puppy. -Charles M. Schulz Boxers are fun loving dogs with a heart of gold. At first glance, they may seem imposing with a hidden message of 'see but don't touch' - that is until their joy and boundless energy comes shining through! This short haired, stocky breed comes from Germany. A mix between an Old English Bulldog and the

Bullenbeisser (Now extinct), this breed is a part of the working group of dogs. After World War I, Boxers arrived to the United States, and became a lovable companion to many dog owners.

Despite their origins, it is not a surprise to hear Boxers called the "Peter Pan" of the dog world. This label is quite accurate because this breed of dog takes a long time to mature into adulthood. Usually they are considered mature when they are three years old! So you will enjoy their puppy like antics for a few years. Typical Boxers are smart, funny, alert and loyal. They are also friendly, (although wary with strangers until they warm up) and will go to great lengths to please you. However, it is important to note these wonderful qualities hide a stubborn streak that could outlast your patience! Thankfully, this type of behavior is not common, and is the result of inappropriate training methods. Mental and physical exercise is required for this breed. This does not mean he / she cannot live in an apartment with you. They can adapt as long as

you are there to spend time with them and provide the required exercise. This breed is gentle with children and a wonderful playmate for them. Boxers also love hugs, pats, kisses and rubs. The more the merrier! There is no doubt their clownish behavior, goofy antics, crazy faces and boundless energy will bring a smile to your face, and a warm feeling to your heart. For these reasons and more, Boxers are highly recommended as a loyal companion well deserving of the title... man's best friend!

*German Boxer Training* - Claudia Kaiser

2020-08-16

German Boxer Training - Dog Training for your German Boxer puppy The training of dogs is often... .. confused with classical dog training drills ... only considered necessary for demanding dogs ... mocked by other dog owners ... replaced by anti-authoritarian methods ... considered too difficult to achieve without experience. What constitutes dog training and what is it good for? And how can you and your German Boxer profit from it without having any experience? The most important thing is to understand how a dog sees his world, what is "normal" for him and how you can use this to your advantage. In addition, the characteristics of each breed are significant when you get

beyond the basic training phase. Your German Boxer will show characteristics which are different to those of a Husky, for example, and this is predominantly what you need to consider during training. This book is vol. 1 of the German Boxer training books. Vol. 2 for your grown up German Boxer is also available with the title "German Boxer Training Vol. 2: Dog Training for your grown-up German Boxer" Author Claudia Kaiser says about her book: "It was my desire to let other dog owners profit from the knowledge I have gained over many years, and after making many mistakes. I love my dog and know how important it is to adapt the training to suit each breed. It is exactly this desire that prompted me to write this book. My aim is to help every beginner, not only to understand his dog better, but also to know exactly how to get the best results, step-by-step, so that you can achieve a close, positive and trusting human-dog relationship." Quench your curiosity to know about background information,

read reports on other experiences and obtain step-by-step instructions and secret tips which are tailor-made for your German Boxer. Get your copy of this book today and experience... .. how your German Boxer sees his world ... and how you can progressively train your dog to receive the best results. Your German Boxer will appreciate it... .. so this is my advice: Don't hesitate to buy this book!

Think Dog - John Fisher 2016-07-14

In the 1980s and 1990s John Fisher revolutionised dog training, first in England, then in the US. With his self-deprecating manner and 'Oh! So British' sense of humour, he taught us to 'Think Dog'. In this seminal pet psychology book, he examines the mind of the dog with examples taken from his practical experience, explaining to owners how the world appears from a dog's point of view. The first section of the book traces the ancestry and inherent behaviour of dogs, from their origins as pack animals related to the wolf or the jackal. The

second part examines what most people describe as problem behaviour, which is just normal canine behaviour exhibited in the wrong place. The book concludes with an A-Z of common problems, their causes and cures.

Boxers for Absolute Beginners - Mildred Joel  
2020-09-23

Males grow to about 25 inches and weigh from about 65 to 80 pounds (30 to 36 kilograms); females grow from about 21 to 25 inches and weigh from about 50 to 65 pounds (22 to 30 kilograms). Boxers have regal, distinctly shaped square heads. Their jaw is undershot and the muzzle blunt. They have a broad, deep chest and a relatively short, strong back. Boxer's ears fold over naturally, but traditionally, their ears have been cropped to stand erect. Their tails generally are docked and carried high. Their feet are compact and the toes are arched. The boxer's coat is short and sheds moderately. Some boxers are a rich, fawn color and others are brindle. Their face or mask is usually black, but many

have white face markings and white on the chest and paws.Boxers are intelligent, high-energy, playful dogs that like to stay busy. Their temperament reflects their breeding. They prefer to be in the company of their owners and are loyal pets that will fiercely guard their family and home against strangers.Few boxers bark excessively. If a boxer barks, chances are there is a good reason. Many boxers are vocal, however, and make a growling noise that's really just the dog's way of talking.The boxer has a high need for companionship and exercise. If these needs are not met, boxers can be destructive if left alone in the house. Boxers are ideal for people who want a canine companion with them most of the time or for larger busy families with homes that are often occupied by someone. They can do well on a country estate or in a city apartment as long as they have the opportunity to romp and expel energy. If you live in an urban area, regular walks are necessary.Boxers are intolerant of hot weather,

and care must be taken to prevent them from getting overheated. They also need protection from the cold since they are short-coated. Their coats, however, are very easy to care for and will be shiny and bright as long as they have a good diet, are bathed occasionally, and are given regular rub-downs with a grooming mitt or brushings with a rubber curry.Some boxers drool excessively, and some snort and snore. Like other larger dogs, boxers are not particularly long-lived. Their life expectancy ranges from about seven to 10 years.Get your copy today by scrolling up and clicking Buy Now to get your copy today

*Cesar's Way* - Cesar Millan 2006-08-08

Cesar Millan—nationally recognized dog expert—helps you see the world through the eyes of your dog so you can finally eliminate problem behaviors. From his appearances on The Oprah Winfrey Show to his roster of celebrity clients to his reality television series, Cesar Millan is America's most sought-after dog-behavior expert. But Cesar is not a trainer in the traditional sense—his expertise lies in his unique

ability to comprehend dog psychology. Tracing his own amazing journey from a clay-walled farm in Mexico to the celebrity palaces of Los Angeles, Cesar recounts how he learned what makes dogs tick. In *Cesar's Way*, he shares this wisdom, laying the groundwork for you to have stronger, more satisfying relationships with your canine companions. Cesar's formula for a contented and balanced dog seems impossibly simple: exercise, discipline, and affection, in that order. Taking readers through the basics of dog psychology and behavior, Cesar shares the inside details of some of his most fascinating cases, using them to illustrate how common behavior issues develop and, more important, how they can be corrected. You'll learn:

- What your dog really needs may not be what you're giving him
- Why a dog's natural pack instincts are the key to your happy relationship
- How to relate to your dog on a canine level
- There are no "problem breeds," just problem owners
- How to choose a dog who's right for you and

your family

- The difference between discipline and punishment
- And much more!

Filled with fascinating anecdotes about Cesar's longtime clients, and including forewords by the president of the International Association of Canine Professionals and Jada Pinkett Smith, this is the only book you'll need to forge a stronger, more rewarding connection with your four-legged companion.
