Macroeconomics - Michael Parkin 2005

Economics - Michael Parkin 2017

Economics touches almost every aspect of life, from climate change to terrorism, taxes to house prices, wages, to how much time to spend studying. This comprehensive text provides detailed presentation of the principles of economics, using real-world examples and applications [The Politics of Inflation and Economic Stagnation](#) - Leon Lindberg 1985-06-01

The inflation of the 1970s represented the greatest peacetime disruption of the Western economies since the Depression. Even as inflation receded, the recession in its wake brought more joblessness than at any time since the 1930s. The governments of industrialized nations found that the economic policies they had developed since World War II no

longer assured price stability or high employment. What are the lessons of over a decade of economic difficulty? In this conference volume, which focuses on aspects of the crisis that economists often presuppose to be beyond control, the authors analyze the political and social underpinning of inflation and recession. Part 1 places the economic problems of the 1970s in the historical context of postwar development and then compares economic and political science analyses of inflation. Part 2 examines how rivalries between social groups affect inflationary processes. One chapter draws on the history of Latin American inflation to suggest the conflicts in play. Two others weigh the role of labor and industry in the formation of economic policy. And another shows how rivalry between countries, like rivalry between classes at home, permitted inflation to rise. The chapters in part 3 contest the claim that big government or big labor causes inflation. Two studies emphasize that a high degree of public expenditure does not itself lead to inflation. Further contributions explore the role of central banks and subject such concepts as the political business cycle to critical analysis. Part 4 comprises case studies about macroeconomic policymaking in four nations: Italy, Germany, Japan, and Sweden. The studies reveal what institutional attributes rendered those countries resistant to inflation or vulnerable to economic setback. In the last part, the editors pull together the findings and lay out the contemporary political feasibility of

alternative approaches to macroeconomic management. *Studyguide for Microeconomics by Michael Parkin, ISBN 9780133019940* - Cram101 Textbook Reviews 2013-01-01

Talk Show Campaigns - Michael Parkin 2014

Over the past twenty years, presidential candidates have developed an entertainment talk show strategy in which they routinely chat with the likes of Oprah Winfrey, David Letterman, and Jon Stewart. In fact, between 1992 and 2012, there have been more than 200 candidate interviews on daytime and late night talk shows with nearly every presidential candidate—from long shot primary contender to major party nominee—hitting the talk show circuit at some point during the campaign. This book explores the development of the entertainment talk show strategy and assesses its impact on presidential campaigns. The chapters mix detailed narrative with extensive empirical data on audiences, content, viewer reaction, and press coverage to explain why candidates have embraced this strategy and the conditions under which these interviews are most likely to meet their expectations. The book also explores how these interviews can enhance campaigns by connecting a critical segment of the voting population with candidates who provide useful political information in a casual setting. *Talk Show Campaigns*

shows that this is more than a gimmick—it's a key part of how candidates communicate with voters, which reveals a lot about how campaigns have changed over the past two decades.

Service Research Challenges and Solutions for the Future Internet - M. Papazoglou 2010-12-09

S-Cube's Foundations for the Internet of Services Today's Internet is standing at a crossroads. The Internet has evolved from a source of information to a critical infrastructure which underpins our lives and economies. The demand for more multimedia content, more interconnected devices, more users, a richer user experience, services available any time and anywhere increases the pressure on existing networks and service platforms. The Internet needs a fundamental rearrangement to be ready to meet future needs. One of the areas of research for the Future Internet is the Internet of S- vices, a vision of the Internet where everything (e. g. , information, software, platforms and infrastructures) is available as a service. Services available on the Internet of Services can be used by anyone (if they are used according to the policies de?ned by the provider) and they can be extended with new services by anyone. Advantages of the Internet of Services include the p- sibility to build upon other people's e?orts and the little investment needed upfront to develop an application. The risk involved in pursuing new business ideas is diminished, and might lead to more innovative ideas being tried out in practice. It will lead to the appearance of new companies that are able to operate in niche areas, providing services to

other companies that will be able to focus on their core business.

Parkin, Powell and Matthews_Economics (Euro) 11e - Michael Parkin 2022

"Thoroughly updated, this revision builds on the solid foundation of the previous edition and retains its thorough and detailed presentation of the principles of economics, its emphasis on real-world examples and applications, its development of critical thinking skills, its diagrams renowned for pedagogy and precision, and its path-breaking technology. Most chapters have been thoroughly reworked to achieve even greater clarity and to place greater emphasis on applications to current issues. Some sections of chapters have been removed and other sections added to cover new issues, particularly those that involve current policy problems. Current issues organise each chapter. News stories about today's major economic events tie each chapter together, from new abbreviated chapter-opening vignettes to Economics in the News and end-of-chapter problems and applications and online practice. Economics in the News boxes show students how to use the economic toolkit to understand the events and issues they are confronted with in the media. At Issue boxes show two sides of a controversial issue and helps students to apply the economic way of thinking to clarify and debate the issues. Among the many issues covered in one or more of the features described above are: Capitalism and its critics in Chapter 1 The supply elasticity of face masks in Chapter 4 Toilet paper price gouging in Chapter 5 The expansion of video streaming in Chapter 8 Climate change and wind power in Chapters 2 and 16 Brexit and Covid effects on UK growth in Chapter 26 Inflation risk in the EU in Chapter 28 Fiscal stimulus in Chapter 29 The Bank of England's extraordinary actions in Chapter 30 Extraordinary monetary stimulus in Chapter 30"--

Business System Management and Engineering - Claudio Agostino Ardagna 2012-08-09

The next generation of Business Process Management (BPM) methods and tools will support the development of a new generation of service-enabled applications that change and evolve over time. The trend is moving from relatively stable, organization-specific applications to dynamic ones supporting business processes. This book is an outcome of the International Workshop on Business System Management and Engineering (BSME 2010), held in Malaga, Spain, in June/July 2010, in conjunction with the TOOLS 2010 federated conferences and under the aegis of the EU Network of Excellence on Service Software and Systems (S-Cube). The goal of the workshop was to bring together experts in the fields of business process management, service-oriented architectures, and service security to discuss the current state of research and identify new issues, challenges, and research directions. The results of these discussions are reflected in this book.

[A Game of Birds and Wolves](#) - Simon Parkin 2020-01-28

As heard on the New Yorker Radio Hour: The triumphant and "engaging history" (The New Yorker) of the young women who devised a winning strategy that defeated Nazi U-boats and delivered a decisive victory in the Battle of the Atlantic. By 1941, Winston Churchill had come to believe that the outcome of World War II rested on the battle for the Atlantic. A grand strategy game was devised by Captain Gilbert Roberts and a group of ten Wrens (members of the Women's Royal Naval Service) assigned to his team in an attempt to reveal the tactics behind the vicious success of the German U-boats. Played on a linoleum floor divided into painted squares, it required model ships to be moved across a make-believe ocean in a manner reminiscent of the childhood game, Battleship. Through play, the designers developed "Operation Raspberry," a counter-maneuver that helped turn the tide of World War II. Combining vibrant novelistic storytelling with extensive research, interviews, and previously unpublished accounts, Simon Parkin describes for the first time the role that women played in developing the Allied strategy that, in the words of one admiral, "contributed in no small

measure to the final defeat of Germany." Rich with unforgettable cinematic detail and larger-than-life characters, *A Game of Birds and Wolves* is a heart-wrenching tale of ingenuity, dedication, perseverance, and love, bringing to life the imagination and sacrifice required to defeat the Nazis at sea.
