Hegemony of English - Donaldo Macedo 2015-11-17

'[P]erhaps the best analysis of the English-only movement in the US and the ramifications worldwide of language policies favouring English ...It displays a dazzling grasp of the many meanings of language and the politics that underlie language policy and educational discourse.' Stanley Aronowitz, City University of New York 'In the present political climate,

racism and classism often hide behind seemingly technical issues about English in the modern world. The Hegemony of English courageously unmasks these deceptions and points the way to a more humane and sane way to discuss language in our global world.' James Paul Gee, University of Wisconsin, Madison The Hegemony of English succinctly exposes how the neoliberal ideology of

globalization promotes dominating language policies. In the United States and Europe these policies lead to linguistic and cultural discrimination while, worldwide, they aim to stamp out a greater use and participation of national and subordinate languages in world commerce and in international organizations such as the European Union. Democracy calls for broad, multi-ethnic participation, and the authors point us toward more effective approaches in an increasingly interconnected world.

Drawing for Science Education - Phyllis Katz
2017-03-23

This book argues for the essential use of drawing as a tool for science teaching and learning. The authors are working in schools, universities, and continual science learning (CSL) settings around the world. They have

written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking – sometimes direct observation and in other instances, their memories. The result is a collection of research and essays that offer theory, techniques, outcomes, and models for the reader. Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms. Secondary students describe their ideas of chemistry and physics. Teacher educators use drawings to consider the progress of their undergraduates' understanding of science teaching and even their moral/ethical responses to teaching about climate change. Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted. A physician explains how the history of drawing has been a critical tool to medical education and doctor-patient communications. Each chapter

contains samples, insights, and where applicable, analysis techniques. The chapters in this book should be helpful to researchers and teachers alike, across the teaching and learning continuum. The sections are divided by the kinds of activities for which drawing has historically been used in science education: An instance of observation (Audubon, Linnaeus); A process (how plants grow over time, what happens when chemicals combine); Conceptions of what science is and who does it; Images of identity development in science teaching and learning.

An African Elegy - Ben Okri 2015-04-30

Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*

2010-01-01*

This book is based on chapters in a series of four books from the first five years (2002-2006) of the Language of Instruction in Tanzania and South Africa (LOITASA) project. LOITASA is a NUFU-funded (Norwegian University Fund) project which began in January 2002 and will continue through to the end of 2011. The chapters reflect the state of the research at the end of the first five years of LOITASA in 2006 and were selected by reviewers independent of the project.

Have You Seen Zandile? -
Gcina Mhlophe 2002

Zandile is snatched away from her grandmother's loving care and taken to live with her matriarcal family in rural Transkei. Moving, funny and convincing, full of Zandile's shrewd, youthful insights, the play offers an illuminating window onto the 1960s with its issues of white dominance, rural hardship and black female repression.

revolutionary tradition. Rosa tries to uphold her heritage handed on by martyred parents while still carving out a sense of self. Although it is wholly of today, *Burger's Daughter* can be compared to those 19th century Russian classics that make a certain time and place come alive, and yet stand as universal celebrations of the human spirit. Nadine Gordimer, winner of the 1991 Nobel Prize in Literature, was born and lives in South Africa.

Welcome to the Monkey House: The Special Edition - Kurt Vonnegut 2014-04-08
Since its original publication in 1968, *Welcome to the Monkey House* has been one of Kurt Vonnegut's most beloved works. This special edition

celebrates a true master of the short-story form by including multiple variant drafts of what would eventually be the title story. In a fascinating accompanying essay, "Building the Monkey House: At Kurt Vonnegut's Writing Table," noted Vonnegut scholar Gregory D. Sumner walks readers through Vonnegut's process as the author struggles—false start after false start—to hit upon what would be one of his greatest stories. The result is the rare chance to watch a great writer hone his craft in real time. Includes the following stories: "Where I Live" "Harrison Bergeron" "Who Am I This Time?" "Welcome to the Monkey House" "Long Walk to Forever" "The Foster Portfolio" "Miss Temptation" "All the King's Horses" "Tom Edison's Shaggy Dog" "New Dictionary" "Next Door" "More Stately Mansions" "The Hyannis Port Story" "D.P." "Report on the Barnhouse Effect" "The Euphio Question" "Go Back to Your Precious Wife and Son" "Deer in the Works" "The Lie"

Management and Cost Accounting - Colin Drury 1997

The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of today's student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an

organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-world mini cases, the text brings home the relevance of the subject matter to the real world of business.

July's People - Nadine Gordimer 2012-03-15

For years, it has been what is called a 'deteriorating situation'. Now all over South Africa the cities are battlegrounds. The members of the Smales family - liberal whites - are rescued from the terror by their servant, July, who leads them to refuge in his native village. What happens to the Smaleses and to July - the shifts in character and relationships - gives us an unforgettable look into the terrifying, tacit understandings and misunderstandings between blacks and whites.

Mindset - Carol S. Dweck
2007-12-26

From the renowned psychologist who introduced the world to "growth mindset" comes this updated edition of the million-copy

bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, GatesNotes "It's not always the people who start out the smartest who end up the smartest." After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can

be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

Zulu Shaman - Vusamazulu Credo Mutwa 2003-10-10
Offers a rare view into the world of a Zulu shaman • Includes 14 Zulu myths as told by a traditional Zulu story keeper • Reveals Zulu shamanic practices, including healing techniques, dreamwork, oracles, prophecy, and interactions with star beings In this rare window into Zulu mysticism, Vusamazulu

Credo Mutwa breaks the bonds of traditional silence to share his personal experiences as a sangoma—a Zulu shaman. Set against the backdrop of post-colonial South Africa, Zulu Shaman relays the first-person accounts of an African healer and reveals the cosmology of the Zulu. Mutwa begins with the compelling story of his personal journey as an English-trained Christian schoolteacher who receives a calling to follow in his grandfather's footsteps as a shaman and keeper of folklore. He then tells the stories of his ancestors, including creation myths; how evil came to the world; the adventures of the trickster god Kintu; and Zulu relations with the "fiery visitors," whom he likens to extraterrestrials. In an attempt to preserve the knowledge of his ancestors and encourage his vision of a world united in peace and harmony, Mutwa also shares previously guarded secrets of Zulu healing and spiritual practices: including the curing power of the sangoma and the psychic powers of his people.

Lifelong Kindergarten - Mitchel Resnick 2018-08-28

How lessons from kindergarten can help everyone develop the creative thinking skills needed to thrive in today's society. In kindergartens these days, children spend more time with math worksheets and phonics flashcards than building blocks and finger paint. Kindergarten is becoming more like the rest of school. In *Lifelong Kindergarten*, learning expert Mitchel Resnick argues for exactly the opposite: the rest of school (even the rest of life) should be more like kindergarten. To thrive in today's fast-changing world, people of all ages must learn to think and act creatively—and the best way to do that is by focusing more on imagining, creating, playing, sharing, and reflecting, just as children do in traditional kindergartens. Drawing on experiences from more than thirty years at MIT's Media Lab, Resnick discusses new technologies and strategies for engaging young people in creative learning experiences. He tells stories of

how children are programming their own games, stories, and inventions (for example, a diary security system, created by a twelve-year-old girl), and collaborating through remixing, crowdsourcing, and large-scale group projects (such as a Halloween-themed game called *Night at Dreary Castle*, produced by more than twenty kids scattered around the world). By providing young people with opportunities to work on projects, based on their passions, in collaboration with peers, in a playful spirit, we can help them prepare for a world where creative thinking is more important than ever before.

Progress, Change and Development in Early Childhood Education and Care

- Elizabeth Coates
2017-10-02

In 2000, the Millennium Development Goals set out targets aimed at creating a safer, more prosperous, and more equitable world. If these goals were to be achieved, children's lives would indeed be transformed. In this

collection, achievements against these targets are identified, with each contributor examining the progress made in early years provision in Australia, China, England, Greece, the Netherlands, Portugal, South Africa, and Sweden. They highlight the priorities and agendas of their respective governments, and focus on the trends and issues which are particularly relevant to each situation, thereby revealing the social and educational inequalities that persist across countries. A common theme running through this volume concerns the political tensions that arise when governments and educators hold fundamentally different views about the nature and purpose of early years education and the needs of children and families. It is clear that although the past two decades have seen many changes in attitude towards the importance of the early years of life; politically, economically, and environmentally, much still remains to be done if the

Millennium Development Goals for young children and their families are to be fully met. Despite this, this volume demonstrates that those who work in this area continue to experience a deep concern for the well-being of young children, which transcends cultures, frontiers, and political and sectarian divides. This book was originally published as a special issue of the *International Journal of Early Years Education*.

Focus on First Year Success -
Brenda Leibowitz 2009-11-01

Duduza. Bopha. Imbiza.
Phapha. Asixoliseni.
Amapopeye . . . What is the power of a single word? Six days a week, advertising creative Melusi Tshabalala posts a Zulu word on his Everyday Zulu Facebook page and tells a story about it. His off-beat sense of humour, razor-sharp social observations and frank political commentary not only teaches his followers isiZulu but also offer insight into the world Melusi inhabits as a 21st century Zulu man. Over the past few months he has built up a big and a loyal following that include radio host Jenny Crwys-Williams and Afrikaans author Marita van der Vyfer. He pokes fun at our differences and makes us laugh at ourselves and each other. Melusi asks critical questions of everyone, from Auntie Helen, Dudu-Zille to Silili (Cyril Ramaphosa) and even Woolworths (why are their aircons always set on 'jou moer'?) His fans love him for his honesty and commitment to pointing out subtle and overt forms of prejudice and racism.

Melusi's Everyday Zulu holds up a mirror that shows South African society in all its flaws and its sheer humanity. Most importantly, he shows the power of words and that there's um'zulu in all of us!

Safe Spaces - Cornelia Roux 2012-10-26

This book examines the crucial issues affecting Human Rights Education in contexts of culture, religious and societal diversity. It exhibits an impressive scholarly achievement, capturing and combining the insights of both established academics and emerging researchers. Each author succeeds in distilling the knowledge of their particular fields of interest, as well as conveying the essence of their intuitive understanding and the richness of the context. This book considers a variety of connected content and methodological issues in three major sections: 'Philosophical and policy perspectives', 'Gender discourses: diverse perspectives' and 'Discourses on narratives as safe spaces'. The Edition is further strengthened by allowing

international reviewers the opportunity of engaging with the contributors in the Introduction and Conclusion, an innovative departure from conventional formats and which will provide a global perspective to the readers. The focus of the various chapters succeeds in establishing both a foundation and platform for dialogue surrounding human rights and human rights education in modern policy and governance. Aptly named "Safe Spaces", the Edition offers in-depth and credible ("safe") nuances ("spaces"), in terms of the somewhat reified concept of human rights, at a time when human rights remains a highly topical and contested international issue. As such, the book imparts an immense scope of theoretical and empirical perspectives, reflected by the distinguished intellectuals who navigate the terrain of their respective disciplines with profound erudition. This book represents a collaborative effort of immeasurable value. This exemplary edition is both

timeous, and will prove

timeless.
