2019-06-14

For seventeen-year-old Ashley St. Helens, senior year is an endless stressfest with no hope in

sight. Since her parents' death, she's had to deal with her micro-managing step-monster and her two narcissist step-sisters, whose fashion fetishes just make Ashley feel worse about her oversized feet. With dirty dishes and stinky laundry piling up at home, it seems that the Universe has deemed her the real-life Cinderella, especially since popular Jeff Prince has forgotten she exists. With help from her drag queen fairygodwhatever—and just the right shoes—Ashley finds her voice and fights back against the "perfect" materialistic life that traps her. But will her soulful transformation translate into the life she wants to have? Will she be able to escape to college, or will she have to give up on that dream? Post-modern, colorful, and quirky, Kristen Caven paints a relatable picture of teenage insecurities that will inspire readers to spark new conversations with their families about responsibility and empathy, morality and wastefulness, life choices, cross-dressing, and best of all, cleaning the house. The Craft of Research, Fourth Edition -

Wayne C. Booth 2016-10-07

With more than three-quarters of a million copies sold since its first publication, *The Craft of Research* has helped generations of researchers at every level—from first-year

undergraduates to advanced graduate students to research reporters in business and government—learn how to conduct effective and meaningful research. Conceived by seasoned researchers and educators Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams, this fundamental work explains how to find and evaluate sources, anticipate and respond to reader reservations, and integrate these pieces into an argument that stands up to reader critique. The fourth edition has been thoroughly but respectfully revised by Joseph Bizup and William T. FitzGerald. It retains the original five-part structure, as well as the sound advice of earlier editions, but reflects the way research and writing are taught and practiced today. Its chapters on finding and engaging sources now incorporate recent developments in library and Internet research, emphasizing new techniques made possible by online databases and search engines. Bizup and FitzGerald provide fresh examples and standardized terminology to

clarify concepts like argument, warrant, and problem. Following the same guiding principle as earlier editions—that the skills of doing and reporting research are not just for elite students but for everyone—this new edition retains the accessible voice and direct approach that have made *The Craft of Research* a leader in the field of research reference. With updated examples and information on evaluation and using contemporary sources, this beloved classic is ready for the next generation of researchers.
