[Handbook of Deep Trade Agreements](#) - Aaditya Mattoo
2020-09-23

Deep trade agreements (DTAs) cover not just trade but additional policy areas, such as international flows of investment and labor and the protection of intellectual property rights and the environment. Their goal is integration beyond trade or deep integration. These

agreements matter for economic development. Their rules influence how countries (and hence, the people and firms that live and operate within them) transact, invest, work, and ultimately, develop. Trade and investment regimes determine the extent of economic integration, competition rules affect economic efficiency, intellectual property rights

matter for innovation, and environmental and labor rules contribute to environmental and social outcomes. This Handbook provides the tools and data needed to analyze these new dimensions of integration and to assess the content and consequences of DTAs. The Handbook and the accompanying database are the result of collaboration between experts in different policy areas from academia and other international organizations, including the International Trade Centre (ITC), Organisation for Economic Co-operation and Development (OECD), United Nations Conference on Trade and Development (UNCTAD), and World Trade Organization (WTO).

Too often in the history of Mexico, women have been portrayed as marginal figures rather than legitimate participants in social processes. As the twentieth century draws to a close, Mexican women of the countryside can be seen as true historical actors: mothers and heads of households, factory and field workers, community activists, artisans, and merchants. In this new book, thirteen contributions by historians, anthropologists, and sociologists—from Mexico as well as the United States—elucidate the roles of women and changing gender relations in Mexico as rural families negotiated the transition from an agrarian to an industrial society. Drawing on Mexican community studies, gender studies, and rural studies, these essays overturn the stereotypes of Mexican peasant women by exploring the complexity of their lives and roles and examining how these have changed over time. The book emphasizes the active

roles of women in the periods of civil war, 1854-76, and the commercialization of agriculture, 1880-1910. It highlights their vigorous responses to the violence of revolution, their increased mobility, and their interaction with state reforms in the period from 1910 to 1940. The final essays focus on changing gender relations in the countryside under the impact of rapid urbanization and industrialization since 1940. Because histories of Latin American women have heretofore neglected rural areas, this volume will serve as a touchstone for all who would better understand women's lives in a region of increasing international economic importance. Women of the Mexican Countryside demonstrates that, contrary to the peasant stereotype, these women have accepted complex roles to meet constantly changing situations.

Trade Law and Regulation in Korea - Süng-hwa Chang 2011

In the face of rapid development of the Korean economy, Korean trade laws and regulations have changed in many different ways over the last few decades. This comprehensive book introduces the laws and regulations affecting trade with Korea. Beginning with an introduction to the trading regime in Korea, and an overview of the basic trade laws and regulations, the expert contributors move on to cover specific topics in detail. They examine import/export measures (such as customs, rules on country of origin, import procedures, and export controls on strategic items) as well as trade remedies and trade in services. In addition,

the book assesses the impact of competition laws on trade and concludes by considering the issues of foreign investment and FTAs. Written by Korean trade law scholars and practitioners with highly specialised knowledge, this authoritative book will be an invaluable guide for those needing practical knowledge of Korean trade law and systems, as well as researchers with an interest in the region or international trade with Korea.

Want Not is a highly inventive

and corrosively funny story of
our times, a three-pronged tale
of human excess that sifts
through the detritus of several
disparate lives, all conjoined in
their come-hell-or-high-water
search for fulfillment. As the
novel opens on Thanksgiving
Day, readers are telescoped
into the worlds of a freegan
couple living off the grid in
Manhattan, a once-prominent
linguist struggling with midlife,
and a New Jersey debt-
collection magnate with a
second chance at getting
things right. Want and desire
propel each one forward on
their paths toward something,
anything more, but when their
worlds collide, briefly,
randomly, yet irrevocably, the
weight of that wanting
ultimately undoes each of
them, leaving them to pick up
the pieces from what's left
behind.
