Slow Travel and Tourism - Janet Dickinson 2010-09-23

It is widely recognized that travel and tourism can have a high environmental impact and make a major contribution to climate change. It is therefore vital that ways to reduce these impacts are developed and implemented. 'Slow travel' provides such a concept, drawing on ideas from the 'slow food' movement with a concern for locality, ecology and quality of life. The aim of this book is to define slow travel and to discuss

how some underlining values are likely to pervade new forms of sustainable development. It also aims to provide insights into the travel experience; these are explored in several chapters which bring new knowledge about sustainable transport tourism from across the world. In order to do this the book explores the concept of slow travel and sets out its core ingredients, comparing it with related frameworks such as low-carbon tourism and sustainable tourism development. The authors explain slow travel as holiday travel where air and car transport is rejected in favour of more environmentally benign forms of overland transport, which generally take much longer and become incorporated as part of the holiday experience. The book critically examines the key trends in tourism transport and recent climate change debates, setting out the main issues facing tourism planners. It reviews the potential for new consumption patterns, as well as current business models that facilitate hyper-mobility. This provides a cutting edge critique of the 'upstream' drivers to unsustainable tourism. Finally, the authors illustrate their approach through a series of case studies from around the world, featuring travel by train, bus, cycling and walking. Examples are drawn from Europe, Asia, Australia and the Americas. Cases include the Eurostar train (as an alternative to air travel), walking in the Appalachian Trail (US), the Euro-Velo network of long-distance cycling routes, canoe tours on the Gudena River in Denmark, sea kayaking in British Columbia (Canada) and the Oz Bus Europe to Australia.

Modern Selective Fungicides - Horst Lyr 1987

The Philosophy of Art History (Routledge Revivals) - Arnold Hauser 2018-12-07

First published in 1959, this book is concerned with the methodology of art history, and so with questions about historical thinking; it enquires what scientific history of art can accomplish, what are its means and limitations? It contains philosophical reflections on history and begins with chapters on the scope and limitations of a sociology of art, and the concept of ideology in the history of art. The chapter on the concept of "art history without names" occupies the central position in the book — thoroughly discussing the basic philosophical outlook for the whole work. There are also further chapters on psychoanalysis, folk art and popular art. The chapter on the role of convention in the history of art points the way for further study.

Gender at Work - Rosemary Pringle 2020-07-29

Three themes are drawn together in this book: gender and sexuality, the organisation of work, and the impact of technological change. Their inter-relationship is explored in six area studies: manufacturing, banking, retailing, computing, nursing and housework. *Gender at Work* presents an account of how each area has changed since the Second World War; sets out ways in which the notion of what constitutes 'proper' work for men and women changes with new work processes; and analyses the prospects for, and limits of, sexual 'equality' in the workplace. Based on the first-hand observations of workers, reflecting on their work experience, this book allows workers to speak for themselves: they reveal the centrality of gender to the way capitalism is organised. 'A notable contribution, both to feminist and labour studies in Australia and further afield. Every woman, whether at home or in the paid workforce, should read this book. It will help her assess exactly what she is - and should be - worth to the community, and how she can help to ensure her true evaluation.' - Newcastle Herald 'A very readable book which makes a major theoretical and descriptive contribution to the analysis of

gender in Australian Society.' - Journal of Industrial Relations 'A convincing demonstration of the central place of gender in the work relationships between men and women. The insights it provides, into the underlying causes of the sex division of tasks and the way in which new jobs in any individual setting quickly become sex-typed, are important for any manager of a mixed workplace.' - Practising Manager

Beginning and End of the Snow - Yves

Bonnefooy 2012

Yves Bonnefooy's book of poems, *Beginning and End of the Snow* followed by *Where the Arrow Falls*, combines two meditations in which the poet's thoughts and a landscape reflect each other. In the first, the wintry New England landscape he encountered while teaching at Williams College evokes the dance of atoms in the philosophical poem of Lucretius as well as the Christian doctrine of death and resurrection. In the second, Bonnefooy uses the luminous woods of Haute Provence as the setting for a parable of losing one's way."

The Gaze - Elif Shafak 2012-10-25

A beautiful and compelling novel, Elif Shafak's *The Gaze* considers the damage which can be inflicted by our simple desire to look at others "I didn't say anything. I didn't return his smiles. I looked at him in the wide mirror in front of where I was sitting. He grew uncomfortable and avoided my eyes. I hate those who think fat people are stupid." An obese woman and her lover, a dwarf, are sick of being stared at wherever they go, and so decide to reverse roles. The man goes out wearing make up and the woman draws a moustache on her face. But while the woman wants to hide away from the world, the man meets the stares from passers-by head on, compiling his 'Dictionary of Gazes' to explore the boundaries between appearance and reality. Intertwined with the story of a bizarre freak-show organised in Istanbul in the 1880s, *The Gaze* considers the damage which can be inflicted by our simple desire to look at others. Heidegger speaks of a new humanism; his philosophy is a fundamental re-evaluation of the relation of man to the world.

The Psychobiology of Consciousness - Richard Davidson 2012-12-06

CONSCIOUSNESS AND THE BRAIN SELF-REGULATION PARADOX The relationship of consciousness to biology has intrigued mankind throughout recorded history. However, little progress has been made not only in understanding these issues but also in raising fundamental questions central to the problem. As Davidson and Davidson note in their introduction, William James suggested, almost a century ago in his *Principles of Psychology*, that the brain was the organ of mind and behavior. James went so far as to suggest that the remainder of the *Principles* was but a "footnote" to this central thesis. This volume brings together diverse biobehavioral scientists who are addressing the various aspects of the mind/brain/body/behavior issue. Although some of the authors have previously published together in other volumes, by and large the particular combination of authors and topics selected by the editors makes this volume unique and timely. Unlike the *Consciousness and Self-Regulation* series (Schwartz & Shapiro, 1976, 1978), also published by Plenum, this volume is devoted entirely to a psychobiological approach to consciousness. Although readers will differ in their interest in specific chapters, the well-rounded investigator who is concerned

with the psychobiology of consciousness will want to become intimately acquainted with all the views presented in this volume. As noted by the individual contributors, the topic of this volume stimulates fundamental questions which, on the surface, may appear trivial, yet, on further reflection, turn out to have deep significance.

By focusing passion, playfulness, improvisation, intuitive judgement, beauty, and sensuality beyond deadlocking dualisms, this new type of leadership opens up a third aesthetic way contributing quality, meaning and value to projects and enterprises.

The Technology of Wine Making - Maynard Andrew Amerine 1980

Abstract: The revolution in the ancient art of wine making really began with Pasteur, whose knowledge of chemistry and microbiology led to the application of scientific principles to the fermentation process. The scientific approach continues to grow in importance, although certain aspects of growing and fermenting grapes, not to mention tasting the wine, defy definition. In an effort to keep abreast of this burgeoning technology, an

updated reference work explains commercial production techniques for all types of wine (red, white, sparkling, sherry, port, fruit, and brandy) and processes for avoiding bacterial and non-bacterial spoilage. Winery equipment and design, the molds and yeasts of grapes and wines, and the chemistry of fermentation are discussed in detail. Although the major wine producing areas of the world are described, emphasis is on American varieties, both eastern and western.

Introduction to Counseling - Michael Scott Nystul 2015-07-09

Introduction to Counseling by Michael Scott Nystul provides an overview of counseling and the helping professions from the perspective of art and science—the science of counseling that generates a knowledge base proven to promote competency and efficacy in the practitioner, and the art of using this knowledge base to build skills that can be applied sensitively to clients in a multicultural society. The Fifth Edition has been organized into three sections: (1) an overview of counseling and the counseling process, (2) multicultural counseling and counseling theories, and (3) special approaches and settings. It continues to address key topics and issues, including gender, culture, and sexual orientation, and offers ways to integrate multiculturalism into all aspects of counseling, rather than view it as a separate entity. Highlighting emerging trends and changes in ethical codes, as well as reflecting the latest updates to the Diagnostic Statistical Manual (DSM-5), the book successfully illustrates the importance of art and science to modern-day counseling.

Dynamics of Globalization and Development - Satya Dev Gupta 2012-12-06

Dynamics of Globalization and Development debates the role of structural adjustment programs and policies, the implication of financial liberalization for growth and stability, the effects of foreign direct investment and the associated behavior of multinationals in terms of intellectual property rights, the diffusion of

technology, growth and development. Many contributors offer innovative insights into the complexities of the process in terms of its micro foundations, and propose efficiency-based multinational policy frameworks. A general thrust of most of the studies in this volume is that the market-driven process of globalization alone will not lead to stable and equitable economic growth. Consequently, several contributors recommend a set of proactive policies to promote greater stability in the system and a more equitable distribution of the benefits of globalization. This anthology will provide valuable insights and important background analysis for scholars working in the field of globalization as well as senior undergraduate and graduate students in a variety of curricula, including economics, finance, development studies, and international studies.
