A subtle line - Fabio Santoro 2019-03-20

A Legal Thriller about two lawyers working on opposite sides of the Channel, whose destinies are fatally intertwined. A pharmaceutical patent worth billions, a brutally murdered man and a trial that appears impossible to win. These are the facts at the centre of two young lawyers' lives. The lives of men from two contrasting worlds whose paths criss-cross in a game of shadows and reflections. Where money and revenge mark the boundaries where enemies become allies; where there is no certainty, only doubt and suspicion. A subtle line which separates ordinary lives, from those destroyed by fear; it will be up to the two adversaries on either side of the legal fence to rise above an international plot which could endanger their careers and, perhaps, their very lives... A gripping legal thriller from the very first page. PUBLISHER: TEKTIME

Convention and Materialism - Paolo Virno 2021-08-03

The first English translation of the book that established Paolo Virno as one of the most influential Italian thinkers of his generation. With the 1986 publication of this book in Italy, Paolo Virno established himself as one of the most influential Italian thinkers of his generation. Astonishingly, this crucial work has never before been published in an English translation. This MIT Press edition, translated by Italian philosopher and Insubordinations series editor Lorenzo Chiesa, is its first English-language version. Virno here engages, in an innovative and iconoclastic way, with some classical issues of philosophy involving experience, singularity, and the relation between ethics and language, while also offering a profoundly transformative political perspective that revolves around the Marxian notion of the "general intellect." Virno reconsiders Walter Benjamin's idea of a "loss of the aura" (brought on, Benjamin argued, by technical reproducibility), and postulates instead the existence of a new experience of uniqueness that, although deprived of every metaphysical aura, resides in the very process of late-capitalist serial reproduction. Writing after the defeat of contemporary leftist revolutionary movements in the West, Virno argues for the possibility of a "good life" originating immanently from existential and political crises. Taking speculative detours through the thought of philosophers ranging from Aquinas and Berkeley to Heidegger and Wittgenstein, with a specific focus on Kant and Hegel, Virno shows how a renewed reflection on basic theoretical problems helps us to better grasp what is happening now. This edition features a preface written by Virno in 2011.

The Leisure Seeker - Michael Zadoorian 2009-10-06

The unforgettable cross country journey of a runaway couple in their twilight years determined to meet the end of all roads on their own terms—a major motion picture from Sony Pictures Classics starring Helen Mirren and Donald Sutherland. The Robins have shared a wonderful life for more than sixty years. Now in their eighties, Ella suffers from cancer and John has Alzheimer's. Yearning for one last adventure, the self-proclaimed "down-on-their-luck geezers" kidnap themselves from the adult children and doctors who seem to run their lives and steal away from their home in suburban Detroit on a forbidden vacation of rediscovery. With Ella as his vigilant copilot, John steers their '78 Leisure Seeker RV along the forgotten roads of Route 66 toward Disneyland in search of a past they're having a damned hard time remembering. Yet Ella is determined to prove that, when it comes to life, you can go back for seconds—even when everyone says you can't. "The Leisure Seeker is pretty much like life itself: joyous, painful, moving, tragic, mysterious, and not to be missed."—Booklist, starred review

From WID to GAD - Shahrashoub Razavi 1995

This paper provides an introduction to "women and development" by tracing the main trends in the way women's issues have been conceptualized in the development context. Part I of the paper explains the emergence of women in development (WID) in the early 1970s, highlighting in particular a dominant strand of thinking within WID that sought to make women's issues relevant to development by showing the positive synergies between investing in women and reaping benefits in terms of economic growth. Even though making efficiency-based arguments proved to be effective as a political strategy for having women's issues taken up by donor agencies, it also entailed a number of controversial outcomes. An undue emphasis was placed on what women could contribute to development (at times based on exaggerated claims), while their demands from development for gender equity became secondary and conditional upon showing positive growth synergies. Part II of the paper looks at the analytical and intellectual underpinnings of the shift from WID to GAD (gender and development). Gender is being used by researchers and practitioners in a number of different ways. The theoretical underpinnings and policy implications of two prominent

frameworks for gender analysis (and training) - the "gender roles framework" and "social relations analysis"--Are discussed at some length. These frameworks are then linked to two relatively recent sets of literature on gender: the first on gender and efficiency at the macro-economic level, which shares several premises with the gender roles framework, and the second on women's empowerment strategies, which can be seen as the action-oriented outgrowth of social relations analysis. The authors highlight two main tensions that emerge from the different conceptualizations of gender. First, at the analytical level, there are critical differences in the extent to which the "togetherness" or "social connectedness" of husband and wife is given analytical weight; a pervasive feature of (predominantly neo-classical) economic models of gender is to use analogies from elsewhere in the economic repertoire, which tend to miss some important dimensions of togetherness characteristic of husband/wife relations. Second, at the political level, the extent to which the goal of "gender-aware" development is to be linked to "top-down" or "bottom-up" strategies remains controversial. While women's NGOs and grassroots organizations have an important role to play in creating space for women to politicize their demands, there are serious limits to what institutions of civil society can achieve. The state still remains responsible for regulating macro-level forces in a more gender-equitable manner. It is with this point in mind that the possible points of convergence between top-down and bottom-up strategies can be explored by women and development advocates.

A Writer's World - Jan Morris 2011-02-17

In a wonderfully evocative collection of her travel writing and reportage from over five decades, Jan Morris - a constant traveller - has produced a unique portrait of the twentieth century. Ranging from New York to Venice, Sydney to Berlin, and the Middle East to South Africa, Jan Morris was a witness to such seminal moments as the Eichmann trial, the first ascent of Everest, the fall of the Berlin Wall and the handover of Hong Kong. Offering a tremendously perceptive and highly personal view of the world, she is as much concerned with conveying the 'feel' of these moments as the events themselves. And, as ever, she displays her unique and inimitable literary style, at once funny, wise and sad. Jan Morris's collection of travel writing and reportage spans over five decades and includes such titles as Venice, Coronation Everest, Hong Kong, Spain, Manhattan '45, A Writer's World and the Pax Britannica Trilogy. Her novel, was shortlisted for the Booker Prize and the Arthur C. Clarke Award. 'A glorious compendium of adventure and wisdom' Pico Iyer

High Concept - Justin Wyatt 2010-07-22

Steven Spielberg once said, "I like ideas, especially movie ideas, that you can hold in your hand. If a person can tell me the idea in twenty-five words or less, it's going to make a pretty good movie." Spielberg's comment embodies the essence of the high concept film, which can be condensed into one simple sentence that inspires marketing campaigns, lures audiences, and separates success from failure at the box office. This pioneering study explores the development and dominance of the high concept movie within commercial Hollywood filmmaking since the late 1970s. Justin Wyatt describes how box office success, always important in Hollywood, became paramount in the era in which major film studios passed into the hands of media conglomerates concerned more with the economics of filmmaking than aesthetics. In particular, he shows how high concept films became fully integrated with their marketing, so that a single phrase ("Just when you thought it was safe to go back in the water...") could sell the movie to studio executives and provide copy for massive advertising campaigns; a single image or a theme song could instantly remind potential audience members of the movie, and tie-in merchandise could generate millions of dollars in additional income.

Re-Forming Capitalism - Wolfgang Streeck 2010-03-04

Wolfgang Streeck has written extensively on comparative political economy and institutional theory. In this book he addresses some of the key issues in this field: the role of history in institutional analysis, the dynamics of slow institutional change, the limitations of rational design and economic-functionalist explanations of institutional stability, and the recurrent difficulties of restraining the effects of capitalism on social order. In the classification of the 'Varieties of Capitalism' school, Germany has always been taken as the chief exemplar of a 'European', coordinated market economy. Streeck explores to what extent Germany actually conforms to this description. His argument is supported by original empirical research on wage-setting and wage structure, the organization of business and labor in business associations and trade unions, social policy, public finance, and corporate governance. From this evidence, Bringing Capitalism Back In traces the current liberalization of the postwar economy of democratic capitalism by means of an historically-grounded approach to institutional change. This is an important book in comparative political economy and key reading across the social sciences for academics, researchers, and advanced students of Political Economy, Sociology, comparative business systems.

Global Health Risk Framework - National Academies of Sciences, Engineering, and Medicine 2016-05-06

Since the 2014 Ebola outbreak many public- and private-sector leaders have seen a need for improved management of global public health emergencies. The effects of the Ebola epidemic go well beyond the three hardest-hit countries and beyond the health sector. Education, child protection, commerce, transportation, and human rights have all suffered. The consequences and lethality of Ebola have increased interest in coordinated global response to infectious threats, many of which could disrupt global health and commerce far more than the recent outbreak. In order to explore the potential for improving international management and response to outbreaks the National Academy of Medicine agreed to manage an international, independent, evidence-based, authoritative, multistakeholder expert commission. As part of this effort, the Institute of Medicine convened four workshops in summer of 2015 to inform the commission report. The presentations and discussions from the Workshop on Research and Development of Medical Products are summarized in this report.

Public Affairs Management - Phil Harris 2013-04-05

This four-volume set looks at the evolution of ideas around that critical government and business strategic interface, Public Affairs, and how our understanding and conceptualisation of the discipline and topic area has changed as the subject has become rapidly grown and become more important over the past decade with globalisation. Through thematic exploration of the key conceptual and empirical articles to have come out of the field, public affairs is here understood as a discipline and professional practice, taking in: the organisation and structuring of the public affairs function; the characteristics and factors influencing the effectiveness of public affairs; the profile, characteristics and competencies of public affairs practitioners; the value of public affairs; what is understood about 'best practice' in the public affairs context, and its

limitations; and the international perspective of public affairs. Skilfully edited and introduced by a leading voice in the field, this major work shines a spotlight on a subject which is increasingly gaining strategic significance across disciplines on the global stage. Social Security Pension Reform in Europe - Martin Feldstein 2009-02-15

Social Security in the United States and in Europe is at a critical juncture. Through the essays assembled in *Social Security Pension Reform in Europe*, Martin Feldstein and Horst Siebert, along with a number of distinguished contributors, discuss the challenges facing Social Security reform in the aging societies of Europe. A remarkable range of European nations—Germany, France, Finland, the Netherlands, Poland, Romania, Italy, Sweden, the United Kingdom, and Hungary—have implemented or are about to implement mixed Social Security systems that combine a traditional defined benefit of the pay-as-you-go system with an individual retirement account defined contribution of a capital-funded system. The essays here highlight the problems that the European pension reform process faces and how it differs from that of the United States. This timely volume will significantly enrich the debate on pension reform worldwide.

Frontier Socialism - Monica Quirico 2021-07-05

Considering the history of workers' and socialist movements in Europe, *Frontier Socialism* focuses on unconventional forms of anti-capitalist thought, particularly by examining several militant-intellectuals whose legacy is of particular interest for those aiming for a radical critique of capitalism. Following on the work of Michael Löwy, Quirico & Ragona identify relationships of “elective affinity” between figures who might appear different and dissimilar, at least at first glance: the German Anarchist Gustav Landauer, the Bolshevik Alexandra Kollontai, the German communist Paul Mattick, the Italian Socialist Raniero Panzieri, the Greek-born French euro-communist Nikos Poulantzas, the German-born Swedish Social Democrat Rudolf Meidner, and the French social scientist Alain Bihr as well as two historical struggle experiences, the Spanish Republic and the Italian revolutionary group “Lotta continua”. *Frontier Socialism* then analyzes these thinkers' and experiences' respective paths to socialism based on and achieved through self-organization and self-government, not to build a new tradition but to suggest a path forward for both research and political activism.

Euro Disneyland. A Cost Benefit Approach - Alexandre Aubard 2019-04-02

Research Paper (postgraduate) from the year 2018 in the subject Economics - Finance, grade: A, The George Washington University (Trachtenberg School of Public Policy and Public Administration), course: Cost-Benefit Analysis, language: English, abstract: This paper has for main objective to calculate the costs and benefits of the Euro Disneyland project signed between the Walt Disney Company and the French government in 1987. The Euro Disneyland project was the most ambitious project for any French government under the 5th Republic and coincided with a decade of economic turmoil. As we shall analyze, the French government accorded many benefits to the Walt Disney Company in order to have the park built in France, with the hope that the French version would be as attractive as its Japanese and American

counterparts. Although the reports conducted by the French government and the Walt Disney Company are not public, enough has filtered to calculate a basic benefit-cost analysis. Thus, this paper regroups the available data and forecasts made in 1987 by the company and the government, calculates the benefits and costs, and then analyzes the government incentives to pursue this project. In addition, the paper discusses both the importance of the forecasting failure from the Walt Disney Company in the results of the analysis and the important data that we could not include in the analysis but would have to be added if available.

Torino (e dintorni) low cost. Guida anticrisi alla (ex) capitale dell'auto - Bruna Gherner 2013

Black Souls - Gioacchino Criaco 2020-02-04

The modern Italian classic about Calabrian organized crime—now an award-winning motion picture—makes its English-language debut. In the remote Aspromonte Mountains in southern Calabria, Italy, three best friends embark on a life of crime in order to raise themselves up out of the poverty of their childhoods. Brainy Luciano, the behind-the-scenes schemer, was orphaned as a little boy when the local mob boss had his postman father executed. Lazy, jovial Luigi has learned that there's no point in following the rules. And completing the triumvirate is the nameless narrator, from whose black soul comes the inspiration and energy for each new criminal project, from kidnapping to armed robbery to heroin dealing to contract killing. Set in the birthplace of the 'Ndrangheta, Calabria's ruthless and ubiquitous mafia, *Black Souls* draws on centuries of brigand lore, peasant rebellion history, mountain mythology, and colonial suffering to offer a gripping morality tale about how violence begets violence.

The Usefulness of the Useless - Nuccio Ordine 2017-02-21

“A little masterpiece of originality and clarity.”—George Steiner “A necessary book.”—Roberto Saviano “A wonderful little book that will delight you.”—François Busnel International Best Seller / Now in English for the First Time In this thought-provoking and extremely timely work, Nuccio Ordine convincingly argues for the utility of useless knowledge and against the contemporary fixation on utilitarianism—for the fundamental importance of the liberal arts and against the damage caused by their neglect. Inspired by the reflections of great philosophers and writers (e.g., Plato, Dante, Montaigne, Shakespeare, Borges, and Calvino), Ordine reveals how the obsession for material goods and the cult of utility ultimately wither the spirit, jeopardizing not only schools and universities, art, and creativity, but also our most fundamental values—human dignity, love, and truth. Also included is Abraham Flexner's 1939 essay “The Usefulness of Useless Knowledge,” which originally prompted Ordine to write this book. Flexner—a founder and the first director of the Institute for Advanced Study in Princeton—offers an impassioned defense of curiosity-driven research and learning.

A Thorn in the Side of European Elites - Florian Hartleb 2015-01-23

The European project has recently reached a critical point, where a discussion on the fundamental objectives of the European Union has entered public debate. There are considerable concerns about a new Euroscepticism arising in response to recent developments, especially the Eurozone crisis, and a general feeling of malaise towards the European project from both national elites and ordinary citizens of Member States. This paper looks at how Euroscepticism can be defined, the reasons behind its development in Western and Eastern Europe and the EPP's perspective on this phenomenon.

Social Security - Danny Pieters 2006-01-01

Everybody uses the term social security, but definitions vary widely. This unique book may be conceived as a wide-ranging definition, although in fact it emphasizes only part of the concept: that administrative function that grants cash benefits to offset or compensate for such social risks as old age, disability, unemployment, costs of health care, and other instances occasioning the lack of means necessary for a decent existence. In an earlier form (1993), this book proved itself as a much-sought-after introduction to the field, for governments as much as for law students. In this completely revised and updated work, Professor Pieters again offers, this time to a new generation of scholars and policymakers, a common language and structure with which to talk and think about social security. The presentation is both abstract (theory of social security) and concise (structure of social security systems). In taking into account the diversity of ways in which social security has been shaped by priorities of place and time, Dr Pieters delineates the distinct alternatives that can be adhered to in establishing a social security system. He builds a frame in which these various concepts, principles, options, and techniques can be put into perspective. Although this approach hints at a common law of social security, Dr Pieters goes no further in that direction than a brief general survey (in his last chapter) of the possible features of a comparative social security law. *Social Security: An Introduction to the Basic Principles* is sure to find a welcome among many sectors of the legal and policy communities. Full of insight and information, and eminently readable, the book may be seen in a number of different ways: as a road map explaining the social security systems of various states; as an overview of the various options available for building a social security system; as an exploration of the

possibilities of rethinking or reforming an existing system; as the first tentative step toward a scientific discipline of comparative social security law; and much else besides.

The Capability Approach to Labour Law - Brian Langille 2019-04-04

Forty years ago Amartya Sen introduced to the world a novel approach to the idea of equality: the notion of 'basic capability' as 'a morally relevant dimension' and the claim that we should focus upon equality of basic capabilities ('a person being able to do certain basic things'). These ideas, as developed by Sen and Martha C. Nussbaum, have launched an academic armada now proceeding under the flag of the 'capability approach' (CA). While that flag has ventured far and wide and engaged many areas of inquiry, this volume of essays is the first to explore how CA might shed light upon labour law. The capabilities approach can illuminate our understanding of labour law across three dimensions. Part I looks at the nature of the basic relationship between CA and labour law-do they share common ground or disagree about what is important? Can the CA provide a normative 'foundation' for labour law? Part II goes further by examining the relationship of the CA and other well-established perspectives on labour law, including economics, history, critical theory, restorative justice, and human rights. Part III examines the possible relevance of the CA to a range of specific labour law issues, such as freedom of association, age discrimination in the workplace, trade, employment policy, and sweatshop goods.

Revolt on the Right - Robert Ford 2014-03-17

Winner of the Political Book of the Year Award 2015 The UK Independence Party (UKIP) is the most significant new party in British politics for a generation. In recent years UKIP and their charismatic leader Nigel Farage have captivated British politics, media and voters. Yet both the party and the roots of its support remain poorly understood. Where has this political revolt come from? Who is supporting them, and why? How are UKIP attempting to win over voters? And how far can their insurgency against the main parties go? Drawing on a wealth of new data - from surveys of UKIP voters to extensive interviews with party insiders - in this book prominent political scientists Robert Ford and Matthew Goodwin put UKIP's revolt under the microscope and show how many conventional wisdoms about the party and the radical right are wrong. Along the way they provide unprecedented insight into this new revolt, and deliver some crucial messages for those with an interest in the state of British politics, the radical right in Europe and political behaviour more generally.
