Zen Odyssey - Janica Anderson 2018-01-19
Explore two lives—and a relationship—that profoundly shaped American Zen. Ruth Fuller Sasaki and Sokei-an Shigetsu Sasaki: two pioneers of Zen in the West. Ruth was an American with a privileged life, even during the height of the Great Depression, before she went to Japan and met D. T. Suzuki. Sokei-an was one of the first Zen priests to come to America; he brought the gift of the Dharma to the United States but in 1942 was put in an internment camp. One made his way to the West and the other would find her way to the East, but together they created the First Zen Institute of America and helped birth a new generation of Zen practitioners: among them, Alan Watts, Gary

Snyder, and Burton Watson. They were married less than a year before Sokei-an died, but Ruth would go on to helm trailblazing translations in his honor and to become the first foreigner to be the priest of a Rinzai Zen temple in Japan. With lyrical prose, authors Steven Schwartz and Janica Anderson bring Ruth and Sokei-an to life. Two dozen intimate photographs photos show us two people who aren't mere historical figures, but flesh and blood people, walking their paths.

Qualitative Research Practice - Jane Ritchie
2003-02-19

'An excellent introduction to the theoretical, methodological and practical issues of qualitative research... they deal with issues at all stages in a very direct, clear, systematic and practical manner and thus make the processes involved in qualitative research more transparent' - Nyhedsbrev "This is a "how to" book on qualitative methods written by people who do qualitative research for a living.... It is likely to become the standard manual on all

graduate and undergraduate courses on qualitative methods' - Professor Robert Walker, School of Sociology and Social Policy, University of Nottingham What exactly is qualitative research? What are the processes involved and what can it deliver as a mode of inquiry? Qualitative research is an exciting blend of scientific investigation and creative discovery. When properly executed, it can bring a unique understanding of people's lives which in turn can be used to deepen our understanding of society. It as a skilled craft used by practitioners and researchers in the 'real world'; this textbook illuminates the possibilities of qualitative research and presents a sequential overview of the process written by those active in the field. Qualitative Research Practice: - Leads the student or researcher through the entire process of qualitative research from beginning to end - moving through design, sampling, data collection, analysis and reporting. - Is written by practising researchers with extensive experience

of conducting qualitative research in the arena of social and public policy - contains numerous case studies. - Contains plenty of pedagogical material including chapter summaries, explanation of key concepts, reflective points for seminar discussion and further reading in each chapter - Is structured and applicable for all courses in qualitative research, irrespective of field. Drawn heavily on courses run by the Qualitative Unit at the National Centre for Social Research, this textbook should be recommended reading for students new to qualitative research across the social sciences.

Studies in the Laṅkāvatāra Sūtra - Daisetz Teitaro Suzuki 1999

The title Lankavatara might mean entering Lanka (Perhaps referring to the temporary Mahayana period of Ceylon), suggesting that the doctrine of this scripture are possibly consistent with earlier Buddhism preserved in the Pali language. Suzuki has greatly helped the reader of the basic scripture by discussing the main

ideas. He tells how to study this scripture, compares it with the popular Zen Buddhism discusses such typical and important doctrines as Mind-only the Triple body of the Buddha and many minor topics. Suzuki is both an exacting scholar and an understanding exponent of these difficult concepts. He adds a Sanskrit-Chinese-English Glossary, and also an Index. This work is essential for grasping the main ideas of the scripture.

Trichloroethylene, Tetrachloroethylene and Some Other Chlorinated Agents - International Agency for Research on Cancer 2015-09-30

This publication provides an assessment of the carcinogenic hazards associated with exposure to seven chlorinated solvents, including trichloroethylene, tetrachloroethylene, and their metabolites (dichloroacetic acid, trichloroacetic acid, and chloral hydrate). All these agents were previously assessed by IARC Working Groups more than 10 years ago, and new epidemiological and mechanistic evidence has been considered in this reevaluation.

Trichloroethylene has been used in several industries, such as manufacture and repair of aircraft and automobiles, and in screw-cutting, while tetrachloroethylene is widely used in dry-cleaning and as a feedstock for the production of chlorinated chemicals.

Handbook of Driver Assistance Systems - Hermann Winner 2015-10-15

This fundamental work explains in detail systems for active safety and driver assistance, considering both their structure and their function. These include the well-known standard systems such as Anti-lock braking system (ABS), Electronic Stability Control (ESC) or Adaptive Cruise Control (ACC). But it includes also new systems for protecting collisions protection, for changing the lane, or for convenient parking. The book aims at giving a complete picture focusing on the entire system. First, it describes the components which are necessary for assistance systems, such as sensors, actuators, mechatronic subsystems, and control elements. Then, it explains key features for the user-friendly design of human-machine interfaces between driver and assistance system. Finally, important characteristic features of driver assistance systems for particular vehicles are presented: Systems for commercial vehicles and motorcycles.

The Fingerprint - U.s. Department of Justice

2014-08-02

The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

Imperial-Way Zen - Christopher Ives

2009-07-08

During the first half of the twentieth century, Zen Buddhist leaders contributed actively to Japanese imperialism, giving rise to what has been termed "Imperial-Way Zen" (Kodo Zen). Its foremost critic was priest, professor, and activist Ichikawa Hakugen (1902-1986), who spent the decades following Japan's surrender almost single-handedly chronicling Zen's support of Japan's imperialist regime and pressing the issue of Buddhist war responsibility. Ichikawa

focused his critique on the Zen approach to religious liberation, the political ramifications of Buddhist metaphysical constructs, the traditional collaboration between Buddhism and governments in East Asia, the philosophical system of Nishida Kitaro (1876-1945), and the vestiges of State Shinto in postwar Japan.

Despite the importance of Ichikawa's writings, this volume is the first by any scholar to outline his critique. In addition to detailing the actions and ideology of Imperial-Way Zen and Ichikawa's ripostes to them, Christopher Ives offers his own reflections on Buddhist ethics in light of the phenomenon. He devotes chapters to outlining Buddhist nationalism from the 1868 Meiji Restoration to 1945 and summarizing Ichikawa's arguments about the causes of Imperial-Way Zen. After assessing Brian Victoria's claim that Imperial-Way Zen was caused by the traditional connection between Zen and the samurai, Ives presents his own argument that Imperial-Way Zen can best be

understood as a modern instance of Buddhism's traditional role as protector of the realm. Turning to postwar Japan, Ives examines the extent to which Zen leaders have reflected on their wartime political stances and started to construct a critical Zen social ethic. Finally, he considers the resources Zen might offer its contemporary leaders as they pursue what they themselves have identified as a pressing task: ensuring that henceforth Zen will avoid becoming embroiled in international adventurism and instead dedicate itself to the promotion of peace and human rights. Lucid and balanced in its methodology and well grounded in textual analysis, Imperial-Way Zen will attract scholars, students, and others interested in Buddhism, ethics, Zen practice, and the cooptation of religion in the service of violence and imperialism.

Introduction to Natural Language Processing - Jacob Eisenstein 2019-10-01

A survey of computational methods for understanding, generating, and manipulating human language, which offers a synthesis of classical representations and algorithms with contemporary machine learning techniques. This textbook provides a technical perspective on natural language processing—methods for building computer software that understands, generates, and manipulates human language. It emphasizes contemporary data-driven approaches, focusing on techniques from supervised and unsupervised machine learning. The first section establishes a foundation in machine learning by building a set of tools that will be used throughout the book and applying them to word-based textual analysis. The second section introduces structured representations of

language, including sequences, trees, and graphs. The third section explores different approaches to the representation and analysis of linguistic meaning, ranging from formal logic to neural word embeddings. The final section offers chapter-length treatments of three transformative applications of natural language processing: information extraction, machine translation, and text generation. End-of-chapter exercises include both paper-and-pencil analysis and software implementation. The text synthesizes and distills a broad and diverse research literature, linking contemporary machine learning techniques with the field's linguistic and computational foundations. It is suitable for use in advanced undergraduate and graduate-level courses and as a reference for software engineers and data scientists. Readers should have a background in computer programming and college-level mathematics. After mastering the material presented, students will have the technical skill to build and analyze

novel natural language processing systems and to understand the latest research in the field.

Diesel and Gasoline Engine Exhausts and Some Nitroarenes - The International Agency for Research on Cancer 2015-01-01

In 1988, IARC classified diesel exhaust as probably carcinogenic to humans (Group 2A). An Advisory Group which reviews and recommends future priorities for the IARC Monographs Program had recommended diesel exhaust as a high priority for re-evaluation since 1998. There has been mounting concern about the cancer-causing potential of diesel exhaust, particularly based on findings in epidemiological studies of workers exposed in various settings. This was re-emphasized by the publication in March 2012 of the results of a large US National Cancer Institute/National Institute for Occupational Safety and Health study of occupational exposure to such emissions in underground miners, which showed an increased risk of death from lung cancer in exposed workers. The

scientific evidence was reviewed thoroughly by the Working Group and overall it was concluded that there was sufficient evidence in humans for the carcinogenicity of diesel exhaust. The Working Group found that diesel exhaust is a cause of lung cancer (sufficient evidence) and also noted a positive association (limited evidence) with an increased risk of bladder cancer (Group 1). The Working Group concluded that gasoline exhaust was possibly carcinogenic to humans (Group 2B), a finding unchanged from the previous evaluation in 1989.

Where the Heart Beats - Kay Larson
2013-07-30

A “heroic” biography of John Cage and his “awakening through Zen Buddhism”—“a kind of love story” about a brilliant American pioneer of the creative arts who transformed himself and his culture (The New York Times) Composer John Cage sought the silence of a mind at peace with itself—and found it in Zen Buddhism, a spiritual path that changed both his music and his view of the universe. “Remarkably researched, exquisitely written,” Where the Heart Beats weaves together “a great many threads of cultural history” (Maria Popova, Brain Pickings) to illuminate Cage’s struggle to accept himself and his relationship with choreographer Merce Cunningham. Freed to be his own man, Cage originated exciting experiments that set him at the epicenter of a new avant-garde forming in the 1950s. Robert Rauschenberg, Jasper Johns, Andy Warhol, Yoko Ono, Allan Kaprow, Morton Feldman, and Leo Castelli were

among those influenced by his 'teaching' and 'preaching.' Where the Heart Beats shows the blossoming of Zen in the very heart of American culture.

Zen Inspirations - Miriam Levering 2013-02-04
Zen Inspirations offers a selection of appealing

texts that bring insight and contemplation to busy modern lives - from the complete koans of the Gateless Gate (a 13th-century collection of spiritual puzzles used in the practice of Zen) to a generous selection of haiku and other poems that are not only thought provoking and evocative but rich in beauty and paradox. The anthology includes work by the masters of the Golden Age of Zen as well as by contemporary Zen masters. Many of the translations are by Lucien Stryk, the esteemed poet and Zen practitioner, who has also contributed a foreword to the book. An illuminating and accessible introduction, written by Zen scholar Dr Miriam Levering, places the writings in context and explores key concepts. The photographs, carefully selected to harmonize with the texts, provide a magnificent visual framework. Readers are invited to open their imaginations to the joining of text and image, and let the quiet wisdom of both seep into their being.

Nordic Nutrition Recommendations 2012 -
Nordic Council of Ministers 2014-03-06

The Nordic countries have collaborated in setting guidelines for dietary composition and recommended intakes of nutrients for several decades through the joint publication of the Nordic Nutrition Recommendations (NNR). This 5th edition, the NNR 2012, gives Dietary Reference Values (DRVs) for nutrients, and compared with earlier editions more emphasis has been put on evaluating the scientific evidence for the role of food and food patterns contributing to the prevention of the major diet-related chronic diseases. Recommendations on physical activity are included and interaction with physical activity has been taken into account for the individual nutrient recommendations wherever appropriate. A chapter on sustainable food consumption has been added. A Nordic perspective has been accounted for in setting the reference values. The NNR 2012 has used an evidence-based and

transparent approach in assessing associations between nutrients and foods and certain health outcomes. Systematic reviews form the basis for the recommendations of several nutrients and topics, while a less stringent update has been done for others. The systematic reviews and individual chapters have been peer reviewed and the systematic reviews are published in the Food & Nutrition Research journal. The draft chapters were subject to an open public consultation. Recommendations have been changed only when sufficient scientific evidence has evolved since the 4th edition. The primary aim of the NNR 2012 is to present the scientific background of the recommendations and their application. A secondary aim is for the NNR 2012 to function as a basis for the national recommendations that are adopted by the individual

Chan Insights and Oversights - Bernard Faure
2020-09-01

For many people attracted to Eastern religions (particularly Zen Buddhism), Asia seems the

source of all wisdom. As Bernard Faure examines the study of Chan/Zen from the standpoint of postmodern human sciences and literary criticism, he challenges this inversion of traditional "Orientalist" discourse: whether the Other is caricatured or idealized, ethnocentric premises marginalize important parts of Chan thought. Questioning the assumptions of "Easterners" as well, including those of the charismatic D. T. Suzuki, Faure demonstrates how both West and East have come to overlook significant components of a complex and elusive tradition. Throughout the book Faure reveals surprising hidden agendas in the modern enterprise of Chan studies and in Chan itself. After describing how Jesuit missionaries brought Chan to the West, he shows how the prejudices they engendered were influenced by the sectarian constraints of Sino-Japanese discourse. He then assesses structural, hermeneutical, and performative ways of looking at Chan, analyzes the relationship of Chan and local religion, and

discusses Chan concepts of temporality, language, writing, and the self. Read alone or with its companion volume, *The Rhetoric of Immediacy*, this work offers a critical introduction not only to Chinese and Japanese Buddhism but also to "theory" in the human sciences.
