and Religion; Dress and Adornment; Female Patronage; Hellenistic Queens; Imperial Women; Women in Late Antiquity; Early Women Saints; and many more Thematically arranged to emphasize the importance of historical themes of continuity, development, and innovation Reconsiders much of the well-known evidence and preconceived notions relating to women in antiquity Includes contributions from many of the most prominent scholars associated with the study of women in antiquity

**Life in the Limes** - Rob Collins 2014-03-31

Lindsay Allason-Jones has been at the forefront of small finds and Roman frontier research for 40 years in a career focussed on, but not exclusive to, the north of Britain, encompassing an enormous range of object types and subject areas. Divided into thematic sections the contributions presented here to celebrate her many achievements all represent at least one aspect of Lindsay's research interests. These encompass social and industrial aspects of

northern frontier forts; new insights into inscribed and sculptural stones specific to military communities; religious, cultural and economic connotations of Roman armour finds; the economic and ideological penetration of romanitas in the frontiers as reflected by individual objects and classes of finds; evidence of trans-frontier interactions and invisible people; the role of John Clayton in the exploration and preservation of Hadrian's Wall and its material culture; the detailed consideration of individual objects of significant interest; and a discussion of the widespread occurrence of mice in Roman art.

**The Oxford Handbook of Roman Britain** -  
Martin Millett 2016-09-01

This book provides a twenty-first century perspective on Roman Britain, combining current approaches with the wealth of archaeological material from the province. This volume introduces the history of research into the province and the cultural changes at the beginning and end of the Roman period. The majority of the chapters are thematic, dealing with issues relating to the people of the province, their identities and ways of life. Further chapters consider the characteristics of the province they lived in, such as the economy, and settlement patterns. This Handbook reflects the new approaches being developed in Roman

archaeology, and demonstrates why the study of Roman Britain has become one of the most dynamic areas of archaeology. The book will be useful for academics and students interested in Roman Britain.

Dress and Ideology - Shoshana-Rose Marzel  
2014-12-18

Dress and fashion are powerful visual means of communicating ideology, whether political, social or religious. From the communist values of equality, simplicity and solidarity exemplified in the Mao suit to the myriad of fashion protests

of feminists such as French revolutionary women's demand to wear trousers, dress can symbolize ideological orthodoxy as well as revolt. With contributions from a wide range of international scholars, this book presents the first scholarly analysis of dress and ideology through accessible case studies. Chapters are organized thematically and explore dress in relation to topics including nation, identity, religion, politics and utopias, across an impressive chronological reach from antiquity to the present day. Dress & Ideology will appeal to students and scholars of fashion, history, sociology, cultural studies, politics and gender studies.

[Managing, Using, and Interpreting Hadrian's Wall as World Heritage](#) - Peter G. Stone 2013-11-13

Hadrian's Wall was inscribed as a World Heritage Site (WHS) in 1987 and, with the German Limes, became one of the first two parts of the transnational 'Frontiers of the Roman Empire' (FRE) WHS in 2005. The World Heritage Site of Hadrian's Wall is unusual, although not unique, among World Heritage sites in its scale and linear nature: stretching from Ravenglass on the west coast of England to Newcastle upon Tyne on the east coast - over

150 miles. Along its length it passes through two major urban centres and a variety of rural landscapes and its remains vary from substantial upstanding architectural features to invisible below ground archaeology. Traditionally many of the constituent parts of Hadrian's Wall, forts etc, have been managed as separate entities by different State and private organisations. These and other issues make it an extremely complex WHS to manage. This book not only chronicles the past management of the Wall but also looks towards the future as more countries aspire to have their Roman frontiers added to the FRE. The experience gained over the last two decades illustrates developments in the management of large scale complex heritage sites that will be of value as a detailed case study to those involved in (and affected by) heritage management, as well as academics, and students. Many of the issues raised will find resonance in those faced by many other large (World) heritage sites.

**Roman Finds** - Richard Hingley 2007-04-10  
Studies on finds in Roman Britain and the Western Provinces have come to greater prominence in the literature of recent years. The quality of such work has also improved, and is now theoretically informed, and based on rich data-sets. Work on finds over the last decade or two has changed our understanding of the Roman era in profound ways, and yet despite such encouraging advances and such clear worth, there has to date, been little in the way of a dedicated forum for the presentation and evaluation of current approaches to the study of material culture. The conference at which these papers were initially presented has gone some way to redressing this, and these papers bring the very latest studies on Roman finds to a wider

audience. Twenty papers are here presented covering various themes.

**The Roman Cemetery at Brougham, Cumbria** - H. E. M. Cool 2004

Excavations to the east of the fort and vicus of Brougham, in 1966 and 1967, the results of which have only recently been evaluated, uncovered a cemetery that was in use during the 3rd century. A population of all ages were buried in the cemetery, cremated along with their grave goods, and interred in urns accompanied by other ceramic and glass vessels. This substantial report examines and catalogues the graves and other features before discussing the evidence of pyres and biers, the animal bone, the vessels, the personal ornaments and other equipment, the tombstones and the inscribed stones. Having described in detail the archaeological and environmental evidence, the author then draws conclusions about funerary rites at Brocavum in the 3rd century and suggests a connection with Pannonia.

*The Recovery of Roman Britain 1586-1906* -

Richard Hingley 2008-06-26

From the sixteenth century, classical texts enabled Scottish and English authors and artists to imagine the character and appearance of their forebears and to consider the relevance of these ideas to their contemporaries. Richard Hingley's study crosses traditional academic boundaries by exploring sources usually separately addressed by historians, classicists, archaeologists, and geographers, to provide a new perspective on the origin of English and Scottish identity. His book is the first full exploration of these issues to cover such a long period in the development of British society and to relate ideas derived from Roman sources to the development of empire, while also placing ideas of origin in a European context. It is illustrated throughout with artefact drawings, site plans, and photographs.

**Leading the Roman Army** - Jonathan Mark Eaton 2020-07-30

The Roman imperial army represented one of the main factors in the exercise of political control by the emperors. The effective political management of the army was essential for maintaining the safety and well-being of the empire as a whole. This book analyses the means by which emperors controlled their soldiers and sustained their allegiance from the battle of Actium in 31 BC, to the demise of the Severan dynasty in AD 235. Recent discoveries have revolutionized our understanding of the Roman army. This study provides an up to date synthesis of a range of evidence from archaeological, epigraphic, literary and numismatic sources on the relationship between the emperor and his soldiers. It demonstrates that this relationship was of an intensely

personal nature. He was not only the commander-in-chief, but also their patron and benefactor, even after their discharge from military service. Yet the management of the army was more complex than this emperor-soldier relationship suggests. An effective army requires an adequate military hierarchy to impose discipline and command the troops on a daily basis. This was of particular relevance for the imperial army which was mainly dispersed along the frontiers of the empire, effectively in a series of separate armies. The emperor needed to ensure the loyalty of his officers by building mutually beneficial relationships with them. In this way, the imperial army became a complex network of interlocking ties of loyalty which protected the emperor from military subversion. Hadrian's Wall - David J Breeze 2000-05-25 Taking into account new research findings about the building of the Wall, Breeze and Dobson include fascinating details about the Roman Army, its religion and daily bureaucratic life.

**Leading the Roman Army** - Jonathan Eaton  
2020-07-30

A historian and archeological scholar examines the complex relationship between Roman emperors and their armies. For the emperors of Ancient Rome, effective political management of the army was vital to the overall stability of the empire. In *Leading the Roman Army*, historian Jonathan Mark Eaton examines how emperors endeavored to control the military from the battle of Actium in 31 BC, to the demise of the Severan dynasty in AD 235. This study draws on the latest evidence from archaeological, epigraphic, literary and numismatic sources on the relationship between the emperor and his soldiers. It demonstrates that the emperor was

not only the army's commander-in-chief, but also their patron and benefactor, even after their discharge from military service. With forces dispersed along the frontiers of the empire, the emperor needed a strong military hierarchy to impose discipline. He also needed to ensure the loyalty of his officers by building mutually beneficial relationships with them. To this end, the imperial army became a complex network of loyalty ties which protected the emperor from military subversion.
