**Lives saved. Rights protected.** - Council of Europe 2019-07-29  
Preventing loss of life and protecting the human rights of refugees, asylum seekers and migrants at sea The protection of refugees, asylum-seekers and migrants travelling by sea forms an integral part of international human rights, refugee and maritime laws. As explained in this document, states have clear obligations to aid any person found in distress at sea, to rescue people in distress and to ensure that their rights - including the right to life and to protection from refoulement - are upheld. Therefore, the Council of Europe Commissioner for Human Rights is putting forward a Recommendation on how to help member states make these rights practical and effective.

**The Tentacles of Progress** - Daniel R. Headrick 1988

This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology--including equipment, techniques, and experts--from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment. Examining the most important technologies--shipping and railways, telegraphs and wireless, urban water supply and sewage disposal, economic botany and plantation agriculture, irrigation, and mining and metallurgy--Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African underdevelopment.

**The Outlaw Sea** - William Langewiesche 2010-07-20

The open ocean--that vast expanse of international waters--spreads across three-fourths of the globe. It is a place of storms and danger, both natural and manmade. And at a time when every last patch of land is claimed by one government or another, it is a place that remains radically free. With typically understated lyricism, William Langewiesche explores this ocean world and the enterprises--licit and illicit--that flourish in the privacy afforded by its horizons. But its efficiencies are accompanied by global problems--shipwrecks and pollution, the hard lives and deaths of the crews of the gargantuan ships, and the growth of two pathogens: a modern and sophisticated strain of piracy and its close cousin, the maritime form of the new stateless terrorism. This is the outlaw sea that Langewiesche brings startlingly into view. The ocean is our world, he reminds us, and it is wild.

**Operational Oceanography** - N.C. Flemming 2002-06-05

The Global Ocean Observing System (GOOS) is an international programme for a permanent global framework of observations, modelling and analysis of ocean variables that are needed to support operational services around the world. The EuroGOOS strategy has two streams: the first is to improve the quality of marine information in European home waters, and the second is to collaborate with similar organisations in other continents to create a new global ocean observing and modelling system that will provide the open ocean forecasts needed to achieve the best possible performance by local marine information services everywhere. EuroGOOS held its second international conference in The Hague in 1999. Here, the operational services already in place in the EuroGOOS regions were presented and evaluated. In addition, a "Forward Look" was presented, with targets for the next 5-10 years. The proceedings of the first EuroGOOS conference were published by Elsevier in the *Journal of Marine Research* Series No. 62 Editors: Stel et al, ISBN 0-444-82892-3.

**Law, Labour, and Empire** - Maria Fusaro 2015-05-05

Seafarers were the first workers to inhabit a truly international labour market, a sector of industry which, throughout the early modern period, drove European economic and imperial expansion, technological and scientific development, and cultural and material exchanges around the world. This volume adopts a comparative perspective, presenting current research about maritime labourers across three centuries, in the Mediterranean Sea and the Atlantic and Indian Oceans, to understand how seafarers contributed to legal and economic transformation within Europe and across the world. Focusing on the three related themes of legal systems, labouring conditions, and imperial power, these essays explore the dynamic and reciprocal relationship between seafarers' individual and collective agency, and the social and economic frameworks which structured their lives.

**Pandemia nel capitalismo del XXI secolo** - Alessandra Ciattini 2020-11-10

La pandemia generata dal Coronavirus SARS-CoV2, che sta facendo morti in tutto il mondo, soprattutto fra gli strati sociali che, per le loro stesse condizioni di vita, non sanno come difendersi, è il risultato di diversi fattori e costituisce un ennesimo avvertimento, dai più inascoltato, sulle reali condizioni del nostro pianeta e sulla possibilità che la vita possa continuare a riprodursi in esso. Il volume, nell'analisi della pandemia, presta una particolare attenzione alla dimensione economica, muovendo dalla convinzione che vi sia una stretta correlazione tra il modo di produzione capitalistico - la manipolazione della natura, lo sconvolgimento degli assetti ecologici e della biodiversità che esso determina - e la genesi degli eventi pandemici. Per sviluppare al meglio questa impostazione e per connettere la sfera economica agli altri aspetti della vita sociale il volume presenta contributi di vari specialisti (biologi, virologi, medici, sociologi, filosofi, economisti, giuristi), dotati però di una sensibilità antiriduzionistica. Ossia capaci di focalizzare la dimensione di loro pertinenza senza offuscare le complesse relazioni tra questa e gli altri livelli della vita sociale.

Fruto de um trabalho minucioso e da urgência do debate sobre o tema, este livro revela a realidade brutal da escravidão contemporânea no Brasil, que persiste não somente no campo, com renomadas empresas dos setores alimentícios e do agronegócio se valendo de práticas escravistas, mas também nas cidades, por meio do trabalho doméstico sem respeito a quaisquer direitos e da exploração sexual de mulheres, jovens e crianças nas capitais e no interior do país. Unindo ensaios teóricos a pesquisas empíricas, com rico conteúdo documental, esta obra é uma coletânea com trinta e um capítulos que foram apresentados e discutidos na XIV Reunião Científica promovida pelo Grupo de Pesquisa Trabalho Escravo Contemporâneo do NEPP-DH/UFRJ, que se dedica a pesquisar esse modo de exploração humana no Brasil e no mundo. Escravidão contemporânea no campo e na cidade: perspectivas teóricas e empíricas é, portanto, a contribuição de pesquisadores, estudantes de iniciação científica, mestrado, doutorado e pós-doutorado, representando diversas áreas dentro das Ciências Humanas, que se reuniram para refletir e produzir conhecimento sobre o Trabalho Escravo

**War and Technology: A Very Short Introduction** - Alex Roland  
2016-09-01

The war instinct is part of human nature, but the means to fight war depend on technology. Alex Roland traces the co-evolution of technology and warfare from the Stone Age to the age of cyberwar, describing the inventions that changed the direction of warfare throughout history: from fortified walls, the chariot, battleships, and the gunpowder revolution to bombers, rockets, improvised explosive devices (IEDs), and nuclear weapons. In the twenty-first century, new technologies continue to push warfare in unexpected directions, while warfare stimulates stunning new technological advances. Yet even now, the newest and best technology cannot guarantee victory. Brimming with dramatic narratives of battles and deep insights into military psychology, this book shows that although military technologies keep changing at great speed, the principles and patterns behind them abide.

**Beach Nourishment and Protection** - Division on Engineering and Physical Sciences 1996-01-12

Many coastal communities have built structures at their beaches and added quantities of sand in contoured designs to combat erosion. Are such beach nourishment projects technically and economically sound? Or are they nothing more than building sand castles, as critics claim? Beach Nourishment and Protection provides a sound technical basis for decision-making, with recommendations regarding the utility of beach nourishment, the appropriate role of federal agencies, responsibility for cost, design methodology, and other issues. This volume: Examines the economic and social role of beaches, the history of beach nourishment projects, and management strategies for shore protection. Discusses the role of the U.S. Army Corps of Engineers and other federal agencies, with a close-up look at the federal flood insurance program. Explores the state of the art in project design and prediction of outcomes, including the controversy over the use of traditional and nontraditional shore protection devices. Addresses what is known about the environmental impacts of beach nourishment. Identifies what outcomes should be targeted for continued monitoring by project officials. Beach Nourishment and Protection provides insight into the technical, economic, environmental, and policy implications of beach nourishment and protection, with examples and suggested research directions.

**Ricerca migrante. Racconti di donne dal Mediterraneo** - Carmelina Chiara Canta 2017-10-01

I Racconti di donne dal Mediterraneo, sono quelli delle migranti che abbiamo ascoltato nel corso della ricerca in Sicilia, al centro di questo mare. Con il cambiamento delle migrazioni, il flusso crescente di persone in fuga da guerre e regimi non democratici e alla ricerca di una speranza di vita migliore, sono cambiate anche le donne: ragazze e madri sempre più numerose, in cammino attraverso peripezie di ogni genere, soccombenti ad abusi e violenze lungo il viaggio, e talora anche nel paese accogliente. Come vivono l'appartenenza e il dialogo interculturale? È cambiata la loro identità? Quali sono le dinamiche per l'integrazione e l'inclusione? Abbiamo cercato delle risposte a questi interrogativi sia attraverso il testo scritto sia con un cortometraggio di Sociologia visuale (<https://youtu.be/ymH6PhHC6R0>) sia con un reportage fotografico. La ricerca, diretta da Carmelina Chiara Canta, è stata realizzata dai membri del laboratorio Plu.C. di Roma Tre, che hanno analizzato i diversi aspetti sociologici. Gli autori dei saggi, esperti istituzionali e studiosi di diverse discipline discutono i risultati della ricerca: P. Basilicata, L. Chiappetta

**Of the Dominion, Or, Ownership of the Sea** - John Selden 1652  
Selden, John. Mare Clausum. Of the Dominion, or, Ownership of the Sea. Two Books: In the First, is Shew'd that the Sea, by the Law of Nature, or Nations, is Not Common to All Men but Capable of Private Dominion or Proprietie as well as the Land in the Second, is Proved That the Dominion of the British Sea, or That Which Incompasseth the Isle of Great Britain, is, and Ever Hath Been, a Part or Appendant of the Empire of that Island. Written at First in Latin and Entituled Mare Clausum, Seu, De Dominio Maris. Translated into English and set Forth with Som Additional Evidences and Discourses by Marchmont Nedham. London: William Du-Gard, 1652. xliii, 200, 37 pp. Reprinted 2004 by The Lawbook Exchange, Ltd. ISBN 1-58477-272-7. Cloth. \$110. \* Reprint of the first edition in English. Mare Clausum (Dominion of the Sea) is the most famous British reply to the argument of Grotius's Mare Liberum, which denied the validity of England's claim to the high seas south and east of England. Selden [1584-1654], argued that England's jurisdiction extends, in fact, to all waters surrounding the isles. His use of common-law principles to rebut Grotius's philosophical argument is quite impressive. Holdsworth notes that his case was enriched by "a vast historical knowledge," replete with references to the customs of peoples from the times of the Greeks to his time.": Holdsworth, A History of English Law V: 10-11.

**Escravidão Ilegal: Migração, Gênero e Novas Tecnologias em Debate** - Ricardo Rezende Figueira, Adonia Antunes Prado, Murilo Peixoto da Mota 2021-09-24

Este livro reflete sobre a escravidão contemporânea. Os capítulos que o compõem mostram que as formas que ela assume na atualidade não são apenas resquícios da escravidão do passado, têm suas próprias especificidades e ganham espaço em um contexto global de trabalho cada vez mais precarizado. Mulheres escravizadas; tráfico de pessoas e exploração sexual; exploração de migrantes; trabalho forçado na marinha mercante, propostas de erradicação do trabalho escravo; mecanismos de responsabilização; controle das condições de trabalho por meio da "lista suja" e de selos sociais; mudanças na legislação e nas políticas públicas, seus avanços e retrocessos; decisões judiciais e dificuldades na obtenção de condenações; operações de resgate; educação para prevenção; exploração no trabalho bancário, uberização e novas tecnologias são alguns dos muitos temas abordados. O objetivo deste livro é estimular a reflexão e ser subsídio para novos estudos acadêmicos, assim como refletir sobre os diversos atores aqui envolvidos com as suas narrativas, motivando a formulação de políticas públicas mais adequadas para a erradicação do trabalho escravo ilegal e contemporâneo.

*The Boundaries of Europe* - Pietro Rossi 2015-04-24

Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of the explicit endeavor to "Europeanize" the world. From the decline of the Roman Empire to the polycentrism of today's world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean

from “mare nostrum” to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.

Inequality - Michele Alacevich 2017-11-21

Inequality endangers the fabric of our societies, distorts the functioning of democracy, and derails the globalization process. Yet, it has only recently been recognized as a problem worth examining. Why has this issue been neglected for so long? In *Inequality: A Short History*, Michele Alacevich and Anna Soci discuss the emergence of the inequality question in the twentieth century and explain how it is related to current issues such as globalization and the survival of democracy. The authors also discuss trends and the future of inequality. Inequality is a pressing issue that not only affects living standards, but is also inextricably linked to the way our democracies work.

**Migration in the Mediterranean** - Francesca Ippolito 2016-01-11

Mediterranean states have developed various cooperation mechanisms in order to cope with the issues that arise from migration. This book critically analyses how institutional actors act and interact on the international scene in the control and management of migration in the Mediterranean. It highlights how, even though the involvement of 'universal' international organisations guarantees a certain balance in setting the goals of cooperation mechanisms and buttresses a certain coherence of the actions, the protection of migrants' fundamental rights

is still an objective as opposed to a reality, and security imperatives and trends still prevail in the aftermath of the 2011 Arab Spring.

**Robert Michels** - Raffaele Federici 2020-10-15T00:00:00+02:00

Nel 1910 Loria definì Robert Michels un “chierico vagante”. Più recentemente Henry Stuart Hughes non ha esitato a indicarlo come “il più cosmopolita tra i principali intellettuali del Novecento”. In effetti, non è possibile né comprendere appieno il significato della sua opera, né venire a capo delle tante contraddizioni che segnaronò il suo itinerario senza fare riferimento al suo profilo di “intellettuale di frontiera”. A partire dell’idea di frontiera, il contributo sociologico di Michels si è dimostrato significativo nel rinnovamento della scienza sociale italiana, concorrendo anche a modificare l’immagine internazionale della penisola italiana, fino ad allora rimasta per lo più legata alle impressioni goethiane. L’autore meglio noto per *La sociologia del partito politico* (1966), un’opera considerata ancora attuale perché consente di far luce su alcune delle logiche alla base della vita politica contemporanea, si caratterizzò per una forte sensibilità nei confronti dei meccanismi di formazione delle identità collettive. Un sentimento che lo spinse a nutrire un costante interesse per il tema identitario della nazione fino a gettare le basi di una “sociologia del sentimento patrio” e di una sociologia dello straniero. Robert Michels non fu solo l’elitista e lo studioso delle oligarchie e dei partiti politici, ma un autentico nomade del pensiero, degli spazi e delle classi sociali.
