Electric Motors and Drives - Austin Hughes 2013-10-22

Written for non-specialist users of electric motors and drives, this book explains how electric drives work and compares the performance of the main systems, with many examples of applications. The author's approach - using a minimum of mathematics - has made this book equally popular as an outline for professionals and an introductory student text. * First edition (1990) has sold over 6000 copies. Drives and Controls on the first edition: 'This book is very readable, up-to-date and should be extremely useful to both users and o.e.m. designers. I unhesitatingly recommend it to any busy engineer who needs to make informed judgements about selecting the right drive system.' New features of the second edition: * New section on the cycloconverter drive. * More on switched reluctance motor drives. * More on vector-controlled induction motor drives. * More on power switching devices. * New 'question and answer' sections on common problems and misconceptions. * Updating throughout. Electric Motors and Drives is for non-specialist users of electric motors and drives. It fills the gap between specialist textbooks (which are pitched at a level which is too academic for the average user) and the more prosaic 'handbooks' which are filled with useful detail but provide little opportunity for the development of any real insight or understanding. The book explores most of the widely-used modern types of motor and drive, including conventional and brushless d.c., induction motors (mains and inverter-fed), stepping motors, synchronous motors (mains and converter-fed) and reluctance motors.

Sex in \$in City - Dee Dawning 2019-09-06

Opportunity presents itself in, of all places--Las Vegas. Randy and his girls are flown to Sin City on a corporate jet and after being wined and dined and...ah...other things, are offered the opportunity to host that Summer's Adult Pool Parties at the Galaxy & Eden Hotels EXCERPT We arrived to the Scottsdale

Airport terminal at one-forty, with twenty minutes to spare. The Prince's right hand man, Fahd Barakah, met us and escorted us to Las Vegas. Fahd apologized for the prince not being there. It seems to pass the time he got involved in a game of Chemin de fer and lost 6.7 million dollars, so he sent Fahd instead, because he was trying to recoup his loses. We flew to Vegas in Prince Salam's tricked-out Gulfstream 650, which according to Fahd cost 89 million dollars. I was shocked. I had no idea private planes cost that much. The fight was uneventful and we arrived at McCarran Executive Air Terminal at 1:45 pm—earlier than we left due to the time difference. From there a stretch limousine zipped us the two miles to the Galaxy Hotel where Romano greeted us effusively, especially me. After embracing me and kissing my cheek, he said, "Ah, April. I'm so glad you came. I have been so looking forward to seeing you again." He winked. "I remember our time together at the Phoenician most fondly." I remembered too. I remembered how handsome he was/is and how much he turned me on. "It's good to see you again, too. I'm looking forward to working in Vegas again." Romano's eyebrows rose. "Again? I wasn't aware you had worked here before." A flush surged through me. "Oh, it was for only two weeks when I was in college." "I see. Well I'm sorry I missed you then." He chuckled. "You might never have gone back to Phoenix." His eyes wandered to Lita, who stood between me and Randy. "And who is this lovely creature?" "Oh! This is Lita. Lita this is...I'm sorry but I don't know your first name." "It's Julio. I seldom use it, everyone calls me Romano, but you can use either name." "Lita, this is Julio Romano and Julio, this is Lita Brooks." Lita did a half curtsy. "Pleased to meet you, Mr. Romano." "Please, please. Julio or Romano. We are going to be famiglia around here." He took Lita's hand, raised it chest high then leaned down and kissed the top. "Lovely name for a lovely creature. I hope we can get to know each other real good. As Lita blushed, Romano lowered her hand and held out his hand to Randy. "And you are?" "Randy Evers." Randy took the offered hand and shook it. "Romano...or Julio, if you prefer. You are the impresario, no?" Randy laughed. "I've been called many things but never that." Romano laughed too. "Well my friend, you have a nose for beautiful women. Counting Lita, I have beheld three. How many more gorgeous courtesans do you have for us?" "Only one of the quality you want." Romano's eyes narrowed. "Oh, you must keep your talented nose, ears and eyes out for more. We can always put beautiful women to work." Addressing everyone Romano then asked, "Have you eaten?" Randy Lita and I shook our heads. "Only an early breakfast." Romano stuck his arms out and lolled his head back. "Then you must be starved. Let's go in the hotel, get you a room and we'll meet for dinner after you freshen up. Perhaps the Prince will be done with his foolishness by then." While Randy went with Romano to check on the Prince, we took an elevator to the thirty-second floor where our suite—suite 3206 was located. Romano insisted we take a suite that was saved for high rolling VIPs. Lita and I decided to share one bedroom though we'd probably all end up in the same extra-king sized bed. If Randy wanted to be by himself or if he picked up a show girl, He could have the bedroom that adjoined the suite, but also had it's own entrance. The three of us were supposed to meet Romano and Prince Salam at five-thirty in the Alpha Centauri gourmet room for what Romano described as a 'gastronomic orgy'. Randy suggested we pull out all stops and look our very best for the occasion. Lita and I agreed. This was the big leagues and the stakes were high. If we pulled it off our lives would change like we never imagined.

The Hardmen: Legends and Lessons from the Cycling Gods - The Velominati 2017-11-07

Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. . .

Semiconductor Device Physics and Design - Umesh Mishra 2007-11-28

Semiconductor Device Physics and Design teaches readers how to approach device design from the point of view of someone who wants to improve devices and can see the opportunity and challenges. It begins with coverage of basic physics concepts, including the physics behind polar heterostructures and strained heterostructures. The book then details the important devices ranging from p-n diodes to bipolar and field effect devices. By relating device design to device performance and then relating device needs to system use the student can see how device design works in the real world.

Macrocosm and Microcosm - Rudolf Steiner 1986-09

The human life alternates between the great, external macrocosm and the invisible inner microcosm. Steiner discusses the various paths of self-development that lead across these two thresholds and to the transformation of human soul-forces into spiritual organs of perception. A brief synopsis: The world behind the tapestry of sensory perceptions; human life between macrocosm and microcosm. The planets and their connection with our sleeping and waking life; consciousness soul, mind soul, and sentient soul. The inner path of the mystic; the cycle of the year; the ability to see through matter; the "greater guardian of the threshold." The nature and development of human soul faculties; the "lesser guardian of the threshold"; the sun at midnight; the results of "sins of omission." The Egyptian mysteries of Osiris and Isis; initiation experiences; the Rosicrucian path; mystics of the Middle Ages. Initiation in the "northern mysteries"; the necessity of suppressing the ego; conscious assent into the macrocosm and the higher worlds; the world of archetypal images. The four spheres of the higher worlds; the threshold of the spirit world; forces for developing clairvoyant consciousness in the world of archetypal images. The macrocosm mirrored in the human being; the nervous system as an inner solar system; the image of purified blood and the conquest of

our lower nature in the symbol of the Rose Cross. Spiritual organs of perception and the strengthening powers of sleep; the thinking of the heart; the ego viewed from twelve perspectives. Reading the akashic record; the transition from intellect to heart thinking; four-dimensional space; intellectual questions have no meaning in relation to conditions before the intellect itself existed. Human and planetary evolution; adaptation to the different states of Earth's existence; the breathing process should not be influenced directly unless knowledge has become prayer.

R.I.C.H. in Preaching - Antonio LaMar Torrence 2020-12-22

As many black churches attempt to become welcoming spaces for LGBTQ people, preachers are navigating ways to develop sermons that are more inclusive and welcoming. Pastors and ministers can begin transforming their congregations to become extensions of Christ through preaching sermons about radical inclusive Christian hospitality (RICH). RICH preaching encourages its hearers to embrace those of the queer community as neighbors deserving of love, compassion, and healing.

Memoirs of Our Cabin in Yosemite; and Our Backyard Wilderness - Sophia Kaeser 2009-05-18

What could have been better for our family with three young boys than spending time in and around Wawona, California within the glorious Yosemite National Park? This is where we built our little cabin and spent over twenty happy, adventure-filled years! We spent every weekend, vacation and all of the holidays exploring the natural beauty surrounding our picturesque cabin. We considered Yosemite to be our back yard; it doesn't get much better than that! Surrounded by so much natural beauty, we were drawn into the day-to-day life of Yosemite National Park; we hiked, skied and even played golf. For our family, such an adventure became even more exciting as we met and befriended the other people who lived in Yosemite; not to mention the animals deer, raccoons, coyotes, and the bears who were also our neighbors. In "Memoirs of Our Cabin in Yosemite"; and "Our Backyard Wilderness," the story of our years in the cabin nestled in Yosemite National Park comes to life!

Drilling for Water - Raymond Rowles 2017-09-29

There have been very few, if any, books of a practical nature covering the 'art' of drilling holes in the ground especially for water. Some rather lengthy tomes are and have been available over the years which have been pretty well incomprehensible to the average field man, or indeed, those responsible for the administration of field operations. Most of those books have been written by people with peripheral disciplines to the industry thus haven't had the field experience to really get hold of the heart of the matter. Drilling for Water - 2 has been written to be understandable to field personnel and in their own terms. Everything in it is based on considerable field experience. Following the publication of Drilling for Water, many accolades were forthcoming such as ...packed with information... ...my bible... ...most welcome... ...a breath of fresh air... ...couldn't put it down... etc.

Java in Two Semesters - Quentin Charatan 2019-01-08

This easy-to-follow textbook teaches Java programming from first principles, as well as covering design and testing methodologies. The text is divided into two parts. Each part supports a one-semester module, the first part addressing fundamental programming concepts, and the second part building on this foundation, teaching the skills required to develop more advanced applications. This fully updated and greatly enhanced fourth edition covers the key developments introduced in Java 8, including material on JavaFX, lambda expressions and the Stream API. Topics and features: begins by introducing fundamental programming concepts such as declaration of variables, control structures, methods and arrays; goes on to cover the fundamental object-oriented concepts of classes and objects, inheritance and polymorphism; uses JavaFX throughout for constructing event-driven graphical interfaces; includes advanced topics such as interfaces and lambda expressions, generics, collection classes and exceptions; explains file-handling techniques, packages, multi-threaded programs, socket programming, remote database access and processing collections using streams; includes self-test questions and programming exercises at the end of each chapter, as well as two illuminating case studies; provides additional resources at its associated website (simply go to springer.com and search for "Java in Two Semesters"), including a guide on how to install and use the NetBeans™ Java IDE. Offering a gentle introduction to the field, assuming no prior knowledge of the subject, Java in Two Semesters is the ideal companion to undergraduate modules in software development or programming.
