With a focus on career as a cornerstone of personal identity, the book explores the specific meaning of careers within different cultures and examines the challenges faced by—and potential solutions for—individuals with diverse backgrounds and needs. It describes unique interventions that allow counseling students to visualize and actualize career counseling with a wide range of clients and demonstrates techniques targeted to each population that can be put into practice immediately. The text provides demographic information regarding specific job-seeking groups including such “traditional” populations as college graduates

Over fifty creative, innovative interventions that have been successfully applied help counselors to provide effective career development strategies with each population. Chapters include a vignette representing each population, group demographics, a history of career paths and obstacles, unique needs of the group, supports already in place, and specific career counseling assessment and interventions. The book also provides abundant resources for additional study. In addition to its value to career counselors, the text will also be useful to personal counselors who often deal with their client’s career issues during treatment. Key Features: Provides in-depth exploration of

**Career Development** - Kimberly McDonald 2015-12-22

**Career Development: A Human Resource Development Perspective** offers a strategic framework that demonstrates the role of career development within the human resource function. It goes beyond conventional interventions and includes key topics such as diversity, work-life balance, and ethics. Historically, the career development literature has been viewed either from the perspective of the individual (how to build a career) or from an economic perspective (how an organization benefits from developing employees). In this book, McDonald and Hite bring together the strengths of both traditions, offering an integrated framework for career development. The theoretical foundation expands on the counseling literature by incorporating the literature from human resource development and related fields. The application section reflects on the wide range of ages and working options that characterize the current and future workplace. The final section of the book

addresses career development issues such as managing a diverse, global workforce; ethics; and work-life balance. This book will help prepare human resource development students, scholars, and practitioners to develop and maintain successful career development programs, and to foster more innovative research that advances the discourse.

**Handbook of Career Development** - Gideon

Arulmani 2014-02-08

This book is focused on work, occupation and career development: themes that are fundamental to a wide range of human activities and relevant across all cultures. Yet theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous. An examination of the literature pertaining to career development, counseling and guidance that has developed over the last fifty years reveals theorizing and model building have been largely dominated by Western epistemologies, some of the largest workforces in the world are in the developing world. Career guidance is rapidly emerging as a strongly felt need in these contexts. If more relevant models are to be developed, frameworks from other cultures and economies must be recognized as providing constructs that would offer a deeper understanding of career development. This does not mean that existing ideas are to be discarded. Instead, an integrative approach that blends universal principles with

particular needs could offer a framework for theorizing, research and practice that has wider relevance. The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues. This book is focused on extending existing concepts to broader contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling.

### **Mapping Career Counseling Interventions - Shékina Rochat 2022**

Mapping Career Counseling Interventions provides an innovative insight into identifying and resolving problems within career management. In recent years, a myriad of counselling tools has been developed so that psychologists can offer the most appropriate support possible. To guide the selection of such

tools, this book offers a map that introduces and links 63 frequent career management difficulties with more than 160 qualitative interventions and solutions. Through its highly organised layout and extensive detail, major career management difficulties--namely lack of motivation, indecisiveness, dysfunctional beliefs, lack of information, conflicts, and lack of employability--are scrutinized and divided into specific, more manageable sub-difficulties. Targeted interventions originating from vocational, motivational, and positive psychology are then suggested and described to address each of those difficulties. From these conclusions, the book delivers practical advice to help conduct these interventions in a sensitive and respectful manner. Overall, this book outlines the most effective ways to foster a good working alliance. One of the book's standout features is its inclusion of an inventory and card sort to facilitate the identification of obstacles to professional choice and career management.

This book is a pivotal resource for the large and diverse community of career development practitioners, such as career counsellors, career advisors, employment counsellors or career coaches, regardless of their specific audience and work settings.

### **Career Development Across the Lifespan -**

Grafton Eliason 2019-08-28

This second edition of Career Counseling Across the Lifespan: Community, School, Higher Education, and Beyond is the latest volume in the Issues in Career Development Series, edited by Drs. Grafton Eliason, Mark Lepore, Jeff Samide, and John Patrick, from California University of Pennsylvania and Clarion University of Pennsylvania. The purpose of Career Development Across the Lifespan is to provide a broad and in-depth look at the field of career development as it applies to individuals

involved in all areas of community counseling, school counseling, and higher education. The book will examine some of the field's major theories, themes, approaches, and newest models incorporating chapters from national and international career counseling experts. Specific emphasis is spent examining issues reflective of today's challenges in developing and maintaining a workforce that is diverse, flexible, and efficient. Readers will be provided with an action-based framework built on the best available research. This text book is truly the culmination of a decade's work, compiling comprehensive studies from four previous volumes and updating key concepts in career counseling with the most contemporary theories and innovations. We examine three primary domains of career counseling throughout all of the developmental stages of the lifespan: community, schools K-12, and higher education. We include a specific focus on career history and theories, to prepare students for both the

counseling environment and for national exams leading to certification and licensure, such as the (NCE) National Counseling Exam. We also include cutting edge research on contemporary topics, including such areas as: military careers, life after the military, individuals with disabilities or special needs, career counseling in our current socio-economic environment, and current technologies such as virtual counseling. In addition, we have added case studies and key

terms as study guides at the end of each chapter. We are fortunate to include many recognized experts in the field of career counseling. *Career Counseling Across the Lifespan: Community, School, Higher Education, and Beyond* is a comprehensive text, written to address the broad needs of career counselors, educators, and students today.
