**An Introduction to the Principles of Transformational Syntax** - Adrian Akmajian 1980

The central goal of this text is to introduce the reader to the methods of argumentation used in the construction of syntactic theory: the ways in which hypotheses are supported or shown to be inadequate. It is not so much about syntactic theory as an attempt to involve the reader in constructing syntactic theory--even at the beginning. The text deals with

a selected number of the clearer issues that arise in analyzing a limited set of English constructions, and it is restricted to a "classical" framework. The authors believe that in this way students will gain a thorough grounding in the methods of syntactic argumentation, will be well equipped to explore other areas on their own, and to appreciate the significance of the many theoretical innovations that have been proposed to make up for the inadequacies in the classical approach.

Reproducing Rape - Gregory M. Matoesian 1993-06

This book offers new insight into one of the most disturbing social problems of modern societies: rape. Using tape recordings of actual trials, Gregory M. Matoesian looks at the social construction of rape trials and at how a woman's experience of violation can be transformed in the courtroom into an act of routine, consensual sex. Matoesian examines the language of the courtroom, focusing on how defense lawyers interpret and classify rape in a way that makes the victim's experience appear as a normal sexual encounter. He analyzes the language that defense attorneys use in cross-examination to argue that courtroom talk can shape the victim's testimony to fit male standards of legitimate sexual practice. On this view, cross-examination is an adversarial war of words through which lawyers manipulate reality and perpetuate the patriarchal domination of women. Reproducing Rape will interest students and professionals in law, criminology, sociology, feminist theory, linguistics, and anthropology.

Exoticism in English Tag Questions - Blasius Achiri-Taboh 2020-10-15

For the last 400 years, since the birth of the Stuart Dynasty in England with James VI in the early 17th century, when the contraction of negative forms of the English sentence began in earnest, (canonical) tag questions have been a great fascination to many users of English. Within the last sixty years, beginning with the birth of the generative paradigm, tag questions have equally been of particular interest to many scholars of linguistics from a variety of perspectives, especially those concerned with the syntax-semantics and socio-pragmatics of the English sentence. With the spread of English to other countries and the emergence of new Englishes in the post-colonial context of the non-native varieties spoken in former British colonies, it is particularly interesting to see how and why tag questions have evolved over time in daily usage in both form and function in different English speech communities around the world. The essays gathered here focus on this evolutionary trend of English tag questions, with special attention on the exoticisms that characterize current usage.
