Every aspect of the charts, maps and time lines leaps off the page with spectacular color, incredible accuracy and intricate detail. . . . This visually appealing resource provides a wide array of illustrative and textually concise references, beginning with three sets of charts covering the Bible as a whole, the Old Testament and the New Testament. These charts cover such topics as biblical weights and measures, feasts and holidays and the 12 disciples. Most of the charts use a variety of illustrative techniques to convey lessons and provide visual interest. A worthwhile example is 'How We Got the Bible,' which provides a time line of translation history, comparisons of canons among faiths and portraits of important figures in biblical translation, such as Jerome and John Wycliffe. The book then presents a section of maps, followed by diagrams to conceptualize such structures as Noah's Ark and Solomon's Temple. Finally, a section on Christianity, cults and other religions describes key aspects of history and doctrine for certain Christian sects and other faith traditions. Overall, the authors take a traditionalist, conservative approach. For instance, they list Moses as the author of the Pentateuch (the first five books of the Hebrew Bible) without making mention of claims to the contrary. When comparing various Christian sects and world religions, the emphasis is on doctrine and orthodox theology. Some chapters, however, may not completely align with the needs of Catholic and Orthodox churches. But the author's leanings are muted enough and do not detract from the work's usefulness. As a resource, it's well organized, inviting and visually stimulating. Even the most seasoned reader will learn something while browsing. Worthwhile reference stuffed with facts and illustrations." --Kirkus Reviews

Four Views on the Historical Adam - Denis Lamoureux 2013-12-10

Were the biblical Adam and Eve historical figures, or are the early events described in Genesis primarily symbolic in nature? Behind the debate of a historical Adam is the age-old debate about evolution and the agreement between Scripture and science. With an introduction that outlines the history and main points of every viewpoint from Darwinism to Young Earth Creationism, this book then clearly outlines four primary views on Adam held by evangelical Christians. Contributors include Denis O. Lamoureux, John H. Walton, C. John Collins, and William Barrick. Each focuses his essay on answering the following questions: What is the biblical case for your viewpoint, and how do you reconcile it both with modern science and with passages and potential interpretations that seem to counter it? In what ways is your view more theologically consistent and coherent than other views? What are the implications of your view for the spiritual life and public witness of the church and individual believers, and how is your view a healthier alternative for both? This book allows each contributor to not only present the case for his view, but also to critique and respond to the critiques of the other contributors, allowing you to compare their beliefs in an open forum setting to see where they overlap and where they differ. Concluding reflections by pastor-scholars Gregory A. Boyd and Philip Graham Ryken highlight the significance of the topic in the faith of everyday believers. The Counterpoints series presents a comparison and critique of scholarly views on topics important to Christians that are both fair-minded and respectful of the biblical text. Each volume is a one-stop reference that allows readers to evaluate the different positions on a specific issue and form their own, educated opinion.

Covenant - John H. Walton 1994

As one of the most prominent themes in Scripture, the covenant is crucial to all Christian theological systems, from dispensationalism to covenant theology to theonomy to liberation theology. One would think that by now all controversies have been exhausted, but an issue of this magnitude can never finally be laid to rest. Because disagreements persist, there is room for yet another attempt to study the covenant and improve our understanding of it. This book proposes that the path toward an evangelical consensus is not to be found in building another modified systematic theology, but in a biblical theology approach. Grounded in this approach, John Walton's perspective is that while the covenant is characteristically redemptive, formulated along the lines of ancient treaties, and ultimately soteric, it is essentially revelatory. This view in turn has implications regarding the continuity or discontinuity of the covenant phases, the conditionality of the covenant, and our understanding of the people of God. And this ultimately affects the way the Old Testament is preached and taught. Walton's thesis is an important contribution to the discussion of the covenant and the attempts to find common ground among evangelicals of diverse theological traditions.

Charts of Christian Ethics - Craig Vincent Mitchell 2006

In the twenty-first century, Christian individuals and institutions routinely face ethical choices not imagined fifty years ago, with little ethical mooring in the surrounding culture to guide us.
