Enterprise Architecture for Strategic Management of Modern IT Solutions - Tiko Iyamu 2022-03-16

The popularity of enterprise architecture (EA) has increased in the last two decades, in both business and academic domains. Despite the cumulative interest from all sectors, the implementation and practice of

EA have been entangled with numerous challenges and complexities. Consequently, some organisations continue to theorise the concept, which has ramifications on practice and return on investment (ROI). This has led to many studies that have been conducted, to understand the complexities impacting the implementation and practice of EA in organisations. Yet, the trajectory of some convolutions remains mystery in many quarters. This attributes to the struggle to articulate the value of EA in many environments. Hence many organisations find it difficult to apply EA for strategic management of modern information technology (IT) solutions. Enterprise Architecture for Strategic Management of Modern IT Solutions provides guidance on how to employ EA in deploying and managing IT solutions from pragmatic and implementable strategies' perspectives. Until now, implementation and practice of EA have been slow, despite its growing popularity and interest from all sectors. The author employs sociotechnical theories such as actor-network theory (ANT) and structuration theory (ST) as lenses to examine and explain why and how challenges and complexities exist and derail the implementation or practice of EA in organisations. By doing so, this serves to enable practitioners and readers to gain fresh insights on why the challenges exist and how they can be addressed in creating collaborative capabilities for business enhancement, sustainability, and competitiveness. The book provides detailed insights on how to apply EA for organisational purposes, from three main fronts. First, it explains the implications that lack of understanding of EA have on organisational activities and processes. Second, it examines the challenges and complexities that hinder the implementation and practice of EA in organisations. Third, it proposes models and frameworks on how EA can be applied for strategic management of modern IT solutions in organisations. Written for postgraduates, researchers, academics, and professionals in the fields of EA, IT, and information systems, this book provides a valuable resource that will enable and enhance implementation and practice of EA including future studies.

How to Commercialize Chemical Technologies for a Sustainable Future - Timothy J. Clark 2021-06-08

The definitive guide for scientific entrepreneurs commercializing sustainable technologies in the chemical sector Lacking the considerable resources of multinational chemical companies, entrepreneurs face a unique set of risks and challenges. How to Commercialize Chemical Technologies for a Sustainable Future is targeted at innovators who are embarking on the entrepreneurial path with their sustainable chemical technology but are unsure of what steps to take. This first-of-its-kind resource features contributions from a diverse team of expert authors, including engineers, venture capitalists, marketing specialists, intellectual property professionals, regulatory experts, industry practitioners, and many others. Accessible and highly practical, this real-world guide covers each step of the technology commercialization process, from market landscape analysis and financing to scale-up and strategic partnering. Throughout the book, effective tactics and strategies for growing a new venture are supported by case studies highlighting the economic and environmental impact of successful commercialization, and identifying the common mistakes that lead to lost opportunities. Filled with invaluable advice and actionable steps, this book: Uses valuation concepts, tools, and examples to demonstrate that for a chemical technology to be sustainable it must not only have market value but also confer benefits to human well-being and the environment Offers templates and tools for understanding what customers need, who the competition is and how to successfully differentiate your product to those customers Describes how to practically advance your technology from conception all the way to commercial demonstration Presents

advantages and disadvantages of strategic partnering from the perspective of the start-up and the larger industrial partner, along with strategies to mitigate risks within a partnership Provides an overview of the legal regulatory requirements for bringing new chemicals to market in several key geographic regions, as well as the impact of public policy on commercialization Offers insights and practical strategies on intellectual property management, raising investment, and operationalizing a startup company How to Commercialize Chemical Technologies for a Sustainable Future is essential reading for budding entrepreneurs in chemistry, materials science, and chemical engineering looking to bring their sustainable technologies to market. It is also a valuable reference for investors, policymakers, regulators, and other professionals.

Bridging the Gap Between Arithmetic & Algebra - Bradley S. Witzel 2015-11-15

Although two federal panels have concluded that all students can learn mathematics and most can succeed through Algebra 2, the abstractness of algebra and missing precursor understandings may be overwhelming to many students ... and their teachers. Bridging the Gap Between Arithmetic & Algebra responds to this need for instruction and interventions that go beyond typical math lesson plans. Providing a review of evidence-based practices, the book is an essential reference for mathematics teachers and special education teachers when teaching mathematics to students who struggle with the critical concepts and skills necessary for success in algebra. Audiences: General education (mathematics) teachers, special education teachers, administrators, teacher educators.

Nature-Based Solutions for Restoration of Ecosystems and Sustainable Urban Development - Thomas Panagopoulos 2020-06-16

This volume examines the applicability of nature-based solutions in ecological restoration practice and in contemporary landscape architecture by bringing together ecology and architecture in the built environment. Green infrastructure is used to address urban challenges such as climate change adaptation, disaster risk reduction, and stormwater management. In addition, thermal comfort nature-based solutions reintroduce critical connections between natural and urban systems. In light of ongoing developments in sustainable urban development, the goal is a paradigm shift towards a landscape that restores and rehabilitates urban ecosystems. The ten contributions to this book examine a wide range of successful cases of designing healthier, greener and more resilient landscapes in different geographical contexts, from the United States of America and Brazil, through various European regions, to Singapore and China. While some chapters attempt to conceptualize the interconnections between cities and nature, others clearly have an empirical focus. Therefore, this volume provides a rich body of work and acts as a starting point for further studies on restoration of ecosystems and integrative policies such as the United Nations Sustainable Development Goals.

Data Protection and Privacy - Ronald Leenes 2018-12-13

The subjects of Privacy and Data Protection are more relevant than ever, and especially since 25 May 2018, when the European General Data Protection Regulation became enforceable. This volume brings together papers that offer conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy and data protection. It is one of the results of the eleventh annual International Conference on Computers, Privacy, and Data Protection, CPDP 2018, held in Brussels in January 2018. The book explores the following topics: biometrics and data protection in criminal justice processing, privacy, discrimination and platforms for men who have sex with men, mitigation through data protection instruments of unfair inequalities as a result of machine learning, privacy and human-robot interaction in robotized healthcare, privacy-by-design, personal data protection of deceased data subjects, large-scale face databases and the GDPR, the new Europol regulation, rethinking trust in the Internet of Things, fines under the GDPR, data analytics and the GDPR, and the essence of the right to the protection of personal data. This interdisciplinary book was written while the reality of the General Data Protection Regulation 2016/679 was becoming clear. It discusses open issues and daring and prospective approaches. It will serve as an insightful resource for readers with an interest in computers, privacy and data protection.

Bridging the Gap - Lesley Roessing 2014-07-30

Lesley Roessing's book, Bridging the Gap: Reading Critically and Writing Meaningfully to Get to the Core, argues that memoir, or creative nonfiction, can help students bridge narrative structure and nonfiction writing in order to meet Common Core standards. The text includes information and resources on implementation for teachers.

Bridging the Opportunity Gap - Arrey Obenson 2020-12-29

It is all about the opportunity as opposed to the challenges. Too often, leaders are overly focused on and thus defined by challenges and problems. Being defined by these challenges inevitably leads to collapse under their weight. In Bridging the Opportunity Gap, Arrey Obenson presents a paradigm shift for leaders, uncovering how to ascend to the next level and transform your organization or business. Told against the backdrop of a series of his own leadership experiences, Obenson offers a set of principles that enable leaders to achieve strategic goals. Using the

power of stories spanning nearly two decades of leading change within his community and an international organization, Obenson challenges readers to think differently and focus on opportunities over challenges. By doing this and following the key principles laid out in the book, you will become a leader able to change the world.

Bridging the Achievement Gap - Rex Fortune 2018-11-12

The Second Edition of *Bridging the Achievement Gap: What Successful Educators and Parents Do* includes 11 examples of K-12 high performing public schools which serve mostly African American students. The book argues that school district leaders with low performing schools should consider what these high performing schools do in their planning to reverse the on-going trend of relatively low academic performance of African American students. Included in the "Solution Chapter" is the rationale for state legislation to provide funding for students who are low performing, but may not qualify for current funding for low income students. Also included in that chapter is the actual legislative language currently under consideration by the California State Legislature. The book contains other supporting research on this topic.

Bridging the Gap Between College and Law School - Ruta K. Stropus 2014

This popular book helps students make the transition from their undergraduate experience to law school learning. Unlike other "introduction to law school" texts, *Bridging the Gap* offers a different approach because it: explains the "why" of law, providing students with the context necessary to understand why law school is taught in a certain manner; explains the "how" of the law, setting out a step-by-step process that will help students adapt to the law school setting; explains the "what" of the law, giving students the opportunity to practice the problem-solving process by providing numerous exercises in a variety of subject matter areas. Rather than giving only general advice, or black letter law and some practice problems for a specific subject, *Bridging the Gap* provides the context, the process, and the problems. Written by two former law school professors who used these techniques with thousands of students, *Bridging the Gap* is a guide to what really works in law school.

ECSCW 2009: Proceedings of the 11th European Conference on Computer Supported Cooperative Work, 7-11 September 2009, Vienna, Austria - Ina Wagner 2009-08-19

This volume presents the proceedings of ECSCW'09, the 11th European Conference on Computer Supported Cooperative Work. Each conference offers an occasion to critically review our research field, which has been multidisciplinary and committed to high scientific standards, both theoretical and methodological, from its beginning. These proceedings represent discussions and contributions to ongoing challenges. One challenge comes from emerging new technologies connected to 'social computing', gaming, as well as applications supporting citizen participation in their communities. As boundaries between home and work erode with the increased movement of work into home environments, and new applications further blur the once separate conceptions of work and leisure, our intellectual community faces challenges in the ways we think about and study work. Other challenges result from transformations of the world of work itself and the role of IT in these. They have been taken up in in-depth studies of design practice, software development, and manufacturing, as well as in the growing body of research on health care contexts and applications. Finally, there is the question of what is the European perspective in our community and whether it is worthwhile to anchor our research more firmly in such a perspective. Of high relevance to our field is the strong grounding of technology development in an understanding of human activity. The nineteen full papers, four short papers and one discussion paper selected for this conference deal with and reflect on some of these challenges, thus representing the lively debate currently ongoing in our field of research.

Organic Chemistry, Student Solution Manual and Study Guide - David R. Klein 2021-01-07

Success in organic chemistry requires mastery in two core aspects: fundamental concepts and the skills needed to apply those concepts and solve problems. With *Organic Chemistry, Student Solution Manual and Study Guide*, 4th Edition, students can learn to become proficient at approaching new situations methodically, based on a repertoire of skills. These skills are vital for successful problem solving in organic chemistry.

Judging Addicts - Rebecca Tiger 2012-12-03

The number of people incarcerated in the U.S. now exceeds 2.3 million, due in part to the increasing criminalization of drug use: over 25% of people incarcerated in jails and prisons are there for drug offenses. *Judging Addicts* examines this increased criminalization of drugs and the medicalization of addiction in the U.S. by focusing on drug courts, where defendants are sent to drug treatment instead of prison. Rebecca Tiger explores how advocates of these courts make their case for what they call "enlightened coercion," detailing how they use medical theories of addiction to justify increased criminal justice oversight of defendants who, through this process, are defined as both "sick" and "bad." Tiger shows how these courts fuse punitive and therapeutic approaches to drug use in the name of a "progressive" and "enlightened" approach to addiction. She critiques the medicalization of drug users, showing how the disease designation can complement, rather than contradict, punitive approaches, demonstrating that these courts are neither unprecedented nor unique, and that they contain great potential to expand punitive control over drug users. Tiger argues that the medicalization of addiction has done little to stem the punishment of drug users because of a key conceptual overlap in the medical and punitive approaches—that habitual drug use is a problem that needs to be fixed through sobriety. *Judging Addicts* presses policymakers to implement humane responses to persistent substance use that remove its control entirely from the criminal justice system and ultimately explores the nature of crime and punishment in the U.S. today.

Changing Policies to Close the Achievement Gap - Cynthia D. Prince 2004

In this guide, Cynthia D. Prince identifies state and local policies that tend to make the achievement gap worse and describes policy changes that superintendents have made with the support of their boards to help narrow the gap. She also examines policies that aggravate the inequitable distribution of quality teachers and principals, that restrict student access to challenging coursework, and that reduce academic instruction time.

Advances in Knowledge Discovery and Data Mining - Hady W. Lauw 2020

The two-volume set LNAI 12084 and 12085 constitutes the thoroughly refereed proceedings of the 24th Pacific-Asia Conference on Knowledge Discovery and Data Mining, PAKDD 2020, which was due to be held in Singapore, in May 2020. The conference was held virtually due to the COVID-19 pandemic. The 135 full papers presented were carefully reviewed and selected from 628 submissions. The papers present new ideas, original research results, and practical development experiences from all KDD related areas, including data mining, data warehousing, machine learning, artificial intelligence, databases, statistics, knowledge engineering, visualization, decision-making systems, and the emerging applications. They are organized in the following topical sections: recommender systems; classification; clustering; mining social networks; representation learning and embedding; mining behavioral data; deep learning; feature extraction and selection; human, domain, organizational and social factors in data mining; mining sequential data; mining imbalanced data; association; privacy and security; supervised learning; novel algorithms; mining multi-media/multi-dimensional data;

application; mining graph and network data; anomaly detection and analytics; mining spatial, temporal, unstructured and semi-structured data; sentiment analysis; statistical/graphical model; multi-source/distributed/parallel/cloud computing.
