Journey of the Future Enterprise - Jorge Calvo 2020-10-29

To survive in the new, competitive digital economy of artificial intelligence and the Internet of Things, companies will have to change their management models. The company of linear, incremental growth is becoming obsolete. Moonshot leaders like Elon Musk or Jeff Bezos aspire to bringing about massive transformations. These visionaries seek radical solutions to big problems through enabling technologies that are easily scalable and yield increasing returns with decreasing marginal costs that in many cases approach zero. In his book Journey of the Future Enterprise, Jorge Calvo explains what the disruptive change of the Fourth Industrial Revolution consists of, what moonshot leadership is and what exponential organizations (ExOs) are, and having set out the conceptual framework, explains how to gear companies toward the new economy. In short, this resource-packed book is written for those who want to be part of this change, for those who are suffering the impact of this radical transformation, for those who feel lost as a result of the complexity and speed of the changes that are taking place, and for those who want to better understand the drivers of the Fourth Industrial

Revolution.

A Researcher's Guide to Sources on Soviet Social History in the 1930s - Sheila Fitzpatrick 2016-07-22

The Stalin era has been less accessible to researchers than either the preceding decade or the postwar era. The basic problem is that during the Stalin years censorship restricted the collection and dissemination of information (and introduced bias and distortion into the statistics that were published), while in the post-Stalin years access to archives and libraries remained tightly controlled. Thus it is not surprising that one of the main manifestations of glasnost has been the effort to open up records of the 1930s. In this volume Western and Soviet specialists detail the untapped potential of sources on this period of Soviet social history and also the hidden traps that abound. The full range of sources is covered, from memoirs to official documents, from city directories to computerized data bases.

The pricing of goods, services, intangible property and financial instruments within a multi-divisional organization, particularly in regard to cross-border transactions, has emerged as one of the most contentious areas of international tax law. This is due in no small measure to the rise of transfer pricing regulations as governments seek to stem the flow of their tax revenue from their jurisdictions. This thoroughly practical work provides guidance on an array of critical transfer pricing issues. The guide's relevance is further enhanced by the inclusion of country chapters covering domestic transfer pricing issues in a variety of key national jurisdictions.

After the illustration of a post-digital manifesto, the book explores all the key topics and tools that are relevant for the decision makers in this context.
