## **Patched** - Jarrod Gilbert 2013-11-01

For more than five decades, gangs have played a pivotal role in New Zealand crime life, beginning with the bodgies and widgies of the 1950s. Based on 10 years of gang research, this book chronicles the rise of the Hell's Angels and other bike gangs in the 1960s, the growth of the Mongrel Mob and Black Power in the 1970s, and organized crime during the last decade. With descriptions of such events as the Devil's Henchmen throwing Molotov cocktails at the Epitaph Riders in Christchurch's first gang war and Black Power members surrounding Prime Minister Rob Muldoon at Wellington's Royal Tiger Tavern, it also discusses the significance of colors and class. With accounts from gang members, police, and politicians, this violent and sometimes horrifying book transports its readers to a tough yet revealing part of New Zealand life.

## **Lone-Actor Terrorists** - Paul Gill 2015-02-11

This book provides the first empirical analysis of lone-actor terrorist behaviour. Based upon a unique dataset of 111 lone actors that catalogues the life span of the individual's development, the book contains important insights into what an analysis of their behaviours might imply for practical interventions aimed at disrupting or even preventing attacks. It adopts insights and methodologies from criminology and forensic psychology to provide a holistic analysis of the

behavioural underpinnings of lone-actor terrorism. By focusing upon the behavioural aspects of each offender and by analysing a variety of case studies, including Anders Breivik, Ted Kaczynski, Timothy McVeigh and David Copeland, this work marks a pointed departure from previous research in the field. It seeks to answer the following key questions: Is there a lone-actor terrorist profile and how do they differ? What behaviours did the lone-actor terrorist engage in prior to his/her attack and is there a common behavioural trajectory into lone-actor terrorism? How 'lone' do lone-actor terrorists tend to be? What role, if any, does the internet play? What role, if any, does mental illness play? This book will be of much interest to students of terrorism/counter-terrorism studies, political violence, criminology, forensic psychology and security studies in general.

## **Millions Saved** - Amanda Glassman 2016-05-24

Over the past fifteen years, people in low- and middle-income countries have experienced a health revolution—one that has created new opportunities and brought new challenges. It is a revolution that keeps mothers and babies alive, helps children grow, and enables adults to thrive. *Millions Saved: New Cases of Proven Success in Global Health* chronicles the global health revolution from the ground up, showcasing

twenty-two local, national, and regional health programs that have been part of this global change. The book profiles eighteen remarkable cases in which large-scale efforts to improve health in low- and middle-income countries succeeded, and four examples of promising interventions that fell short of their health targets when scaled-up in real world conditions. Each case demonstrates how much effort—and sometimes luck—is required to fight illness and sustain good health. The cases are grouped into four main categories, reflecting the diversity of strategies to improve population health in low-and middle-income countries: rolling out medicines and technologies; expanding access to health services; targeting cash transfers to improve health; and promoting population-wide behavior change to decrease risk. The programs covered also come from various regions around the world: seven from sub-Saharan Africa, six from Latin America and the Caribbean, five from East and Southeast Asia, and four from South Asia.

*Auto Repair For Dummies* - Deanna Sclar 2019-01-07

While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to

call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

### **Standard and Non-standard African Language Varieties in the Urban Areas of South Africa** - Karen Calteaux 1996

This report provides data on standard and non-standard African language varieties occurring in urban areas of South Africa, drawn from nine smaller reports. It illustrates the language use patterns in black urban communities and describes the language varieties spoken in them. It was found that the impact of non-standard varieties on the use of standard African languages is reflected clearly in their grammatical systems. Main sources of influence are the European languages of daily contact.

Grammatical adaptation of the standard African languages, in the form of lexical adoption from foreign languages, is a major focus of the report. Implications of the study's results for African language planning and for education are discussed. Chapters address these topics: research origins, background, and methodology; theoretical bases in research on sociolinguistics, multilingualism, language change, linguistic borrowing, language variation, and language use within a speech community; language use patterns in black urban communities, both general and

specific; the nature of phonological change; the nature of morphological change; syntactic change; semantic shift; language interference in the schools; language planning in this context; and implications for South African education policy and practice. Contains 124 references. (MSE)

[Soft Soil Engineering](#) - Dave H. Chan 2006-09-28

Soft soils present particular challenges to engineers and an understanding of the specific characteristics of these soils is indispensable. Laboratory techniques such as numerical modelling, theoretical analysis and constitutive modelling give new insights into soft

soil material behaviour, while large-scale testing in the field provides important information in areas such as slope stability and soft soil improvements. This collection of papers from the Fourth International Conference on Soft Soil Engineering, Vancouver, 2006, presents an international appraisal of current research and new advances in engineering practices, illustrating the theory with relevant case studies. Geotechnical professionals, engineers, academics and researchers working in the areas of soft ground engineering and soft soil engineering will find this a valuable book.
