Da Nang Postscripts - B. F. Gaulman 2013-05-10

Dave Simms is a young black marine stationed at the Da Nang Air Base during the Vietnam War. Working as a supply clerk, he fights not only the Viet Cong but also everyday boredom and the absurdity of military life. In the face of those challenges, his search for personal identity leads him through a drunken and reefer-smoking year of ludicrous encounters. Simms finds himself in perilous surroundings and yet is protected from the worst of events in many ways but not always. The horrors of war reach even him, leaving a mark that not even alcohol fueled nights can erase. Simms rarely meets the enemy, but his worst fears arise more from what the marines might do to him. The preposterous, bloodthirsty mind-set of the Marine Corps feeds his hatred for them and his determination to leave Vietnam not only alive and in one piece but also in his right mind a goal that might prove impossible to achieve. In this military novel, a young marine serving in Vietnam struggles to stay alive and keep his sanity in the face of the brutality of war.

PET and PET/CT Study Guide - Andrzej Moniuszko 2012-10-06

The PET and PET/CT Study Guide presents a comprehensive review of nuclear medicine principles and concepts necessary for passing PET specialty board examinations. The practice questions and content are similar to those found on the Nuclear Medicine Technology Certification

Board (NMTCB) exam, allowing test takers to maximize their chances of success. The book is organized by test sections of increasing difficulty, with over 650 multiple-choice questions covering all areas of positron emission tomography, including radiation safety; radionuclides; instrumentation and quality control; patient care; and diagnostic and therapeutic procedures. Detailed answers and explanations to the practice questions follow. Supplementary appendices include common formulas, numbers, and abbreviations, along with a glossary of terms for easy access by readers. The PET and PET/CT Study Guide is a valuable reference for nuclear medicine technologists, nuclear medicine physicians, and all other imaging professionals in need of a concise review of the basics of PET and PET/CT imaging.

Healthcare Analytics - Hui Yang 2016-10-10

Features of statistical and operational research methods and tools being used to improve the healthcare industry
With a focus on cutting-edge approaches to the quickly growing field of healthcare, *Healthcare Analytics: From Data to Knowledge to Healthcare Improvement* provides an integrated and comprehensive treatment on recent research advancements in data-driven healthcare analytics in an effort to provide more personalized and smarter healthcare services. Emphasizing data and healthcare analytics from an operational management and statistical perspective, the book details how analytical methods and tools can be utilized to enhance healthcare quality and operational efficiency. Organized into two main sections, Part I features biomedical and health informatics and specifically addresses the analytics of genomic and proteomic data; physiological signals from patient-monitoring systems; data uncertainty in clinical laboratory tests; predictive modeling; disease modeling for sepsis; and the design of cyber infrastructures for early prediction of epidemic events. Part II focuses on healthcare delivery systems, including system advances for transforming clinic workflow and patient care; macro analysis of patient flow distribution; intensive care units; primary care; demand and resource allocation; mathematical models for predicting patient readmission and postoperative outcome; physician-patient interactions; insurance claims; and the role of social media in healthcare. *Healthcare Analytics: From Data to Knowledge to Healthcare Improvement* also features:

- Contributions from well-known international experts who shed light on new approaches in this growing area
- Discussions on contemporary methods and techniques to address the handling of rich and large-scale healthcare data as well as the overall optimization of healthcare system operations
- Numerous real-world

examples and case studies that emphasize the vast potential of statistical and operational research tools and techniques to address the big data environment within the healthcare industry • Plentiful applications that showcase analytical methods and tools tailored for successful healthcare systems modeling and improvement The book is an ideal reference for academics and practitioners in operations research, management science, applied mathematics, statistics, business, industrial and systems engineering, healthcare systems, and economics. Healthcare Analytics: From Data to Knowledge to Healthcare Improvement is also appropriate for graduate-level courses typically offered within operations research, industrial engineering, business, and public health departments.

HCI and Usability for e-Inclusion - Andreas Holzinger 2009-10-26

The Workgroup Human-Computer Interaction & Usability Engineering (Arbeitskreis HCI&UE) of the Austrian Computer Society (Österreichische Computer Gesellschaft, OCG) has been serving as a platform for interdisciplinary exchange, research and development since February 2005. While human-computer interaction (HCI) traditionally brings psychologists and computer scientists together, the inclusion of usability engineering (UE), which is a software engineering discipline and ensures the appropriate implementation of applications, has become indispensable. Our 2009 topic was therefore Human-Computer Interaction & Usability for e-Inclusion (HCI4e-I), culminating in the 5th annual Usability Symposium USAB 2009 held during November 9-10, 2009 in Linz, Austria (<http://usab.icchp.org>), organized together with the Workgroup Information Technology for People with Special Needs (OCG Arbeitskreis IT für Menschen mit besonderen Bedürfnissen). The term e-inclusion, also known as digital inclusion, is used within the European Union to encompass all activities related to the achievement of an inclusive information society. New information technologies always bring the risk of a digital divide, and consequently e-Inclusion wants to put emphasis on a digital cohesion and on enhancing opportunities with IT into all segments of the European population, including disadvantaged people, e.g., due to lack of education (e-Competences, e-Learning), age (e-Ageing), gender apartheid (equality=e-Quality), disabilities (e-Accessibility), ill health (e-Health) etc. At the European level, e-Inclusion is part of the third pillar of the 2010 policy initiative, managed by the Directorate General for Information Society and Media of the European Commission.

Harnessing the Power of Technology to Improve Lives - P. Cudd
2017-09-05

The lives of people with disabilities are complex and various, and there are many situations where technology - particularly assistive technology - already makes a real difference. It is clear that smart phone and tablet computer based solutions continue to enhance the independence of many users, but it is also important that more traditional assistive technologies and services are not forgotten or neglected. This book presents the proceedings of the 14th conference of the Association for the Advancement of Assistive Technology in Europe (AAATE 2017) entitled: 'Harnessing the power of technology to improve lives', held in Sheffield, UK, in September 2017. This 4-day event about assistive technologies (AT) highlights the association's interest in innovating not only technology, but also services, and addresses the global challenge of meeting the needs of the increasing number of people who could benefit from assistive technology. The 200+ papers in the book are grouped under 30 subject headings, and include contributions on a wide range of topical subjects, including aging well and dementia; care robotics; eHealth and apps; innovations; universal design; sport; and disordered speech. The breadth of the AAATE conference reflects people's life needs and so the book is sure to contain something of interest to all those whose work involves the design, development and use of assistive technology, whatever the situation. The photo on the front cover illustrates the breadth of assistive technologies that can improve lives. Photographer: Simon Butler.
