Companion to the History of Modern Science -

G N Cantor 2006-09-07

* A descriptive and analytical guide to the development of Western science from AD 1500, and to the diversity and course of that development first in Europe and later across the world * Presented in clear, non-technical language * Extensive indexes of Subjects and Names `Indeed a companion volume whose 67 essays give pleasure and instruction ... an ambitious and successful work.' - Times Literary Supplement `This work is an essential resource for libraries everywhere. For specialist science libraries willing to keep just one encyclopaedic guide to history, for undergraduate libraries seeking to provide easily accessible information, for the devisers of university curricula, for the modern social historian or even the eclectic scientist taking a break from simply making history, this is the book for you.' - Times Higher

Education Supplement `A pleasure to read with a carefully chosen typeface, well organized pages and ample margins ... it is very easy to find one's way around. This is a book which will be consulted widely.' - Technovation `This is a commendably easy book to use.' - British Journal of the History of Science `Scholars from other areas entering this field, students taking the vertical approach and teachers coming from any direction cannot fail to find this an invaluable text.' - History of Science Journal Observational Assessments of Glacier Mass Changes at Regional and Global Level - Michael Zemp 2021-03-26

The Mantle of the Earth - Veronica della Dora
2021-01-18

The term mantle has inspired philosophers, geographers, and theologians and shaped artists' and mapmakers' visual vocabularies for thousands of years. According to Veronica della Dora, mantle is the "metaphor par excellence, for it unfolds between the seen and the unseen as a threshold and as a point of tension." Featuring numerous illustrations, *The Mantle of the Earth: Genealogies of a Geographical Metaphor* is an intellectual history of the term mantle and its metaphorical representation in art and literature, geography and cartography. Through the history of this metaphor from antiquity to the modern day, we learn about shifting perceptions and representations of global space, about our planetary condition, and about the nature of geography itself. *Report* - East Pakistan (Pakistan). Innovation and Tourism Destination

Development - Henrik Halkier 2017-10-02
Tourism is a central part of regional development strategies in many localities around Europe, not just in traditional coastal or mountain resorts but also in areas without a strong track record with regard to visitor economy. In a globalising world, destinations can no longer take their traditional visitors for granted and escape growing competitive pressures, because increasingly experienced, specialised and demanding travellers now have a vastly greater number of potential destinations to choose from. Both well-established and emerging tourist destinations are therefore under pressure to be innovative to increase their attractiveness in the globalising visitor economy. This book focuses on the role played by tourist destinations - conceived as multi-layered and functional governance structures - in stimulating or complicating the development of new tourist experiences. The complex relationship between firm-level and territorial development dynamics is, of course, by no means confined to tourism development, and the book will therefore be of a more general relevance for research into

innovation and spatial development dynamics. This book was published as a special issue of *European Planning Studies*.

Geopolitics - Francis Sempa 2017-07-12

Writers, observers, and practitioners of international politics frequently invoke the term "geopolitics" to describe, explain, or analyze specific foreign policy issues and problems. Such generalized usage ignores the fact that geopolitics as a method of understanding international relations has a history that includes a common vocabulary, well-established if sometimes conflicting concepts, an extensive body of thought, and a recognized group of theorists and scholars. In *Geopolitics*, Francis P. Sempa presents a history of geopolitical thought and applies its classical analyses to Cold War and post-Cold War international relations. While mindful of the impact of such concepts as "globalization" and the "information revolution" on our understanding of contemporary events, Sempa emphasizes traditional geopolitical theories in explaining the outcome of the Cold War. He shows that, the struggle between the Western allies and the Soviet empire was unique in its ideological component and nuclear standoff, the Cold War fits into a recurring geopolitical pattern. It can be seen as a consequence of competition between land powers and sea powers, and between a potential Eurasian hegemonic power and a coalition of states opposed to that would-be hegemony. The collapse of the Soviet empire ended the most recent threat to global stability. Acting as a successor to the British Empire, the United States organized, funded, and led a grand coalition that successfully countered the Soviet quest for domination. No power or alliance posed an immediate threat to the global balance of power. Indeed, the end of the Cold War generated hopes for a "new world order" and predictions that economics would replace geopolitics as the driving force in international politics. Russian instability, the nuclear dimension of the India-Pakistan conflict, and Chinese bids for dominance have turned the Asia-Pacific region into what Mahan called "debatable and debated ground." *Russi Geography, Grade 12* - Helen Collett 2014-06-26

San Diego's Bioscience Cluster and Berlin's Club Scene - Renard Teipelke 2013-07

Essay from the year 2012 in the subject Geography / Earth Science - Economic Geography, grade: 1,0, University of Frankfurt (Main) (Institut für Humangeographie), course: Cultural Geographies of Economy, language: English, abstract: This paper discusses the relation of Richard Florida's notion of creative cities, cluster economics, and urban policies towards creative industries. Two empirical cases, San Diego's bioscience cluster and Berlin's club scene, are examined in order to reconstruct their success, analyze corresponding factors, identify challenges and problems, and discuss recent developments. Conclusions will be drawn on what city governments' policies can or cannot as well as should not do to support creative industries. It will be argued that the scope of urban policies even in a Floridaesque age of creative cities is still wellrelated to ('traditional') cluster policies but therefore also limited by scale and dependent on private enterprises and cluster actors that have an active role in attracting other creative people.
