Get Set for Computer Science - Alistair Edwards 2006-02-17

This book is aimed at students who are thinking of studying Computer Science or a related topic at university. Part One is a brief introduction to the topics that make up Computer Science, some of which you would expect to find as course modules in a Computer Science programme. These descriptions should help you to tell the difference between Computer Science as taught in different departments and so help you to choose a course that best suits you. Part Two builds on what you have learned about the nature of Computer Science by giving you guidance in choosing universities and making your applications to them. Then Part Three gives you some advice on what to do once you get to university, how to get the most out of studying your Computer Science degree. The principal objective of the book is to produce happy students, students who know what they are letting themselves in for when they start a Computer Science course, and hence find themselves very well suited for the course they choose.

**A Student's Guide to Studying Psychology** - Thomas M. Heffernan 2005-03-01

Now in its third edition, this very popular guide to studying psychology remains an invaluable tool for students at both undergraduate and pre-degree level, along with those deciding whether to take psychology as an academic subject. Providing insights into the most critical aspects of studying psychology, A Student's Guide to Studying Psychology is distinguished from other texts by its easy to follow format and practical nature. Topics covered include: \* perspectives within psychology \* making the most of seminars, tutorials and lectures \* how to write essays and empirical reports \* guidelines on exam preparation and technique \* information on careers in psychology and tips for applying for jobs, including how to write your own curriculum vitae. For this fully updated third edition, new advice is included on web-based research and referencing. Subject coverage is expanded to include contemporary research trends in cognitive neuroscience, evolutionary psychology and positive psychology. In addition, new material investigates postgraduate specialisms including neuropsychology, psychotherapy and sport psychology.

Research and Teaching Aptitude for UGC SET-NET Exam - Santosh Baheti 2018-09-20

This book is written keeping in view revised syllabus and Question Pattern of UGC SET/NET Exams. The book contains question papers with immediate accurate solutions. Usually immediate and accurate solutions are not provided in any book, where students find it difficult to get clarity of the concept. Only providing answer keys at the end of the question paper doesn't serve the purpose. I faced all these limitations when I have attempted these examinations. Various states also conduct their State Eligibility Test for determining the eligibility for Assistant Professor. Usually students find it difficult to get the material for their respective state level exam. I have qualified SET for seven different states including J&K, Maharashtra, Tamilnadu, Kerala, Karnataka, Telangana, and North Eastern Region. So, through these exams I got the understanding of how to incorporate specific needs of those respective states also. This book is an attempt to provide enough practice exercises to make the students perfect and confident before the exams. This book is For Teaching and Research aptitude Paper One. It consists of all types of questions and comprehensive syllabus of NET/SET Paper one. Proposed book by the author: The next book proposed by authors is "Commerce SET/NET-A Comprehensive Look". This book is the in-depth expertise of mine in the domain of Commerce.
