussois conference site, and to both he and Dr. M. Armand for handling local arrangements.
