The aging of societies is a global phenomenon. In the United States alone, the life expectancy for both men and women will continue to increase over the next few decades and with that a population explosion of older adults. The dramatic increase in the number and diversity of older adults elevates the visibility of gerontological matters. As a result, social work practice is becoming more multigenerational, thereby demanding social workers, regardless of their professional endeavors, to be equipped with the most innovative theories and practices to serve older adults and their families. This comprehensive text spans the new knowledge and skills required in direct practice areas, group work, and macro practice. It also outlines the Geriatric Social Work Competencies, as developed by social work educators, necessary to serve the older adult population and suggests

how these competencies can be integrated into foundation curriculum. Social work educators, students, practitioners, administrators, and policymakers will find updated, useful information in this text regarding \* assessment tools \* cultural influences \* evidence-based practices \* intervention techniques \* theoretical examples. "Individuals are living longer and healthier lives in part because of the extraordinary growth of biomedical knowledge and public health initiatives. The confluence of the rapid and large increase of the older population and the exponential increase in the dissemination of knowledge create an imperative for social workers to employ the most recent knowledge in their practice with people living increasingly long lives." -- JoAnn Damron-Rodriguez Department of Social Welfare University of California, Los Angeles

[The SAGE Handbook of Social Work Research](#) -

Ian Shaw 2009-12-10

"This is an ambitious book. It aims at nothing less than a comprehensive account of the state of the art of social work research internationally and an intellectually original statement that will help to define and shape social work research. Those with a serious interest in social work research will agree that this is a major undertaking and one that should put social work research 'on the map'." - Ian Sinclair, University of York, UK "This terrific Handbook provides an essential map for navigating the complex currents of social work research today. It resists polemical and simplistic binaries to chart a course that emphasizes diversity, pluralism and sensitivity to political contexts in many featured exemplars. As key chapters note, inherent tensions at the heart of social work itself are mirrored in current debates about the purposes and methods of social work research. Rather than patch over differences, the volume invites us to understand historical roots of unresolvable

tensions, and live with them. The international scope of the volume is unique--scholars from more than a dozen different countries were involved --and its broad scope counters the tendency toward parochialism of much North American literature. The Handbook should be essential reading for students and academics." - Catherine Riessman, Boston University, USA The SAGE Handbook of Social Work Research provides a comprehensive, internationally-focused account of leading social work research, offering an original and defining statement on contemporary theory and practice within the field. The groundbreaking Handbook engages critically with the nature and role of social work research and evaluation in contemporary societies around the globe, and asks four key questions: - What is the role and purpose of social work research? - What contexts shape the practice and purpose of social work research? - How can we maximise the quality of the practice of social work research? - How can the aims of

social work in its varied domains be met through social work research? Ranging over local, national and international issues, and exploring questions of theory and practice, this is a diverse and constructively organized overview of the field. It will quickly be recognized as a benchmark in the expanding field of social work research, setting the agenda for future work in the arena.
