

Tourism Local Livelihoods And The Private Sector In

Yeah, reviewing a books **Tourism Local Livelihoods And The Private Sector In** could grow your close associates listings. This is just one of the solutions for you to be successful. As understood, realization does not suggest that you have wonderful points.

Comprehending as with ease as concord even more than supplementary will provide each success. next to, the proclamation as well as keenness of this Tourism Local Livelihoods And The Private Sector In can be taken as capably as picked to act.

The Routledge Handbook of Tourism in Asia - C. Michael Hall 2016-09-13

Asia is regarded as the fastest growing area for international and domestic tourism in the world today and over the next 20 years. Given the economic, social and environmental importance of tourism in the region, there is a need for a comprehensive and readable overview of the critical debates and controversies in tourism in the region and the major

factors that are affecting tourism development both now and in the foreseeable future. This Handbook provides a contemporary survey of the region and its continued growth and development as a key destination and generator of tourism, which is marked by a high proportion of intra-regional travel. The book is divided into five sections. This first section provides an introduction to the region and context to the nationally

focused chapters. The next three sections are then broadly based on the three UNWTO Asian regions: South-East Asia, South and Central Asia, and East and North-East Asia, providing readers with a valuable snapshot of tourism at various scales, and from various approaches and positions. The concluding section considers future prospects for tourism in Asia. The handbook is interdisciplinary in coverage and is also international in scope through its authorship and content. It presents a range of perspectives and understanding of the processes and forces that are shaping tourism in this fascinating and dynamic region that is one of the focal points of global tourism. This is essential reading for students, researchers and academics interested in tourism in the growth region of Asia now and in the future.

Tourism and Protected Areas - Robyn Bushell 2007

Bringing together the diverse experiences of park agencies

and managers, conservation NGO's and international agencies this book examines the role of tourism in protected area management. Using case studies from around the world it provides examples of successful partnerships between community, public and private sectors. It also explores how tourism can be used as a management tool for financing protected areas. It concludes by summarizing the lessons learnt and the challenges facing protected areas in the future.

Reducing Poverty and Sustaining the Environment

- David Satterthwaite

2013-06-17

'A valuable contribution to our collective knowledge about governance, poverty and the environment' Frances Seymour, World Resources Institute 'Detailed and realistic documentation of contemporary development and governance relationships and trends' Melissa Leach, Institute of Development Studies There are growing signs that development work by

Downloaded from
viewfromthefridge.com on
by guest

governments, aid agencies and non-government organisations ignores the fact that environmental quality matters to the poor. There are also indications that some environmental work is pushing 'people-out' protection methodologies. Yet recently, an extensive range of project, programme and policy level activities has focused attention on the important links between poverty and the environment, and the benefit of entrenching these links in policy-making processes at all levels. The role that politics plays in all of this is of overriding importance. This volume is the first to address the role of politics in environmental issues that matter to the poor through a series of case studies. It describes experiences at regional, national and local levels in low and middle income countries including China, Tanzania, Nigeria, South Africa, Pakistan, Colombia, Peru, India, Saint Lucia and countries in East Africa. Ultimately the book demonstrates how

understanding the national and local political context is crucial for addressing poverty-environment issues such as environmental health, access to natural resources for livelihoods and security, and coping with environmental disasters. The editors advocate ways in which political processes can be used to make positive changes - from the perspectives of both poverty reduction and the environment.

Tourism in Russia - Frederic Dimanche 2015-09-09

This book addresses tourism as a system, provides essentials of tourism management and marketing, discusses planning and impact management, and proposes strategies and recommendations to improve Russia as an international destination.

[Reframing Sustainable Tourism](#)

- Stephen F. McCool

2015-08-19

This book examines the need for a new way of describing sustainable tourism and also looks at the frameworks needed to rethink how to apply this to communities, private

operators and protected area managers. It makes it clear that tourism is just one of many human activities that affects host communities. The work includes informative and provocative case studies with realistic applications.

References included in the book will help graduate students formulate new hypotheses and suggest literature for them. Tools and techniques useful to tourism practitioners suggest innovative approaches to marketing, management and community development.

International Environmental Law - Elli Louka 2006-10-02

This book analyzes the law and policy for the management of global common resources. As competing demands on the global commons are increasing, the protection of environment and the pursuit of growth give rise to all sorts of conflicts. It also analyzes issues in the protection of the global commons from a fairness, effectiveness and world order perspective. The author examines whether

policymaking and trends point to a fair allocation of global common resources that is effective in protecting the environment and the pursuit of sustainable development. The author looks at the cost-effectiveness of international environmental law and applies theories of national environmental law to international environmental problems. Chapters include analysis on areas such as marine pollution, air pollution, fisheries management, transboundary water resources, biodiversity, hazardous and radioactive waste management, state responsibility and liability. Rural Development, Institutional Change and Livelihoods in the Eastern Cape, South Africa - Zolile Mninawa Ntshona 2003

DAC Guidelines and Reference Series Natural Resources and Pro-Poor Growth The Economics and Politics - OECD 2009-01-27
Natural capital constitutes a quarter of total wealth in low-

income countries. This publication demonstrates that natural resources can contribute to growth, employment, exports and fiscal revenues and highlights the importance of policies encouraging the sustainable management of these resources.

Sustainable Tourism VI - C.

A. Brebbia 2014-07-08

Sustainable Tourism VI contains the proceedings of the sixth International Conference in this successful series on Sustainable Tourism. Tourism has become a major international industry, with many countries all over the world relying on the income it produces. Its economic advantages as a major source of finance and employment frequently leads to its active promotion by governments and other institutions, independent of the consequences on the environment, ecology and social structure of affected regions. Issues concerned with achieving environmental social and economic sustainability of tourism alongside the

governance mechanisms needed to support sustainable tourism are highlighted. Also discussed is how new resources ought to be employed to avoid the errors committed in the past and propose remedial actions when required. This book takes a broad view of this sophisticated and complex industry, and examines the practice of sustainable tourism from global travel trends through to destination and site management. Innovative solutions, including ecological tourism, as well as cultural initiatives that will lead to better approaches to tourism with the objective of preserving the diversity of our planet. The demands of tourism can contribute to the destruction of the natural and cultural environment upon which it depends. The natural and cultural landscape's capacity to accommodate the local and worldwide effects of tourism and the implications for the human economy and society constitute very important study objectives. To protect the

natural and cultural landscape
new solutions need to be
developed which minimise the
adverse effects of tourism. This
can be achieved through new
strategies involving the active
collaboration of society as a
whole. Topics covered include:
Tourism strategies;
Environmental issues;
Emergent strategies for
tourism development;
Community issues; Climate
change; Safety and Security;
Tourism as a tool of
development; Art, architecture
and culture; Heritage tourism;
Special interest tourism;
Marine and coastal areas
tourism; Sport tourism; City
tourism; Tourism impact;
Tourism and protected area;
Rural tourism; Transport and
tourism; Education and
training; Theme parks;
Destination management;
Planning and development;
Simulation models; Social and
physical infrastructure.

Private Sector Tourism in
Conservation Areas in Africa -
Susan Snyman 2019-04-24

Rewilding the World -

Caroline Fraser 2014-04-29
A gripping account of the
environmental crusade to save
the world's most endangered
species and landscapes—the
last best hope for preserving
our natural home Scientists
worldwide are warning of the
looming extinction of
thousands of species, from
tigers and polar bears to rare
flowers, birds, and insects. If
the destruction continues, a
third of all plants and animals
could disappear by 2050—and
with them earth's life-support
ecosystems that provide our
food, water, medicine, and
natural defenses against
climate change. Now Caroline
Fraser offers the first definitive
account of a visionary
campaign to confront this
crisis: rewilding. Breathtaking
in scope and ambition,
rewilding aims to save species
by restoring habitats, reviving
migration corridors, and
brokering peace between
people and predators.
Traveling with wildlife
biologists and conservationists,
Fraser reports on the vast
projects that are turning

Europe's former Iron Curtain into a greenbelt, creating trans-frontier Peace Parks to renew elephant routes throughout Africa, and linking protected areas from the Yukon to Mexico and beyond. An inspiring story of scientific discovery and grassroots action, *Rewilding the World* offers hope for a richer, wilder future.

[Cultural Due Diligence in Hospitality Ventures](#) - Nicole Häusler 2017-04-05

This book introduces readers to a powerful method for cross-cultural due diligence in mergers and organizational collaborations. It employs the context of joint ventures between local communities and companies in the domain of hospitality in emerging tourism destinations. The book first analyzes the impact of cultural diversity in mergers between local communities and the private sector, revealing the characteristics and functions of culture and paying specific attention to the roles of organizational and community cultures in hospitality. In two

subsequent methodological chapters the book presents a theoretical framework for cultural due diligence and identifies the principal actors, technical aspects and core principles. On the basis of a separate case study from northern Thailand, the book provides an example of cultural context analysis and presents the findings and results. In a concluding chapter the book presents an outlook on further research and development in this field.

Sustainable Tourism on a Finite Planet - Megan Epler Wood 2017-02-28

This book helps all those involved in international tourism develop the new skills, tools and investments required to protect irreplaceable global resources from the impacts of escalating tourism demand over the next 50 years. It documents how technology and the growing global middle class are driving a travel revolution which requires a new paradigm in managing tourism destinations. Travel and tourism supply chains and

business models for hotels, tour operators, cruise lines, airlines and airports are analysed and environmental management techniques are proposed for each sector. A pragmatic set of solutions are offered to support the transition to lower impact tourism development worldwide. It recommends that decision makers assess the current and future value of natural, social, and cultural capital to guide investment in destinations and protect vital resources. Case studies illustrate why budgets to protect local destinations are consistently underestimated and offer guidance on new metrics. Innovative approaches are proposed to support the transition to green infrastructure, protect incomparable landscapes, and engage local people in the monitoring of vital indicators to protect local resources. It provides students, professionals, and policy makers with far-reaching recommendations for new educational programs,

professional expertise, financing, and legal frameworks to lower tourism's rapidly escalating carbon impacts and protect the health and well-being of local populations, ecosystems, cultures, and monuments worldwide.

Disaster Risk Reduction in Indonesia - Riyanti Djalante
2017-05-02

This book is a unique, transdisciplinary summary of the state of the art of disaster risk reduction (DRR) in Indonesia. It provides a comprehensive overview of disaster risk governance across all levels and multiple actors including diverse perspectives from practitioners and researchers on the challenges and progress of DRR in Indonesia. The book includes novel and emerging topics such as the role of culture, religion, psychology and the media in DRR. It is essential reading for students, researchers, and policy makers seeking to understand the nature and variety of environmental hazards and risk patterns

affecting Indonesia. Following the introduction, the book has four main parts of key discussions. Part I presents disaster risk governance from national to local level and its integration into development sectors, Part II focuses on the roles of different actors for DRR, Part III discusses emerging issues in DRR research and practice, and Part IV puts forward variety of methods and studies to measure hazards, risks and community resilience.

The Oxford Handbook of Political Consumerism -

Magnus Boström 2019

This handbook is currently in development, with individual articles publishing online in advance of print publication. At this time, we cannot add information about unpublished articles in this handbook, however the table of contents will continue to grow as additional articles pass through the review process and are added to the site. Please note that the online publication date for this handbook is the date that the first article in the title

was published online.

The Tourism-Disaster-Conflict Nexus - Andreas Neef

2018-11-12

Tourism is often seen as the world's peace industry. Yet while tourism may play a major role in post-conflict and post-disaster recovery, the sector can also be a trigger of crisis and disaster. This book examines the complex linkages between tourism, disaster and conflict through a series of case studies drawn mainly from the Asia-Pacific region.

The Politics of Land Reform in Southern Africa - Edward

Lahiff 2003

Responsible Tourism - Anna Spenceley 2012-05-04

Responsible Tourism presents a wide variety of valuable lessons learned in responsible tourism initiatives in Southern Africa that many tourism practitioners can use in their efforts to make the tourism sector work for the poor and for the environment. Dr Harsh Varma, Director, Development Assistance Department, World Tourism Organization

(UNWTO) For those interested in how tourism can assist in the economic and social development of societies in need, Responsible Tourism effectively integrates scales and types of knowledge to present an informative, stimulating perspective. It will be on my bookshelf. Steve McCool, Professor Emeritus, Wildland Recreation Management, University of Montana Responsible tourism is one of the most significant contemporary issues for tourism scholars and practitioners alike. This useful and clearly written collection of new research demonstrates the innovations in responsible tourism occurring within southern Africa and provides lessons for international research and practice.

Professor Christian Rogerson, University of Witwatersrand, South Africa Conservation efforts are often seen to be in conflict with local livelihoods and resource use - the park versus people debate.

Responsible tourism and Ecotourism are often invoked

as a third way that serve both ends. Yet do they actually work in practice? This volume delves deep into practice in southern Africa, the hotbed of innovation on the issue, and provides a comprehensive, evidence-based examination of what works and what fails, using a wealth of information from scholars and practitioners working in the region. This book opens with an overview of the issues, looks at what sustainable and responsible tourism are in practice and how they may contribute to conservation, poverty alleviation and local economic development. Part 1 examines policies and institutional activities in responsible tourism by governments, donor agencies and nongovernmental organizations, and addresses the market for responsible travel. Part 2 considers responsible nature-based tourism, the economics of wildlife tourism and ecotourism, transfrontier conservation areas, ecological impacts of tourism and other issues. Part 3 looks at more

detailed case studies of community-based tourism projects, and highlights the reasons for successes and failures in this sector. The book concludes with a synthesis of the key findings with implications for policy, destination planning, business management, and future private sector and donor interventions. Published with the Southern African Sustainable Use Specialist Group (SASUSG) of IUCN

Sustainable Tourism Policy and Planning in Africa - Emmanuel Akwasi Adu-Ampong 2020-12-18

Sustainable Tourism Policy and Planning in Africa offers an accessible and understandable overview of the challenges of integrating sustainability into tourism policy and planning in Sub-Saharan Africa and provides some interesting recommendations on how these could be overcome. Tourism is currently growing faster in Sub-Saharan Africa (SSA) and in many other developing regions compared to the rest of the world. Using case examples

from different segments of the tourism sector in different country contexts, this volume therefore reassesses context specific tourism policies and planning mechanisms in SSA over the years. It considers how the increasing focus on sustainability is reflected in different areas of the tourism sector including food security, the human capacity management, service delivery, local communities and heritage management, climate change and the influence of colonial legacies on tourism policy planning. For many SSA countries, it has only been in the last two decades that the development of sustainable and achievable context specific policies and planning mechanisms has become the norm. The chapters provide examples of how different dimensions of sustainability are integrated into tourism policy and practice, and examine the extent to which these are shaping the present, and their implications for the future sustainability of the tourism sector. Sustainable Tourism

Policy and Planning in Africa will be of great value to academics, private and third sector employees to better understand tourism in Sub-Saharan Africa. Eight of the chapters were originally published as a special issue of *Tourism Planning and Development*. These are now complimented with a new introductory chapter and a concluding chapter that sets out a future research agenda for sustainable tourism policy and planning.

Tourism, Recreation, and Sustainability - Stephen F. McCool 2008

This book is designed to illustrate many of the issues and approaches associated with sustainable tourism development, policy and research. Included are case studies of tourism development using both quantitative and qualitative methods, analytical frameworks for managing tourism and chapters addressing critical questions about the relationship between tourism and sustainability goals. As a whole, the book

demonstrates the many dimensions and topics associated with attempts to address the complex issues associated with sustainability and tourism. Added in this second edition, are several new chapters that address emerging issues in management of tourism. Part I (Frameworks and Approaches) discusses the need for integration of social and environmental issues in tourism development. Part II (Tourism and Place) explicitly recognizes the importance of understanding the values and attributes of areas that become tourist destinations. Part III (Emerging Issues in Culture and Tourism) illustrates that we live in a dynamic world, that what was once acceptable is no longer, that our mental models of tourism development are in constant change and that researchers and policy makers must be alert to shifting public values and beliefs. This part includes material on local attitudes, poverty alleviation, indigenous people and tourism, and a discussion about culture

and tourism. The book has 16 chapters and a subject index. Sustainable Tourism & the Millennium Development Goals - Kelly S. Bricker 2013 Endorsed by The International Ecotourism Society, Sustainable Tourism & The Millennium Development Goals: Effecting Positive Change demonstrates how ecotourism and sustainable tourism can assist in supporting and meeting the goals set forward by the Millennium Development Goals (MDG) and how it can foster a global partnership for development. The text discusses how ecotourism and sustainable tourism can assist in supporting and meeting the MDG by drawing on case studies and examples. The final summary chapter discusses how ecotourism and sustainable tourism can assist in supporting and meeting the MDG by 2015 and identifies the challenges and goals that need to be considered in the future. In this edition you will find: - Historical perspective of the development of ecotourism

and sustainable tourism - The Millennium Development Goals defined - Overview of how ecotourism and sustainable tourism can assist in meeting the goals of the MDG - Engaging case studies and examples to reinforce the concept

The Nature of Heritage -

Lynn Meskell 2011-08-26

The Nature of Heritage: The New South Africa is unique in revealing the conflicts inherent in preserving both natural and cultural heritage, by examining the archaeological, ethnographic and economic evidence of a nation's attempts to master its past and its future. Provides a classic example of how nations attempt to overcome a negative heritage through past mastering of their histories Evaluates the continuing dominance of nature and conservation over concerns for cultural heritage Employs ethnographic and archaeological methodologies to reveal how the past is processed into a new national heritage Identifies heritage as

therapy, exemplified in the strategy for repairing legacies of racial and ethnic difference in post-apartheid South Africa Highlights the role of archaeological heritage sites, national parks and protected areas in economic development and social empowerment Explores how nature trumps culture and the global implications of the new configurations of heritage

Indigenous Ecotourism - Heather Zeppel 2006-01-01

"This volume reviews indigenous ecotourism as a special type of nature-based tourism and examines the key principles of conservation and community benefits from indigenous-owned and operated ecotourism businesses or joint ventures. It compares indigenous ecotourism in developed and developing countries and provides global case studies of indigenous ecotourism projects in the Pacific Islands, Africa, Latin America and Southeast Asia. The book analyses key factors and constraints for sustainable development of

Indigenous ecotourism and explores the growing links between biodiversity conservation, ecotourism and indigenous rights. It will appeal to practitioners, researchers and students in ecotourism and sustainable tourism, indigenous studies, conservation, natural resource management and community development."--BOOK JACKET.

Driving Agribusiness With Technology Innovations - Tarnanidis, Theodore 2017-03-20

Modern web-based applications are pertinent for businesses, as they often encourage their core competencies and capabilities. As such, the agribusiness sector must begin to take advantage of the open networks and advances in communication and information technologies in order to grow their businesses exponentially. *Driving Agribusiness With Technology Innovations* highlights innovative business models and theories that encourage the use of emerging technological advances to produce thriving

enterprises. Featuring extensive coverage on relevant topics including digital environments, mobile agriculture, supply chain platforms, and internet marketing models, this publication is an important reference source for business managers, practitioners, professionals, and engineers who are interested in discovering emerging technology trends for agribusiness.

Tourism and Poverty Reduction

- Jonathan Mitchell 2010

First Published in 2009.

Routledge is an imprint of Taylor & Francis, an informa company.

Resilience - Zinta Zommers

2018-05-09

In *Resilience: The Science of Adaptation to Climate Change* leading experts analyze and question ongoing adaptation interventions. Contributions span different disciplinary perspectives, from law to engineering, and cover different regions from Africa to the Pacific. Chapters assess the need for adaptation,

highlighting climate change impacts such as sea level rise, increases in temperature, changing hydrological variability, and threats to food security. The book then discusses the state of global legislation and means of tracking progress. It reviews ways to build resilience in a range of contexts— from the Arctic, to small island states, to urban areas, across food and energy systems. Critical tools for adaptation planning are highlighted - from social capital and ethics, to decision support systems, to innovative finance and risk transfer mechanisms. Controversies related to geoengineering and migration are also discussed. This book is an indispensable resource for scientists, practitioners, and policy makers working in climate change adaptation, sustainable development, ecosystem management, and urban planning. Provides a summary of tools and methods used in adaptation including recent innovations Includes chapters from a diverse range of authors from academic

institutions, humanitarian organizations, and the United Nations Evaluates adaptation options, highlighting gaps in knowledge where further research or new tools are needed

Livelihoods, Natural Resources, and Post-Conflict Peacebuilding -

Helen Young 2015-04-10

Sustaining and strengthening local livelihoods is one of the most fundamental challenges faced by post-conflict countries. By degrading the natural resources that are essential to livelihoods and by significantly hindering access to those resources, conflict can wreak havoc on the ability of war-torn populations to survive and recover. This book explores how natural resource management initiatives in more than twenty countries and territories have supported livelihoods and facilitated post-conflict peacebuilding. Case studies and analyses identify lessons and opportunities for the more effective design of interventions to support the livelihoods that depend on

natural resources - from land to agriculture, forestry, fisheries, and protected areas. The book also explores larger questions about how to structure livelihoods assistance as part of a coherent, integrated approach to post-conflict redevelopment. Livelihoods and Natural Resources in Post-Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses, with contributions from practitioners, policy makers, and researchers. Other books in this series address high value resources, land, water, assessing and restoring natural resources, and governance.

Quality Assurance and Certification in Ecotourism -

Rosemary Black 2007

This book explores solutions to the problems of inconsistency and even exploitation of the term ecotourism through examples, case studies, and a discussion of quality control

and certification. The first part of the book (chapters 2-8) moves the reader through the spectrum of quality assurance tools, from what are perceived to be the least rigorous and effective (awards of excellence and codes of conduct) to more formal, credible and effective methods (certification and accreditation), with a brief foray into using indicators to measure and monitor effectiveness. The second part (chapters 9-23) looks at a range of ecotourism stakeholders' perspectives, with an emphasis in one way or another on various industry certification programmes. A concluding chapter explores the challenges and issues for quality in ecotourism. The book has a glossary and a subject index.

Community-based Ecotourism on the Wild Coast, South Africa - Zolile Mninawa Ntshona 2003

Effecting Positive Change through Ecotourism - Kelly S. Bricker 2020-05-21

This book is designed to show

how ecotourism theory can be put into practice by exploring innovation, program applications, and research-supported case studies in ecotourism. The chapters reflect results of applied research focused on socio-economics of community development; the value of considering system-wide approaches to the relationships between communities and natural resources; the intricacies of capacity building and training facilitators in ecotourism; and education through ecotourism experiences. The cumulative impact of the research presented highlights innovative approaches to visitor management, community engagement, and education to critically address the complexities associated with visitation to natural areas and the dependence upon conservation of ecosystems and associated communities. This book was originally published as a special issue of the Journal of Ecotourism.

Tourism and Development in

Sub-Saharan Africa - Marina Novelli 2015-09-16

Over the past 20 years, the perception of tourism as an effective contributor to socio-economic development in the developing world has propagated, with many viewing tourism as a provider for poverty alleviation and towards other UN Millennium Development Goals. Over the same period, readers have become familiar with the paradoxes, complexities and inequalities of tourism in relation to development, wealth creation, growth, redistribution, governance and 'hosts-guests' relationships. This volume further extends this critical debate with a much-needed cohesive publication on Sub-Sahara Africa (SSA). In an era of fluctuating tourist arrivals at global level, the growth of tourism in SSA requires deeper consideration in terms of its inconsistent and questionable implications at local level. Taking as a central theme the debate on whether tourism should be used in development

efforts, this book examines the way in which tourism has controversially become the way forward to development in several SSA locations and assesses bottlenecks to sustainable development as well as dilemmas and challenges faced by those SSA destinations seeking to achieve development through tourism. It offers an explicit set of chapters adopting a multi-disciplinary approach, drawing upon tourism studies, human geography, sociology, anthropology, political economy, development and environmental studies, and integrates case studies authored by local African practitioners and academics to produce a book that gave voice to local experts on local realities. Combining an overview of key theories, concepts, contemporary issues and debates as well as practical insights from a wide range of regions in SSA, this book will be a valuable resource for those investigating the role of tourism in development.

The Routledge Research Companion to Border Studies - Doris Wastl-Walter 2016-04-01

Throughout history, the functions and roles of borders have been continuously changing. They can only be understood in their context, shaped as they are by history, politics and power, as well as cultural and social issues. Borders are therefore complex spatial and social phenomena which are not static or invariable, but which are instead highly dynamic. This comprehensive volume brings together a multidisciplinary team of leading scholars to provide an authoritative, state-of-the-art review of all aspects of borders and border research. It is truly global in scope and, besides embracing the more traditional strands of the field including geopolitics, migration and territorial identities, it also takes in recently emerging topics such as the role of borders in a seemingly borderless world; creating neighbourhoods, and border enforcement in the

post-9/11 era.

Living on the Edge - Susan Snyman 2021-05-06

Tourism has an essential role in terms of contributing to the financial sustainability of protected areas. In addition, through effective and efficient benefit-sharing, tourism can positively impact numerous stakeholders within and beyond the protected area. *Living on the Edge: Benefit-Sharing from Protected Area Tourism* highlights the complexity of benefit-sharing, the importance of identifying all relevant stakeholders, the challenges of ensuring equity and sustainability, and the critical importance of good governance. The evolution of benefit-sharing mechanisms over time also emphasizes a continuing need to evolve and adapt to each unique situation as much evidence indicates that little has changed for those living on the edge. Although this book focuses on benefit-sharing from protected area tourism, it is essential to acknowledge that along with these benefits are costs

associated with tourism, including possible increased local prices, loss of access to land, human-wildlife conflict, and other related costs. The contributing authors agree that benefit-sharing must include good governance, accountability, equity, transparency, a broad reach of stakeholder engagement, and a robust combination of tangible and intangible benefits – with recognition that benefit-sharing systems need to be adaptive and evolve, as needed, according to the relevant situation. The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism.

Managing Protected Areas -

Michael Lockwood 2012-05-04

This handbook, produced by world renowned experts from the World Conservation Union (IUCN), spans the full terrain of protected area management and is the international benchmark for the field. The book employs dozens of detailed international cases studies, hundreds of concise topical snapshots, maps, tables,

illustrations and a colour plate section, as well as evaluation tools, checklists and numerous appendices to cover all aspects of park management from biodiversity to natural heritage to financial management. The book establishes a conceptual underpinning for protected area management, presents guiding principles for the 21st century, reflects recent work on international best practice and provides an assessment of skills required by professionals. As the most authoritative guide ever compiled to the principles and practice of protected area management, this volume is essential for all professionals and students in all countries and contexts.

Protected Areas and Tourism in Southern Africa - Lesego

Senyana Stone 2022-03-24

This volume discusses the complex relationship between Protected Areas and tourism and their impact on community livelihoods in a range of countries in Southern Africa. Protected areas and tourism have an enduring and symbiotic relationship. While

protected areas offer a desirable setting for tourism products, tourism provides revenue that can contribute to conservation efforts. This can bring benefits to local communities, but it can also have a negative impact, with the establishment of protected areas leading to the eviction of local communities from their original places of residence, while also preventing them from accessing the natural resources they once enjoyed. Taking a multi-disciplinary approach, this book addresses the opportunities and challenges faced by communities and other stakeholders as they endeavour to achieve their conservation goals and work towards improving community livelihoods. Case studies from Botswana, Malawi, Namibia, South Africa, Tanzania, Zambia and Zimbabwe address key issues such as human-wildlife conflicts, ecotourism, wildlife-based tourism, landscape governance, wildlife crop-raiding and trophy hunting, including the high-profile case

of Cecil the lion. Chapters highlight both the achievements and positive outcomes of protected areas, but also the challenges faced and their impact on how protected areas are viewed and also conservation priorities more generally. The volume gives these issues affecting protected areas, local communities, managers and international conservation efforts centre stage in order to inform policy and improve practice going forward. This book will be of great interest to students and scholars of conservation, natural resource management, tourism, sustainable development and African studies, as well as professionals and policymakers involved in conservation policy. [Sustainable Livelihoods in Kalahari Environments](#) - Deborah Sporton 2002 This collection provides a comprehensive overview of the dynamics of contemporary natural resource based livelihoods and implications for their sustainability in the context of the Kalahari

environment of southern Africa, a region subject to marked spatial and temporal natural variability. Each chapter is written by an active Kalahari researcher and addresses, from an environmental or a social perspective, the implications of different policies for rural livelihoods and coping strategies.

Social and Solidarity Economy - Sara Calvo 2017-06-26

This book aims to provide the reader with an insight into the relevance of a section of the economy, which is often referred to as the 'social and solidarity economy' (SSE); and highlight some of the current issues in the field, how they are being addressed and some of their future implications. Using case studies from around the world, this book 'Social and Solidarity Economy: The World's Economy With a Social Face' provides an up-to-date account of the strengths and weaknesses of these initiatives across four continents including issues that have not been researched sufficiently

before (e.g. circular economy, social propaganda and its dangers, social enterprise as a panacea for NGOs in developing countries, and 'new' social movements). There is growing interest in SSE initiatives among policymakers, foundations, researchers and academic institutions around the world. Despite this interest, SSE related research remains scarce. There are concerned that SSE initiatives, which contribute significantly to their local communities' development, need to be more widely disseminated amongst the general public. The Social and Solidarity Economy: The World's Economy With a Social Face will help promote the ground-breaking work being done by organisations and individuals but which remain undocumented and help to raise awareness of such initiatives as well as contribute to academia with a critical approach to the sector covering issues that have not been covered much before, such as the circular economy and the dangers of social

propaganda. Aimed at researchers, academics and policy makers in the fields of Social Enterprise, CSR, Tourism, International Economics as well as supporting disciplines 'Social and Solidarity Economy: The World's Economy With a Social Face' looks to establish and help define the field.

Tourism and Poverty Reduction

- Anna Spenceley 2017-10-02

Over the past decade, there have been an increasing number of publications that have analysed and critiqued the potential of tourism to be a mechanism for poverty reduction in less economically developed countries (LEDCs). This book showcases work by established and emerging researchers that provides new thinking and tests previously made assumptions, providing an essential guide for students, practitioners and academics. This book advances our understanding of the changes and ways forward in the field of sustainable tourism development. Five main themes are illustrated throughout the

book: (1) measuring impacts of tourism on poverty; (2) the need to evaluate whether interventions that aim to reduce poverty are effective; (3) how unbalanced power relations and weak governance can undermine efforts; (4) the importance of the private sector's use of pro-poor business practices; and (5) the value of using multidisciplinary and multi-method research approaches. Furthermore, the book shows that academic research findings can be used practically in destinations, and how practitioners can benefit from sharing their experiences with academic scholars. This book was based on a special issue and various articles from the Journal of Sustainable Tourism.

Pro-poor Tourism - Colin Michael Hall 2007

Pro-poor tourism is currently receiving enormous attention from the World Tourism Organization, government, industry, and NGOs. Through a series of cases and reviews this book provides one of the first assessments of the

effectiveness of pro-poor tourism as a development strategy and tackles the issue of who benefits from tourism's potential role in poverty reduction.

Tourism in Africa - Iain Christie 2014-06-19

This book presents how tourism initiates economic

development and how constraints to the growth of tourism in Sub-Saharan Africa can be addressed. With 24 case studies that illustrate tourism development, it reveals that despite destination challenges, the basic elements needed to initialize or intensify success are applicable across the region.
