*Surgery* - Christian de Virgilio 2015-01-10

Surgery: A Case Based Clinical Review provides the reader with a comprehensive understanding of surgical diseases in one easy to use reference that combines multiple teaching formats. The book begins using a case based approach. The cases presented cover the diseases most commonly encountered on a surgical rotation. The cases are designed to provide the reader with the classic findings on history and physical examination. The case presentation is followed by a series of short questions and answers, designed to provide further understanding of the important aspects of the history, physical examination, differential diagnosis, diagnostic work-up and management, as well as questions that may arise on surgical rounds. Key figures and tables visually reinforce the important elements of the disease process. A brief algorithmic flow chart is provided so the reader can quickly understand the optimal management approach. Two additional special sections further strengthen the student's comprehension. The first section covers areas of controversy in the diagnosis or management of each disease, and another section discusses pitfalls to avoid, where the inexperienced clinician might get in trouble. The text concludes with a series of multiple choice questions in a surgery shelf/USMLE format with robust explanations. Surgery: A Case Based Clinical Review is based on 20 years of Socratic medical student teaching by a nine-time Golden Apple teaching awardee from the UCLA School of Medicine and will be of great utility for medical students when they rotate on surgery, interns, physician assistant students, nursing students and nurse practitioner students.

Gunner Goggles Pediatrics E-Book - Hao-Hua Wu 2018-08-07

The Gunner Goggles Series is the first exam prep resource written by a high-scoring peer group of medical students, ensuring the most practical and efficient study guidance. It organizes topics around the USMLE and NBME content outlines for the required shelf exams and features state-of-the-art Augmented Reality (AR) mobile application to extend learning beyond the book. This innovative series features AR opportunities throughout the text for an integrated print-mobile experience that maximizes learning and test preparation. The Gunner Goggle function allows you to scan pages for integrated AR links, unlocking animations, visuals, and 3D models that clarify complex anatomy, conditions, and concepts in a remarkably effective and unique manner. Gunner Goggles Series: Pediatrics is one of seven authoritative exam preparation guides that use cutting-edge AR technology to fully prepare you for the NBME

clinical shelf exams, the USMLE Step 2 Clinical Knowledge (CK) exam, and successful clinical rotations. Topics are organized around the USMLE and NBME content outlines for specific shelf exams, and information is presented in a highly templated, concise manner. The Augmented Reality application allows you to efficiently study and learn using an integrated print-mobile approach. In addition to unlocking animations and other visuals, AR app access also includes additional content, links to provide feedback to the authors, community pages, and more. All test topics are covered in just enough detail to help you hone in on key points you must know for exam success. Unique! Every disease is described by its stem clues (buzzwords that appear in question stems) and prophylactic measures (PPx), mechanism (MoD), diagnostic tests (Dx) and treatment/management principles (Tx/Mgmt) - the four "Physician Tasks" that the NBME requires students to know about each disease. You'll also get real-world tips for your clinical rotations from your peers - information that won't show up on the shelf exam but is ideal for maximum impact when on rounds (knowing the prognosis for a specific disease, for example). Plus ... effective study techniques, sample study schedules, tips and tricks to better retain information learned from review questions, and methods to self-generate mnemonics. Edited, written, and crowdsourced by high-performing medical students and residents and reviewed by experts in the field to ensure accuracy, relevancy, and accessibility.
