**Transparent Design in Higher Education**

**Teaching and Leadership** - Mary-Ann Winkelmes 2019-04-18

This book offers a comprehensive guide to the Transparency in Learning and Teaching (TILT) framework that has convincingly demonstrated that implementation increases retention and improved outcomes for all students. Its premise is simple: to make learning processes explicit and equitably accessible for all students.

Transparent instruction involves faculty/student discussion about several important aspects of academic work before students undertake that work, making explicit the purpose of the work, the knowledge that will be gained and its utility in students' lives beyond college; explaining the tasks involved, the expected criteria, and providing multiple examples of real-world work application of the specific academic discipline. The simple change of making objective and methods explicit - that faculty recognize as consistent with their teaching goals - creates substantial benefits for students and

demonstrably increases such predictors of college students' success as academic confidence, sense of belonging in college, self-awareness of skill development, and persistence. This guide presents a brief history of TILT, summarizes both past and current research on its impact on learning, and describes the three-part Transparency Framework (of purposes, tasks and criteria). The three sections of the book in turn demonstrate why and how transparent instruction works suggesting strategies for instructors who wish to adopt it; describing how educational developers and teaching centers have adopted the Framework; and concluding with examples of how several institutions have used the Framework to connect the daily work of faculty with the learning goals that departments, programs and institutions aim to demonstrate.

*Living Downtown* - Paul Groth 1999-01-01

From the palace hotels of the elite to cheap lodging houses, residential hotels have been an element of American urban life for nearly two hundred years. Since 1870, however, they have been the target of an official war led by people whose concept of home does not include the hotel. Do these residences constitute an essential housing resource, or are they, as charged, a public nuisance? *Living Downtown*, the first comprehensive social and cultural history of life in American residential hotels, adds a much-needed historical perspective to

this ongoing debate. Creatively combining evidence from biographies, buildings and urban neighborhoods, workplace records, and housing policies, Paul Groth provides a definitive analysis of life in four price-differentiated types of downtown residence. He demonstrates that these hotels have played a valuable socioeconomic role as home to both long-term residents and temporary laborers. Also, the convenience of hotels has made them the residence of choice for a surprising number of Americans, from hobo author Boxcar Bertha to Calvin Coolidge. Groth examines the social and cultural objections to hotel households and the increasing efforts to eliminate them, which have led to the seemingly irrational destruction of millions of such housing units since 1960. He argues convincingly that these efforts have been a leading contributor to urban homelessness. This highly original and timely work aims to expand the concept of the American home and to recast accepted notions about the relationships

among urban life, architecture, and the public management of residential environments.

**Excellence in Teacher Education** - Linda

Darling-Hammond 1992

This monograph examines issues that will shape teacher education programs in the future.

Following a foreword by Robert M. McClure, the monograph is organized into three chapters. The first, "Perestroika and Professionalism: The Case for Restructuring Teacher Preparation" (Linda Darling-Hammond), focuses on changes wrought by school restructuring, i.e., the creation of learner-centered schools, and implications for changes in the teacher's role and consequently for teacher education. The second, "Learning

from the 'New' Schools: Lessons for Teacher Education" (Gary A. Griffin), discusses school-level issues in restructuring, rethinking, and re-enacting teacher education. The final chapter, "The Case for Restructuring Teacher Preparation" (Arthur E. Wise), espouses seven propositions to promote education reform: (1) intensive teacher education; (2) rigorous teacher certification and licensing standards; (3) increased teacher involvement in decision-making processes that affect how they teach; (4) teacher unions with a better balance between inherent responsibilities to protect members and long-term responsibility for advancing the profession; (5) teacher professionalism that demands an accountability system; (6) improved teachers' salaries and working conditions; and (7) more attention to the less fortunate of teachers' clientele.
