Comprehensive Healthcare Simulation: Anesthesiology - Bryan Mahoney 2019-12-19

This book functions as a practical guide for the use of simulation in anesthesiology. Divided into five parts, it begins with the history of simulation in anesthesiology, its relevant pedagogical principles, and the modes of its employment. Readers are then provided with a comprehensive review of simulation technologies as employed in anesthesiology and are guided on the use of simulation for a variety of learners: undergraduate and graduate medical trainees, practicing anesthesiologists, and allied health providers. Subsequent chapters provide a ‘how-to’ guide for the employment of simulation across wide range of anesthesiology subspecialties before concluding with a proposed roadmap for the future of translational simulation in healthcare. Capitals of Punk - Tyler Sonnichsen 2019-04-09

Capitals of Punk tells the story of Franco-American circulation of punk music, politics, and culture, focusing on the legendary Washington, DC hardcore punk scene and its less-heralded counterpart in Paris. This book tells the story of how the underground music scenes of two major world cities have influenced one another over the past fifty years. This book compiles exclusive accounts across multiple eras from a long list of iconic punk musicians, promoters, writers, and fans on both sides of the Atlantic. Through understanding how and why punk culture circulated, it tells a greater story of (sub)urban blight, the nature of counterculture, and the street-level dynamics of that centuries-old relationship between France and the United States.

Put the Needle on the Record - Matthew Chojnacki 2011

In the 1980s, music defined the moment: "Video Killed The Radio Star" ushered in MTV, "Don't You (Forget About Me)" ruled "The Breakfast Club," and "I Still Haven't Found What I'm Looking For" became the anthem of a generation. The 1980s were also the most visually provocative era of the last millennium. Every new vinyl single hit the stands wrapped in eye-catching sleeves that reflected the latest trends. Coupled with exclusive commentary from more than 100 of the '80s biggest musicians, including Annie Lennox, Duran Duran, Run-DMC, Devo, The B-52's, Erasure, The Human League, Scorpions, The Knack, and Yoko Ono, this is an authoritative journey back to the songs and images that continue to influence our culture.

Rage to Survive - Etta James 1998

Perhaps the finest soul singer of the rock era-but equally at home singing

blues and jazz—Etta James is one of the great women of American music. In *Rage to Survive* she tells her mesmerizing tale in her uniquely big, bold, and unrepentant voice. Without a trace of self-pity she describes her chaotic world of early R&B, depicts legends like Sam Cooke and Little Richard, details her dependency on drugs and bad men, and unsparingly recounts the golden age of soul, when her "Tell Mama" topped the charts. *Rage to Survive* is a funky, ribald tale told with unparalleled sass.

Movable Inn - Judith Kalik 2018-07-19

Jews are typically viewed as urban dwellers. However there was a considerable Jewish presence in villages from the very beginning of their settlement in Eastern Europe in the 12th century, up until the Holocaust. The presence of a large Jewish population in villages was, in fact, one of the most distinctive features of East European Jewry. The colourful personality of Jewish leaseholders of the production and sale of alcoholic beverages was often depicted in Polish, Russian and Jewish literature of the 19th century, but the real knowledge about the East European rural Jews beyond the stereotypical view is still at large. The book presents the results of a systematic survey, the first of its kind, on the rural Jews in the Minsk Guberniya, from its establishment as a major administrative unit within the Russian Empire in 1793, to the outbreak of the First World War in 1914. The present study is based mainly on systematic sources, which produced, for the first time, a full picture of Jewish settlement in the countryside in one particular region of the Russian Empire.

Book of Instructions in the Elements of the Art of Astrology - Al Biruni 2006

Al Biruni, one of the greatest Arab scholars, was born on September 4, 973, in what is now Uzbekistan. He showed talent at an early age and by his early 20's had written several acclaimed papers. Political unrest in his 20's and 30's found him at one point at Gurgan, on the shores of the Caspian Sea. Peace found him in Ghaznah, which is today in Afghanistan. From 1017 to 1030 he travelled extensively in India, becoming fluent in Sanskrit. From this he wrote his monumental survey, India, of the history, customs and beliefs of the subcontinent. His other books include The Chronology of Ancient Nations, the Masudic Cannon, Book of Instructions, and more than 100 others, some of which are lost. He died on December 13, 1048, aged 75. He is buried in Ghaznah. The Book of Instruction in the Elements of the Art of Astrology was written for Lady Rayhanah, to whom it is dedicated. R. Ramsay Wright, the translator, said it could be regarded as a primer of 11th century science. Among its highlights are a comprehensive list of more than 150 Lots, various forms of aspects and planetary relationships, planetary positions relative to the sun, an excellent text on rulerships as well as comprehensive notes on weather and meteorological phenomena. This book was unknown to medieval European astrologers. This edition, comprising the astrological part of the original (sections 347-530) has been taken from Wright's pioneering 1934 translation, itself taken from Persian and Arabic sources. For this edition, text and tables have been reset, and a new index added.

Transforming Teacher Education - Valerie Hill-Jackson 2012-03-12
Extracts from the text: "Why are fifteen million children and youth in poverty not achieving when we know that low-income students excel in

the classrooms of "star" teachers (who comprise approximately 8 percent of the teaching force)?" "Whose needs or interests are being met in education reform today?" "In my own institution, there has not been a systematic assessment of the effectiveness of the basic teacher education program since the institution was founded over a century ago as a teachers college. Imagine, not one ever!" "Teachers who empathize with students and the life challenges they face soon realize that the dysfunctional bureaucracies will not permit them to meet the needs of their students. Half of the starry-eyed beginners are gone in five years or less." "Why does teacher education focus on the managerial, instrumental or delivery system aspects of the profession?" "The expert advice dispensed by schools of education regarding what future teachers should do is not connected to any theory of learning, or to any reality of life in school classrooms." "Why has the recruitment process resulted in a cohort of teachers who are unable to connect with their students?" "Does a qualified teacher equate to a quality teacher?" "The best hope of getting more effective teachers from university teacher preparation programs is to base their budgets on the number of their graduates who serve in challenging schools and their effectiveness with children and youth. At the district level, the salaries of hiring officials should be based on how well these officials identify and retain quality teachers." In this book, 12 distinguished scholars provide a hard-hitting, thoroughly researched, historical and theoretical critique of our schools of education, and offer clear recommendations on what must be done to ensure all children can achieve their potential, and contribute to a vibrant, democratic society.

Memoirs of a British Agent - R. H. Bruce Lockhart 2011-04-30

When first published in 1932, this memoir was an immediate classic, both as a unique eyewitness account of Revolutionary Russia and as one man's story of struggle, and tragedy set against the background of great events. Aged 25, Lockhart became the British Vice-Consul to Moscow in 1912. With revolution in the air, it was dangerous, decadent posting. The 'Boy Ambassador' became an eyewitness to pivotal events and in 1918 was charged with establishing a diplomatic understanding with the Bolsheviks, to ensure that Russia remained in the war against Germany. It was a precarious mission: Whitehall could not be seen support revolutionaries; Lockhart grew wary of his masters' secret machinations; while Lenin and Trotsky's cordial relations with the British agent never quite dispelled their mistrust of the nation he represented. When Lockhart met Moura Budberg, who became the great love of his life, he was in an increasingly vulnerable position. In September 1918 he would be falsely accused of a counter-revolutionary plot to overthrow the Bolsheviks, and sent to the Loubianka. His account even inspired a Hollywood movie. From his evocative descriptions of revolutionary Moscow, where the champagne flowed as the bourgeoisie trembled, to his audiences with Trotsky and his brushes with death, this is a vivid, unique memoir.

The Plot Against the Peace - Michael Sayers 2018-09-03

The Plot Against the Peace, which was first published in 1945, uncovers Nazi Germany's secret plans for a Third World War. The book reveals how the behind-the-scenes clique which really rules Germany is plotting to undermine the peace, split the United Nations, and convert military defeat into actual victory. Written by two journalists who have won an international reputation for their exposés of fifth-column activities and worldwide fascist intrigues, this book offers thoroughly documented, indisputable evidence to prove that Germany's undercover apparatus is

at work in the United States today, laying the groundwork for a post-war secret offensive against America. The book disclosed how German spies and assassins are already carrying out their new assignments in the United States, as throughout the rest of the world. *The Plot Against the Peace* is a book that names names. Among the vitally important disclosures discussed are how Germany is secretly preparing for the continued post-war operations of the Nazi apparatus; the real story behind the German factories of death; the clandestine building of German hidden arsenals in Spain, Argentina and other countries; the plot for maintaining a Nazi-Junker officer corps in temporary exile abroad after the war; who are the "real brains" behind the German international network; how the Germans have smuggled funds, diamonds and other valuables into the United States to finance their post-war machinations; and what the German plans are for disuniting the United Nations, inciting international turmoil and thus making impossible the fulfilment of the Allied peace aims. The authors have left nothing to the imagination in their account of the hitherto untold secret history of Nazism, and in their description of the character and deeds of the German General Staff. But, as the authors write, "Those facts had to be recorded and they have to be read." An amazing, revealing and urgent document.

Mandelstam, Blok, and the Boundaries of Mythopoetic Symbolism - Stuart Goldberg 2011

"Mandelstam had no teacher," marveled Anna Akhmatova, reflecting on his early maturity and singularity. But Mandelstam himself spoke of the need and even duty to study a poet's literary roots. So how did this consummately complex, compelling, multi-resonant poet navigate and exploit the burden of the Russian Symbolist movement from which he emerged? How did this process change and augment his poetry?

Through a series of illuminating readings, Stuart Goldberg explores the

ongoing role that the poetry of Russian Symbolism played in Osip Mandelstam's creative life, laying bare the poet's productive play with distance and immediacy in his assimilation of the Symbolist heritage. At the same time, Mandelstam, Blok, and the Boundaries of Mythopoetic Symbolism presents the first coherent narrative of the poet's fraught relationship with Alexander Blok, the most powerful poetic voice among the Symbolists. This dialogue, which was largely one-sided, extended beyond poetic intertext into the realms of poetics, charisma, and personality. Goldberg's study pushes theoretical boundaries, exploring the juncture between pragmatics and intertext, adapting and challenging Bloom's anxiety of influence theory, and, ultimately, tracing a shift in the nature of sincerity and authenticity that divided poetic generations.

The Manifesto for Teaching Online - Sian Bayne 2020-09-15

An update to a provocative manifesto intended to serve as a platform for debate and as a resource and inspiration for those teaching in online environments. In 2011, a group of scholars associated with the Centre for Research in Digital Education at the University of Edinburgh released "The Manifesto for Teaching Online," a series of provocative statements intended to articulate their pedagogical philosophy. In the original

manifesto and a 2016 update, the authors counter both the "impoverished" vision of education being advanced by corporate and governmental edtech and higher education's traditional view of online students and teachers as second-class citizens. The two versions of the manifesto were much discussed, shared, and debated. In this book, Siân Bayne, Peter Evans, Rory Ewins, Jeremy Knox, James Lamb, Hamish Macleod, Clara O'Shea, Jen Ross, Philippa Sheail and Christine Sinclair have expanded the text of the 2016 manifesto, revealing the sources and larger arguments behind the abbreviated provocations. The book groups the twenty-one statements ("Openness is neither neutral nor natural: it creates and depends on closures"; "Don't succumb to campus envy: we are the campus") into five thematic sections examining place and identity, politics and instrumentality, the primacy of text and the ethics of remixing, the way algorithms and analytics "recode" educational intent, and how surveillance culture can be resisted. Much like the original manifestos, this book is intended as a platform for debate, as a resource and inspiration for those teaching in online environments, and as a challenge to the techno-instrumentalism of current edtech approaches. In a teaching environment shaped by COVID-19, individuals and institutions will need to do some bold thinking in relation to resilience, access, teaching quality, and inclusion.
