Cultures of Crisis in Southeast Europe - Klaus Roth 2017-04

The history of the Balkan Peninsula of the last two centuries is marked by deep transformations and upheavals. The emergence and disappearance of states, ethnic conflicts and wars, changes of political systems, economic crises, migration movements, and natural disasters are the more visible of such upheavals. Most of them have been experienced as deep crises that forced people to adapt to often radically new situations. All too often crisis management became a permanent way of life. The included essays focus on the cultures of crisis and on the reactions of societies and individuals to them: on their impact on everyday life, on peoples' strategies of coping, on the processes of adaptation, and on peoples' attitudes. (Series: Ethnologia Balkanica, Vol. 19) [Subject: Sociology, Balkan Studies, Politics, Migration, Crisis Management]

Sustainable Tourism Development - Council of Europe 1996-01-01

Tourism Enterprises and Sustainable Development - David Leslie 2010-03-17

The tourism industry has increasingly recognized and responded to growing environmental concerns. In recent years, there has been an emergence of a variety of categories of tourism considered more environmentally friendly: green, eco-tourism, and sustainable tourism. Much of the literature that has addressed these developments has been orientated to the destination locale or specific to a development. These texts have not sought to investigate and examine the response of government/national tourist organizations to the international sustainability agenda and the responses/actions of tourism enterprises to this "greening" agenda. This text aims to address this remarkable gap. This indispensable contribution to the field provides a comprehensive, state of the art perspective on progress towards the objectives of sustainable development within the tourism sector across the globe by focusing on the environmental performance and adoption of environmental management systems by tourism enterprises.

European Union Enlargement - Michael Schwarzingler 2017-09-29

European Union Enlargement offers an intense and detailed analysis of the almost ten-year process of preparing and negotiating the accession of Eastern, Southeastern, and Central European countries, as well as Mediterranean countries to the European Union. In the end, ten joined in 2004, with two more to follow in 2007. European Union Enlargement was written by two diplomats who were directly involved in that process. Sajdik and Schwarzingler relate their first-hand experience of proceedings that occurred behind closed doors. They detail how the vision of adding some countries gradually developed into the concrete policy intended to enlarge the European Union. A special chapter explains the Accession Process as well as

the Union's strategy that prepared the candidate countries, in legal and economic terms, for membership. The authors describe in detail the complex negotiations that occurred from 1998 to 2002. These include activities of EU member states as well as the European Commission with respect to the candidate countries. They further offer a brief analysis of future possibilities of EU-accession by Balkan nations and Turkey. A number of topical chapters deal with particular key issues involved in the process: free movement of workers, agriculture, financing of the enlargement, transport, and nuclear safety. Other chapters deal with the enclave of Kaliningrad as well as the Stability and Association Pact for South East Europe. In addition to providing key information about the process, this volume is also a case study of European policies and diplomatic practice. The enlargement negotiations from 1998 to 2002 were the most complex ones the European Union had ever conducted. In consequence, this work gives insight into the working methods of both the institutions in Brussels and of the representatives of the member states that made them a success. It will be of interest to those concerned with European politics, international organizations, and area studies.

This book therefore examines the tourism business in terms of 'greening' the

Tourism in the New Europe - Rhodri Thomas 2007-01-18

The book represents a state of the art review of key research on small firms in tourism in relation to European integration. It is, therefore, an essential resource for those engaged in research relating to tourism SMEs in transitional economies throughout the world. In addition, it is an essential purchase for the increasing number of students studying modules on small businesses as part of their final year undergraduate and postgraduate degree programmes. One of the key features of this book is its clear focus on breaking new ground by reporting recent research and theorising on small firms in tourism. In many cases, the analysis provided by contributors will carefully relate small business behaviour to issues of wider concern to tourism academics and policy-makers. It is also distinctive for its overt emphasis on contrasting European experiences. These characteristics contrast with the existing literature on small firms in tourism and hospitality, particularly in Europe. Previous literature achieved their aims by providing valuable syntheses of existing literature. Now that such 'taking of stock' has been undertaken, there is a demand for more overtly research-based texts that are nevertheless accessible to a wide audience. This book does exactly that.
