2015-06-06

The 73rd Constitutional Amendment is a milestone in the modern history of India and it has taken democracy to the grassroots. It aims to transform the characteristics of our democracy from representative to representative and participatory democracy.

Before going into the details of the process of decentralization of powers in the states over a period, it is necessary to explain the basic framework of decentralization of powers. To operationalise the basic framework – both letter and spirit – the state governments have to take an array of steps that are fundamental and basic for the establishment of a local governance system. By keeping the above framework, in the last twenty years how decentralization took place in south Indian states – Tamil Nadu, Karnataka, Andhra Pradesh and Kerala has been evaluated in this volume. The four chapters have been written by G. Palanithurai, M. Gobinath Reddy, M. Sivanna and Jos Chathukulam. Along with the above state-specific chapters, there are a few chapters covering Panchayat finance in South Indian States and democratization in this volume written by B. DevendraBabu and G. Palanithurai, respectively. S. N. Sangita has written a chapter on Political regime,

Decentralized Governance and social security in south Indian states. It is also included in this volume. Further the chapter written by V. N. Alok on “Devolution of Powers to Local Bodies” has been incorporated in the present work. Finally yet another paper on “Decentralization of Powers: Acceleration and Deceleration” by G. Palanithurai for a different journal has also been included. Thus totally nine papers have been accommodate

Marginalized Communities and Decentralized Institutions in India - Bala Ramulu Chinnala
2020-12-22

This book examines the causes

and consequences of marginalization of social groups and the state of democratic decentralization in India in the unfolding context of globalization and changing perspectives of development models and institutions. The first of its kind, it correlates macro-and micro-level issues to understand social exclusion and inclusion and the level of participation of democratic institutions at the grassroots level since economic liberalization (1991) and the 73rd Constitution Amendment Act of 1992, marking three decades since granting constitutional status to the Panchayati Raj Institutions. The study looks at the linkages between certain key themes: the neoliberal model of development, growth, and distributive justice; the role and mandate of grassroots-level public institutions enshrined in the Constitution, inclusive growth, and the Indian State; the role of political executives from marginalized communities; factors involved in people's

active participation in the development process; and challenges in current political structures, inclusion of marginalized communities in governance and development, and real empowerment of local bodies and institutions. The book argues that legislative enactments, constitutional status, reservation of seats to marginalized communities, and so on can only empower local bodies and their leadership symbolically. The success of these provisions depends on the overall development model of the country; the support of national and state governments; the socio-economic and political environment of the institutions; and effective service and accountability. Topical and rich in empirical data, including case studies, this book will be an essential read for scholars and researchers of political science, development studies, governance, public administration, sociology, public policy, and also for government agencies, administrators and

bureaucrats, policymakers, international organizations, think tanks, and NGOs working in the area.
