Luton in the grip of a sweltering summer is a pretty sedentary place-which is bad for the private detective business. Thieves, fraudsters and philanderers take the month off and the only swingers in town are the ones to be found on the 19th hole of the Royal Hoo Golf Course. The civilized reputation of the “Hoo” is in trouble, however. Shocking allegations of cheating have been directed at one of its leading members, Chris Porphyry. When Chris turns to Joe Sixsmith, PI, he’s more than willing to help. . .well, he hasn’t got any other clients...only Joe hadn’t counted on being charmed, kissed and then dangled out of a window all in the same day! Before long, though, Joe is on the trail of a conspiracy that starts with missing balls, and ends with murder. . .

Katharine Graham's Washington - Katharine Graham 2003-11-11

As a fitting epilogue to a life intimately linked to Washington, D.C., Pulitzer Prize winner Katharine Graham, the woman who transformed The Washington Post into a paper of record, left behind this lovingly collected anthology of writings about the city she knew and loved, a moving tribute to the nation’s capital. To Russell Banks, it is a place where “no one is in charge and no one, therefore, can be held responsible for the mess.” To John Dos Passos, it is “essentially a town of lonely people.” Whatever your impressions of Washington, D.C., you will likely find them challenged here. Experience Christmas with the Roosevelts, as seen through the eyes of a White House housekeeper. Learn why David McCullough is happy to declare “I love Washington,” while The Washington Post’s Sally Quinn wonders, “Why Do They Hate Washington?” Glimpse David Brinkley’s depiction of the capital during World War II, then experience Henry Kissinger’s thoughts on “Peace at Last,” post-Vietnam. Written by a who’s who of journalists, historians, First Ladies, politicians, and more, these varied works offer a wonderful overview of Katharine Graham’s beloved city. *Punch, Or, The London Charivari* - 1868

A Different Society Altogether - Roar Høstaker 2014-06-26

What is a society? Within sociology and political science, theoretical debates are typically concerned with how societies can be studied in the best possible way. Despite the importance of these epistemological questions, it is timely to ask what kinds of entities compose society, what the relationship between them might be and whether humans may be said to live in ‘societies’ at all. How do we conceive of a sociological theory that takes these fundamental – and more ontological – problems seriously? This book suggests some solutions based on the anthropology of science of Bruno Latour and the philosophy of Gilles Deleuze and Felix Guattari. The central argument is that these thinkers provide perspectives which can both reinvigorate the theoretical debates within sociology and provide better analytical tools for social research. Although sociology does not adhere to the letter of Durkheim’s dictum that society should be studied as an object, or of Weber’s theory that only meaningful relations are of interest, it still owes these two forefathers a great deal. Their intellectual influence has made it notoriously difficult to reconceptualize social thought from within the discipline itself. As a result, sociology has become entrenched in an unwarranted anthropocentrism, an inability to integrate language and technical objects as part of its analytical foundation, and a marked subordination to ‘state thinking’. By introducing concepts like the collective of humans and non-humans, event, plane and assemblage, this book indicates new avenues for empirical research which will make a break away from the established patterns possible. Unfortunately, many previous applications of Deleuze and Guattari’s thinking within the social sciences leave much to be desired. A recurrent phenomenon has been the rather imprecise treatment of their concepts. Furthermore, analyses of their concepts are not much more than meta-commentaries on meta-commentaries. To redress these shortcomings, this book presents a more thorough reception of this body of philosophy within the framework of sociological theory.

Girls Gone Wise in a World Gone Wild - Mary A. Kassian 2010-04-01

Inundated by popular culture, many women have lost their bearings and no longer trust the internal compass that intuitively affirms those things that are good, true, and noble about womanhood. As Jesus' favorite and most powerful teaching tactic was the parable, it is appropriate that Mary Kassian walks the reader through the compelling tale of the wild versus wise woman found in Proverbs 7. By using 20 points of contrast, she helps readers discern wild from wise, saucy from biblically savvy, and more. Girls Gone Wise in a World Gone Wild will captivate, convict, and challenge women to become decreasingly worldly and increasingly godly, and it will equip them with truth for that journey. Includes questions for personal reflection at the end of each chapter

The Indians' New World - James H. Merrell 2012-12-01

This eloquent, pathbreaking account follows the Catawbas from their first contact with Europeans in the sixteenth century until they carved out a place in the American republic three centuries later. It is a story of Native agency, creativity, resilience, and endurance. Upon its original publication in 1989, James Merrell's definitive history of Catawbas and their neighbors in the southern piedmont helped signal a new direction in the study of Native Americans, serving as a model for their reintegration into American history. In an introduction written for this twentieth anniversary edition, Merrell recalls the book's origins and considers its place in the field of early American history in general and Native American history in particular, both at the time it was first published and two decades later.
