[Landscapes in Oil](#) - Ken Salaz 2019-03-19

*Landscapes in Oil* is the first-ever comprehensive guide to classical landscape painting reinterpreted for the twenty-first century. Drawing from the tradition established by American painters of the Hudson River School--artists like Thomas Cole, Frederic Church, and George Inness--author and painter Ken Salaz reveals great masters' philosophy and methods, updating their approaches for the contemporary landscape painter. Beginning painters are given the basic tools and step-by-step demonstrations, intermediate painters are challenged with unpublished techniques that allow them to break through to the next level, and advanced

painters learn to apply their skills under unified theories. *Landscapes in Oil* devotes a chapter to each of the fundamental elements of landscape painting--drawing, value, color, composition, and light quality--and offers critical advice on selecting tools and materials, choosing colors, and structuring your palette for best results. Emphasizing the necessity of plein air drawing and painting, Salaz demonstrates how to translate small, quick studies made outdoors into full-scale studio paintings. He provides detailed step-by-step breakdowns of the creation of four of his own paintings, focusing not only on application but also on the ideas that underpin every decision a landscape painter must make. The scores of landscape masterworks, past and present, that illustrate this book have been carefully chosen for their aesthetic power and because each embodies a specific aspect of the landscape painter's craft. For Salaz, landscape painting is a noble pursuit, and the goal of the landscape artist is not to paint "pretty pictures" but to create compelling images that express human beings' profound connection to nature in all its diversity and grandeur. At a time when classical landscape is enjoying a renaissance in art schools, ateliers, and galleries across North America, this book is an essential resource for beginning and experienced painters alike.

**Girls Like Us** - Sheila Weller 2008-04-08

A groundbreaking and irresistible biography of three of America's most important musical artists—Carole King, Joni Mitchell, and Carly Simon—charts their lives as women at a magical moment in time. Carole King, Joni Mitchell, and Carly Simon remain among the most enduring and important women in popular music. Each woman is distinct. Carole King is the product of outer-borough, middle-class New York City; Joni Mitchell is a granddaughter of Canadian farmers; and Carly Simon is a child of the Manhattan intellectual upper crust. They collectively represent, in their lives and their songs, a great swath of American girls who came of age in the late 1960s. Their stories trace the arc of the now mythic sixties generation—female version—but in a bracingly specific and deeply recalled way, far from cliché. The history of the women of that generation has never been written—until now, through their resonant lives and

emblematic songs. Filled with the voices of many dozens of these women's intimates, who are speaking in these pages for the first time, this alternating biography reads like a novel—except it's all true, and the heroines are famous and beloved. Sheila Weller captures the character of each woman and gives a balanced portrayal enriched by a wealth of new information. *Girls Like Us* is an epic treatment of midcentury women who dared to break tradition and become what none had been before them—confessors in song, rock superstars, and adventurers of heart and soul.

**Retail Food Safety** - Jeffrey Farber 2014-10-07

Currently, there is no one book or textbook that covers all aspects of retail food safety. It is becoming apparent that a number of issues relating to retail food safety have come to the forefront in some jurisdictions of late. For example, a recent USDA risk assessment has pointed out that issues occurring at USA retail appear to be critical in terms of contamination of deli-meat. As well, a large listeriosis outbreak in Quebec pointed to retail cross-contamination as a key issue. In terms of sanitation, a number of advances have been made, but these have not all been synthesized together in one chapter, with a focus on retail. In addition, the whole area of private standards and the Global Food Safety Initiative (GFSI) have come to the forefront of late and these as well will be explored in great detail. Other aspects related to the safety of important food commodities such as seafood, meat, produce and dairy will also be discussed and salient areas addressed.

*Representing the Good Neighbor* - Carol A. Hess 2013-06-26

Winner of the 2015 Robert M. Stevenson Award from the American Musicological Society In *Representing the Good Neighbor: Music, Difference, and the Pan American Dream*, Carol A. Hess investigates the reception of Latin American art music in the US during the twentieth century. Hers is the first study to probe Latin American art music in relation to Pan Americanism, or the idea that the American nations are bound by common aspirations. Under the Good Neighbor policy, crafted by the administration of President Franklin D. Roosevelt to cement hemispheric solidarity amid fears of European fascism, Latin American art music flourished and US critics applauded it as "universal." During the Cold War, however, this repertory assumed a very different status. While the United States supported Latin American military dictators to assuage fears that communism would overwhelm the hemisphere, musical works were increasingly objectified through essentializing adjectives such as "exotic," "distinctive," or "national"--through the filter of difference. Hess explores this phenomenon by tracking the reception in the United States of the so-called Big Three: Carlos Chávez (Mexico), Heitor Villa-Lobos (Brazil), and Alberto Ginastera (Argentina). She also evaluates several important US composers and critics-Copland, Thomson, Rosenfeld, and others-in relation to Pan Americanism, and offers a new interpretation of a work about Latin America by US composer Fredric Rzewski, 36 Variations on "The People United Will Never Be Defeated!" Whether discussing works performed in modern music concerts of the 1920s, at the 1939 World's Fair, the inauguration of the New York State Theater in 1966, or for the US Bicentennial, Hess illuminates ways in which North-South relations continue to inform our understanding of Latin American art music today. As the first book to examine in detail the critical reception of Latin American music in the United States, *Representing the Good Neighbor* promises to be a landmark in the field of American music studies, and will be essential reading for students and scholars of music in the US and Latin America during the twentieth-century. It will also appeal to historians studying US-Latin America relations, as well as general readers interested in the history of American music.

**Boom!** - Tom Brokaw 2008-10-14

In *Boom!*, Tom Brokaw, one of America's premier journalists and the acclaimed author of *The Greatest Generation*, gives us an epic portrait of another defining era in America: the tumultuous Sixties. In the reflections of a generation, Brokaw also discovers lessons that might guide us in the years ahead. Race, politics, war, feminism, popular culture, and music are all delved into here. Brokaw explores how members of this generation have gone on to bring activism and a Sixties mindset into individual entrepreneurship, as we hear stories of how this formative decade has shaped our perspectives on business, the environment, politics, family, and our national existence. Remarkable in its insights, wonderfully written and reported, this revealing book lets us join in these frank conversations about America then, now, and tomorrow. Praise for *Boom!* "Tom Brokaw does an excellent job of capturing an exciting, controversial period in American history and *Boom!* is a worthy addition to his growing canon."--New York Post "[Tom Brokaw] approaches this magnum opus with warmth, curiosity and

conviction, the same attributes that worked so well for his Greatest Generation.” -The New York Times “[A] verbal scrapbook of the Sixties . . . [Boom! shows] that the era’s core issues–racism, women’s rights, a nation-dividing war–remain central today, and that the values boomers championed haven’t yet gone bust.” –People (four stars) “Packed with memorable people, places, events . . . **Art is a Tyrant** - Catherine Hewitt 2020-02-06

‘Art is a Tyrant recounts [Bonheur’s] life with no little brio.’ Michael Prodger, The Times Books of the Year 2020 '[A] diligently researched, beautifully produced and insistently sympathetic biography.' Kathryn Hughes, Guardian A new biography of the wildly unconventional 19th-century animal painter and gender equality pioneer Rosa Bonheur, from the author of the acclaimed *Mistress of Paris* and *Renoir's Dancer*. Rosa Bonheur was the very antithesis of the feminine ideal of 19th-century society. She was educated, she shunned traditional ‘womanly’ pursuits, she rejected marriage – and she wore trousers. But the society whose rules she spurned accepted her as one of their own, because of her genius for painting animals. She shared an intimate relationship with the eccentric, self-styled inventor Nathalie Micas, who nurtured the artist like a wife. Together Rosa, Nathalie and Nathalie’s mother bought a chateau and with Rosa’s menagerie of animals the trio became one of the most extraordinary households of the day. Catherine Hewitt’s compelling new biography is an inspiring evocation of a life lived against the rules.

**Bretherick's Handbook of Reactive Chemical Hazards** - Peter Urban 2016-06-23

'Bretherick' is widely accepted as the reference work on reactive chemical hazards and is essential for all those working with chemicals. It attempts to include every chemical for which documented information on reactive hazards has been found. The text covers over 5000 elements and compounds and as many again of secondary entries involving two or more compounds. One of its most valuable features is the extensive cross referencing throughout both sections which links similar compounds or incidents not obviously related. The fifth edition has been completely updated and revised by the new Editor and contains documented information on hazards and appropriate references up to 1994, although the text still follows the format of previous editions. Volume 1 is devoted to specific information on the stability of the listed compounds, or the reactivity of mixtures of two or more of them under various circumstances. Each compound is identified by an UPAC-based name, the CAS registry number, its empirical formula and structure. Each description of an incident or violent reaction gives reference to the original literature. Each chemical is classified on the basis of similarities in structure or reactivity, and these groups are listed alphabetically in Volume 2. The group entries contain a complete listing of all the compounds in Volume 1 assigned to that group to assist cross referral to similar compounds. Volume 2 also contains hazard topic entries arranged alphabetically, some with lists. Appendices include a fire related data table for higher risk chemicals, indexes of registry numbers and chemical names as well as reference abbreviations and a glossary.
