Geometry - Michel Serres 2017-02-23
In this third installment of his classic 'Foundations' trilogy, Michel Serres takes on the history of geometry and mathematics. Even more broadly, Geometry is the beginnings of things and also how these beginnings have shaped how we continue to think philosophically and critically. Serres rejects a traditional history of mathematics which unfolds in a linear manner, and argues for the need to delve into the past of maths and identify a series of ruptures which can help shed light on how this discipline has developed and how, in turn, the way we think has been shaped and formed. This meticulous and lyrical translation marks the first ever English translation of this key text in the history of ideas.

Pseudodifferential Analysis on Conformally Compact Spaces - Robert Lauter 2003
The 0-calculus on a manifold with boundary is a micro-localization of the Lie algebra of vector fields that vanish at the boundary. It has been used by Mazzeo, Melrose to study the Laplacian of a conformally compact metric. We give a complete characterization of those 0-pseudodifferential operators that are Fredholm between appropriate

weighted Sobolev spaces, and describe C^{*}-algebras that are generated by 0-pseudodifferential operators. An important step is understanding the so-called reduced normal operator, or, almost equivalently, the infinite dimensional irreducible representations of 0-pseudodifferential operators. Since the 0-calculus itself is not closed under holomorphic functional calculus, we construct submultiplicative Frechet $*$-algebras that contain and share many properties with the 0-calculus, and are stable under holomorphic functional calculus (Ψ^{*}-algebras in the sense of Gramsch). There are relations to elliptic boundary value problems.

The Small Business Computer Guide - Joseph Beckman 2014-06-28

Mathematical Theory of Diffraction - Arnold Sommerfeld 2012-12-06
A. Sommerfeld's "Mathematische Theorie der Diffraction" marks a milestone in optical theory, full of insights that are still relevant today. In a stunning tour de force, Sommerfeld derives the first mathematically rigorous solution of an optical diffraction problem. Indeed, his diffraction analysis is a surprisingly rich and complex mix of pure and applied mathematics, and his often-cited diffraction solution is presented only as an application of a much more general set of mathematical results. This complete translation, reflecting substantial scholarship, is the first publication in English of Sommerfeld's original work. The extensive notes by the translators are rich in historical background and provide many

technical details for the reader.

Translation Studies - Mary Snell-Hornby 1988-01-01
Translation Studies presents an integrated concept based on the theory and practice of translation. The author adapts linguistic approaches and methods in such a way that they may be usefully employed in the theory, practice, and analysis of literary translation. The author develops a more cultural approach through text analysis and cross-cultural communication studies. The book is a contribution to the development of translation studies as a discipline in its own right.

A Shepherd to Fools - Drew Mendelson 2021-08-12
A Shepherd to Fools is the second of Drew Mendelson's trilogy of Vietnam War novels that began with Song Ba To and will conclude with Poke the Dragon. Shepherd: It is the ragged end of the Vietnam war. With the debacle of a failing South Vietnamese invasion of Northern Laos as background, A Shepherd to Fools tells the harrowing tale of a covert Hatchet Team of US soldiers and Montagnard mercenaries. They are ordered to find and capture or kill a band of American deserters, called Longshadows, before the world learns of their paralyzing rebellion. An earlier attempt to capture them failed disastrously, the facts of it buried. Captain Hugh Englander commands the Hatchet Team. He is a humorless bastard, sneering and discourteous to every regular army soldier. He cares little for the welfare of his own men and nothing for the lives of the deserters. The conflict between him and Captain David Weisman, the artillery officer assigned to the mission for artillery support, threatens to tear the team apart. Deep in the Laotian jungle, the team is caught in a final, horrific battle facing an enemy armed with

Sarin nerve gas, the "worst of the worst" of the war's clandestine weapons.

People I Want to Punch in the Throat - Jen Mann 2014-09-09
NATIONAL BESTSELLER • A debut collection of witty, biting essays laced with a surprising warmth, from Jen Mann, the writer behind the popular blog People I Want to Punch in the Throat People I want to punch in the throat: • anyone who feels the need to bling her washer and dryer • humblebraggers • people who treat their pets like children Jen

Mann doesn't have a filter, which sometimes gets her in trouble with her neighbors, her fellow PTA moms, and that one woman who tried to sell her sex toys at a home shopping party. Known for her hilariously acerbic observations on her blog, People I Want to Punch in the Throat, Mann now brings her sharp wit to bear on suburban life, marriage, and motherhood in this laugh-out-loud collection of essays. From the politics of joining a play group, to the thrill of mothers' night out at the gun range, to the rewards of your most meaningful relationship (the one you have with your cleaning lady), nothing is sacred or off-limits. So the next time you find yourself wearing fuzzy bunny pajamas in the school carpool line or accidentally stuck at a co-worker's swingers party, just think, What would Jen Mann do? Or better yet, buy her book. Praise for People I Want to Punch in the Throat "People I Want to Punch in the Throat is so good that it'll make you want to adopt all the cats in the world. I'm not sure about the correlation, but it's that good. It should come with a warning."—Jenny Lawson, author of Let's Pretend This Never Happened "Jen Mann has an amazing way of telling stories that will make you cringe and burst out laughing at the same time. From swinger parties to racist toddlers, she makes the suburbs unbelievably funny."—Karen Alpert, author of I Heart My Little A-Holes "Jen Mann says the things we're all too afraid to say. Her honest and hilarious writing style reminds me of David Sedaris and Tina Fey."—Robin O'Bryant, author of Ketchup

Is a Vegetable: And Other Lies Moms Tell Themselves "Jen Mann's shrewd and unrelenting assault on the absurdity of suburban life is an honest peek into the occasional nightmare that is part of living the American dream. I love Jen. I wish she was my neighbor. It's so refreshing to know that I'm not the only one who wants to punch almost everyone in the f***ing throat."—Nicole Knepper, author of Moms Who Drink And Swear

The Complete Manual of Typography - James Felici 2012
This book is about how type should look and how to make it look that way--in other words, how to set type like a professional. It explains in practical terms how to use today's digital tools to achieve the secret of good design: well set type. An essential reference for anyone who works with type: designers, print production professionals, and corporate communications managers can go to straight to the index to find focused answers to specific questions, while educators and students can read it as a text book from cover to cover.
