Understanding Occupational & Organizational Psychology - Lynne J Millward 2005-03-22

'This is a really useful and comprehensive textbook that will provide readers with all their needs as a primer in the field of occupational and organisational psychology' - Cary L Cooper, Times Higher Educational Supplement 'Provides excellent coverage of the main areas of Industrial, Work and Organisational Psychology. All main topics at the individual and group levels are covered... a highly competent, research based introductory text' - Professor Neil Anderson, University of Amsterdam Understanding Occupational and Organizational Psychology is an invaluable resource for students doing a course in occupational and organizational psychology, either at third year undergraduate or Masters level. The text provides comprehensive coverage of the British Psychological Society's training requirements for becoming a chartered occupational psychologist, yet it is also compliant with European training guidelines for industrial, work and organizational psychology too. This book will prompt and inspire further reading and research as well as ideas for dissertations, problem formulation and the creative application of knowledge to various situations. Ideal if you want to get ahead with your undergraduate study or get your foot on the ladder to becoming a fully-fledged scientist-practitioner.

Teaching Psychology Online - Kelly S. Neff 2013

Intended as a resource for psychology educators ranging from teaching assistants to experienced faculty, this book shows readers how to effectively create and manage an online psychology course. Guidelines for preparing courses, facilitating communication, and assigning grades are provided along with activities and assessments geared specifically towards psychology. Pedagogical theories and research are fused with the authors' teaching experiences to help maximize the reader's abilities as an online psychology instructor. The book focuses on psychology education at the undergraduate level but it also includes material appropriate for graduate students and professionals. Readers will find helpful examples from all the major content areas including introductory, social, developmental, biological, abnormal, and positive psychology, and human sexuality. Every chapter is organized around 3 sections. The Purpose part introduces the key concepts, theory, and research. The Implementation section reviews the 'nuts and bolts' of online teaching, and the Troubleshooting section addresses key problems and potential solutions. 'Text boxes' highlight important tips. The website <http://www.TeachingPsychologyOnline.com> provides additional tips, links to related articles and other resources, and examples of online psychology assignments from across the discipline. The book addresses: launching your online course; enhancing student/instructor communication; modes of multimedia and how to integrate them into your course including lecture videos, podcasting, blogging, wikis, and social networking sites; creating activities for online courses; assessment and grading; and online education trend including doctoral level education. Ideal for instructors teaching ANY psychology course, from introductory to upper-level undergraduate to graduate courses, this text can be used for developing on line courses in applied areas such as counseling, health, and industrial psychology as well as for courses in social, cognitive, and developmental psychology. Instructors of any technical skill level can use this book, including those familiar with Blackboard to those who are just getting started. Whether you are a seasoned pro or new to teaching psychology online, the tips in this book can help improve your instruction, reduce your prep time, and enhance your students' success.

Writing for Psychology - Mark L. Mitchell 2012-03-30

WRITING FOR PSYCHOLOGY, Fourth Edition offers concise assistance for students writing their research analyses using APA style. By providing concrete examples of common errors, the authors show rather than merely tell students what to do and what to avoid. This manual will help students adhere to the basics of APA style; refine critical thinking skills, library search skills, revising skills, editing skills, and proofing skills; and avoid plagiarism. Checklists precede a summary at the end of every chapter, giving students the chance to make sure they have been thorough in their reports. Studies On The Self And Social Cognition - M F Pichevin 1993-10-29

This volume presents a selection of the papers presented at the International Conference on Cognition, Social Cognition and the Question of the Self, and some original contributions by well-known scholars on these topics. Its main purpose is to present the European studies on the self from a social cognitive perspective. The first part (introduced by A Greenwald and M Jarymowicz) focuses on the sociopsychological processes linked to the self when it acts as a reference point or as a prototype in social perception. In the second part (introduced by W Doise), the authors analyze the social conditions, particularly group membership, that modify the functioning of such processes. The third part (introduced by J-M Monteil) contributes to the debate on the relationship between cognition and social cognition.

Developmental Psychology - Alan M Slater 2012-06-22

Electronic Inspection Copy available here Revisiting the Classic Studies is a series of texts that introduces readers to the studies in psychology that changed the way we think about core topics in the discipline today. It provokes students to ask more interesting and challenging questions about the field by encouraging a deeper level of engagement both with the details of the studies themselves and with the nature of their contribution. Edited by leading scholars in their field and written by researchers at the cutting edge of these developments, the chapters in each text provide details of the original works and their theoretical and empirical impact, and then discuss the ways in which thinking and research has advanced in the years since the studies were conducted. Revisiting the Classic Studies in Developmental Psychology traces 14 ground-breaking studies by researchers such as Harlow, Meltzoff & Moore, Kohlberg and Bandura to re-examine and reflect on their findings and engage in a lively discussion of the subsequent work that they have inspired. Suitable for students on developmental psychology courses at all levels, as well as anyone with an enquiring mind

Best Practices for Teaching Beginnings and Endings in the Psychology Major - Dana S. Dunn 2010-01-12

Introductory and capstone experiences in the undergraduate psychology program are crucial ways to engage students in their major and psychology department, impart realistic expectations, and prepare them

for life beyond college. Providing the right orientation and capstone courses in psychology education is increasingly a concern of instructors, department chairs, program directors, and deans, and both types of courses have become important sources for gathering pre- and post-coursework assessment data for degree learning outcomes. The strategies presented here have been designed to help educators examine issues around teaching the introductory or careers course and developing a psychology-specific orientation program. The authors also provide concrete suggestions for building capstone experiences designed to fit the needs of a department, its pedagogical philosophy, or the educational agenda of the college or university. Undergraduate psychology curriculum designers and instructors can benefit from learning innovative and effective strategies for introducing the major to first-year students and, at graduation, for bringing closure, reinforcing the overall departmental learning outcomes, and helping students apply their disciplinary knowledge in capstone experiences and post-graduate life. In this collection of articles, psychology instructors involved in the improvement of teaching and learning review the research and share their own successes and challenges in the classroom. Discussions include effective practices for helping students become acclimated to and engaged in the psychology major, application of developmental knowledge and learning communities to course design, and use of quality benchmarks to improve introductory and capstone courses. Other chapters describe innovations in the design of stand-alone courses and offer concrete advice on counseling psychology graduates about how to use what they have learned beyond their higher education experiences.

Essentials of Psychology - Douglas Bernstein 2018-01-01

In a concise and readable 16-chapter format, *ESSENTIALS OF PSYCHOLOGY*, 7th Edition, incorporates the most effective features of the sixth edition along with the latest and most important research findings from psychological science. Combining extensive pedagogical support with an emphasis on active learning, the text challenges students to learn by doing -- to actively participate and to think about what they are learning rather than just passively read written information. The

integrated pedagogical program helps students master the material by supporting the elements of the PQ4R (Preview, Question, Read, Recite, Review, and Reflect) study system. Douglas Bernstein also shows how topics in psychology are interrelated and guides students in thinking critically -- including organizing select research studies around questions to help readers think objectively about research and results. A Portrait of the Israeli Soldier - Reuven Gal 1986

No army in the Middle East has been as written about in English as has Israel's, yet this book actually says something new. Reuven Gal, former chief psychologist of the IDF, looks at the influences on the Israeli soldier and their impact on the IDF's performance. He is able to deal with issues such as motivation and camaraderie, leadership and heroism from a human viewpoint. . . . a detailed assembly of data such as this one is welcome, and the sociological-psychological jargon is kept at a minimum. This is neither hagiography nor psychobabble, and it contains a great deal of detail. *Middle East Journal*
