Totem Salmon - Freeman House 2000-05-12

Part lyrical natural history, part social and philosophical manifesto, Totem Salmon tells the story of a determined band of locals who've worked for over two decades to save one of the last purely native species of salmon in California. The book-call it the zen of salmon restoration-traces the evolution of the Mattole River Valley community in northern California as it learns to undo the results of rapacious logging practices; to invent ways to trap wild salmon for propagation; and to forge alliances between people who sometimes agree on only one thing-that there is nothing on earth like a Mattole king salmon. House writes from streamside: "I think I can hear through the cascades of sound a systematic plop, plop, plop, as if pieces of fruit are being dropped into the water. Sometimes this is the sound of a fish searching for the opening upstream; sometimes it is not. I breathe quietly and wait." Freeman House's writing about fish and fishing is erotic, deeply observed, and simply some of the best writing on the subject in recent literature. House tells the story of the annual fishing rituals of the indigenous peoples of the Klamath River in northern California, one that relies on little-known early ethnographic studies and on indigenous voices-a remarkable story of self-regulation that unites people and place. And his riffs on the colorful early history of American hatcheries, on property rights, and on the "happiness of the state" show precisely why he's considered a West Coast visionary. Petitions to list a dozen West Coast salmon runs under the provisions of the Endangered Species Act make saving salmon an issue poised to consume the Pacific West. "Never before, said Federal officials, has so much land or so many people been given notice that they will have to alter their lives to restore a wild species" (New York Times, 2/27/98). Totem Salmon is set to become the essential read for this newest chapter in our relations with other wild things.

The Tie That Bound Us - Bonnie Laughlin-Schultz 2013-11-21

John Brown was fiercely committed to the militant abolitionist cause, a crusade that culminated in Brown's raid on the Federal armory at Harpers Ferry in 1859 and his subsequent execution. Less well known is his devotion to his family, and they to him. Two of Brown's sons were killed at Harpers Ferry, but the commitment of his wife and daughters often goes unacknowledged. In *The Tie That Bound Us*, Bonnie Laughlin-Schultz reveals for the first time the depth of the Brown women's involvement in his cause and their crucial roles in preserving and transforming his legacy after his death. As detailed by Laughlin-Schultz, Brown's second wife Mary Ann Day Brown and his daughters Ruth Brown Thompson, Annie Brown Adams, Sarah Brown, and Ellen Brown Fablinger were in many ways the most ordinary of women,

contending with chronic poverty and lives that were quite typical for poor, rural nineteenth-century women. However, they also lived extraordinary lives, crossing paths with such figures as Frederick Douglass and Lydia Maria Child and embracing an abolitionist moral code that sanctioned antislavery violence in place of the more typical female world of petitioning and pamphleteering. In the aftermath of John Brown's raid at Harpers Ferry, the women of his family experienced a particular kind of celebrity among abolitionists and the American public. In their roles as what daughter Annie called "relics" of Brown's raid, they tested the limits of American memory of the Civil War, especially the war's most radical aim: securing racial equality. Because of their longevity (Annie, the last of Brown's daughters, died in 1926) and their position as symbols of the most radical form of abolitionist agitation, the story of the Brown women illuminates the changing nature of how Americans remembered Brown's raid, radical antislavery, and the causes and consequences of the Civil War.

Historic Spots in California - Douglas E. Kyle 2002-09-06

The only complete guide to the historical landmarks of California, this standard work has now been thoroughly revised and updated. The edition is enriched by some 200 photographs, most of which were taken by the reviser and all of which are new to this edition. Since the last revision in 1990, enormous changes have taken place within the state: many landscapes and buildings have been greatly altered and some are no longer in existence. Every effort has been made, through personal observation, to record the present condition of the landmarks and to provide clear and accurate descriptions of their locations. The text is written with the idea that the reader might use the book while traveling around the state, and thus mileage and signposts have been given where it was thought helpful. For this new edition, the reviser has added additional information on the state's geography, the presence of Native Americans, and state and local museums. To provide historical background, the reviser has written a short historical overview. The chapters of the book are organized by county, in alphabetical order. A rough chronology is followed for each county, beginning with pertinent facts on geography, continuing with Native American life, the coming of the Spaniards and other Europeans, the American conquest of the 1840s, and, in those areas where it had a major impact, the gold rush. The text then continues into the period of intensive agricultural development, railroads, industrialization, the growth of cities, the effects of World War II, and on into more recent times. The bibliography, like the text, has been updated to 2001 and includes some of the established classics in California history as well as more recent material. Reviews of the Fourth Edition "Prodigious in detail and scope, this is the definitive guide to historical landmarks in California and a valuable resource not only for travelers but also for anyone interested in California history." —California Highways "This is an outstanding and accessible piece of scholarship, one that every student of California will value." —San Francisco Chronicle "Kyle and Stanford University Press are to be lauded for this monumental undertaking." —Southern California Quarterly

Encountering Adamastor - W.S. Barnard 2016-09-20

The volume of W.S. Barnard is a first in a series of life-histories of the founding geographers in South Africa published by the Centre of Geographical Analysis at Stellenbosch University. Life-histories are reported in five ways: the commendation lauds the winner of an award; the obituary by necessity speaks well of the dead; the brief entry in a dictionary or encyclopedia is highly stylized and constrained by editorial guidelines; in the autobiography the author tells his own story in his own way; and, finally, the biography comes in a range of formats and structures. At the one extreme is the complete life-history, written by a specialist following the historiographical method and based on the critical assessment of primary sources; at the other is the belletristic overview: descriptive, anecdotal, facile and artful.
