and wonderful in all its guises, has been a source of nourishment and delight since the days of the Roman occupation, and probably even before then. By faithfully recreating recipes from historical cookery texts and updating them for today's kitchens and ingredients, Regula Ysewijn has revived over 80 beautiful puddings for the modern home cook. There are ancient savoury dishes such as the Scottish haggis or humble beef pudding, traditional sweet and savoury pies, pastries, jellies, ices, flummeries, junkets, jam roly-poly and, of course, the iconic Christmas pudding. Regula tells the story of each one, sharing the original recipe alongside her own version, while paying homage to the cooks, writers and moments in history that helped shape them.

**The Opera of Bartolomeo Scappi (1570)** - Terence Scully 2011-01-22

Bartolomeo Scappi (c. 1500-1577) was arguably the most famous chef of the Italian Renaissance. He oversaw the preparation of meals for several Cardinals and was such a master of his profession that he became the personal cook for two Popes. At the culmination of his prolific career he compiled the largest cookery treatise of the period to instruct an apprentice on the full craft of fine cuisine, its methods, ingredients, and recipes. Accompanying his book was a set of unique and precious engravings that show the ideal kitchen of his day, its operations and myriad utensils, and are exquisitely reproduced in this volume. Scappi's Opera presents more than one thousand recipes along with menus that comprise up to a hundred dishes, while also commenting on a cook's responsibilities. Scappi also included a fascinating account of a pope's funeral and the complex procedures for feeding the cardinals during the ensuing conclave. His recipes inherit medieval culinary

customs, but also anticipate modern Italian cookery with a segment of 230 recipes for pastry of plain and flaky dough (torte, ciambelle, pastizzi, crostate) and pasta (tortellini, tagliatelli, struffoli, ravioli, pizza). Terence Scully presents the first English translation of the work. His aim is to make the recipes and the broad experience of this sophisticated papal cook accessible to a modern English audience interested in the culinary expertise and gastronomic refinement within the most civilized niche of Renaissance society.

**Ἡδυπάθεια** - Arcestratos of Arcestratos of Gela 2000  
Arcestratos of Gela was the author of a mock-epic poem, most likely entitled the *Hedupatheia* or *Life of Luxury*, that presented itself as a gastronomic tour of the Mediterranean world. Written sometime in the first two-thirds

of the fourth century BCE, the *Hedupatheia* was widely read in the late classical and early Hellenistic periods and was translated into Latin by Ennius, through whom it influenced the work of later Roman poets including Horace. It survives today in fragments totalling about 330 lines. The *Hedupatheia* is a fundamental source for our understanding not only of fourth-century literature but also of the significance of food and dining and the reception of epic poetry in late classical society. This edition is based on a fresh examination of the manuscripts and is the first to combine an authoritative critical text of the fragments with a translation, a detailed philological and historical commentary, and an extensive introduction situating the poem in its literary, social, and cultural context.

### The Science of Cooking - Peter Barham 2012-10-05

A kitchen is no different from most science laboratories and cookery may properly be regarded as an experimental science. Food preparation and cookery involve many processes which are well described by the physical sciences. Understanding the chemistry and physics of cooking should lead to improvements in performance in the kitchen. For those of us who wish to know why certain recipes work and perhaps more importantly why others fail, appreciating the underlying physical processes will inevitably help in unravelling the mysteries of the "art" of

good cooking. Strong praise from the reviewers - "Will be stimulating for amateur cooks with an interest in following recipes and understanding how they work. They will find anecdotes and, sprinkled throughout the book, scientific points of information... The book is a pleasant read and is an invitation to become better acquainted with the science of cooking." - NATURE "This year, at last, we have a book which shows how a practical understanding of physics and chemistry can improve culinary performance... [Barham] first explains, in a lucid non-textbooky way, the principles behind taste, flavour and the main methods of food preparation, and then gives fool-proof basic recipes for dishes from roast leg of lamb to chocolate soufflé." -

FINANCIAL TIMES WEEKEND "This book is full of interesting and relevant facts that clarify the techniques of cooking that lead to the texture, taste and aroma of good cuisine. As a physicist the author introduces the importance of models in

preparing food, and their modification as a result of testing (tasting)." - THE PHYSICIST "Focuses quite specifically on the physics and food chemistry of practical domestic cooking in terms of real recipes... Each chapter starts with an overview of the scientific issues relevant to that food group, e.g. toughness of meat, thickening of sauces, collapse of sponge cakes and soufflés. This is followed by actual recipes, with the purpose behind each ingredient and technique explained, and each recipe followed by a table describing some common problems, causes and solutions. Each chapter then ends with suggested experiments to illustrate some of the scientific principles exploited in the chapter." - FOOD & DRINK NEWSLETTER

*The Little Virtues* - Natalia Ginzburg 2017-09-12

In this collection of her finest and best-known short essays, Natalia Ginzburg explores both the mundane details and inescapable catastrophes of personal life with the grace and wit that have assured her rightful place in the pantheon of classic mid-century authors. Whether she writes of the loss of a friend, Cesare Pavese; or what is inexpugnable of World War II; or the Abruzzi, where she and her first husband lived in forced residence under Fascist rule; or the importance of silence in our society; or her vocation as a writer; or even a pair of worn-out shoes, Ginzburg brings to her reflections the wisdom of a survivor and the spare, wry, and poetically resonant style her readers have come to recognize. "A glowing light of modern Italian literature . . . Ginzburg's magic is the utter simplicity of her prose, suddenly illuminated by one

word that makes a lightning streak of a plain phrase. . . . As direct and clean as if it were carved in stone, it yet speaks thoughts of the heart.' — The New York Times Book Review **Modern Classics** - Donna Hay 2002

Renowned for recipes that make food look gorgeous and taste great yet require minimal effort, Donna Hay's cookbooks have become international successes. "Modern Classics" is no different. Chapters, including soups, salads, pastas, and pies, begin with a "basic" recipe. Step-by-step photos allow cooks to create increasingly sophisticated variations from this starter recipe.

[History of the Italian Agricultural Landscape](#) - Emilio Sereni 2014-07-14

Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth

century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, The Original Characteristics of French Rural History. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social

history, linguistics, archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

readers to Romania's bold, inventive and delicious cuisine. Bringing the country to life with stunning photography and recipes, it will take the reader on a culinary journey to the very heart of the Balkans, exploring it's history and landscape through it's traditions and food. From fragrant pilafs, sour borsch and hearty stews, to intricate and moreish desserts, this book celebrates the dishes from a culture living at the crossroads of eastern and western traditions.

*An Introduction to the Historiography of Science* - Helge Kragh 1987

This book introduces the methodological and philosophical problems with which modern history of science is concerned, offering a comprehensive and critical review through description and evaluation of significant historiographical viewpoints. Incorporating discussion of key problems in general historical writing, with examples drawn from a range of disciplines, this non-elementary introduction

bridges the gap between general history and history of science. Following a review of the early development of the history of science, the theory of history as applied to science history is introduced, examining the basic problems which this generates, including problems of periodisation, ideological functions, and the conflict between diachronical and anachronical historiography. Finally, the book considers the critical use, and analysis, of historical sources, and the possibility of the experiential reconstruction of history. Aimed primarily at students, the book's broad scope and integration of historical, philosophical and scientific matters will interest philosophers, sociologists and general historians, for whom there is no alternative introduction to the subject at this level.

Chef Alessandro Frassica emphasizes the use of fresh ingredients in imaginative combinations. What could be more simple than a pan'ino? Take some bread and butter, slice it through the middle and fill it. Seen in this way, the sandwich is almost an "anti-cuisine", a nomadic shortcut that allows for speed and little thought. But when Alessandro Frassica thinks about his pan'ino, he considers it in a different way, not as a shortcut, but as an instrument for telling stories, creating layers of tales right there between the bread and its butter. Because even if the sandwich is simple, it is not necessarily so easy to create. Alessandro searches for ingredients, and in the raw foods he finds people: producers of pecorino cheese from Benevento, anchovies from Cetara, 'nduja spicy salami from Calabria. Then he studies the combinations, the consistencies and the temperature, because a pan'ino is not just a random object; savoury must be complemented

by sweet; tapenade softens and provides moisture; bread should be warmed but not dried; thus the sandwich becomes a simple way of saying many excellent things, including finding a complexity of flavours that can thrill in just one bite.

**The Art of Cooking** - Maestro Martino of Como 2005-01-03  
Maestro Martino of Como has been called the first celebrity chef, and his extraordinary treatise on Renaissance cookery, *The Art of Cooking*, is the first known culinary guide to specify ingredients, cooking times and techniques, utensils, and amounts. This vibrant document is also essential to understanding the forms of conviviality developed in Central Italy during the Renaissance, as well as their sociopolitical implications. In addition to the original text, this first complete English translation of the work includes a historical essay by Luigi Ballerini and fifty modernized recipes by acclaimed Italian chef Stefania Barzini. *The Art of Cooking*, unlike the culinary

manuals of the time, is a true gastronomic lexicon, surprisingly like a modern cookbook in identifying the quantity and kinds of ingredients in each dish, the proper procedure for cooking them, and the time required, as well as including many of the secrets of a culinary expert. In his lively introduction, Luigi Ballerini places Maestro Martino in the complicated context of his time and place and guides the reader through the complexities of Italian and papal politics. Stefania Barzini's modernized recipes that follow the text bring the tastes of the original dishes into line with modern tastes. Her knowledgeable explanations of how she has adapted the recipes to the contemporary palate are models of their kind and will inspire readers to recreate these classic dishes in their own kitchens. Jeremy Parzen's translation is the first to gather the entire corpus of Martino's legacy.
