Principles of Experimental Psychopathology

- Brendan Arnold Maher 2003-01

Principles of Experimental Psychopathology celebrates the contributions of Brendan A. Maher to the development and emergence of experimental psychopathology as a sub-discipline of psychological science. Several current research programmes are discussed, and contributors provide examples of how the methods of experimental psychology and allied disciplines have been applied to the study of schizophrenia and other psychopathological conditions through a strong understanding of normative processes, genetics, and neuroscience. In the opening chapter of the volume, Maher discusses his view of the formation of delusional thought and the methodological approach he has taken in studying this area.

Sediments, Morphology and Sedimentary Processes on Continental Shelves - Michael Z. Li 2012-02-21

The application of multibeam and sediment transport measurement technologies and the adoption of multi-faceted research methodologies have greatly advanced our understanding of the sedimentary processes on continental shelves in the last decade. This book uniquely blends cutting-edge research and state-of-the art review articles that take stock of new advances in multibeam mapping and sediment transport technologies, spatial analysis and modelling, and the applications of these advances to the understanding of shelf sediments, morphodynamics, and sedimentary processes. Case studies are also presented to illustrate the utilization of seabed property and process knowledge in habitat mapping and ocean management With its mix of papers focusing on technological advances, integration of shelf morphology and processes, and the application of these advances to coastal and ocean management, this Special Publication volume will serve as a milestone reference for professional marine scientists and as advanced text for students in marine geology,

sedimentology and oceanography. This book is part of the International Association of Sedimentologists (IAS) Special Publications. The Special Publications from the IAS are a set of thematic volumes edited by specialists on subjects of central interest to sedimentologists. Dr. J - Julius Erving 2013-11-05

"A terrific memoir by a man worthy of one." —

Sports Illustrated An honest, unflinching self-portrait of the basketball legend whose classy public image as a superstar and a gentleman masked his personal failings and painful losses, which he describes here—from his own point of view—for the very first time. For most of his life, Julius Erving has been two men in one. There is Julius, the bright, inquisitive son of a Long Island domestic worker who has always wanted to be respected for more than just his athletic ability, and there is Dr. J, the cool, acrobatic showman whose flamboyant dunks sent him to the Hall of Fame and turned the act of jamming a basketball through a hoop into an art form. In many ways, Erving's life has been about the push and pull of Julius and The Doctor. It is Dr. J who has stories to tell of the wild days and nights of the ABA in the 1970s, and of being the seminal figure who transformed basketball from an earthbound and rigid game into the creative, free-flowing aerial display it is today. He has a long list of signature plays - he's famous for winning the first dunk contest in 1976 with a jam on which he lifted off from the foul line, and he made a miraculous layup against the Lakers on which he soared behind the backboard before reaching back in to flip the ball in on the other side, with one hand. He inspired a generation of dunkers, including Michael Jordan, to express their improvisational talents. But Julius wasn't always as graceful and in control as Dr. J. Erving had a pristine image throughout his career and early retirement, but he was far from a perfect man. Here he gives detailed accounts of some of the personal problems he faced -- or created -- behind the scenes, including the adulterous affair with sports writer Samantha Stephenson, which led to the birth of his daughter, professional tennis player Alexandra Stephenson. Though his marriage survived that infidelity, the death of Erving's 20-year-old son Cory in 2000 in a tragic accident proved too much for the union to bear. Erving paints a raw, heartbreaking picture of the dissolution of his marriage, as his wife Turquoise began to blame him for his refusal to be paralyzed by grief for as long as she was. Their intense arguments came to a head when Erving stepped out of the shower one day to find his wife holding a lamp in one hand and a vase in the other, ready for a physical confrontation. "I knew somebody was going to get hurt, and it

wasn't going to be me," he says. He packed a suitcase and he and Turquoise never lived under the same roof again. Erving's story is a tale of the nearly perfect player and the imperfect man, and how he has come to terms with both of them. It will appeal to readers on a sports level and on a human one.

Automotive FDI in Emerging Europe - A. J. Jacobs 2017-06-19

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.
