

University Union Commons Building White Paper Final July 15 2010 PDF

Eventually, you will definitely discover a further experience and achievement by spending more cash. nevertheless when? attain you undertake that you require to get those every needs gone having significantly cash? Why dont you attempt to get something basic in the beginning? Thats something that will lead you to comprehend even more in the region of the globe, experience, some places, taking into consideration history, amusement, and a lot more?

It is your extremely own era to pretense reviewing habit. along with guides you could enjoy now is **University Union Commons Building White Paper Final July 15 2010 PDF** below.

e-Democracy - Alfredo M. Ronchi 2019-04-12

This book explores the main elements of e-Democracy, the term normally used to describe the implementation of democratic government processes by electronic means. It provides insights into the main technological and human issues regarding governance, government, participation, inclusion, empowerment, procurement and, last but not least, ethical and privacy issues. Its main aim is to bridge the gap between technological solutions, their successful implementation, and the fruitful utilization of the main set of e-Services totally or partially delivered by governments or non-government organizations. Today, various parameters actively influence e-Services' success or failure: cultural aspects, organisational issues, bureaucracy and workflows, infrastructure and technology in general, user habits, literacy, capacity or merely interaction design. This includes having a significant population of citizens who are willing and able to adopt and use online services; as well as developing the managerial and technical capability to implement applications that meet citizens' needs. This book helps readers understand the mutual dependencies involved; further, a selection of success stories and failures, duly commented on, enables readers to identify the right approach to innovation in governmental e-Services. With its balanced humanistic and technological approach, the book mainly targets public authorities, decision-makers, stakeholders, solution developers, and graduate students.

The Government and Politics of the European Union - Neill Nugent 2006

A clear and comprehensive explanation of the historical development and ongoing evolution of the European Union (EU), revised and updated in this sixth edition.

European Union and Global Democracy - Raffaele Marchetti

The European Union and Global Governance - Dr Jens-Uwe Wunderlich 2010-12-14

The European Union and Global Governance: A Handbook aims to analyse contemporary debates in European Studies in order to provide lessons for the development, design and normative evaluation of global governance. It brings together scholars of European studies and international relations, where much of the literature on regional and global governance is located, thereby providing interdisciplinary lessons from the study of European Union and its governance that can be used to re-evaluate processes of global governance. Each chapter examines methodological, theoretical or empirical discussions within European studies in order to draw insights for current developments in global governance.

Economics and Policies of an Enlarged Europe - Carlo Altomonte 2006-01-01

Increasingly, policies and laws commonly agreed within the EU shape the political and economic scenarios of nation states in Europe. However, the same European context is radically changing, essentially due to three major recent developments: the adoption of the Euro, EU

enlargement to the east and the implementation of the Lisbon Strategy of structural reforms for growth and competitiveness. The book presents a thorough economic analysis of these three events and of their implications for both existing and potential EU policies and objectives. Carlo Altomonte and Mario Nava have written a very rigorous text in an accessible and jargon-free style, ensuring easy acquisition of invaluable insights into the European economic set-up and the possible evolution of EU policies, including an update on the reform of the Growth and Stability Pact and of the 2007 13 Financial Perspectives. The accessibility of economic concepts combined with the methodological rigour of this up-to-date text will be of great interest to both policy makers and students.

The European Union, China and Central Asia - Fabienne Bossuyt 2021-10-04

This book examines the involvement of the European Union (EU) and China in Central Asia and critically assesses the implications this has for the region as a whole. The volume adopts a comprehensive, interdisciplinary approach, combining insights from International Relations, EU Studies, International Economics, International Law, Sinology, and History. It concentrates on three thematic levels: (1) historical and contextual, (2) geopolitical and geo-economic, and (3) socio-cultural and institutional. Paying particular attention to the role of the EU and the factors driving the EU's and China's relations with Central Asia, it looks at how the Central Asian countries position themselves vis-à-vis China's growing influence, and how the balance of power between China, Russia, and the EU plays out. Contributors also explore the important historical context of the 'Silk Routes', as well as of the erstwhile connection of the Central Asian states with the Soviet Union. Critically analysing the potential areas for collaboration and synergy between the EU and China, the book also discusses the extent to which they share a common ground in Central Asia that could serve as a basis for long-term cooperation. It will be of interest to all scholars and students of International Relations, Economics, Sinology, and History.

The Politics of Means and Ends - Dr Holger Bähr 2013-03-28

Policy instruments are techniques used to

implement policy goals. Subject to political conflict, they address the relationship between those who govern and those who are governed. Why do political actors choose certain policy instruments to implement policy goals? Systematically comparing policy instruments employed in the European Union's environmental and social policy, Holger Bähr develops a general theoretical framework to illustrate how policy-makers prefer different types of policy instruments depending on the respective effect they wish to have on member state governments, citizens, consumers, and producers. He argues that institutions, the politicisation of policy problems and external events constrain political actors and provide them with the opportunity to transfer their preferred policy instruments into policy outputs at the end of decision-making.

The Politicization of Europe - Paul Statham 2012-11-12

This book examines how mass media debates have contributed to the politicization of the European Union. The public controversies over the EU's attempted Constitution-making (and its failure) sowed the seeds for a process of politicization that has advanced ever since: an increasing visibility for the EU in mass-mediated public debates that is combined with a growing public contestation over Europe within national politics. The book presents an original systematic study of the emerging field of political discourse carried by the mass media in France, Germany and Britain to examine the performance of Europe's public sphere. Whilst the EU's increasing politicization can be seen as beneficial to European democracy, potentially 'normalizing' the EU-level within national politics, the same developments can also be a threat to democracy, leading to populist and xenophobic responses and a decline in political trust. Such discussions are key to understanding the EU's legitimacy and how its democratic politics can work in an era of mediated politics. The Politicization of Europe will be of interest to students and scholars of comparative politics, media studies, communication, sociology and European studies.

Civil Society and Legitimate European Governance - Stijn Smismans 2006-01-01

Smismans gathers a fine selection of papers. The

book gains particular authority from its interdisciplinary approach. Ulrike Ehling, *European Law Journal* This book explores the concept of civil society, which over recent years has been revived and introduced into the institutional debate within the EU. Significantly, EU institutions themselves have made reference to civil society and, on an academic plane, it has been argued that the debate on the legitimacy of European governance should value the role of civil society organisations. Bringing together lawyers and political scientists, the book studies the role of civil society organisations in the multi-level context of European governance. *Civil Society and Legitimate European Governance* bridges the distance between normative suggestions, legal instruments and empirical analysis. Providing original contributions to the research on European governance, this book will appeal to all scholars and students with an interest in European integration and European institutions.

Rethinking Europe - Gerard Delanty 2005-09-15
Dominant approaches to the transformation of Europe ignore contemporary social theory interpretations of the nature and dynamics of social change. Here, Delanty and Rumford argue that we need a theory of society in order to understand Europeanization. This book advances the case that Europeanization should be theorized in terms of: globalization major social transformations that are not exclusively spear-headed by the EU the wider context of the transformation of modernity. This fascinating book broadens the terms of the debate on Europeanization, conventionally limited to the supersession of the nation-state by a supra-national authority and the changes within member states consequent upon EU membership. Demonstrating the relevance of social theory to contemporary issues and with a focus on European transformation rather than simplistic notions of Europe-building, this truly multidisciplinary volume will appeal to readers from a range of social science disciplines, including sociology, geography, political science and European studies.

The Social Construction of Europe - Thomas Christiansen 2001-06-01

This book is the first to systematically introduce and apply a social constructivist perspective to

the study of European integration. Social constructivism is carefully located in terms of its philosophical and methodological origins. The wider debates and contribution of constructivist approaches to international relations are reviewed, and the insights that might then be afforded to European studies fully explored. Highlights include: new theoretical contributions to the debate by Ernst B. Haas, Andrew Moravcsik and Steve Smith; research on key aspects of European integration and EU governance applying a variety of constructivist approaches. *The Social Construction of Europe* provides new and important in *Legitimacy and the European Union* - Thomas Banchoff 2005-08-12

Since the Maastricht ratification debate of the early 1990s, the legitimacy of the European Union has become a subject of controversy. With unprecedented force, Europeans have begun to question the need for deeper integration. Some fear threats to established national identities, while others perceive the emergence of a distant but powerful Brussels, beyond the reach of democratic control. *Legitimacy and the European Union* breaks with established approaches to the problem of the legitimacy of the European Union by focusing on the recent trend towards reconceptualization of the EU not as a superstate or an organization of states, but as a multi-level, contested polity without precedent. The book examines the implications of this reconceptualization for the problem of legitimacy. Individual chapters focus on policy areas, institutions and identity politics. Taken together, they reach two main conclusions. While Europeans do not strongly identify with the EU, they increasingly recognize it as a framework for politics alongside existing national and subnational structures. And while the EU lacks central democratic institutions, the integration process has spawned significant informal and pluralist forms of representation. *Rethinking recognition and representation* outside the context of the nation state points to important, if little understood, actual and potential sources of EU legitimacy.

Economic Integration in NAFTA and the EU - Kirsten Appendini 2016-01-20

The institutions of the EU and NAFTA are critically analysed by leading American and

European scholars. The book covers both the general problems of building new and integrated markets, and several policy areas that are related to economic integration. The institutions established in both Europe and America are seen as deficient in several respects. Without offering adequate replacements, the economic integration projects are actually undermining some of the core institutions that serve the needs of the market economies - institutions on which the integration process itself depends.

European Integration and Health Policy -

Panos Minogiannis 2018-02-06

The impact of European integration on diverse national social policies is still largely unknown. While policy decision making remains at the country level, there is a strong possibility that indirectly, as a result of ideological imperatives and financial constraints, policies will change. National health policy is a case in point. This important volume explores the current and probable effect of European integration on health care protection. Will it tend to encourage all European member states to provide equitable and universal access to quality care? Or is the European integration process likely to lead to social exclusion of some? The high degree of social welfare as a health expectancy holds great significance for decisions in countries like the United States facing similar pressures for expanded coverage. In answering these questions, Panos Minogiannis examines policies in Greece, France, Germany, and the Netherlands. Minogiannis frames his argument through an exploration of the history of the institutionalization of health care. Chapter 1 explores the nature of challenges that health care faces in an era of integration and the ways in which these challenges have emerged. Chapter 2 discusses centralization of governance in Brussels, describing the structure and relations of different European Union institutions, and their interactions with member states. The final portions of the book, through case studies of the Dutch, French, German, and Greek health reforms, explore the history of the political development of health care institutions with a particular interest in reform proposals in the last fifteen years. Chapter 7 brings together lessons from previous chapters and discusses the dynamics of health policy making in the

European Union. Minogiannis concludes that health insurance will most likely remain at the member state level as far as politics are concerned, at least for the present, although policy makers will most likely have to deal with the issue of cross-border health more comprehensively than in the past. Those interested in comparative policy, and in particular health care policy, will find this volume highly informative reading. Those interested in the impact of European integration will find it provocative. Panos Minogiannis is with the Mailman School of Public Health at Columbia University and is a research associate at the Eisenhower Center.

Public Management and the Metagovernance of Hierarchies, Networks and Markets - Louis Meuleman 2008-04-03

Public managers can, to a certain extent, choose between various management paradigms which are provided by public and business administration scholars and by politicians as well. How do they find their way in this confusing supermarket of competing ideas? This book explores how public managers in Western bureaucracies deal with the mutually undermining ideas of hierarchical, network and market governance. Do they possess a specific logic of action, a rationale, when they combine and switch between these governance styles? This chapter sets the scene for the book as a whole and presents the research topic and the research question. 1.1 Problem setting Since the Second World War, Western public administration systems have changed drastically. The hierarchical style of governing of the 1950s to the 1970s was partly replaced by market mechanisms, from the 1980s onwards. In the 1990s, a third style of governing, based on networks, further enriched the range of possible steering, coordination and interventions. In the new millennium, public sector organisations seem to apply complex and varying mixtures of all three styles of what we will define as governance in a broad sense. This development has brought about two problems. **The Future Law of Armed Conflict -** Matthew C. Waxman 2022

"Warfare is changing-and rapidly. New technologies, new geopolitical alignments, new interests and vulnerabilities, and other

developments are changing how, why, and by whom conflict will be waged. Just as militaries must plan ahead for an environment in which threats, alliances, capabilities, and even the domains in which they fight will differ from today, they must plan for international legal constraints that may differ, too. As states, including the United States, plan for how they will conduct warfare in the future, West Point's Lieber Institute for Law and Land Warfare, in collaboration with Columbia Law School's National Security Law Program, convened an expert workshop to consider the future legal context in which conflict will be waged. Titled "Law of Armed Conflict (LOAC) 2040," we assembled leading academics and practitioners from around the world to consider how that body of law and institutions for creating, interpreting, and enforcing it might look two decades ahead--as well as what opportunities may exist to influence it in that time"--

Independence and Legitimacy in the Institutional System of the European Union

- Dominique Ritleng 2016

With many EU non-majoritarian bodies growing in political influence, this volume sheds light on the inherent tension between independence and legitimacy in the EU's institutional system, and explores ways to reconcile the two.

Informal Governance in the European Union

- Thomas Christiansen 2003-01-01

How are the deals and decisions of the EU made - in the meeting rooms and at the conference tables, or by informal networks in the back corridors of power?

Europe, Discourse, and Institutions - Cristian Nitoiu 2014-07-25

This book focuses on how discourse and various narratives contribute to the construction of the European Union as a political actor, thus seeking to challenge the more established approaches to the study of the Union. It sheds light on the way discourses about the European Union are created, perpetuated and then translated into policy outcomes. Most of the contributions attempt to account for the differences that usually arise between discourse and policy practices. The methods employed range from more traditional variants of discourse analysis to other more radical versions that emphasize power, or to critical or differential reading of

policy narratives and ethnography. Policy areas such as trade, enlargement, foreign policy and the European Neighbourhood Policy (ENP) are discussed, while a particular interest is awarded to the European Parliament and the Commission. In doing so, the contributions shed light on the role discourse plays in relation to policies, institutional practices, and value representations at the European level. Moreover, the authors analyse the different actors and structures that create and perpetuate discourses within the EU, highlighting new insights that a focus on discourse can bring to the field of European Union studies. This book was published as a special issue of *Perspectives on European Politics and Society*.

European Food Regulation after

Enlargement - Karolina Żurek 2011-11-11

Combining an empirical analysis of the evolution of EU food regulation with a theoretical study of selected mechanisms used in governing food, this book provides a critical outlook on the capacity of the regulatory system to accommodate increased post-enlargement diversity of socio-economic concerns.

Political Theory and the European

Constitution - Lynn Dobson 2004-08-02

In June 2003, the Convention on the Future of Europe released what may become the Constitution of the European Union. This timely volume provides one of the first critical assessments of the draft Constitution from the vantage point of political theory. The work combines detailed institutional analysis with normative political theory, bringing theoretical analysis to bear on the pressing issues of institutional design answered - or bypassed - by the draft Constitution. It addresses several themes that play out differently in federal arrangements than in unitary political orders: * European values, especially the legitimate role of alleged common values * liberty and powers - how does the draft Constitution address competing normative preferences? * the European interest: the noble words regarding common European objectives and values are often muddled or conflated, different actors intending quite different things. Several chapters contribute to clarifying the different senses of these terms.

Key Controversies in European Integration -

Hubert Zimmermann 2021-03-03

Is the EU a success or a failure? Should It Stay or Should It Go? Britain and the EU The Big Waste or Essential to Feed Europe? The Common Agricultural Policy Observers of the European Union could be forgiven in thinking that since its inception the EU project has been under threat from near constant crises. In recent years, controversial issues such as EU enlargement, the fallout from the Eurozone crisis, migration policies, Brexit and the Corona pandemic have tested the EU to its limits and divided public opinion in the process. The major third edition of this comprehensive textbook on the EU seeks to introduce the integration project by looking at the thorny debates politicians, European citizens and the media contend with on a daily basis. Well known for its unique and pedagogically-innovative key debates format, the editors have invited top names in the field to contribute a stirring contribution either 'for' or 'against' each of the toughest political questions the EU faces. In doing so, not only does it offer a broad introduction to all the key concerns of the Union, but it does so in a way that is contemporary, engaging and designed to spark controversy. New to this Edition: - All chapters fully revised and updated New chapter on the transatlantic partnership - All chapters now with key takeaway points - Across all controversies, more inclusion of mainstream gender and feminist approaches

The European Union, the World Bank and the Policymaking of Aid - Eugenia Baroncelli 2019-01-03

Based on the experience of the author, an IPE scholar and former trade policy consultant at the World Bank (WB), the book offers an in-depth exploration of the EU-WB relations, conceptualized as hybrid delegation. Coupling cross-time analyses of their interaction in the regions of the Middle East and North Africa, Europe and Central Asia and Sub-Saharan Africa with an original investigation on the coordination among the EU member states at the Executive Board of the International Bank for Reconstruction and Development over the 'voice and participation reform' of 2008-2010, the book advances an innovative theoretical framework to assess the EU-WB joint institutional and field policy performances.

Augmented PA models of delegation, role theory and performance analyses are engaged, and selectively recombined, to investigate the nature, evolution and impact of the interactions of the two organizations, both in their everyday and constituent politics. Hybrid delegation-in-motion is reconstructed, against the background of post-Washington Consensus and post-Lisbon EU, to unveil the changing division of labour between the two largest development multilaterals of the new global context. The book will be of interest to scholars, students and practitioners in European Politics, Development, International Relations, International Political Economy and Global Economic Governance. European Union Politics - Michelle Cini 2007 This is the essential text for all students of European Union politics. With its established authority and reputation, the new edition is an even more invaluable resource. It has been updated throughout to reflect recent developments, and there are four new chapters on the constitutional treaty, CFSP and ESDP, the single market, and public opinion.

Crises in Europe in the Transatlantic Context - Bruno Dallago 2015-01-30

The adoption and management of the common currency has led the Eurozone to a critical point. This book analyzes in an interdisciplinary way the fundamental causes of distress, making sure to relate economic issues to the social and political aspects of the problem. The book explores the reasons why the Eurozone has fallen into a policy trap, as well as what Europe did and should do to exit the crisis, and why this is proving to be so difficult. The book also considers what role the United States has played, and could play to help foster a solution for the Eurozone. The main topics explored are the complex nature of the crisis, the short circuit between policies and the given institutional architecture, the controversial role of Germany, and the importance of an active role of the US. The book brings together a transatlantic group of scholars in order to offer an interdisciplinary analysis of the deep causes of the Eurozone distress. The authors recognize that the Eurozone countries have contrasting situations and interests and face different problems with complex consequences for the vexed question of national sovereignty within the EU; and pay

attention to the social and political consequences of the economic and financial distress and of the perceived strain of the common currency.

Applied Physics, System Science and Computers II - Klimis Ntalianis 2018-06-25

This book reports on advanced theories and methods in three related fields of research: applied physics, system science and computers. It is organized in three parts, the first of which covers applied physics topics, including lasers and accelerators; condensed matter, soft matter and materials science; nanoscience and quantum engineering; atomic, molecular, optical and plasma physics; as well as nuclear and high-energy particle physics. It also addresses astrophysics, gravitation, earth and environmental science, as well as medical and biological physics. The second and third parts focus on advances in computers and system science, respectively, and report on automatic circuit control, power systems, computer communication, fluid mechanics, simulation and modeling, software engineering, data structures and applications of artificial intelligence among other areas. Offering a collection of contributions presented at the 2nd International Conference on Applied Physics, System Science and Computers (APSAC), held in Dubrovnik, Croatia on September 27-29, 2017, the book bridges the gap between applied physics and electrical engineering. It not only presents new methods, but also promotes collaborations between different communities working on related topics at the interface between physics and engineering, with a special focus on communication, data modeling and visualization, quantum information, applied mechanics as well as bio and geophysics.

The Paradox of EU-India Relations - Shazia Aziz Wülbers 2010-12-16

The Paradox of EU-India Relations: Missed Opportunities in Politics, Economics, Development Cooperation, and Culture, by Shazia Aziz Wylbers, successfully identifies problems and prospects in the relationship between two great entities. It is a comprehensive empirical study which, after addressing economics, politics, technology, and social interactions, ultimately indicates that the Indian worldview is undeniably different from

the European Union worldview. This difference could therefore be the important cause for problematic divergences in foreign policy trends.

Constructing a Policy-Making State? -

Jeremy Richardson 2012-09-20

Constructing a Policy-Making State? sets out to examine the processes by which Europeanization takes place. Europeanization is defined as the process by which the key decisions about public policies are gradually transferred to the European level (or for new policy areas, emerge at the European level). This is in contrast to definitions of Europeanization which focus on the adaptation of member states to European public policies. Thus, the main focus is whether a European Union 'policy-making state' is being created via changes in the distribution of power between member states and the European level institutions over time. In addition to several overview chapters (such as on agenda setting in the EU), there are twelve sectoral studies which analyse the differing trajectories and outcomes of the Europeanization process and the extent to which the European Union can make 'authoritative allocations'. The case studies have been selected in order to illustrate the degree of cross-sectoral variation in the process of Europeanization, from sectors which have yet to see very much Europeanization, such as health, to sectors such as competition policy which are almost fully Europeanized. The book is consciously multi-theoretic in its approach, drawing on a range of theories and concepts, from theories of European integration, to theories of public policy processes.

New Risks, New Welfare - Peter Taylor-Gooby 2004-11-11

This book, based on brand new data from a major study and long-standing collaboration between a number of prominent European scholars, provides a fresh perspective on the future of the welfare state across the EU. Through detailed case-study analysis, it analyses the emergence of new social risks alongside traditional needs.

Dimensions of Federal Nation Building - Abdulrahim P. Vijapur 1998

Crisis and Renewal - John Van Oudenaren 2021-09-22

This clear text provides a comprehensive

introduction to the EU's history, institutions, and policies in the context of the ongoing crises the Union faces. Explaining the different theoretical perspectives used to understand the EU, the book gives students the tools they need to assess whether the Union is on a path to renewal.

Redefining Harmonisation - Ghio, Emilie
2022-06-14

Providing a definition of the concept of harmonisation within the context of the European Union, this timely book debunks the idea that EU harmonisation measures are made behind closed doors in Brussels and imposed, top-down, on the Member States. Offering an in-depth exploration of the concept of harmonisation through the lens of European Insolvency Law, the book will be an insightful read for students and legal scholars interested in EU law and the law-making process.

A Common Law for Europe - Gian Antonio Benacchio 2005-01-01

The first of a series on European Union Law, it provides a detailed overview of the development of a new European Common Law. The authors deal with the transposition of concepts and the problem of translation. Each chapter is accompanied by a bibliography in Italian as well as in English, French and German suggesting further reading in each area.

Sustainable Water Ecosystems Management in Europe - Carlo Sessa 2012-07-31

First book to consider citizens playing a role in the science-policy interface to help formulate durable responses to sustainability challenges Discusses all aspects to enhance the connectivity of actors in the sustainable water management field, with three pilot case studies showing how citizens and stakeholders can be engaged early and effectively in the river basins and coastal waters planning processes Provides tips and recommendations for the transferability of the approach in different coastal areas of Europe and beyond. Sustainable Water Ecosystems Management in Europe examines the anthropogenic deterioration of water ecosystems, in particular in coastal areas. It proposes a new approach to enhance connectivity between research and policy-making. The book exploits the concept of integrated adaptive ecosystem management, by engaging scientists, policy makers and the

public (the latter including both stakeholders and lay citizens/water users) in comparable case studies. Emphasis is given to the role of the public to enlarge the concept of organisational learning to the wider concept of social learning. The EC 7th Research Framework Program funded project AWARE engaged a panel of randomly selected citizens living in three different coastal areas of Europe - in a pilot experience of knowledge brokerage with water scientists and decision makers focused on coastal waters quality. Results and lessons learned from the project are summarized in this volume, and recommendations are made for this pilot's replication and transferability to different coastal areas and sustainable water management tasks - and beyond to other sustainability research and policy issues. This book is a must-read for water managers and policy makers looking to effectively organize citizen and stakeholder participation in river basin and coastal water planning, as required by the EU Water Framework Directive. Sustainable Water Ecosystems Management in Europe provides useful recommendations for organising effective participation of citizens in the science and policy dialogue, promoting a collective awareness of the plans and actions needed to protect the water environment and ensure sustainable use of water resources. Editor: Carlo Sessa, AWARE Project Coordinator, Director at ISIS - Institute of Studies for the Integration of Systems, Italy

The European Union - Ali El-Agraa 2007-08-09
The European Union provides a comprehensive introduction to the economics and policies of the EU.

European Labour Relations - György Széll
2020-07-24

This title was first published in 2001. With the increasing economic, political and social integration in Europe, there has been a fundamental change in labour and industrial relations. Not only in the Japanese and American challenges in the triad competition under the slogan of 'Lean Management' but also ecological and democratic challenges are relevant. The directive for the introduction of European works councils is one example of new forms of industrial relations. The question remains since the Hofstede studies on how far will integration

go in guarding the cultural specificity's and identities. The material is structured in a logical and helpful way with a balanced and complete review of the subject. This first of two volumes concentrates on the general features of the European system of labour relations. Both volumes are addressed particularly to academics and students of business administration, economics, sociology, labour law and organizational psychology at university level, and would also be suitable for intensive courses and seminars in the private sector.

Brexit and Agriculture - Ludivine Petetin
2022-01-26

Acknowledging the challenges and opportunities raised by Brexit for the agri-food supply chain and agricultural policies across the UK, this book provides the first in-depth analysis of agricultural policy developments across the UK's four nations rooted in strong theoretical and practical underpinnings. Arguing that the four nations could be more ambitious in departing from the Common Agricultural Policy and extending beyond the 'public money for public goods' approach adopted across the UK, it critiques the core attributes of their policies with focuses including the debate over outcome-based schemes, governance mechanisms, impacts on farm diversity and path dependency on the Common Agricultural Policy and English approaches. It promotes a 'resilient agriculture' paradigm and utilises social-ecological services, net zero, agroecology and agri-food democracy as the main pathways to achieve this. In doing so, it scrutinises the evolving contextual, political and legal landscape within which devolved and UK agricultural policies are developing from a multilevel governance perspective, examining the implications of WTO law for the UK and its devolved administrations to determine environmental, food and animal welfare standards under the GATT, the SPS and TBT Agreements and financial support schemes under the Agreement on Agriculture. The book assesses the significance of the Northern Ireland Protocol, the Trade and Cooperation Agreement with the EU and other free trade agreements for standards across the UK and access to markets. From a domestic perspective, challenges to devolution and the stability of the Union are highlighted. Elements of unilateral

recentralisation are visible via financing mechanisms, the UK Internal Market Act and the Agriculture Act. The book's interdisciplinary nature makes it of interest to lawyers, political scientists, economists, human geographers and scientists, as well as policy-makers, agricultural communities, civil society organisations and think tanks in the devolved administrations, the UK, the EU and beyond.

The Politics of Means and Ends - Holger Bähr
2016-03-03

Policy instruments are techniques used to implement policy goals. Subject to political conflict, they address the relationship between those who govern and those who are governed. Why do political actors choose certain policy instruments to implement policy goals? Systematically comparing policy instruments employed in the European Union's environmental and social policy, Holger Bähr develops a general theoretical framework to illustrate how policy-makers prefer different types of policy instruments depending on the respective effect they wish to have on member state governments, citizens, consumers, and producers. He argues that institutions, the politicisation of policy problems and external events constrain political actors and provide them with the opportunity to transfer their preferred policy instruments into policy outputs at the end of decision-making.

Accountability in EU Security and Defence - Carolyn Moser
2020-05-21

Currently, some 2,500 civilian experts work across Europe, Africa, and Asia in ten ongoing civilian missions launched under the Common Security and Defence Policy (CSDP). Mandates cover a broad range of multidimensional tasks, such as rule of law support, law enforcement capacity building, or security sector reform. Numerous (recent) incidents from the field underscore that there are serious institutional as well as procedural weaknesses and irregularities tied to accountability in these EU peacebuilding missions. This title offers a comprehensive legal analysis and empirical study of accountability concerning the Union's peacebuilding endeavours, also referred to as civilian crisis management. Along with examining the governance credentials of EU peacebuilding, the monograph thoroughly scrutinizes de jure and

de facto accountability arrangements of political, legal, and administrative nature existing in the domestic sphere, at EU level, and across levels. With a view to providing for a nuanced picture, the assessment further distinguishes between different accountability finalities and evaluates the appropriateness of existing accountability arrangements in civilian crisis management based on a combination of quantitative and

qualitative criteria.

Handbook of International Security and Development - Paul Jackson 2015-02-27

Providing a comprehensive introduction to the literature and approaches used in the field, this illustrious Handbook explores and interrogates the link between security and development at a global level whilst offering a broad survey of current thinkin
